SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Minnetonka, Minnesota. It has been determined by the Associate Director, State and Local Programs and Support after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Minnetonka, Minnesota, that certain property is within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is within the Special Flood Hazard Area, adds the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that

no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone Toll Free (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map number 270173, Panel 0004B, published on December 22, 1980, in 45 FR 84066, indicates that Lots 3 through 6 in Block 1 of the property known as Minnetonka Woods Townhomes, located in Section 29, Township 117, Range 22, Minnetonka, Hennepin County, Minnesota, recorded as 381, Document Number 1483467, Page 621089, in the Office of Registrar of Titles, Hennepin County, Minnesota is not located within the Special Flood Hazard Area.

Map Number 270173, Panel 0004B, is hereby corrected to reflect that the above-mentioned property is located within the Special Flood Hazard Area identified on May 19, 1981.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated, will not have a significant economic impact on a subtantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

Letter of Map Amendment for City of Sikeston, Missouri, Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final Rule; Map Correction

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Sikeston, Missouri. It has been determined by the Associate Director, State and Local Programs and Support after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Sikeston, Missouri, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472; (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition Federal of Federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone Toll Free (800) 638–6620

The map amendments listed below are in accordance with § 70.7(a):

Map Number 295270B, Panel H&I—04, published on October 6, 1980 in 45 FR 66016, indicates that Block 1, consisting of Lots 1 through 10; Block 2, consisting of Lots 1 through 6; Block 3, consisting of Lots 1 through 20; Block 4, consisting of Lots 1 through 10; Block 5, consisting of Lots 1 through 18; and Block 6, consisting of Lots 1 through 4, of a 21.22 acre tract known as Cole's Subdivision to the City of Sikeston, Missouri, as recorded in Plat Book 14, Page 1, in the Office of Recorder, Scott County, Missouri, are located within the Special Flood Hazard Area.

Map Number 295270B, Panel H&I–04 is hereby corrected to reflect that the above-mentioned lots are not within the Special Flood Hazard Area identified on April 29, 1977. These lots, and the existing structures located on them, are in Zone C.

Pursuant to the provisions of 5 U.S.C. 605 (b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

Letter of Map Amendment for Town of Henrietta, New York, Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final Rule; Map correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included

the Town of Henrietta, New York. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the Town of Henrietta, New York, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for the property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: December 15, 1980.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20272, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number FIRM 360419, Panel Number 0005C, published on December 15, 1980, in FR Volume 45 No. 242, page 82260, indicates that Lot 4, Township 12, Range 7, as described in Deed Book Libers 4666 and 4359, pages 220 and 281, of the Monroe County Clerk's office, is located within the Special Flood Hazard Area.

Map Number FIRM 360419, Panel Number 0005C, is hereby corrected to reflect that existing structure located at 1387 Brighton-Henrietta Town Line Road of the above-mentioned property is not within the Special Flood Hazard Area identified on November 5, 1980. This structure is in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

Letter of Map Amendment for City of Las Vegas, Nevada, Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule; map correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying special Flood Hazard Areas have been published. This list included the City of Las Vegas, Nevada. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Las Vegas, Nevada, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20817, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with 70.7(a):

Map No. 325276, Panel 0025B, published on October 21, 1980, in 45 FR 69451, indicates that the existing structures located on Lots 21 through 28, Block 1, and Lots 13 through 18, Block 2, of The Village at Washington, Las Vegas, Nevada, recorded as Document No. 1530678 in Book 28, page 9 of Plats, Book No. 1571 of Official Records, in the Office of the Recorder, Clark County, Nevada, are located within the Special Flood Hazard Area.

Map No. 325276, Panel 0025B is hereby corrected to reflect that the existing structures located on the above-mentioned lots are not within the Special Flood Hazard Area identified on October 21, 1980. These structures are in Zone B.

Pursuant to the provisions of 5 U.S.C 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. [Docket No. FEMA-5909]

Letter of Map Amendment for Borough of Briar Creek, Pennsylvania, Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final Rule, Map Correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the Borough of Briar Creek, Pennsylvania. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the Borough of Briar Creek, Pennsylvania, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: October 6, 1980.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Md. 20034, Telephone: (800) 638-8620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number FIRM 420340, Panel Number 0005B, published on October 6, 1980, in FR Volume 45 No. 195, page 66040, indicates that the property described in Deed Book Volume 164, page 86, Deed Book Volume 167, page 354, and Deed Book Volume 287, page 13, is located within the Special Flood Hazard Area.

Map Number FIRM 420340, Panel Number 0005B, is hereby corrected to reflect that the following structures of the above-mentioned property are not

within the Special Flood Hazard Area identified on August 15, 1979.

1. The brick residence located on the property described in Deed Book Volume 287, page 13.

2. The two and one-half story frame dwelling, the frame storage building and greenhouses 1, 2, 3, 6–13. All of the above structures are located on the property described in Deed Book Volume 164, page 86, and Deed Book Volume 167, page 354.

These structures are in Zone B and are illustrated on the drawing entitled "Plan Showing Area to be Removed from Floodway Fringe," as prepared by Charles B. Webb, P.E.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

[Docket No. FEMA-5909]

Letter of Map Amendment for City of Tulsa, Tulsa, Osage, and Rogers Counties, Oklahoma; Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Tulsa, Tulsa, Osage, and Rogers Counties, Oklahoma. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Tulsa, Tulsa, Osage, and Rogers Counties, Oklahoma, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: October 6, 1982.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number FIRM 405381, Panel Numbers 0090E and 0095E, published on October 6, 1982, in FR Volume 45, No. 195, page 66095, indicates that the subdivision of Woodland Glen Fourth, as recorded in Plat Number 4221 of the City of Tulsa, Tulsa, Osage, and Rogers Counties, Oklahoma, is located within the Special Flood Hazard Area.

Map Number FIRM 405381, Panel Numbers 0090E and 0095E, are hereby corrected to reflect that existing structures located on Lot 1, Block 1; and Lot 2, Lots 9 through 14, Lots 18 through 20, Lot 22, Lot 23, Block 12 of the above-mentioned property are not within the Special Flood Hazard Area identified on October 15, 1982. These structures are in Zone B.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, is promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

44 CFR Part 70

[Docket No. FEMA-6480]

Letter of Map Amendment for City of Memphis, Tennessee, Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Memphis, Tennessee. It has been determined by the Associate Director, State and Local Programs and Support after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Memphis, Tennessee, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone Toll Free (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number 470177, Panel 0060B, published on January 7, 1983, in 48 FR 795, indicates that Lots 53 and 54, and Lots 77 through 114 of the property known as Phase II, Greenlodge Townhomes, City of Memphis, Shelby County, Tennessee, as recorded in Plat Book 83, Page 14, in the Office of the Register of Deeds of Shelby County, Tennessee, are located within the Special Flood Hazard Area.

Map Number 470177, Panel 0060B is hereby corrected to reflect that Lots 53 and 54, Lots 77 through 99, and Lots 110 through 114 of the above-mentioned property are not within the Special Flood Hazard Area indentified on December 1, 1982. Lots 53 and 54, Lots 77 through 96, and Lots 110 through 114 are located in Zone C. Lots 97, 98 and 99 are located partially in Zone B and in Zone C.

Map Number 407177, Panel 0060B is also corrected to reflect that the existing structures located on Lots 100 through 109 of the above-mentioned property are not within the Special Flood Hazard Area identified on December 1, 1982. These structures are in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

[Docket No. FEMA-6173]

Letter of Map Amendment for City of Austin, Texas, Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Austin, Texas. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Austin, Texas, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: October 26, 1981.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premiun paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number FIRM 480624, Panel Number 0065B, published on October 26, 1981, in FR Volume 46 No. 206, page 52113, indicates that Lot 6, Block A and Lots 27–30, Block B, Lakewood Subdivision, City of Austin, Texas, as described in Deed Book Volume 4373, page 384, of the Land Records for the City of Austin, Texas, are located within the Special Flood Hazard Area.

Map Number FIRM 480624, Panel Number 0065B, is hereby corrected to reflect that existing structures located at the above-mentioned properties are not within the Special Flood Hazard Area identified on September 2, 1981. These structures are in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

Letter of Map Amendment for City of Bedford, Texas, Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Bedford, Texas. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Bedford, Texas, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: July 18, 1977.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638-6620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number FIRM H&I 480585, Panel Number 0001A, published on October 6, 1980, in FR Volume 45 No. 195, page 66097, indicates that Lots 1-4, Block G, Woodfield Addition, as described in Deed Book Volume 388, page 50, of the Land Records for Tarrant County, Texas, are located within the Special Flood Hazard Area.

Map Number FIRM H&I 480585, Panel Number 0001A, is hereby corrected to reflect that existing structures located at Lots 1-4, Block G, Woodfield Addition, of the above-mentioned properties are not within the Special Flood Hazard Area identified on July 18, 1977. These structures are in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. Proposed Rules

Federal Register
Vol. 48, No. 72
Wednesday, April 13, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 29

U.S. Types 11–14, Flue-Cured Tobacco Official Standard Grades

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: It is proposed that the Official Standard Grades for Flue-Cured Tobacco, U.S. Types 11–14, grown in the States of Virginia, North Carolina, South Carolina, Georgia, and Florida, be amended to: (1) Delete certain grades determined to be no longer necessary; (2) add certain grades which will more accurately describe tobacco as it is presently prepared for market; and (3) combine certain color factors to reflect noticeable deviations from colors contained in the current official standards. These revisions, based on recommendations from various segments of the flue-cured industry and the Department's continuous review and evaluation of the current grade standards, are proposed to more accurately describe tobacco as it is presently prepared for market.

DATE: Written comments must be received by May 16, 1983.

ADDRESSES: Send written comments to Lioniel S. Edwards, Director, Tobacco Division, Agricultural Marketing Service, United States Department of Agriculture, Room 502 Annex Building, Washington, D.C. 20250. Comments will be available for public inspection at this location during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lioniel S. Edwards, Director, Tobacco Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–2567.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Department is considering a modification of the Official Standard Grades for Flue-Cured Tobacco, U.S. Types 11–14, pursuant to authority contained in the Tobacco Inspection Act of 1935, as amended (49 Stat. 731; 7 U.S.C. 511 *et seq.*). Previous revisions or modifications to the standard grades for flue-cured tobacco were made in 1956, 1958, 1959, 1963, 1968, 1976, 1977, and 1982.

Representatives of all segments of the tobacco industry recommended to the Department modifications of current flue-cured standards to incorporate descriptive factors to accommodate the grading of qualities of tobacco which have surfaced on the auction market in the last few seasons.

In 1978, the Department amended the tobacco price support regulations by changing the planted acreage limitation prescribed as a condition of price support eligibility for flue-cured tobacco producers. This amendment, popularly referred to as the Four Leaf Program, increased the acreage limitation by 10 percent for producers who agree not to harvest the 4 lower-stalk leaves. This program has enabled producers to increase their production of upper stalk tobacco by discarding the lower-stalk tobacco which consists of primings and lugs. However, by removing the 4 lower-stalk leaves, the remaining lower leaves (cutters) bend downward and come in contact with the soil. These leaves usually ripen prematurely, are flimsy and have a pale color intensity, thereby, taking on characteristics of the primings group. Producers participating in the Four Leaf Program have voiced dissatisfaction at receiving on their first marketing a primings grade on the cutters. Producers have emphasized that the primary reason for removing the 4 bottom leaves is to rid the plant of the primings. The current standards prevent lower-stalk cutter marketings from being graded in any group other than primings.

Therefore, the Department proposes to establish grades C5LP and C5FP in an effort to provide factors to describe the prematurely ripe and pale-colored tobacco from the cutters group which have taken on the characteristics of the primings group.

Extremely wet weather conditions persisted during the 1982 marketing season. When heavy rains occur during early growth, the root system of the tobacco plant does not attain deep soil penetration necessary for plant development. Sufficient water at ground level results in the root system remaining relatively close to the top of the ground. This lack of proper root development causes the leaf to be thin. Excessive rainfall then leaches the oil out of the leaf, and a whitish-lemon color is produced in the lugs and cutters groups. When this situation exists, the Department is faced with the problem of describing an underdeveloped, colorless leaf for which no specific grade standard applies under the present standards.

The Department proposes to establish grades X4LL for the lugs, and C4LL for the cutters to more accurately describe the whitish-lemon color produced during wet growing seasons. The color-combination of "whitish-lemon (LL)" is proposed as a new definition in the regulations.

Numerous problems are encountered by federal inspectors in describing old crop tobacco which has been stored on the farm and is carried over for sale from previous crop years. While the tobacco is in storage, its moisture content fluctuates with changes in the percentage of relative humidity. During this process of absorbing and dissipating moisture, the color becomes darker than the normal colors defined in the current standards.

The Department proposes to establish grades B4DK, B5DK, and B6DK to more accurately describe the darker colors of tobacco both from previous crop years and that tobacco which has been marketed over the past few years. The color "dark red variegated (DK)" is proposed as a new definition to the regulations.

Currently, X3S is the only standard grade describing slick tobacco in the lugs group. Studies and observations at various market sites have shown that the composition of marketings contains a considerable amount of tobacco that is of lower quality than the X3S and could be described more accurately as 4th quality slick lugs. Therefore, a new grade X4S is proposed to be established to describe 4th quality slick lugs.

Current standards describe variegated lemon tobacco but provide no grade to describe the variegated orange side in the cutters group. This color has become more distinct in recent years and the Department proposes to establish the grade C4KF to more accurately describe this variegated orange color found primarily in the cutters group.

The Department further proposes that grades B4R, H1F, H2F, M4F, M5F, M4KR, M4KM, M5KM, M4GK, and M5GK, be deleted. The grades, H1F, M4F, M4KR, and M5GK, were not marketed at all in 1982. In those remaining grades proposed for deletion—B4R, H2F, M5F, M4KM, M5KM, and M4GK—an average of less than one-hundredths of one percent was marketed in 1982. Therefore, the proposal to delete said grades is based on the fact that the volume of tobacco classified in these grades has diminished to the extent that retention of these grades is clearly unwarranted.

This proposed rule has been reviewed under USDA procedures established to implement Executive Order 12291 and the Secretary's Memorandum 1512-1 and has been determined to be a "nonmajor" rule because it does not meet any of the criteria established for major rules under the executive order. Initial reviews of the regulations contained in 7 CFR Part 29, for need, currency, clarity, and effectiveness has been completed.

Additionally, in conformance with the provisions of Pub. L. 96-354, Regulatory Flexibility Act, full consideration has been given to the potential economic impact upon small business. Tobacco warehousemen and producers fall within the confines of "small business" as defined in the Regulatory Flexibility Act. A number of firms which are affected by these adopted regulations do not meet the definition of small business either because of their individual size or because of their dominant position in one or more marketing areas. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will have no adverse economic impact upon all entities, small or large, and will in no way affect the normal competition in the market place.

William T. Manley, Acting Director, Tobacco Division, Agricultural Marketing Service, has determined that an emergency situation exists which warrants less than a 60-day comment period on this proposal because all segments of the industry must be informed of any changes affecting the marketing process prior to the opening of the marketing season. Therefore, a 30-day comment period will be provided on this proposal.

List of Subjects in 7 CFR Part 29

Administrative practices and procedure, Tobacco.

PART 29—TOBACCO INSPECTION

Accordingly, the Department hereby proposes to amend the regulations under the Tobacco Inspection Act contained in 7 CFR Part 29, Subpart C, as follows:

1. Section 29.1007 is revised to read as follows:

§ 29.1007 Color symbols.

As applied to flue-cured tobacco, color symbols are L—lemon, F—orange, FR—orange red, R—red, V—greenish, K—variegated, KR—variegated red or scorched, G—green, GR—green red, GK—green variegated (may be scorched), GG—gray green, KL—variegated lemon, KF—variegated orange, KV—variegated greenish, KM—variegated (scorched) mixed, DK—dark red variegated, and LL—whitish-lemon.

2. Section 29.1008 is revised to read as follows:

§ 29.1008 Combination symbols.

A color or group symbol used with another symbol to form the third factor of a grademark to denote a particular side or characteristic of the tobacco. As applied to flue-cured tobacco, the combination symbols are XL—lug side, PO—oxidized primings, XO—oxidized lugs or cutters, BO—oxidized leaf or smoking leaf, GL—thin-bodied nondescript, GF—medium-bodied nondescript, LP—lemon (primings side), and FP—orange (primings side).

§ 29.1025 [Amended]

3. Section 29.1025 is amended to remove from therein the words, "Mixed (M)."

§ 29.1034 [Removed]

4. Section 29.1034, Mixed group (M), is removed in its entirety.

§§ 29.1013 through 29.1033 [Redesignated as §§ 29.1014 through 29.1034]

5. Current §§ 29.1013 through 29.1033 are redesignated as §§ 29.1014 through 29.1034, respectively, to maintain alphabetical sequence.

6. Section 29.1013 is added to read as follows:

§ 29.1013 Dark red variegated (DK).

A dark brownish-red discoloration which usually results from excessive sunbaking during the growing process or from storing cured tobacco over extended periods of time. Any leaf of which 20 percent or more of its surface is dark brownish-red may be described as dark red variegated.

§ 29.1079 [Redesignated as § 29.1080]

7. Current § 29.1079 is redesignated as § 29.1080 to maintain alphabetical sequence of the definitions contained in 7 CFR Part 29.

8. A new § 29.1079 is added to read as follows:

§ 29.1079 Whitish-lemon (LL).

A whitish-yellow color which usually results during wet growing seasons when rain leaches or washes out the yellow color from the leaf. Any leaf of which 20 percent or more of its leaf surface has whitish-yellow color may be described as whitish-lemon.

§ 29.1121

[Amended]

9. Amend § 29.1121 by including the word ' "DK," ' after ' "KF," ' Amended § 29.1121 should read " . . . the color symbol "K," "KL," "KF," "DK," or "KV."

§ 29.1162 [Amended]

10. Section 29.1162 Leaf (B Group) is amended by removing the part entitled "B4R—Fair Quality Red Leaf" and the paragraph directly thereunder.

§ 29.1162 is further amended to add three new grades following the paragraph under the heading "B6KF—Poor Quality Variegated Orange Leaf" to read as follows:

B4DK—Fair Quality Dark Red Variegated Leaf

Unripe, close leaf structure, heavy, normal width. Uniformity, 70 percent; injury tolerance 20 percent, of which not over 5 percent may be waste.

B5DK—Low Quality Dark Red Variegated Leaf

Unripe, tight leaf structure, heavy, narrow. Uniformity, 70 percent; injury tolerance 30 percent, of which not over 10 percent may be waste.

B6DK—Poor Quality Dark Red Variegated Leaf

Unripe, tight leaf structure, heavy, stringy. Uniformity, 70 percent; injury tolerance 40 percent, of which not over 20 percent may be waste

§ 29.1163 [Amended]

11. § 29.1163 is amended by removing the heading "H1F—Choice Quality Orange Smoking Leaf," and the heading "H2F—Fine Quality Orange Smoking Leaf," and the paragraphs immediately thereunder.

12.a. Section 29.1164 is amended to add a new grade following the paragraph under the heading "C5F—Low Quality Orange Cutters," to read as follows:

C4LL—Fair Quality Whitish-Lemon Cutters

Ripe, open leaf structure, thin, lean in oil, normal width, 16 inches or over in length. Uniformity, 70 percent; injury tolerance, 20 percent, of which not over 5 percent may be waste.

b. Section 29.1164 is further amended to add a new grade following the paragraph under the heading "C4KL—Fair Quality Variegated Lemon Cutters" to read as follows:

C4KF—Fair Quality Variegated Orange Cutters

Unripe, close leaf structure, medium body, normal width, 16 inches or over in length. Uniformity, 70 percent; injury tolerance 20 percent, of which not over 5 percent may be waste.

c. Section 29.1164 is further amended to add two new grades following the paragraph under the heading "C4GK—Fair Quality Green Variegated Cutters" to read as follows:

C5LP—Low Quality Lemon Cutters (Primings Side)

Prematurely ripe, open leaf structure, thin, lean in oil, pale color intensity, normal width, 16 inches or over in length. Uniformity, 70 percent; injury tolerance 30 percent, of which not over 10 percent may be waste.

C5FP—Low Quality Orange Cutters (Primings Side)

Prematurely ripe, open leaf structue, medium body, lean in oil, pale color intensity, normal width, 16 inches or over in length. Uniformity, 70 percent; injury tolerance 30 percent, of which not over 10 percent may be waste.

13.a. Section 29.1165 Lugs (X Group) is amended to add a new grade following the paragraph under the heading "X5F—Low Quality Orange Lugs," to read as follows:

X4LL—Fair Quality Whitish-Lemon Lugs

Ripe, open leaf structure, thin, lean in oil. Uniformity, 70 percent; tolerance, 30 percent waste.

b. Section 29.1165 is further amended to add a new grade following the paragraph under the heading "X3S—Good Quality Slick Lugs," to read as follows:

X4S—Fair Quality Slick Lugs

Unripe, close leaf structure, medium body. Uniformity, 70 percent; tolerance, 30 percent waste.

§ 29.1167 [Removed and reserved]

14. Section 29.1167 is removed in its entirety and noted as "[Reserved]."

15. Section 29.1181 is amended to reflect the above-proposed additions and removals. For purposes of clarity, the entire section has been reprinted and is to be considered revised, as follows:

§ 29.1181 Summary of standard grades.

2 Grades of Wrappers

A1L	A1F

23 Grades of Leaf

B1L	B1F	B1FR		
B2L	B2F	B2FR		
B3L	B3F	B3FR		B3K
B4L	B4F	B4FR		B4K
B5L	B5F	B5FR	B5R	B5K
B6L	B6F	B6FR		B6K

14 Grades of Smoking Leaf

H3L	H3F		
H4L	H4F	H4FR	H4K
H5L	H5F	H5FR	H5K
H6L	H6F	H6FR	H6K

10 Grades of Cutters

C1L	C1F
C2L	C2F
C3L	C3F
C4L	C4F
C5L	C5F

10 Grades of Lugs

X1L	X1F
X2L	X2F
X3L	X3F
X4L	X4F
X5L	X5F

8 Grades of Primings

P2L	P2F
P3L	P3F
P4L	P4F
P5L	P5F

6 Grades of Greenish

B3V		X3V
B4V	C4V	X4V
B5V		

19 Grades of Variegated

B3KL	B3KF							
B4KL	B4KF	B4DK	B4KV	C4KL	C4KF	X4KL	X4KF	X4KV
B5KL	B5KF	B5DK	B5KV

B4KM	C4KM	X4KM
B5KM		
B6KM		

6 Grades of Variegated Red or Scorched

B3KR		X3KR
B4KR	C4KR	X4KR
B5KR		

6 Grades of Slick

B3S		X3S
B4S	C4S	X4S
B6S		

2 Grades of Whitish-Lemon

X4LL	C4LL

2 Grades of Cutters (Primings Side)

C5LP	C5FP

13 Grades of Nondescript

N1L	N1KV	N1GG
N1XL	N1GL	N1PO
N1K	N1GF	N1XO
N1R	N1GR	N1BO
		N2

1 Grade of Scrap

S

Special factors "U" (unsound) and "W" (doubtful-keeping order) may be applied to all grades. The special factors "dirt" or "sand" may be applied to any grade in the Primings group, including first qualtiy Nondescript from the Primings group. Tobacco not covered by the standard grades is designated "No-G," "No-G-F," or "No-G-Nested."

§ 29.1125 [Amended]

16. Section 29.1225 is amended as follows:

1. Paragraph under the heading "Groups": Remove the words "M–Mixed Group."

a. Paragraph under the heading "Color Symbols": Add at the end thereof the words "DK—Dark red variegated, LL—Whitish-lemon."

c. Paragraph under the heading "Combination Symbols": Add at the end thereof the words "LP—Lemon (primings side). FP—Orange (primings side)."

Dated: April 8, 1983.

C. W. McMillan,

Assistant Secretary Marketing and Inspection Services.

Federal Crop Insurance Corporation

7 CFR Part 440

Texas Citrus Tree Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Crop Insurance Corporation herewith issues a new Part 400 in Title 7 of the Code of Federal Regulations to be known as the Texas

Citrus Tree Insurance Regulations (7 CFR Part 440). The intended effect of this rule is to issue regulations for the purpose of prescribing procedures for insuring citrus trees in certain counties in Texas, effective with the 1984 crop year.

DATE: Written comments, data, and opinions on this proposed rule must be submitted not later than May 13, 1983, to be sure of consideration.

ADDRESS: Written comments on this proposed rule should be sent to the Office of the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 447–3325.

The Impact Statement describing the options considered in developing this proposed rule and the impact of implementing each option is available upon request from Peter F. Cole.

SUPPLEMENTARY INFORMATION: Information collection requirements contained in these regulations (7 CFR Part 440) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Nos. 0563–0003 and 0563–0007.

This action also constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under the provisions of Secretary's Memorandum No. 1512–1. The sunset review date established for these regulations is January 1, 1988.

This action has been reviewed under USDA procedures established in Secretary's Memorandum No. 1512–1 (June 11, 1981).

Merritt W. Sprague, Manager, FCIC, has determined that (1) this action is not a major rule as defined in Executive Order No. 12291 (February 17, 1981), (2) this action does not increase the Federal paperwork burden for individuals, small businesses, and other persons, and (3) this action conforms to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and other applicable law.

The title and number of the Federal Assistance Program to which these regulations apply are: Title—Crop Insurance; Number 10.450.

This action will not have a significant impact specifically upon areas and community development; therefore, review as established in Executive Order No. 12372 (July 14, 1982) was not used to assure that units of local government are informed of this action.

It has also been determined that this action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Impact Statement was prepared.

Background

Under the authority of Section 508 of the Federal Crop Insurance Act, as amended (7 U.S.C. 1508), the Federal Crop Insurance Corporation proposes to offer citrus tree insurance in selected counties in South Texas on an experimental basis in response to growers requests for such insurance. The causes of loss insured against are: freeze, excess moisture, hail, fire, hurricane or tornado which damage or destroy citrus trees. The insurance will be applicable on insurable citrus trees of the following types: Type I, Early and Midseason Oranges; Type II, Late Oranges, including Temples; Type III, Grapefruit Trees, except Star Ruby Trees; and, Type IV, Star Ruby Grapefruit Trees.

Merritt W. Sprague, Manager, FCIC, has determined that good cause exists for publication of these regulations as a notice of proposed rulemaking with less than the normal 60-day period comment because these regulations are new for crop year 1984 and there are no present insureds to be affected by these regulations. According to the provisions of Section 16 of the Texas Citrus Tree insurance policy contained herein, these regulations, or any amendments thereto, shall be placed on file in the service office by May 1. Public comment on these proposed regulations are solicited for 30 days after the date of publication in the **Federal Register**. Any written comments on this proposed rule should be sent to the Office of the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250. All written comments made pursuant to this proposed rule will be available for public inspection in the Office of the Manager during regular business hours, Monday through Friday.

List of Subjects in 7 CFR Part 440

Crop insurance, Texas citrus trees.

Proposed Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation proposes to issue a new Part 440 in Chapter IV of Title 7 of the Code of Federal Regulations effective for the 1984 and succeeding crop years, to be known as 7 CFR Part 440—Texas Citrus Tree Insurance, to read as follows:

PART 440—TEXAS CITRUS TREE INSURANCE REGULATIONS

Subpart: Regulations for the 1984 and Succeeding Crop Years

Sec.

440.1 Availability of Texas citrus tree insurance.
440.2 Premium rates, covered levels, amounts of insurance, and prices at which indemnities shall be computed.
440.3 [Reserved.]
440.4 Creditors.
440.5 Good faith reliance on misrepresentation.
440.6 The contract.
440.7 The application and policy.
Appendix A—Counties designated for Texas Citrus Tree Insurance.

Authority: Secs. 506, 516, Pub. L. 75–430, 52 Stat. 72, 77, as amended (7 U.S.C. 1506, 1516).

§ 440.1 Availability of Texas citrus tree insurance.

Insurance shall be offered under the provisions of this subpart on citrus trees in counties within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation. Before insurance is offered in any county, there shall be published by appendix to this part the names of the counties in which citrus tree insurance will be offered.

§ 440.2 Premium rates, coverage levels, amounts of insurance, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, coverage levels, amounts of insurance, and prices at which indemnities shall be computed for citrus trees which shall be shown on the county actuarial table on file in the service office and may be changed from year to year.

(b) At the time the application for insurance is made, the applicant shall elect a coverage level, amounts of insurance, and price at which indemnities shall be computed from among those shown on the actuarial table for the crop year.

§ 440.3 [Reserved]

§ 440.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or an involuntary transfer shall not entitle the holder of the interest to any benefits under the contract except as provided in the policy.

§ 440.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the Texas Citrus Tree Insurance contract, whenever (a) an insured person under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation, (1) is indebted to the Corporation for additional premiums, or (2) has suffered a loss to a crop which is not insured or for which the insured person is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured person believed to be insured, or believed the terms of the insurance contract to have been complied with or waived, and (b) the Board of Directors of the Corporation, or the Manager in cases involving not more than $100,000, finds (1) that an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured person relied thereon in good faith, and (3) that to require that payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

§ 440.6 The contract.

The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. The contract shall cover the citrus trees as provided in the policy. The contract shall consist of the application, the policy, the appendix, and the county acturial table. Any changes made in the contract shall not affect its continuity from year to year. Copies of forms referred to in the contract are available at the service office.

§ 440.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation may be made by any person to cover such person's insurable share in the citrus trees as landlord, owner-operator, or tenant. The application shall be submitted to the Corporation at the service office on or before the applicable closing date for the county on file in the service office.

(b) The Corporation may discontinue the acceptance of applications in any county upon its determination that the insurance risk is excessive, and also, for the same reason, may reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the closing date for submitting applications or contract changes in any county, by placing the extended date on file in the service office in the county and publishing a notice in the **Federal Register** upon the Manager's determination that no adverse selectivity will result during the period of such extension. However, if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in policies issued under FCIC regulations for the 1984 and succeeding crop years, a contract in the form provided for under this subpart will come into effect as a continuation of a citrus tree insurance contract issued under such prior regulations, without the filing of a new application.

(d) The application for the 1984 and succeeding crop years is found at Subpart D of Part 400—General Administrative Regulations (7 CFR 400.37, 400.38), first published at 48 FR 1023, January 10, 1983, and may be amended from time to time for subsequent crop years. The provisions of the Texas Citrus Tree Insurance Policy for the 1984 and succeeding crop years are as follows:

DEPARTMENT OF AGRICULTURE

FEDERAL CROP INSURANCE CORPORATION

TEXAS CITRUS TREE CROP INSURANCE POLICY

(This is a continuous contract. Refer to Section 15.)

AGREEMENT TO INSURE: We shall provide the insurance described in this policy in return for the premium and your compliance with all applicable provisions.

Throughout this policy "you" and "your" refer to the insured shown on the accepted application and "we," "us" and "our" refer to the Federal Crop Insurance Corporation.

TERMS AND CONDITIONS

1. CAUSES OF LOSS.

a. The insurance provided is against unavoidable damage to citrus trees resulting from freeze, excess moisture, hail, fire, hurricane or tornado occurring within the insurance period, unless those causes are excepted, excluded, or limited by the actuarial table or section 9f.

b. We shall not insure against any cause of loss or damage, as determined by us, to the citrus trees due to:

(1) The neglect or malfeasance of you, any member of your household, your tenants or employees;

(2) The failure to follow recognized good grove management practices;

(3) Any cause not specified in section 1a as an insured loss.

2. CROP, ACREAGE, AND SHARE INSURED.

a. The crop insured shall be any of the following insurable citrus tree types (hereafter called trees) elected by you:

Type I, Early and Midseason Orange Trees;

Type II, Late Orange (including Temples) Trees;

Type III, Grapefruit Trees except Star Ruby Trees;

Type IV, Star Ruby Grapefruit Trees;

which are set out for the purpose of harvesting citrus as fresh fruit and/or juice and which are located on insured acreage, and for which we provided an amount of insurance and premium rate of the actuarial table.

b. The acreage insured for each crop year shall be that acreage of trees located on insurable acreage as provided for on the actuarial table and in which you have a share, as reported by you or as determined by us, whichever we shall elect.

c. The insured share shall be your share as landlord or owner-operator in the insured citrus trees at the time insurance attaches.

d. We do not insure any acreage:

(1) For the crop year the application for insurance is filed until the acreage has been inspected by us and considered acceptable by us;

(2) Where grove management practices carried out are not in accordance with those practices for which premium rates have been established;

(3) Maintained or set out for experimental purposes; or

(4) In any established grove which we determine does not have the potential to produce at least 70% of the area average yield for the type and age. This provision may be waived by writtten agreement between you and us.

e. Where insurance is provided for an irrigated practice:

(1) You shall report as irrigated only the acreage for which you have adequate facilities and water to carry out a good tree irrigation practice at the time insurance attaches; and

(2) Any loss of trees caused by failure to carry out a good tree irrigation practice, except failure of the water supply from an unavoidable cause occurring after insurance attaches for the crop year shall be considered as due to an uninsured cause. The failure or breakdown of irrigation equipment or facilities shall not be considered as a failure of the water supply from an unavoidable cause.

f. We may limit the insured acreage to any acreage limitation established under any Act of Congress, if we advise you of the limit prior to planting.

g. We may (1) on any acreage which was not insured the previous crop year, exclude acreage from insurance, or (2) limit the amount of insurance.

3. REPORT OF ACREAGE, SHARE, NUMBER, TYPE, AGE OF TREES, AND PRACTICE.

You shall report on our form:

a. All the acreage of trees in the county in which you have a share;

b. The practice;

c. Your share at the time insurance attaches; and

d. The type, number of trees, and

(1) Date of original set out; or

(2) Date of replacement and/or dehorning, if more than 10 percent of the trees on any unit have been replaced or dehorned in the previous five years; and

e. Within 72 hours; the acreage, type, number of trees, and the date set out is completed for any insurable acreage of trees set out after June 1 of the crop year, if you elect to insure such acreage during the crop year.

You shall designate separately any acreage that is not insurable. You shall report if you do not have a share in any trees located in the county. This report shall be submitted annually on or before the July 1 reporting date. We shall have the right to determine all indemnities on the basis of information you have submitted on this report. If you do not submit this report by the reporting date, we may elect to determine by unit the insured acreage, share, and practice or we may deny liability on any unit. Any report submitted by you may be revised only upon our approval.

4. COVERAGE LEVELS AND AMOUNTS OF INSURANCE.

a. The coverage levels and amounts of insurance shall be contained in the actuarial table.

b. You may change the coverage level and amount of insurance on or before the closing date contained in the actuarial table for submitting applications for the crop year.

c. The amount of insurance shall be reduced for any acreage which has not reached the fourth growing season after being set out or fifth year following dehorning by multiplying the amount of insurance by:

(1) 25 percent the year of set out or the year following dehorning;

(2) 40 percent the first growing season after being set out or the second year following dehorning;

(3) 60 percent the second growing season after being set out or the third year following dehorning; or

(4) 75 percent the third growing season after being set out or the fourth year following dehorning.

d. The amount of insurance shall be reduced proportionately for any unit on which the stand is less than 90 percent, of the original planting pattern.

5. ANNUAL PREMIUM.

a. The annual premium is earned and payable on the date insurance attaches. The amount is computed by multiplying the amount of insurance per acre times the premium rate, times the insured acreage, times your share at the time insurance attaches.

b. Interest shall accrue at the rate of one and one-half percent (1½%) simple interest per calendar month, or any part thereof, on any unpaid premium balance starting on the first day of the month following the first premium billing date.

6. DEDUCTIONS FOR DEBT

Any unpaid amount due us may be deducted from any indemnity payable to you or from any loan or payment due you under any Act of Congress or program administered by the United States Department of Agriculture or its Agencies, unless prohibited by law.

7. INSURANCE PERIOD.

a. Insurance attaches on insured acreage on June 1 for each crop year except that for the first crop year and notwithstanding section 2d(1):

(1) If the application is accepted by us after June 1, the insurance against hurricane and freeze shall attach the tenth day after the application is executed by you; and

(2) If any insurable acreage is set out after June 1, insurance shall attach on the date set out is completed for the unit if the acreage is reported within 72 hours after the date of completion; except insurance against hurricane and freeze shall attach the tenth day after you report such acreage.

b. The insurance period ends at the earlier of:

(1) May 31 of the following year; or

(2) The total destruction of the insured trees.

8. NOTICE OF DAMAGE OR LOSS.

a. In case of damage or probable loss:

(1) You must give us written notice of:

(a) The date(s) of damage; and

(b) The cause(s) of damage.

b. You must not claim an indemnity on any unit, unless we inspect all insured acreage and damaged trees before pruning, dehorning or replacement. We may grant a written waiver of this requirement.

c. We may reject any claim for indemnity if any of the requirements of this section or section 9 are not complied with.

9. CLAIM FOR INDEMNITY.

a. Any claim for indemnity on a unit shall be submitted to us on our prescribed form not later than 60 days after the earliest of:

(1) Total destruction of the trees on the unit; or

(2) The calendar date for the end of the insurance period.

b. We shall not pay any indemnity unless you:

(1) Furnish records concerning all trees on the unit;

(2) Establish that the damage to the trees was directly caused by one or more of the insured causes during the insurance period; and

(3) Furnish all information we require concerning the loss.

c. The indemnity shall be determined on each unit by:

(1) Multiplying the number of insured acres in the unit by the amount(s) of insurance;

(2) Multiplying this result by the applicable percent of loss. (The applicable percent of loss is determined by subtracting from the actual percent of damage determined by us in accordance with section 9e, the following applicable amount;

(a) 25 percent (for coverage level 3) and dividing the result by 75 percent;

(b) 35 percent (for coverage level 2) and dividing the result 65 percent; or

(c) 50 percent (for coverage level 1) and dividing the result by 50 percent); and

(3) Multiplying this result by your share.

d. If the information reported by you results in:

(1) A lower premium than the actual premium determined by us, the indemnity shall be reduced proportionately; or

(2) A lower amount of liability than the actual amount of liability determined by us, we may reduce the indemnity proportionately.

e. The total amount of indemnity shall be determined by us and shall include both tree damage and/or trees destroyed due to an insurable cause.

(1) The percent of damage to count for each tree, resulting from insurable cause shall be:

(a) Determined by dividing the number of scaffold limbs damaged by the total number scafford limbs before damage occurred, as determined by us. (A scafford limb is considered damaged if damage occurs in the area defined as a circle around the trunk of the tree with a radius equal to one-fourth (¼) of the height of the tree). Any tree with a percent of damage in excess of 80 percent shall be counted as 100 percent damaged; or

(b) During the crop year of set out as follows:

(i) 100 percent if the trees are killed back to the root stock;

(ii) 90 percent if less than 12 inches of wood above the bud union is alive; or

(iii) No damage shall be considered if more than 12 inches of wood above the bud union is alive.

(2) Any percentage of damage caused by uninsured causes, as determined by us, shall not be included in the percent of damage.

f. When you have elected to exclude hail and fire as insured causes of loss and the crop is damaged by hail or fire, appraisals for uninsured causes shall be made in accordance with the terms of Form FCI–78 "Request to Exclude Hail and Fire."

g. You shall not abandon any insured tree acreage to us.

h. You cannot bring suit or action against us unless you have complied with all policy provisions. If a claim is denied, you may sue us in the United States District Court under the provisions of 7 U.S.C. 1508(c). You must bring suit within 12 months of the date notice of denial is mailed to and received by you.

i. We shall pay the loss within 30 days after we reach agreement with you or entry of a final judgment. In no event shall we be liable for interest or damages in connection with any claim for indemnity, whether we approve or disapprove such claim.

j. If you die, disappear, or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved after insurance attaches for any crop year, any indemnity shall be paid to the person(s) we determine to be beneficially entitled thereto.

k. If you have other fire insurance and fire damage occurs during the insurance period and you have not elected to exclude fire insurance from this policy, we shall be liable for loss due to fire only for the smaller of:

(1) The amount of indemnity determined pursuant to this contract without regard to any other insurance; or

(2) The amount determined by us by which the loss from fire exceeds the indemnity paid or payable under such other insurance. For the purposes of this section, the amount of

loss from fire shall be the difference between the fair market value of the production on the unit before the fire and after the fire, as determined by us.

10. CONCEALMENT OR FRAUD.

We may void the contract on all crops insured without affecting your liability for premiums or waiving any right, including the right to collect any amount due us if, at any time, you have concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

11. TRANSFER OF RIGHT TO INDEMNITY ON INSURED SHARE.

If you transfer any part of your share during the crop year, you may transfer your right to an indemnity. The transfer must be on our form and approved by us. We may collect the premium from either you or your transferee or both. The transferee shall have all rights and responsibilities under the contract.

12. ASSIGNMENT OF INDEMNITY.

You may only assign to another party your right to an indemnity for the crop year on our prescribed form and with our approval. The assignee shall have the right to submit the loss notices and forms required by the contract.

13. SUBROGATION. (Recovery of loss from a third party.)

Because you may be able to recover all or a part of your loss from someone other than us, you must do all you can to preserve any such rights. If we pay you for your loss then your right of recovery shall belong to us. If we recover more than we paid you plus our expenses, the excess shall be paid to you.

14. RECORDS AND ACCESS TO GROVE.

You shall keep for two years after the time of loss, records of the trees destroyed and/or damaged on each unit including separate records showing the same information for any uninsured acreage. Any persons designated by us shall have access to such records and the grove for purposes related to the contract.

15. LIFE OF CONTRACT: CANCELLATION AND TERMINATION.

a. This contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, the contract shall continue in force for each succeeding crop year unless canceled or terminated as provided for in this section.

b. This contract may be canceled by either you or us for any succeeding crop year by giving written notice on or before the cancellation date preceding such crop year.

c. This contract shall terminate as to any crop year if any amount due us on this or any other contract with you is not paid on or before the termination date preceding such crop year for the contract on which the amount is due. The date of payment of the amount due:

(1) If deducted from an indemnity claim shall be the date you sign such claim; or

(2) If deducted from payment under another program administered by the United States Department of Agriculture shall be the date such payment was approved.

d. The cancellation and termination dates are May 31.

e. If you die or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution. *However,* if such event occurs after insurance attaches for any crop year, the contract shall continue in force through the crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the written partnership agreement provides otherwise. If two or more persons having a joint interest and insured jointly, death of one of the persons shall dissolve the joint entity.

f. The contract shall terminate if no premium is earned for five consecutive years.

16. CONTRACT CHANGES.

We may change any terms and provisions of the contract from year to year. If your amount of insurance at which indemnities are computed is no longer offered, the actuarial table shall provide the amount of insurance which you shall be deemed to have elected. All contract changes shall be available at your service office by May 15 preceding the crop year for which they are to become effective.

Acceptance of any changes shall be conclusively presumed in the absence of any notice from you to cancel the contract.

17. MEANING OF TERMS.

For the purposes of Texas citrus tree crop insurance:

a. "Actuarial table" means the forms and related material for the crop year approved by us which are available for public inspection in your service office, and which show the amounts of insurance, coverage levels, premium rates, practices where applicable, insurable and uninsurable acreage, and related information regarding citrus tree insurance in the county.

b. "Contiguous and" means land which is touching at any point, except land which is separated by only a public or private right-of-way shall be considered contiguous.

c. "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown on the actuarial table.

d. "Crop year" means the period beginning June 1 and extending through May 31 of the following year and shall be designated by the calendar year in which the insurance period ends.

e. "Dehorning" means the cutting back of each scaffold limb to a length that is no longer than ¼ the height of the tree.

f. "Destroyed" means trees which are damaged to the extent that we determine that replacement is required.

g. "Insurable acreage" means the land we classify as insurable and show as insurable on the actuarial table.

h. "Insured" means the person (owner or owners) who submitted the application accepted by us.

i. "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

j. "Saffold limb" means a limb attached directly to the trunk.

k. "Service office" means the office servicing your contract as shown on the application for insurance or such other approved office as may be selected by your or designated by us.

l. "Set out" means the transplanting of trees from the nursery to the grove.

m. "Unit" means all insurable acreage in the county of any one of the tree types referred to in section 2, located on contiguous land on the date insurance attaches for the crop year:

(1) in which you have a 100 percent share, or

(2) on which you are a joint-owner.

Land which would otherwise be one unit may be divided according to applicable guidelines on file in your service office or by written agreement between us and you. We shall determine units as herein defined when the acreage is reported. Errors in reporting such units may be corrected by us to conform to applicable guidelines when adjusting a loss and we may consider any acreage and share of and reported by or for your spouse or child or any member of your household to be your bona fide share of the bona fide share any other person having an interest therein.

18. DECRIPTIVE HEADINGS.

The descriptive headings of the various policy terms and conditions are formulated for convenience only and are not intended to affect the construction or meaning of any of the provisions of the contract.

Appendix A—Counties Designated for Texas Citrus Tree Insurance—7 CFR Part 440

In accordance with the provisions of 7 CFR 440.1, the following Texas counties are designated for tree insurance: Cameron, Hidalgo, Willacy.

Approved by the Board of Directors on February 23, 1983.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

Approved by:

Merritt W. Sprague,

Manager.

Date: April 5, 1983.

BILLING CODE 3410-08-M

Food Safety and Inspection Service

9 CFR Part 319

[Docket No. 82-012P]

Definitions and Standards of Identity or Composition for Miscellaneous Pork Products and Miscellaneous Beef Products

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the Federal meat inspection regulations by adding a standard of identity or composition for products commonly known as "ground pork," "chopped pork" or "pork burgers." The rule also proposes to adopt a standard for "pork patties." Consistent with the traditional meaning of the term "pork," the proposed standards would provide a definition of the term "pork." The proposed ground pork standard closely resembles the standards established for ground beef and hamburger and should serve to insure the continued marketing of product in line with consumer expectations. The proposed standard for pork patties closely resembles the standard established for beef patties. In addition, this proposed rule would, consistent with the customary usage of the term "beef" and in accordance with Agency policy, amend the miscellaneous beef products section of the regulations to emphasize and clarify that the use of the term "beef" is permissible only when describing meat that is skeletal in origin or derived from the diaphragm or esophagus of cattle and may not be used to describe meat that is derived, in whole or in part, from the tongue or the heart. Finally, the proposed rule would amend the limitations with respect to the use of mechanically separated (species) and mechanically separated (species) for processing so as to prohibit the use of such in ground pork, chopped pork or pork burgers.

DATE: Comments must be received on or before June 13, 1983.

ADDRESS: Written comments to: Regulations Office, Attn: Annie Johnson, FSIS Hearing Clerk, Room 2637, South Agriculture Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250. (See also "Comments" under Supplementary Information.)

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Hibbert, Director, Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-6042.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

. The Agency has made an initial determination that this proposed rule is not a major rule under Exective Order 12291. It will not result in an annual effect on the economy of $100 million or more. There will be no major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographical regions, and it will not have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The amendment to the beef products section of the regulations merely codifies the traditional interpretation of the term "beef" by describing the anatomical origin of beef and will not alter practices as carried out in the past. Additionally, most ground pork processors already voluntarily observe the requirements specified in the proposed ground pork standard and the requirements of the proposed definition of "pork" are also being oberved. Further, there are no "ground pork," "chopped pork" or "pork burgers" being produced commercially with mechanically separated (species) or mechanically separated (species) for processing as an ingredient, and the standard for "pork patties" is expected to encompass all such products being produced.

Effect on Small Entities

The Administrator, Food Safety and Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act, Pub. L. 96-354 (5 U.S.C. 601). If promulgated, it is anticipated that the economic impact of a standard for ground pork on small entities would be minimal since the requirements of the standard and definition for pork being proposed are currently being observed by most ground pork processors. Additionally, there are currently no "ground pork", "chopped pork" or "pork burgers" being produced commercially with mechanically separated species or mechancially separated (species) for processing. Therefore, the prohibition of this potential ingredient should not have any effect on small processors. The amendment adding a standard for "pork patties" should not have a detrimental impact upon any processors currently producing such products as the standard would encompass all such products currently being produced. The amendment to the beef products section of the regulation merely incorporates current Agency policy and should not have a siginficant impact on any entity subject to the jurisdiction of the Agency.

Comments

Interested persons are invited to submit comments concerning this proposal. Written comments must be sent in duplicate to the Regulations Office. Comments should bear reference to the docket number appearing in the heading of this document. All comments submitted pursuant to this proposal will be made available for public inspection in the Regulations Office between 9:00 a.m. and 4:00 p.m., Monday through Friday.

Background

Section 7 of the Federal Meat Inspection Act (FMIA) (21 U.S.C. 607) provides that the Secretary may prescribe definitions and standards of identity or composition for meat and meat food products when it has been determined that such action is necessary for the protection of the public. Generally, the Food Safety and Inspection Service (Agency) establishes definitions and standards for meat or meat food products when a product becomes popular and consumers have developed expectations that wherever or whenever they purchase the product, it will have certain characteristics. Standards for various meat food products are codified in Part 319 of the Federal meat inspection regulations (9 CFR 319.1 *et seq.*).

Over 200 federally inspected establishments process and sell products labeled as "ground pork." While some of these products are intended for either institutional or retail sale, other ground pork products are used by some establishments for further processing. Such products may be in bulk, roll, or patty form, and they may be refrigerated or frozen. The fat content may vary, and seasonings may or may not be added.

The Agency has received a petition from the National Pork Producers Council requesting that a standard for ground pork be adopted. The petitioner expressed concern that variations in the quality of ground pork products on the market might cause a negative consumer response to ground pork, especially if some of the products offered for sale contained high levels of fat. The petitioner suggested that a standard resembling the existing standards for other ground meat products (e.g., ground beef and hamburger) would help maintain the quality and consistency of ground pork products and would help prevent the introduction of ground pork products with excessively high fat content to the market.

The Agency has determined that there is merit to this petition. This determination is based on the knowledge that commercial sales of ground pork are increasing and that consumers have legitimate expectations concerning the attributes of ground meat products. Therefore, a standard for

ground pork and similar products is being proposed to ensure that products labeled as ground pork or represented under similar names will have certain characteristics whenever and wherever they are sold and will compositionally resemble other ground meats.

The Agency has also determined that it is appropriate to propose a standard for "pork patties" at this time. Like other ground pork products, commercial sales of pork patties are increasing and because pork patties resemble ground pork and pork burgers in appearance and composition, standards establishing the compositional requirements of such products would benefit both consumers and processors.

Finally, with respect to ground pork products, the Agency believes it is also desirable to propose a change in the mechanically separated (species) regulations so as to prohibit the use of mechanically separated (species) and mechanically separated (species) for processing in ground pork, chopped pork or pork burger. Mechanically separated (species) and mechanically separated (species) for processing is prohibited in ground beef and hamburgers (9 CFR 319.6(d)). A similar prohibition seems appropriate for ground pork products so as to meet consumers' legitimate expectations of ground meat products.

The Agency has also received a petition from the Western States Meat Association requesting that the Agency clarify the standards for "ground beef," "chopped beef" and "hamburger" by designating the anatomical origin of the meat that may be used as beef in such products. The petitioner correctly notes that the Agency has established a policy, based on traditional notions of the term "beef", that only meat from cattle which is skeletal in origin or derived from the esophagus or diaphragm may be used as beef in the preparation of products such as ground beef, chopped beef or hamburger, and that, under this policy, heart and tongue meat are permissible ingredients in these products. However, since this policy is not a regulation and is not incorporated in the beef products standard (9 CFR 319.15), the petitioner contends that any action that may be brought to enforce the policy may be hampered. In the opinion of the petitioner this is an impediment to the effective enforcement of the Act that harms the market for firms complying with the guidelines expressed in the Agency policy and impairs consumers' reasonable expectations of meat food products.

The petitioner's contentions were recently supported by representatives of the State of Utah responsible for directing the State meat inspection program with respect to meat products produced solely for distribution within that State. Like the petitioner, they suggest that the Agency's policy concerning the anatomical origin of meat described as beef should be incorporated in the regulations. The representatives of the State of Utah believe that such action would assist them in the effective administration of their meat inspection program and would help assure that inaccurately labeled products do not reach the consumers.

The term "meat" is defined in the Federal meat inspection regulations as:

> The part of the muscle of any cattle, sheep, swine, or goats, which is skeletal or which is found in the tongue, in the diaphragm, in the heart, or in the esophagus, with or without the accompanying and overlying fat, and the portions of bone, skin, sinew, nerve, and blood vessels which normally accompany the muscle tissue and which are not separated from it in the process of dressing . . . (9 CFR 301.2 (tt)).

The term "meat" is also subject to the following provision:

> * * * "meat" and the names of particular kinds of meat, such as beef, veal, mutton, lamb, and pork, shall not be used in such a manner as to be false or misleading (9 CFR 317.8(b)(12)).

Although not expressly defined in the FMIA or the meat inspection regulations, historically, the terms "beef," "veal," "mutton," "lamb," "pork" and "goat" have been permitted to describe only meat of skeletal origin or meat derived from the diaphragm or the esophagus. These terms have not been permitted to describe meat consisting, in whole or in part, of meat derived from the tongue or heart. When heart or tongue meat is a permissible ingredient in a product, it must be listed as an ingredient separate and distinct from beef, veal, mutton, lamb, pork, or goat.

The prohibition against the use of tongue or heart meat as beef in ground beef, chopped beef, or hamburger was recently affirmed in the Standards and Labeling Division's Policy Memo 027 dated June 15, 1981, which states, in part, that heart meat and tongue meat have never been considered as beef or permitted to be declared as beef on labels and are not expected ingredients in chopped beef, ground beef, or hamburger. This policy memorandum has been distributed to official establishments, trade associations and other representatives of such official establishments.

The Agency recognizes the enforcement problem that may exist as a result of the regulations not fully reflecting the current Agency policy concerning the anatomical origins of beef. Therefore, the Agency concurs with the petitioner that effective enforcement of this policy could be hampered in some cases by the lack of regulatory provisions on what may or may not be included as beef in ground beef, chopped beef or hamburger. Accordingly, the Agency is proposing to amend the miscellaneous beef products section of the regulations to expressly clarify that only meat of skeletal origin or derived from the diaphragm or esophagus may be labeled as beef in ground beef, chopped beef, hamburger or other beef products.

For the reasons discussed above, similar provisions concerning the anatomical origin of "pork" are also being proposed in conjunction with the proposal to establish a standard for ground pork, chopped pork, pork burgers and other ground or chopped pork products.

Proposal

A standard is proposed for ground pork, chopped pork, pork burgers and other ground or chopped pork products (9 CFR 319.29). Under the proposed standard, such pork products would contain ground or chopped fresh and/or frozen pork with or without the addition of pork fat and/or seasoning, and could not contain more than 30 percent fat, or added water, binders, extenders and phosphates. These compositional requirements are consistent with requirements for similar ground meat products set forth in the Federal meat inspection regulations (9 CFR 319.15(a)) or established by Agency policy. These similar products include ground beef, chopped beef, hamburger, ground meat, chopped veal, and ground or chopped lamb. It appears appropriate and consistent with consumers' expectations that similar restrictions should apply to ground pork.

If adopted, the standard for ground pork would be comparable to the well known standards for other ground meat products. This standard would serve to prevent unfair competition and would result in ground pork products of composition similar to ground beef products. The proposed standard would also be helpful to State and local authorities as it would provide a guideline which could be used by such authorities in the administration of their meat inspection activities.

A standard is also being proposed for pork patties. Under the proposed standard, pork patties would consist of chopped fresh and/or frozen pork with or without the addition of pork fat as

such and/or seasonings. Binders or extenders, mechanically separated (species) used in accordance with § 319.6 of the meat inspection regulations (9 CFR 319.6), and/or partially defatted pork fatty tissue may be used without added water or with added water only in amounts such that the product's characteristics are essentially that of a meat pattie. These compositional requirements are consistent with requirements for other meat pattie products set out in the Federal meat inspection regulation (9 CFR 319.15(c)) or established by Agency policy. It appears appropriate and consistent with consumers' expectations that similar requirements should apply to pork patties.

This proposed rule would also add a new paragraph to the miscellaneous pork products section of the regulations (9 CFR 319.29) incorporating an Agency policy concerning the anatomical origin of meat included in the term "pork." The revision would adopt the definition which has historically been applied and will not result in any changes in product composition from what has been expected and found in the past.

Limitations on the use of mechanically separated (species) in ground pork, chopped pork, or pork burgers would also be established by this proposed rule. These limitations would be similar to those currently in effect for ground beef or hamburger (9 CFR 319.6(d)) and will help assure that consumers' expectation of ground meat products including ground pork and pork burgers are met.

Finally, the proposed rule would, if adopted, add a new paragraph to the miscellaneous beef product section of the regulations (9 CFR 319.15) by incorporating the Agency policy concerning the anatomical origin of meat described by the term "beef." This revision would adopt the definition which has historically been applied and will not result in any changes in product composition from what has been expected and found in the past.

List of Subjects in ACFR Part 319

Meat inspection, Standards of identity or composition.

PART 319—[AMENDED]

Accordingly, it is proposed to amend the Federal meat inspection regulations as follows:

1. The authority citation for Part 319 reads as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*, 601 *et seq.*, 33 U.S.C. 1254.

2. Section 319.6 (9 CFR 319.6) would be amended by revising paragraph (d) to read as follows:

§ 319.6 Limitations with respect to use of Mechanically Separated Species.

* * * * *

(d) Mechanically Separated (Species) and Mechanically Separated (Species) for processing described in § 319.5 shall not be used in baby, junior, or toddler foods, ground beef, hamburger, fabricated steaks (§ 319.15(a), (b) and (d)), ground pork, chopped pork, pork burgers (§ 319.29(a)), barbecued meats (319.80), roast beef-parboiled and steam roasted (§ 319.81), corned (cured) beef cuts (§§ 319.100–319.103), certain cured pork products (§§ 319.104(a)–(e) and 319.106), tripe with milk (§ 319.308), lima beans with ham and similar products (§ 319.310), beef with gravy and gravy with beef (§ 319.313), and meat pies (§ 319.500).

3. Section 319.15 (9 CFR 319.15) would be amended by adding a new paragraph (f) to read as follows:

§ 319.15 Miscellaneous beef products.

* * * * *

(f) *Beef.* Beef is meat derived from cattle which is skeletal or which is found in the diaphragm or in the esophagus and does not include heart meat or tongue meat.

4. Section 319.29 (9 CFR 319.29) would be amended by redesignating the present paragraph (a) as (c) and by adding new paragraphs (a), (b) and (d) to read as follows:

§ 319.29 Miscellaneous pork products.

(a) *Ground pork, chopped pork, pork burgers.* "Ground Pork", "Chopped Pork", or "Pork Burgers" shall consist of ground or chopped fresh and/or frozen pork, with or without the addition of pork fat as such and/or seasoning, shall not contain more than 30 percent fat, and shall not contain added water, binders, extenders, or phosphates.

(b) *Pork patties.* "Port Patties" shall consist of chopped fresh and/or frozen pork with or without the addition of pork fat as such and/or seasonings. Binders or extenders, mechanically separated (species) used in accordance with § 319.6, and/or partially defatted pork fatty tissue may be used without added water or with added water only in amounts such that the products characteristics are essentially that of a meat pattie.

* * * * *

(d) *Pork.* Pork is meat derived from swine which skeletal or which is found in the diaphragm or esophagus and does not include heart meat or tongue meat.

* * * * *

Done at Washington, D.C., on April 11, 1983.

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 934

Permanent State Regulatory Program of North Dakota; Consideration of Modification of Deadline

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is considering modifying the deadline for North Dakota to meet two of the conditions of approval of its State permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Based on a request of the State, the Secretary is proposing to extend the deadline for the State to resolve the conditions until July 1, 1985.

DATE: Comments must be received by May 13, 1983, at the address below, no later than 5:00 p.m.

ADDRESS: Written comments must be mailed or hand-delivered to Mr. William Thomas, Field Office Director, Office of Surface Mining Reclamation and Enforcement, Frederal Building, P.O. Box 1420, Mills, Wyoming 82644.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur Abbs, Chief, Division of State Program Assistance, Office of Surface Mining, 1951 Constitution

Avenue NW., Washington, D.C. 20240, (202) 343–5351.

SUPPLEMENTARY INFORMATION: Under 30 CFR 732.13(i), the Secretary may conditionally approve a State permanent regulatory program which contains minor deficiencies where the deficiencies are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with steps to correct the deficiencies and the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval. The correction of each deficiency is a condition of the approval. The conditional approval terminates if the conditions are not met according to the schedule. The dates are established in consultation with the State based on its regulatory and administrative schedules.

The North Dakota program was conditionally approved on December 15, 1980 (45 FR 82241–82248). The Secretary's approval was conditioned on the State's correction of 13 minor deficiencies in its program by July 1, 1981. That deadline was later extended, upon the State's request, to January 1, 1983 (46 FR 54070–54071). The Secretary granted a further extension of the deadline for conditions (e) and (m) to July 1, 1983 (47 FR 42347–42348, September 27, 1982 and 48 FR 5902, February 9, 1983).

On March 2, 1983, North Dakota advised the Director of the defeat of Senate Bills 2151 and 2155 by the North Dakota Legislative Assembly. These proposed bills were intended to address conditions (e) and (m) of the Secretary's approval of the State program.

The Public Service Commission (PSC) advised OSM that as a result of the legislature's action, the State would be unable to meet the July 1, 1983, deadline to satisfy the two conditions. In a letter dated March 21, 1983, the State requested a two-year extension of the July 1, 1983, deadline for meeting conditions, (e) and (m).

To satisfy these two conditions, North Dakota must adopt statutory changes. The next opportunity for the State to enact such modifictions is the 1985 biannual legislative session.

Condition "e"

Condition "e" stipulates that North Dakota must adopt provisions consistent with sections 507 and 510 of SMCRA and 30 CFR 786.17, 786.19, 778.13 and 778.14 as those sections pertain to a permit applicant's outstanding violations in any State. The Federal standards prohibit issuance of a permit to any person with an outstanding violation or pattern of violations in any State. North Dakota's program prohibits issuance of a permit to an operator with any outstanding violations in North Dakota. It does not, however, prohibit issuance of a permit to an operator with outstanding violations in States other than North Dakota.

Condition "m"

This condition stipulates that North Dakota must enact provisions revising the date for establishment of valid existing rights to be consistent with section 522(e) of SMCRA. Under the Act and OSM's regulations, surface coal mining operations are prohibited in certain areas unless the operator had established "valid existing rights" to mine in one of those areas by August 3, 1977. North Dakota's program establishes July 1, 1979, as the date for establishment of valid existing rights whereas the Federal definition sets August 3, 1977, as the date.

In its March 21, 1983, letter to the Director requesting an extension of the deadline for meeting conditions (e) and (m), PSC acknowledged that North Dakota does not currently have statutory authority to enforce the requirements of SMCRA and the Federal regulations as they pertain to valid existing rights acquired between August 3, 1977 and July 1, 1979, and the permit requirements relating to a permittee's operations in States other than North Dakota. Accordingly, to ensure that no person is deprived of any right guaranteed under SMCRA, the State requested that OSM enforce these requirements until the State amends its program to include standards consistent with the Federal requirements. The State indicated that the Commission would furnish to OSM all data and information to enable it to properly enforce these requirements.

Copies of the State's letter of request and the above cited **Federal Register** notices are available for public review during regular business hours at the location listed above under **"ADDRESS."**

In accordance with the State's request, OSM is proposing to grant North Dakota an extension to satisfy conditions (e) and (m) until July 1, 1985, following the next legislative session. Comment is solicited on this proposed extension.

In addition, in view of North Dakota's lack of statutory authority to enforce the standards which are the subject of conditions (e) and (m), OSM is considering measures to ensure that these standards are upheld in the State until such time as North Dakota amends its program and satisfies conditions (e) and (m). OSM seeks comment on what measures would be appropriate to ensure that permits are not issued by PSC in violation of the standards of SMCRA and the Federal regulations which stipulate (1) that mining shall not be conducted in prohibited areas unless an operator has established "valid existing rights" to mine prior to August 3, 1977 and (2) that a permit shall not be issued to an operator with outstanding violations or a pattern of violations in *any* State.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSM is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

O,O-Diethyl S-[2-(Ethylthio)Ethyl] Phosphorodithioate; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the combined residues of the insecticide *O,O*-diethyl *S*-[2-(ethylthio)ethyl] phosphorodithioate; and its cholinesterase-inhibiting metabolites, calculated as demeton, in or on the raw agricultural commodity asparagus. The proposed regulation to establish a maximum permissible level for residues of the insecticide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

DATE: Comments must be received on or before May 13, 1983.

ADDRESS: Written comments to: Emergency Response Section, Process Coordination Branch, Registration Division (TS-767C), Environmental Protection Agency, Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703-557-1192) at the above address.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 2E2730 to EPA on behalf of the IR-4 Technical Committee and the Agricultural Experiment Stations of California, Idaho, Oregon and Washington.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the combined residues of the insecticide *O,O*-diethyl *S*-[2-(ethylthio)ethyl] phosphorodithioate and its cholinesterase-inhibiting metabolites in or on the raw agricultural commodity asparagus at 0.1 part per million (ppm).

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance included a 16-week subacute rat feeding study with a no-observed-effect level (NOEL) for cholinesterase inhibition (ChE) at 1 ppm (0.050 mg/kg/day); a 12-week subacute dog feeding study with a NOEL for ChE at 1 ppm (0.025 mg/kg/day); a dominant lethal mutagenicity study in mice with no observed mutagenicity at 5 mg/kg (highest dose tested); a supplementary 2-year rat feeding/oncogenicity study with a NOEL for ChE at 1 ppm and an undetermined NOEL for systemic toxicity; and a 2-year dog feeding study (minimum) with a NOEL for ChE of 1 ppm and a NOEL for systemic toxicity at greater than 2 ppm (highest dose tested). Studies considered desirable but lacking are a 2-year chronic rat feeding/oncogenicity study, a mouse oncogenicity study, a three-generation rat reproduction study, two teratology studies, additional mutagenicity studies, and a delayed neurotoxicity study in chickens.

The provisional acceptable daily intake (PADI), based on the chronic dog feeding study (ChE NOEL of 0.025 mg/kg/day) and using a 10-fold safety factor, is calculated to be 0.0025 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.1500 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.2544 mg/day; the current action will increase the TMRC by 0.0002 mg/day (0.08 percent) and will utilize an additional 0.14 percent of the PADI. The tolerance that will be established by this proposed rule is considered to pose a negligible incremental dietary risk since dietary exposure will not be significantly increased.

The nature of the residues is adequately understood and an adequate analytical method, gas chromatography, is available for enforcement purposes. Since there are no animal feed items involved, there will be no secondary residues in meat, milk, poultry, or eggs. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency the tolerance established by amending 40 CFR 180.183 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number [PP 2E2730/P290]. All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division, at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

April 8, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of P.L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Comments and questions about the items in the listings should be directed to the agency person named at the end of each entry. If you anticipate commenting on a form but find that preparation time will prevent you from submitting comments promptly, you should advise the agency person of your intent as early as possible.

Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Statistical Clearance Officer, (202) 447–6201.

Revised

BILLING CODE 3410–01–M

CIVIL AERONAUTICS BOARD

Institution of Scheduled Airline Traffic Office; Show Cause Proceedings

AGENCY: Civil Aeronautics Board.

ACTION: Approval of Agreements CAB 19994, A–45, A–46, A47, A–48 (Dockets 40712, 40718, 40754, 40755) but without antiturst immunity and subject to conditions; Institution of Scheduled Airline Traffic Office (SATO) Agreements Show-Cause Proceeding, (Docket 41416), Order 83–4–32.

SUMMARY: The board is approving four agreements among members of the Air Traffic Conference of American (ATC) to amend the Scheduled Airline Traffic Office (SATO) Agreement, CAB 19994 A–45–48 (ATC Resolution 5.53), but without antitrust immunity and subject to the conditions that Article VII B(1) and C of Agreement CAB 19994, A–45 (Docket 40712) be deleted and that non-member/non-concurring carriers be permitted to attend and participate in local SATO committee meetings as observers. The Board is also reexamining the approval and grant of antitrust immunity for the entire SATO program, established by ATC Resolutions 5.53, 5.54, and 5.58. It is tentatively maintaining approval for Resolutions 5.53 and 5.54 but withdrawing immunity, and it is tentatively disapproving Resolution 5.58. The Board is instituting the SATO Agreements Show-Cause Proceeding, directing interested persons to show cause why its tentative conclusions should not be made final.

DATES: Objections to the issuance of an order making final the proposed findings and conclusions shall be filed in Docket 41416 by May 31, 1983. Answers to the objections shall be filed by June 29, 1983.

ADDRESSES: Documents should be filed in Docket 41416, Docket Section, Room 714, Civil Aeronautics Board, Washington, D.C. 20428.

CONTACT:
Susan L. Blankenheimer, Legal Affairs, Competition Maintenance Division, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, phone (202) 673–5345.

The complete text of Order 83–4–32 is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request to the above address.

By the Civil Aeronautics Board, April 7, 1983.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census
Title: Monthly Retail Trade Report Random Digit Dialing Feasibility
Form Numbers: Agency—B-676A, B-676B; OMB—N/A
Type of request: New
Burden: 10,000 respondents; 273 reporting hours
Needs and uses: This study is to explore the feasibility of replacing the area frame supplement to the Monthly Retail Trade Report with a supplement derived via random-digit dialing techniques.
Affected Public: All residences and nonresidences reachable by telephone
Frequency: Nonrecurring
Respondent's Obligation: Voluntary
OMB Desk Officer: Tim Sprehe, 395-4814

Agency: Bureau of the Census
Title: 1983 Report of Organization
Form Numbers: Agency—NC-9901 and NC-9907; OMB—N/A
Type of Request: New
Burden: 56,000 respondents; 55,298 reporting hours
Needs and Uses: This survey is needed to update and maintain the Standard Statistical Establishment List (SSEL). The SSEL provides (1) a standard basis for assigning industrial clasification codes of establishments engaged in all areas of economic activity, (2) a single universe for the selection and maintenance of statistical samples of establishments, legal entities, or enterprises, and (3) a benchmark data base from which sample estimates can be developed more accurately and efficiently.
Affected Public: Businesses or other institutions (except farms)
Frequency: Annually
Respondent's Obligation: Mandatory
OMB Desk Officer: Tim Sprehe, 395-4814

Agency: National Oceanic and Atmospheric Administration
Title: Fisheries Loan Fund
Form Numbers: Agency—N/A; OMB—N/A
Type of Request: New
Burden: 200 respondents; 200 reporting hours
Needs and Uses: Information will be used to determine eligibility for Federal benefits.
Affected Public: Fishing vessel owners
Frequency: Nonrecurring
Respondent's Obligation: Required to obtain or retain benefit
OMB Desk Officer: Ken Allen, 395-3785

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals (202) 377-4217, Department of Commerce, Room 6622, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to the respective OMB Desk Officer, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Edward Michals,

Departmental Clearance Officer.

International Trade Administration

[Case No. 643]

Robert Almori, et al.; Order Temporarily Denying Export Privileges

In the matter of: Robert Almori aka Mathurin Almori, 80-82 Rue St. Dominique, 75008 Paris, France; COTRICOM, Orly Fret 661, 94393 Orly Airport, CEDEX, France, and 90 Rue La Fayette, 75009 Paris, France; Jean Didat c/o COTRICOM, Orly Fret 661, 94393 Orly Airport CEDEX, France; Michel Daniel d'Ormigny, 22202 North 84th Place Scottsdale, Arizona 85255; Marcel Goldfarb, aka Marcel Le Fevre, aka Gerard Le Fevre, 71 Avenue du Commandant Baree, Paris, France, and c/o FARB et CIE, 4 Boulevard Voltaire, Paris, France; Hedera Establishment, Casa Postale 748, 1201 Geneva, Switzerland, and Postfach 46, 9490 Vaduz, Liechtenstein; Felix-Constantine S. Popovitch, 138 Allee de la Pointe Genete 91190 Gif-Sur Yvette, France, and Technica Ltd., 14415 North 73rd Street Scottsdale, Arizona 85260.

The Department of Commerce (the "Department"), pursuant to the provisions of Section 388.19 of the Export Administration Regulations (currently codified at 15 CFR 388, *et seq.* (1982)) (the "Regulations"), has petitioned the Hearing Commissioner for an order temporarily denying all export privileges to Technica Ltd., Scottsdale, Arizona; Robert Almori, aka Mathurin Almori, aka Bernard Almori, ("Almori"); Cotricom, Paris, France; Jean Didat ("Didat"); Michel Daniel d'Ormigny ("d' Ormigny"); Marcel Goldfarb, aka Marcel Le Fevre, aka Gerard le Fevre, ("Goldfarb"); Hedera Establishment, Geneva, Switzerland and Vaduz, Liechtenstein; and Felix-Constantine S. Popovitch ("Popovitch") (hereinafter collectively referred to as "respondents").

The Department states that respondents are under investigation by the Department's Office of Export Enforcement. The Department states further that its investigation to date has revealed: (i) That d'Ormigny has made unlicensed shipments of U.S.-origin high technology goods through the U.S. firm Technica Ltd., to Didat's firm Cotricom for the account of Popovitch's firm, Hedera Establishment; (ii) that attempts by d'Ormigny and Almori to make similar exports through the U.S. firm Techica Ltd. have occurred: (iii) that goods already exported to Almori in France have been reexported to proscribed destinations without authorization from the Office of Export Administration; (iv) that Goldfarb has admitted to presenting false information to OEA at the behest of Almori; and (v) that the individuals named above may attempt future exports and reexports contrary to the Regulations unless appropriate action is taken to preclude such attempts.

Based upon the showing made by the Department, I find that an order temporarily denying all export privileges to respondents is required in the public interest to facilitate enforcement of the Export Administration Act of 1979 (50 U.S.C. app. 2401, *et seq.* (Supp. IV 1980)), as amended by the Export Administration Amendments Act of 1981, Pub. L. 97-145 (1981) (the Act) and the Regulations and to permit completion of the Department's investigation.

Anyone who is now or may in the future be dealing with the above-named respondents or any related party in transactions that in any way involve U.S.-origin commodities or technical data is specifically alerted to the provisions set forth in Paragraph IV below.

Accordingly, it is hereby ordered:

I. All outstanding validated export licenses in which respondents or any related party appear or participate, in any manner or capacity, are hereby revoked and shall be returned forthwith

to the Office of Export Administration for cancellation.

II. The respondents, their successors or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity, (a) as a party or as a representative of a party to a validated export license application, (b) in the preparation or filing of any export license application or reexport authorization, or of any document to be submitted therewith, (c) in the obtaining or using of any validated or general export license or other export control document, (d) in the carrying on of negotiations with respect to, or in the receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported, and (e) in the financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. Such denial of export privileges shall extend not only to the respondents, but also to their agents and employees and to any successors. After notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which respondents are now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services. The business organizations now known to be owned by or affiliated with d'Ormigny, and/or Almori, and which are accordingly subject to the provisions of this order, are:

Interco-Technica Ltd., 14415 North 73rd Street, Scottsdale, Arizona 85260
Interco-Energia Inc., 14415 North 73rd Street, Scottsdale, Arizona 85260
United Equipment Resources Ltd., 14415 North 73rd Street, Scottsdale, Arizona 85260
U.S. Energy Resources Ltd., 14415 North 73rd Street, Scottsdale, Arizona 85260
Teletrans Industries Inc., 14415 North 73rd Street, Scottsdale, Arizona 85260
and
Technica, S.A., 80–82 Rue St. Dominique, 75009 Paris, France.

IV. No person, firm, corporation, partnership or other business organization, whether in the United States or elswhere, without prior disclosure to and specific authorization from the Office of Export Administration, shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with the respondents or any related party, or whereby the respondents or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for any respondent or any related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

V. In accordance with the provisions of § 388.19(b) of the Regulations, the respondents or any related party may move at any time to vacate or modify this temporary denial order by filing with the Hearing Commissioner, International Trade Administration, U.S. Department of Commerce, Room 6716, 14th and Constitution Avenue, N.W., Washington, D.C. 20230, an appropriate motion for relief, supported by substantial evidence, and may also request an oral hearing thereon, which, if requested, shall be held before the Hearing Commissioner at the earliest convenient date. In accordance with the provisions of § 388.22 of the Regulations, any respondents or any related party may appeal to the Assistant Secretary for Trade Administration, U.S. Department of Commerce, Room 3898–B, 14th and Constitution Avenue, N.W., Washington, D.C. 20230, a decision upholding an order temporarily denying export privileges.

VI. This order is effective immediately. It remains in effect until the final disposition of any administrative or judicial proceeding or proceedings initiated against the respondents as a result of the ongoing investigation. A copy of this order and Parts 387 and 388 of the Regulations shall be served upon the respondents and the above-named related parties.

Dated: April 5, 1983.

Thomas W. Hoya,

Hearing Commissioner.

BILLING CODE 3510-25-M

Consolidated Decision on Applications for Duty-Free Entry of Scientific Articles; University of Chicago et al.

The following is a consolidated decision on applications for duty-free entry of scientific articles published pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR 301 as amended by 47 FR 32517).

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 A.M. and 5:00 P.M. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Decision: Applications Denied. Applicants have failed to establish that instruments or apparatus of equivalent scientific value to the foreign articles for such purposes as the foreign articles are intended to be used are not being manufactured in the United States.

Reasons: The requirements for the resubmission of applications that have been denied without prejudice to resubmission are contained in Section 301.5(e) of the regulations. Each of the applicants has failed to resubmit its application within the specified time period. Pursuant to Subsection 301.5(e)(4), this failure shall result in a denial of the application.

In accordance with Section 301.5(f), notice of these decisions is forwarded to the **Federal Register** for publication.

Docket No. 82–00180. Applicant: University of Chicago, Operator of Agronne National Laboratory, 9700 South Cass Avenue, Argonne, IL 60439. Instrument: Gas Chromatograph Mass Spectrometer, Model MS–25. Date of Denial Without Prejudice to Resubmission: January 11, 1983.

Docket No. 82–00257. Applicant: Baylor College of Medicine, 1200 Moursund Avenue, Houston, TX 77030. Instrument: Nuclear Magnetic Resonance Imager. Date of Denial Without Prejudice to Resubmission: December 23, 1982.

Docket No. 82–00294. Applicant: York Hospital, 1001 S. George Street, York, PA 17405. Instrument: Therasim 750 Universal Simulator. Date of Denial

Without Prejudice to Resubmission: January 11, 1983.

Docket No. 82-00306. Applicant: University of Colorado, Department of Physics, Campus Box 390, Boulder, CO 80309. Instrument: Excimer Laser, Model TE-431T with Optics Set, Model 503 FX/503RX. Date of Denial Without Prejudice to Resubmission: January 11, 1983.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

BILLING CODE 3510-25-M

Guidelines for the Issuance of Export Trade Certificates of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of guidelines.

SUMMARY: These guidelines are issued under Title III of the Export Trading Company Act of 1982, Pub. L. 97-290. The guidelines discuss the eligibility requirements, certification standards and analytical approach which the Departments of Commerce and Justice will utilize in determining whether to issue an export trade certificate of review. The holder of a certificate and its members will have specific protections from liability under Federal and State antitrust laws. Potential applicants can refer to these guidelines for assistance in determining whether to apply for a certificate.

Comments

Interested persons are invited to submit written comments at any time, with five copies, to: Office of the Assistant General Counsel for Export Trading Companies, Department of Commerce, Room 5882, Washington, D.C. 20230.

Comments should refer to this notice by the title "Guidelines for the Issuance of Export Trade Certificates of Review."

FOR FURTHER INFORMATION CONTACT: Eleanor Roberts Lewis, Assistant General Counsel for Export Trading Companies, U.S. Department of Commerce, Washington, D.C. 20230, (202) 377-0937 or (202) 377-4772. These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: These initial guidelines are intended to assist persons who may apply for an export trade certificate of review under Title III of the Export Trading Company Act of 1982. The Commerce Department welcomes comments on these guidelines at any time. The Departments of Commerce and Justice plan to make revisions and additions to these guidelines (including the addition of specific examples) as they gain more experience with the certification process.

I. Introduction

Under Title III of the Export Trading Company Act, "Export Trade Certificates of Review," the Commerce Department, with the concurrence of the Justice Department, is issuing these quidelines "[t]o promote greater certainty regarding the application of the antitrust laws to export trade."[1] In order to assist firms in planning their organizational structure and export operations, these guidelines set forth the purpose of the certification procedure, the protection conferred by the certificate of review, the persons and conduct eligible for certification, the eligibility standards which will be considered and the analytical approach which the Commerce and Justice Departments will apply in determining whether to certify specific types of proposed conduct. These guidelines set forth the kinds of considerations that will be taken into account in determining whether or not to issue a certificate.

The Export Trading Company Act of 1982[2] ("the ETCA" or "the Act") is intended to increase U.S. exports of goods and services primarily by removing two impediments: (1) restrictions on bank investment and certain export financing, and (2) the uncertainty regarding the application of U.S. antitrust laws. To remove these impediments, the ETCA makes several changes to applicable banking and antitrust laws. These changes are reflected in four titles, which, for the most part, are independent of each other. Title I establishes in the Department of Commerce an office to promote the formation of export trade associations and export trading companies ("ETCs"). By providing a full range of export services, an ETC can function as a one-stop export intermediary for U.S. producers of goods and services. Title II permits eligible banking entities to acquire, subject to certain limitations, up to 100 percent of the stock of an ETC. It also reduces certain restrictions on export financing. Title III provides for a certification process which enables businesses engaged in export trade to determine in advance whether their proposed export conduct will have specific protection from liability under Federal and State antitrust laws. And Title IV clarifies how the Sherman and Federal Trade Commission Acts apply to export commerce.

Many, and perhaps most, export activities are currently permissible under U.S. antitrust laws. But members of the American business community have long expressed uncertainty about the application of U.S. antitrust laws to their export conduct. The purpose of the Act is to encourage U.S. exports, particularly by small and medium-sized firms, by minimizing any antitrust uncertainty about proposed export conduct. The Act reduces the uncertainty by establishing a procedure which permits persons engaged in export trade to receive a certificate that sets the limits of their antitrust liability before they engage in such conduct.

II. Protection Conferred by Certification

Under the procedures set forth in the implementing regulations,[3] the Commerce Department will issue to an applicant a certificate or an amendment to the certificate if it determines and the Justice Department concurs that the proposed conduct meets the four eligibility standards in section 303(a) of the Act.[4] A certificate of review protects its holder and the members identified in it from civil and criminal liability under Federal and state antitrust laws for conduct specified in the certificate and carried out during its effective period in compliance with its terms and conditions. However, any person who has been injured by the certified conduct may bring a civil action for injunctive relief and actual damages for such conduct that does not comply with the four eligibility standards.[5] Such a

---

[1] Pub. L. No. 97-290, Title III section 307, 96 Stat. 1244 (to be codified at 15 U.S.C. 4017). Section 311(b) of the Act defines "antitrust laws" as "the antitrust laws, as such term is defined in the first section of the Clayton Act (15 U.S.C. 12), and section 5 of the Federal Trade Commission Act (15 U.S.C. 45) (to the extent that section 5 prohibits unfair methods of competition), and any State antitrust or unfair competition law."

For a discussion of the application of U.S. antitrust laws to foreign commerce, see Antitrust Division, U.S. Department of Justice, *Antitrust Guide for International Operations* (1977) [hereinafter *"Guide."*]; J. Atwood & K. Brewster, *Antitrust and American Business Abroad* 2d ed. 1981 and Supplement); W. Fugate, *Foreign Commerce and the Antitrust Laws* (1982); B. Hawk, *United States, Common Market and International Antitrust: A Comparative Guide* (1979 and Supplement).

[2] Pub. L. No. 97-290, 96 Stat. 1233-1247.

[3] 48 FR 10696 (March 11, 1983) (to be codified at 15 CFR Part 325).

[4] Pub. L. No. 97-290, section 303(a), 96 Stat. 1241 (to be codified at 15 U.S.C. 4013(a)).

[5] Id. section 306(b)(1)-(4), 96 Stat. 1243 (to be codified at 15 U.S.C. 4016(b)(1)-(4). The Justice Department may also bring an action against the certificate holder to enjoin conduct threatening clear and irreparable harm to the national interest. (*Id.* section 306(b)(5)).

cause of action could arise if the certificate had been incorrectly issued through misapplication of the four eligibility standards or if certified conduct no longer meets the standards because of changed circumstances.

There are, however, significant limitations on these private suits. First, there is a presumption that the certified conduct does comply with the eligibility standards. Second, any such private suit would have to be commenced within two years of the date that the injured party has notice of the failure to comply and in no event later than four years from the date the cause of action occurs. Finally, if the certificate holder prevails, he recovers the cost of defending against the suit, including reasonable attorneys fees. One benefit of these limitations should be to deter frivolous private lawsuits.

The certificate provides no protection if it was obtained by fraud because it is void from the beginning. Also, the certificate provides no protection for persons not identified in it or for conduct outside its scope. In any private antitrust action alleging that the certificate holder's conduct is not within the scope of the certificate, an issue before the court will be whether that allegation is correct. Finally, applicants should be aware that other nations have competition laws with which they must comply. The certificate does not confer immunity from foreign competition laws.

III. Persons Eligible for Certification

The Act permits any "person" [6] engaged in export trade to apply for a certificate. This is unlike Title II of the ETCA, the "Bank Export Services Act," which applies only to an "export trading company." [7] For example, under Title III's definition of "person," a single U.S. company may apply for a certificate even though its export trade is only a small part of its business operations and it would not qualify as an ETC under Title II. In addition, U.S. subsidiaries of foreign companies are eligible to apply for the protection of a certificate. Finally, foreign companies may also receive the protection of a certificate as members [8] of an applicant U.S. trading entity.

IV. Conduct Eligible for Certification

Certificates of review may be issued with respect to export trade, export trade activities and methods of operation, as those terms are defined in the Act. The agencies will ordinarily determine, as a threshold matter, whether the proposed conduct falls within these definitions before considering whether the conduct meets the eligibility standards of section 303(a) of the Act. Conduct that constitutes export trade, export trade activities or methods of operation is eligible for certification and will be reviewed for its consistency with those standards. Conduct that does not constitute export trade, export trade activities or methods of operation is not eligible for certification.

A. Export Trade

The Act defines "export trade" as:

> trade or commerce in goods, wares, merchandise, or services exported, or in the course of being exported, from the United States or any territory thereof to any foreign nation.

This definition is similar to that contained in the Webb-Pomerene Act, 15 U.S.C. 61–65. It differs, however, in its inclusion of exports of services,[9] which are not protected by the Webb-Pomerene Act. And, unlike the Bank Export Services Act, the Act does not require that the goods or services to be exported be produced in the United States.

Conduct may constitute export trade, and therefore be eligible for certification, even if the goods or services are not actually exported by the applicant or its members, as long as the goods or services involved are "in the course of being exported." For example, the sale of a product within the United States, if the product is to be exported, may in some circumstances constitute "export trade." However, the production in the United States of goods will not oridinarily be considered as "export trade," even if the goods produced are destined for export. Nothing in the Act prevents an export venture from engaging in manufacturing activities or any other activities such as import or domestic trade. Such activities would not, however, be eligible for certification, and would remain subject to the antitrust laws.

B. Export Trade Activities and Methods of Operations

The Act defines "export trade activities" as "activities or agreements in the course of export trade." "Methods of operation" are defined as "any method by which a person conducts or proposes to conduct export trade." Proposed activities, agreements or methods of conducting business will be eligible for certification if they fall within these definitions. Whether proposed conduct is best characterized as an export trade activity or method of operation is not important for eligibility purposes, provided the proposed conduct comes within the purview of the one or the other.

Export trade activities may include services that are provided exclusively to facilitate the export of goods or services. Examples might include the sale and shipment of goods or services abroad, advertising in the export market, international market research, product research and design, joint trade promotion, financing, communication and processing of foreign orders, and negotiating export contracts with foreign buyers.

Agreements in the course of export trade might include agreements among the members on the allocation of export quotas, agreements to pool products for export shipment, agreements setting prices, terms and conditions of sale in foreign markets, and distributorship with foreign distributors.[10]

The applicant's methods of operation might include such mechanisms as using exclusive or non-exclusive foreign distributors, selling on consignment, and

---

[6] Section 311(5) of the Act defines "person" as "an individual who is a resident of the United States; a partnership that is created under and exists pursuant to the laws of any State or of the United States; a State or local government entity; a corporation, whether organized as a profit or nonprofit corporation, that is created under and exists pursuant to the laws of any State or of the United States; or any association or combination, by contract or other arrangement, between or among such persons."

[7] Section 203(3)(F) of the Bank Export Services Act defines "export trading company" as "a company which does business under the laws of the United States or any State, which is exclusively engaged in activities related to international trade, and which is organized and operated principally for purposes of exporting goods or services produced in the United States or for purposes of facilitating the exportation of goods or services produced in the United States by unaffiliated persons by providing one or more export trade services."

[8] Section 325.2(k) of the implementing regulations defines "member" as "with respect to an applicant, a partner, shareholder or participant who is seeking protection under the certificate. This applies to partners in partnerships or joint ventures; shareholders of corporations; or participants in associations, cooperatives, or other forms of profit or nonprofit organizations or combinations, by contract or other arrangement."

[9] Section 311(2) of the Act defines "services" as: "intangible economic output, including, but not limited to—

(A) Business, repair, and amusement services,

(B) Management, legal, engineering, architectural, and other professional services, and

(C) Financial, insurance, transportation, informational and any other data-based services, and communication services."

Patent, trademark, know-how and technology licenses are considered to be intangible economic output. Therefore, such licenses to persons located in other countries are within the definition of "export trade" and will be eligible for certification.

[10] Where an applicant seeks certification of an agreement involving non-members, however, only the applicant and members listed on the certificate may receive the protection from antitrust liability afforded by the Act.

using a resale price maintenance program for its foreign sales. Methods of operation eligible for certification might also include the organizational and managerial aspects of the export venture, such as the manner in which overseas prices will be established, the role members will play in the management decisions of the venture, the manner in which business information will be disclosed to or exchanged between members and/or non-members, and restrictions on the activities of members in export markets or on their withdrawal from the export venture.

While, as general matter, certification is not available for overseas investment activities, investments that are integral to the export of goods or services may in some circumstances be eligible for certification. For example, investment in warehouse facilities overseas to store exported products until transferred to the foreign purchaser would ordinarily be eligible for certification. Similarly, although the production or manufacture of products ordinarily would not be eligible for certification, minor product or packaging modification activities necessary to insure compatibility of the product with the requirements of the foreign market could be considered an export trade activity eligible for certification.

V. Certification Standards

Proposed export trade, export trade activities and methods of operation may be certified if the applicant establishes that such conduct will—

(1) Result in neither a substantial lessening of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of the applicant,

(2) Not unreasonably enhance, stabilize, or depress prices within the United States of the goods, wares, merchandise, or services of the class exported by the applicant,

(3) Not constitute unfair methods of competition against competitors engaged in the export of goods, wares, merchandise, or services of the class exported by the applicant, and

(4) Not include any act that may reasonably be expected to result in the sale for consumption or resale within the United States of the goods, wares, merchandise, or services exported by the applicant.

These certification standards are intended to encompass the substantive law of antitrust as modified by the Webb-Pomerene Act.[11] The antitrust laws fulfill an important purpose in protecting American consumers and other American exporters from anticompetitive restraints. Where the only anticompetitive effects of the conduct are in foreign markets, a certificate may be issued. However, where proposed conduct will have a substantial anticompetitive impact on trade or commerce in the U.S., or on the export opportunities of other U.S. exporters, a certificate will not be issued.

A. The First Standard—Substantial Lessening of Competition or Restraint of Trade

Under this standard, conduct will be certified unless it has a substantial anticompetitive impact in the domestic market or on U.S. export competitors.[12] The agencies will carefully evaluate the likelihood that proposed export conduct will facilitate collusion in the domestic market, or otherwise have a substantial anticompetitive impact, before a certificate is issued. For example, if the exhange of price, output, or other sensitive information in the course of export trade will result in a substantial lessening of competition in the domestic market, that method of operation will not be certified.

To determine whether the proposed conduct will comply with this standard, the analysis will in most instances look to the overall purpose and effect of the activities on competition and whether that impact is unreasonably restrictive of competitive conditions.[13] When making this determination, the agencies will balance the likely pro-competitive and anticompetitive effects of the proposed action within each relevant market. If the net impact of the restraint will not be to substantially lessen competition, it will be certified.

An evaluation of the likely anticompetitive effects of proposed conduct in the domestic market may require an analysis of the market structure in the United States for the goods and services to which the proposed conduct will apply. The likelihood and severity of such effects may depend on the concentration of the relevant market(s), the ease of new entry and the market power of the applicant and its members. In determining the market power of the applicant and members, the aggregate market shares of each, as well as market shares of their parents, subsidiaries and affiliates, will be considered. Ordinarily, the proposed conduct will be more closely scrutinized for possible anticompetitive impact when these markets are highly concentrated or when the participants in the proposed conduct have a large market share than when neither of these factors is present.

B. The Second Standard—Unreasonable Price Effects

The second standard requires the agencies to analyze the likely effect upon domestic prices of the proposed export trade, export trade activities and methods of operation. Proposed conduct will meet this standard if it will not have the foreseeable consequences of unreasonably enhancing, stabilizing or depressing prices in the Unites States.

Under this standard, an effect on domestic prices resulting from export sales which lessen domestic supply and which are a legitimate response to demand in foreign markets will in itself not constitute an unreasonable effect on domestic prices. On the other hand, an increase in domestic prices that results from anticompetitive behavior directed at the domestic market will be unreasonable. For example, where the purpose of proposed conduct is to manipulate domestic prices directly, or indirectly through the manipulation of domestic supplies, certification will be denied.

C. The Third Standard—Unfair Methods of Competition

Under this standard, proposed conduct that unreasonably restrains the trade of U.S. export competitors will not be certified. While this language is similar to that contained in section 5 of the Federal Trade Commission Act,[14] this standard is narrower on its face than that of the Federal Trade Commission Act. The policies and purposes underlying the Export Trading Company Act are different from the Federal Trade Commission Act. In light of this, the judicial decisions interpreting section 5 of the Federal Trade Commission Act, while illustrative, have only limited precedential significance.

An example of conduct that might not meet this standard is the deliberate and unreasonable restriction of domestic export competitors from their source of supply. On the other hand, the fact that export sales by the applicant or its members would displace sales of other U.S. exporters would not be grounds in itself for denying certification.

[13] *See National Society of Professional Engineers v. United States*, 435 U.S. 679, 687–692 (1978).

[14] 15 U.S.C. 45.

D. The Fourth Standard—Resales in the United States

The fourth standard seeks to ensure that the anticompetitive effects, if any, of proposed export conduct does not have a domestic impact through the export and subsequent re-import of the goods or services back into the United States. It is intended to ensure that the antitrust protection afforded by the Act will not be given for conduct which, while ostensibly involving exports, has a significant impact in the domestic market.

Under this standard, the agencies will look at whether the applicant reasonably expects the exported goods or services to re-enter the United States for sale or consumption within the United States, and if so, whether such sale or consumption within the U.S. may have a significant domestic impact. The exportation of products or services that are incorporated into finished products overseas or which are in any significant manner transformed in their character, and then exported back into the United States would not ordinarily be denied certification under this standard.

Dated: April 8, 1983.

Malcolm Baldrige,

Secretary of Commerce.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

[Modification No. 1 to Permit No. 400]

Taking and Importing of Marine Mammals

Notice is hereby given that pursuant to the provisions of § 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), and § 222.25 of the Regulations Governing Endangered Species Permits (50 CFR Part 222), Scientific Research Permit No. 400 issued to Bolt Beranek and Newman Inc., 10 Moulton Street, Cambridge, Massachusetts 02238, is modified to include air gun sources in addition to the noise sources authorized.

Accordingly, Section B–1 is deleted and replaced by: "1. The research shall be conducted by the means, in the areas and for the purposes set forth in the application and documents submitted in modification."

This modification becomes effective upon publication in the **Federal Register**.

The Permit as modified and documentation pertaining to the modification are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMODITY FUTURES TRADING COMMISSION

Introducing Brokers and Associated Persons of Introducing Brokers; Authorization of National Futures Association To Perform Limited Commission Registration Functions

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice and Order Authorizing National Futures Association to perform a limited portion of the Commission's registration functions applicable to introducing brokers and associated persons of introducing brokers.

SUMMARY: In order to facilitate application of a Commission no-action position concerning the required registration of introducing brokers and associated persons of introducing brokers by May 11, 1983, and to assist the Commission in processing applications for registration in such categories following the adoption of Commission rules, the Commission is authorizing the National Futures Association to receive and process materials submitted to it in accordance with procedures established by the Commission to administer its no-action position and to commence processing new applications for registration as an introducing broker or an associated person of an introducing broker.

FOR FURTHER INFORMATION CONTACT: Linda Kurjan, Assistant Director, Division of Trading and Markets, 2033 K Street, N.W., Washington, D.C. 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: The Commission today announced interim procedures to facilitate compliance by introducing brokers (IBs) and associated persons (APs) of introducing brokers with the registration requirements of the Commodity Exchange Act (the "Act"), as recently added by the Futures Trading Act of 1982. Those procedures include Commission announcement of certain conditions which may be met by IBs and APs to qualify for a Commission no-action position concerning the applicability of the Act's new registration requirements on May 11, 1983. In addition, the Commission has published notice of proposed rules which would govern the qualification of, and procedures for, registration of IBs and their APs upon adoption (48 FR 14933 (April 6, 1983)).

By letter dated April 6, 1983, the National Futures Association has requested that the Commission authorize it to commence receiving and processing applications for the IB and IB/AP registration categories in accordance with the no-action procedures established by the Commission, thereby qualifying appropriate persons to rely upon the Commission's no-action position until such time as the Commission adopts final rules governing these required registrants. NFA also has requested that, upon the Commission's adoption of final rules governing IBs and their APs, it be authorized to commence processing new applications for registration in these two categories.

In this regard, NFA has represented that it will comply with the procedures adopted by the commission to administer the extension of the Commission's no-action position to qualified applicants, and also to comply with such rules as the Commission may adopt to govern the procedures for application to become registered as an IB or AP thereof. NFA also has indicated that it intends to submit for Commission approval specific rules which, in accordance with applicable Commission requirements, would establish NFA procedures for processing IB and IB/AP registration applications, apply fitness standards to prospective registrants and adopt procedures to assure compliance with such standards, and establish notice and review procedures concerning denial of or other adverse action on registration applications.[1]

[1] The Commission previously has approved Article III, Section 1 of the NFA Articles of Incorporation, which provides that one of the fundamental purposes of NFA is "facilitating the allocation of increased Commission resources to contract market designations, approval of contract market rules, registration of industry professionals and other duties of the Commission affecting the growth of the commodity futures industry and the public's ability to avail itself of the industry's expanding services." The Commission anticipates that, upon adoption of Commission rules governing the application procedures and qualifications of applicants for registration as IBs or APs thereof, NFA will submit rules for Commission approval which would establish necessary application, qualification and review procedures for the Commission to consider authorizing NFA to grant or deny IB and IB/AP registration applications.

In light of NFA's request for Commission authorization to assume responsibility for those portions of the Commission's registration functions, its representations concerning procedures to be followed in administering those functions, and the opportunity for the Commission to implement these functions in an efficient, cost effective manner, the Commission has determined, in accordance with its authority under section 8a(10) of the Act, as added by § 224 of the Futures Trading Act of 1982, to authorize NFA to perform the limited registration functions associated with processing "no-action" requests submitted by or on behalf of IBs and APs of IBs and processing applications for registration and related materials submitted in connection therewith.

Issued by the Commission on April 7, 1983, in Washington, D.C.

Jean A. Webb,

Deputy Secretary of the Commission.

[FR Doc. 88-9657 Filed 4-12-83; 8:45 am]

BILLING CODE 6351-01-M

CONSUMER PRODUCT SAFETY COMMISSION

Proposed Collection of Information

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. 3501 *et seq.*), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval, through April 30, 1986, of information collection requirements in a regulation applicable to full-size baby cribs. The regulation, published at 16 CFR Part 1500.18(a)(13) and Part 1508, is intended to reduce or eliminate unreasonable risks of death or injury to children from mechanical hazards. The regulation bans from sale and distribution full-size cribs that fail to meet established criteria and requires certain labeling, under provisions of the Federal Hazardous Substances Act (15 U.S.C. 1261 *et seq.*). Additionally, § 1508.10 of this regulation requires manufacturers and importers of the cribs subject to its provisions to make and maintain records of sale, distribution, inspections, and tests, for 3 years after production or importation of each lot or other identifying unit of full-size baby cribs.

Information about the Proposed Collection of Information.

Agency address: Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

Title of information collection: Full-size baby cribs, 16 CFR 1500.18(a)(13) and Part 1508.

Type of request: Extension of approval.

Frequency of collection: Varies depending upon volume of products manufactured, imported, tested, or sold.

General description of respondents: Manufacturers and importers of full-size baby cribs.

Estimated number of respondents: 33.

Estimated average number of hours per response: 4 for records and 8 for tests.

Comments: Comments on this proposed collection of information should be addressed to Gwen Pla, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, telephone: (202) 395-7313, not later than April 28, 1983. Copies of the proposed collection of information are available from Francine Shacter, Office of Budget and Program Implementation, Consumer Product Safety Commission, Washington, D.C. 20207, telephone: (301) 492-6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: April 7, 1983.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Summer Study Panel on Aircraft Survivability in NATO; Notice of Advisory Committee Meeting

The Defense Science Board 1983 Summer Study Panel on Aircraft Survivability in NATO will meet in closed session 9–10 May 1983 in the Pentagon, Arlington, Virginia.

The Mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on 9–10 May 1983, the Panel will examine the threat to tactical aircraft in the air and on the ground and assess the major sources of their attrition and sortie rate degradation.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Foce meeting concerns matters listed in 5 U.S.C. 552b(c) (1) (1976), and that accordingly these meetings will be closed to the public.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

April 8, 1983.

Defense Science Board Summer Study Panel on Conventional Munitions; Notice of Advisory Committee Meeting

The Defense Science Board 1983 Summer Study Panel on Conventional Munitions will meet in closed session on 12–13 May 1983 in the Pentagon, Arlington, Virginia.

The Mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on 12–13 May 1983, the Panel will consider the opportunities to improve our conventional weapons capability and the degree to which our current R&D program is exploiting these opportunities.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

Defense Science Board Summer Study Panel on Joint Service Acquisition Programs; Notice of Advisory Committee Meeting

The Defense Science Board 1983 Summer Study Panel on Joint Service Acquisition Programs will meet in closed session on 5–6 May 1983 in the Pentagon, Arlington, Virginia.

The Mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on 5–6 May 1983, the Panel will examine past and present joint Service programs and the factors which contributed to their success or failure.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

DEPARTMENT OF ENERGY

Office of Energy Research

University Programs Panel, Energy Research Advisory Board; Meeting

Notice is hereby given of the following meeting:

Name: University Programs Panel of the Energy Research Advisory Board (ERAB). ERAB is a Committee constituted under the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770).

Date and time: April 29, 1983 from 9 a.m. to 5 p.m.

Place: Department of Energy Room 8E–089, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585.

Contact: Joan Snodderly, Energy Research Advisory Board, Department of Energy, Forrestal Building, ER–6, 1000 Independence Avenue SW., Washington, DC 20585, Telephone: 202/252–8933.

Purpose of the Parent Board

To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative Agenda

- Briefing on NSF programs
- Briefing on DOE defense R&D performed by universities
- Discussion of draft report

Public Participation

The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Joan Snodderly at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts

Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8:00 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on April 7, 1983.

Ira M. Adler,

Deputy Director for Management, Office of Energy Research.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Cases Filed; Week of March 18 through March 25, 1983

During the Week of March 18 through March 25, 1983, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. A Submission inadvertently omitted from an earlier list has also been included.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be

aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

April 6, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of Mar. 18 through Mar. 25, 1983]

Date	Name and location of applicant	Case No.	Type of submission
Mar. 9, 1983	Mira Oil Company, Inc., Washington, D.C	HRD-0118	Motion for Discovery. If granted: Discovery would be granted to Mira Oil Company in connection with the State of Objections submitted in response to the Proposed Remedial Order issued to Mira (Case No. HRO-0113).
Mar 18, 1983	Husky Oil Company/Exxon Company, U.S.A., Cities Service Company, Gulf Oil Corporation, Washington, D.C.	HEJ-0038	Protective order. If granted: Exxon Company, U.S.A., Cibes Service Company and Gulf Oil Corporation would enter into a Protective Order with Husky Oil Company regarding the release of proprietary information to Exxon, Cibes Service and Gulf in connection with the year end review of entitlements exception relief granted to Husky (Case No. BEX-0210).
Mar 21, 1983	Economic Regulatory Administration/United Petroleum Distributors, Inc., Washington, D.C.	HRW-0006	Remedial order finalization. If granted: A Proposed Remedial Order issued to United Petroleum Distributors, Inc. on December 22, 1982, would be issued as a final Remedial Order.
Do	Edward T. Cotham, Jr., Houston, Texas	HFA-0127	Appeal of an information request denial. If granted: The March 8, 1983, Freedom of Information Request Denial issued by the Office of Special Counsel would be rescinded and Edward T. Cotham, Jr. would receive access to a "Memorandum of Understanding" between the DOE and the Standard Oil Company (Indiana) concerning the applicability of that firm's Consent Order to the resolution of the *In Re the Department of Energy Stripper Well Exemption Litigation* case.
Do	Tierra Engineering Consultants, Santa Fe, New Mexico	HFA-0126	Appeal of an information request denial. If granted: The Freedom of Information Request Denial issued by the DOE Albuquerque Operations Office would be rescinded and Tierra Engineering Consultants would receive access to score sheets used in the selection of contracts No. AC-96, AC-97 and TA-39.
Mar 22, 1983	Andrew Douglas Churchman, Santa Fe, New Mexico	HFA-0128	Appeal of an information request denial. If granted: The February 17, 1983, Freedom of Information Request Denial issued by the DOE Albuquerque Operations Office would be rescinded and Andrew Douglas Churchman would receive access to opm investigative reports, which were deleted from the responsive documents.
Do	Atlantic Richfield Company/Economic Regulatory Administration, Los Angeles, California.	HRJ-0039	Motion for protective order. If granted: Atlantic Richfield Company would enter into a Protective order with the Economic Regulatory Administration regarding the release of proprietary information to Atlantic Richfield in connection with the Proposed Remedial Order issued to Atlantic Richfield (Case No. BRO-1243).
Do	Transcontinental Oil Corporation, Shreveport, LA	HEE-0062	Exception from the reporting requirements. If granted: Transcontinental Oil Corporation would not be required to file form EIA-23 "Annual Survey of Domestic Oil and Gas Reserves" for 1982.
Mar. 23, 1983	Anita Goldwasser, San Jose, California	HFA-0129	Appeal of an information request denial. If granted: The February 10, 1983, Freedom of Information Request Denial issued by the DOE Chicago Operations Office would be rescinded and Anita Goldwasser would receive access to medical records pertaining to her late husband, Samuel R. Goldwasser.
Do	Ashland Oil, Inc., Washington, D.C	HFA-0130	Appeal of an information request denial. If granted: The February 4, 1983, Freedom of Information Request Denial issued by the DOE Director of the Office of Fuels Programs would be rescinded and Ashland Oil, Inc. would receive access to documents pertaining to the Emergency Petroleum Allocation Act of 1973, the Entitlements Program and the Tertiary Incentive Program.
Do	Exxon Company, U.S.A., Washington, D.C	HED-0119	Motion for discovery. If granted: Discovery would be granted to Exxon Company, U.S.A. in connection with the Statement of Objections submitted in response to the Proposed Decision and Order issued to Husky Oil Company (Case No. BEX-0210).
Do	Department of the Interior, Washington, D.C	HEE-0063	Exception from the certification rules. If granted: The Department of the Interior would receive an exception from certain certification requirements applicable to first sellers of crude oil set forth in 10 CFR Part 212, with respect to its sales of onshore and offshore crude oil.
Mar 24, 1983	Cities Service Company, Tulsa, Oklahoma	HEH-0016	Request for evidentiary hearing. If granted: An evidentiary hearing would be convened in connection with the Statement of Objections submitted by Cibes Service Company in response to the Proposed Decision and Order issued to Husky Oil Company (Case No. BEX-0210).
Mar. 25, 1983	Economic Regulatory Administration/Camden Arco, San Francisco, California.	HRW-0007	Rededial order finalization. If granted: A Proposed Remedial Order issued to Camden Arco on March 31, 1981, would be issued as a final Remedial Order.
Do	Economic Regulatory Administration/Fakhoury Service Center, San Francisco, California.	HRW-0009	Remedial order finalization. If granted: A Proposed Remedial Order issued to Fakhoury Service Center on April 22, 1981, would be issued as a final Remedial Order.
Do	Economic Regulatory Administration/J & C Shell Service, San Francisco, California.	HRW-0008	Remedial order finalization. If granted: A Proposed Remedial Order issued to J & C Shell Service on May 29, 1981, would be issued as a final Remedial Order.
Do	SKE, Inc., Norman, Oklahoma	HFA-0131	Appeal of an information request denial. If granted: The February 23, 1983, Freedom of Information Request Denial issued by the DOE Albuquerque Operations Office would be rescinded and SKE, Inc. would receive access to a May 12, 1982, memorandum of a site visit and the DOE review of cost information submitted by SRL, Inc. in regard to DOE Grant No. DE-FG46-31AF92501.

REFUND APPLICATIONS RECEIVED WEEK OF MARCH 18 TO MARCH 25, 1983

Date	Name of refund proceeding/name of refund applicant	Case No.
Mar. 25, 1983	Sid Richardson/ Loup City Propane.	RF26-2
Mar. 21, 1983	Amoco Refund Applications.	RF21-4560 through RF21-5236

BILLING CODE 6450-01-M

Issuance of Decisions and Orders; Week of March 7 Through March 11, 1983

During the week of March 7 through March 11, 1983 the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

Mobil Oil Corporation, 3/9/83; HFA-0119

Mobil Oil Corporation (Mobil) filed an Appeal from a determination that had been issued to the firm pursuant to the Freedom of Information Act (FOIA) by the Deputy Director for Legal Analysis of the DOE's Office of Hearings and Appeals (the Deputy Director). In that determination, the Deputy Director had advised the firm that the material sought was available in specified files in OHA's Public Docket Room. In its Appeal, Mobil claimed that the agency should more specifically identify the material sought. The DOE found that documents available in a Public Reading Room are not an appropriate subject for an FOIA request. Since all of the documents are available in the OHA's Public Docket Room, the Deputy Director's determination went beyond any obligation under the FOIA. The DOE concluded that there is certainly no obligation for the agency to perform research for the firm into publicly available information. Accordingly, the Appeal was dismissed.

Skelly and Loy, 3/7/83; HFA-0117

On February 4, 1983, Skelly and Loy filed an Appeal from a partial denial by the Inspector General of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the search conducted by the Inspector General was adequate and that Skelly and Loy had been provided with the only responsive document. The DOE further noted that the Inspector General had agreed to release certain information that originally was withheld pursuant to 5 U.S.C. § 552(b)(5). Accordingly, the Appeal was granted in part.

Requests for Exception

Asamera Oil (U.S.) Inc., 3/9/83; BEE-1491

Asamera Oil (U.S.) Inc. (Asamera) filed an Application for Exception from the provisions of 10 C.F.R. § 211.67 in which the firm sought to receive additional entitlement benefits to equalize its crude oil costs with those of other domestic refiners. In considering the request, the DOE found the deterioration in Asamera's financial position in 1980 was largely attributable to the firm's reliance upon high cost uncontrolled crude oil. The DOE noted that the Entitlements Program was intended to provide the economic equivalent of access to price-controlled crude oil. Since Asamera had actual access to price-controlled crude oil at less than the national average rate, the DOE determined that exception relief was appropriate to place Asamera in the same financial position it would have been in, if it had been actually allocated price-controlled crude oil. Relief was therefore approved for the period May through December, 1980 in the amount of $1,300,109.

Rogers Fuels, Inc., 3/9/83; HEE-0054

Rogers Fuels, Inc. filed an Application for Exception in which the firm sought to be relieved of the requirement to file Form EIA-9A, No. 2 Distillate Price Monitoring Report. In considering the request, the DOE found that the firm failed to provide reasons which justify relieving it of the responsibility to file Form EIA-9A. Accordingly, exception relief was denied. The important issue discussed in the Decision and Order is whether the death of the owner of the firm justified exception relief in view of the fact that the firm had been relieved of the obligation to file Form EIA-9A for an earlier period of time on the basis of the illness then being experienced by the firm's owner.

Economic Regulatory Administration/Texaco Inc., 3/7/83; HRS-0021, HRS-0029, HRS-0030.

Economic Regulatory Administration and Texaco Inc. filed Joint Requests for Stay of Proceedings pending the Office of Hearings and Appeals. The parties asserted that they had made substantial progress toward resolving the issues in the three proceedings and that they expected the negotiations to be successful. They therefore requested an indefinite "postponement" of the proceedings. The DOE determined that the parties failed to

meet the criteria for a stay set forth at 10 C.F.R. § 205.125(b). The DOE found that public policy factors do not favor the approval of the stay because there is not certainly that the negotiations will be successful. It was also noted that the filing of submissions required under 10 C.F.R. Part 205, Subpart O was complete in all three cases and that the requests were designed to suspend any future decision-making by OHA which might in turn require some action by the parties. The DOE therefore stated that to the extent that a deadline is established in an OHA determination, the parties would be allowed to submit reasonable requests for extensions of time to comply with that deadline. Accordingly, the joint Request for Stay was denied.

Refund Applications

Standard Oil Company (Indiana)/Akin Oil Company, Inc., et al., 3/10/83; RF21–145 et al.

On December 23, 1982, the Office of Hearings and Appeals issued a Decision and Order implementing special refund procedures for the distribution of a $72,000,408 fund obtained by the DOE through a consent order with the Standard Oil Company (Indiana) (Amoco). *Office of Special Counsel,* 10 DOE ¶ 85,048 (1982). On March 10, 1983 the DOE issued a Decision and Order concerning 223 Applications for Refund filed by resellers of Amoco middle distillates. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in the December 23 Decision. In considering these applications, the DOE concluded that each of the 223 applicants should receive a refund based upon the total volume of their Amoco middle distillate purchases. The refunds granted in this proceeding totaled $150,526.

Standard Oil Company (Indiana)/Camp's Standard et al., 3/9/83; RF21–1935 et al.

On December 23, 1982, the Office of Hearings and Appeals issued a Decision and Order implementing special refund procedures for the distribution of a $72,000,408 fund obtained by the DOE through a consent order with the Standard Oil Company (Indiana) (Amoco). *Office of Special Counsel,* 10 DOE ¶ 85,048 (1982). On March 9, 1983 the DOE issued a Decision and Order concerning 168 Applications for Refund filed by retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in the December 23 Decision. In considering these applications, the DOE concluded that each of the 168 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding totaled $179,802.

Standard Oil Company (Indiana)/Gray's Amoco Service et al., 3/10/83; RF21–1856 et al.

On December 23, 1982, the Office of Hearings and Appeals issued a Decision and Order implementing special refund procedures for the distribution of a $72,000,408 fund obtained by the DOE through a consent order with the Standard Oil Company (Indiana) (Amoco). *Office of Special Counsel,* 10 DOE ¶ 85,048 (1982). On March 10, 1983 the DOE issued a Decision and Order concerning 131 Applications for Refund filed by retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in the December 23 Decision. In considering these applications, the DOE concluded that each of the 131 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding totaled $131,889.

Standard Oil Company (Indiana)/William Hawck et al., 3/11/83; RF21–2700 et al.

On December 23, 1982, the Office of Hearings and Appeals issued a Decision and Order implementing special refund procedures for the distribution of a $72,000,048 fund obtained by the DOE through a consent order with the Standard Oil Company (Indiana) (Amoco). *Office of Special Counsel,* 10 DOE ¶ 85,048 (1982). On March 11, 1983 the DOE issued a Decision and Order concerning 145 Applications for Refund filed by retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in the December 23 Decision. In considering these applications, the DOE concluded that each of the 145 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding totaled $140,208.

Standard Oil Company (Indiana)/J.L.G. Standard et al., 3/7/83; RF21–2222 et al.

On December 23, 1982, the Office of Hearings and Appeals issued a Decision and Order implementing special refund procedures for the distribution of a $72,000,408 fund obtained by the DOE through a consent order with the Standard Oil Company (Indiana) (Amoco). *Office of Special Counsel,* 10 DOE ¶ 85,048 (1982). On March 7, 1983 the DOE issued a Decision and Order concerning 122 Applications for Refund filed by retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in the December 23 Decision. In considering these applications, the DOE concluded that each of the 122 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding totaled $140,747.

Dismissals

The following submissions were dismissed:

Name and Case No.

Marie A. Asner, RF21–2095; Phillip C. Barus, RF21–1665; Rudolph J. Burich, RF21–2074; Stephen Chelap, RF21–1979; B. C. Degreeff, RF21–2564; John H. Douglas, RF21–0953; Joe Felice, Jr., RF21–1656; Lester Fisher, RF21–0036; Brian J. Foley, RF21–972; Katherine Foster, RF21–2306; John Hainline, Jr., RF21–1657; Mary A. Hillstrom, RF21–1054; George A. Hunicke, RF21–0947; Murray Isquith, RF21–1025; Thomas Kee, RF21–0976; Dorthy K. Kosmal, RF21–2113; Dennis Kunhart, RF21–0077; Patricia Kunhard, RF21–0078; Steve Kunhart, RF21–0076; F. E. Lowenstein, RF21–2108; Mary Malloy, RF21–0959; Richard O. Matson, RF21–2050; George Montgomery, RF21–1556; Max M. BILLING CODE 6450–01–M

Office of the Secretary

National Petroleum Council, Costs and Economics Task Group of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Costs and Economics Task Group of the Committee on Enhanced Oil Recovery will meet in April 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location and agenda of the Costs and Economics Task Group meeting follows:

The Costs and Economics Task Group will hold its fifth meeting on Friday, April 22, 1983, starting at 9:00 a.m., in Conference Center Six of the Hyatt Hotel—Los Angeles Airport, 6225 West Century Boulevard, Los Angeles, California.

The tentative agenda for the Costs and Economics Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review progress of Task Group study assignments.
3. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Costs and Economics Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Costs and Economics Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G. J. Parker, Office of Oil, Gas, and Shale Technology, Fossil Energy, 301/353–3032, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on April 6, 1983.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

[FR Doc. 83-9753 Filed 4-12-83; 8:45 am]

BILLING CODE 6450-01-M

National Petroleum Council, Coordinating Subcommittee of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Coordinating Subcommittee of the NPC Committee on Enhanced Oil Recovery will meet in April 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location, and agenda of the Coordinating Subcommittee meeting follows:

The Coordinating Subcommittee will hold its seventh meeting on Tuesday, April 26, 1983, starting at 8:00 a.m., in the Pavilion Room of the Rio Bravo Resort, 11200 Lake Ming Road, Bakersfield, California.

The tentative agenda for the Coordinating Subcommittee meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Discuss study assignments.
3. Review task group study assignments.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Coordinating Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Coordinating Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Gerald J. Parker, Office of Oil, Gas and Shale Technology, Fossil Energy, 301/353–2918, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on April 6, 1983.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

BILLING CODE 6450-01-M

National Petroleum Council, Thermal Task Group of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Thermal Task Group of the Committee on Enhanced Oil Recovery will meet in April 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location, and agenda of the Thermal Task Group meeting follows:

The Thermal Task Group will hold its fifth meeting on Monday, April 25, 1983, starting at 8:30 a.m., in the Division Conference Room, Getty Oil Company, 5329 Office Centre Court, Bakersfield, California.

The tenative agenda for the Thermal Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review progress of Task Group study assignments.
3. Discuss any other matters pertinent to the overall assignment from Secretary of Energy.

The meeting is open to the public. The Chairman of the Thermal Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Thermal Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G. J. Parker, Office of Oil, Gas and Shale Technology, Fossil Energy, 301/353–3032, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on April 6, 1983.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

BILLING CODE 6450-01-M

Nuclear Waste Policy Act of 1982; Public Hearings on Proposed Nomination of Sites in Salt Deposits for Detailed Site Characterization, Recommendations on Issues To Be Addressed in the Environmental Assessments and Site Characterization Plans

AGENCY: Department of Energy.

ACTION: Notice of public hearing and solicitation of comments.

SUMMARY: The U.S. Department of Energy has identified potentially acceptable sites in salt deposits for a high-level radioactive waste repository and now announces public hearings on the proposed nomination of these sites for site characterization studies pursuant to Section 113 of the Nuclear Waste Policy Act of 1982 (Pub. L. 97–425). These sites are: the Richton and Cypress Creek salt domes in Mississippi, the Vacherie salt dome in Louisiana, one or more sites in Deaf Smith and Swisher Counties in the Texas Panhandle, and sites in Davis and Lavender Canyons in southeastern Utah. The Department has decided to propose for nomination and conduct pre-nomination hearings in the vicinity of sites previsously identified as potentially acceptable in order to provide maximum opportunity for public comments to influence the nomination process. A site in basalt in Washington and one in tuff in Nevada have already been proposed for nomination. The basis for the final nomination of any site will be documented in an Environmental Assessment. The EA will reflect the pre-nomination hearing comments and include an evaluation as to whether the site is suitable for site characterization under the final siting guidelines prepared pursuant to Section 112 of the Act. The Department intends to nominate at least five sites and subsequently to recommend three of the nominated sites to the President in the fall of 1983. A site Characterization Plan will be developed if a site is approved by the President as a candidate site. A major objective of the site characterization activity will be the acquisition of geologic information necessary for the evaluation of the suitability of the sites for a repository. Site characterization activities at all candidate sites must be completed within the next four years to support a Departmental recommendation to the President and subsequent Presidential recommendation of a site for a repository to the Congress by March 31, 1987. This notice establishes the hearing dates and locations, and a public comment period to solicit: (1) Comments on the proposed nominations, (2) recommendations with respect to issues that should be included in Environmental Assessments supporting the nomination of each site, and (3) recommendations with respect to issues to be addressed in the Site Characterization Plan.

DATES AND ADDRESSES: The Hearings are scheduled for:

1. April 28, 1983, 4:00 to 10:00 p.m., Richton High School, Richton, Mississippi.
2. April 29, 1983, 2:00 p.m. to 9:00 p.m., Woolfolk State Office Building, 501 North West Street, Jackson, Mississippi.
3. May 3, 1983, 7:00 p.m. to 11:00 p.m., Monticello High School Auditorium, Monticello, Utah.
4. May 4, 1983, 2:00 to 9:00 p.m., Hotel Utah, Salt Lake City, Utah.
5. May 10, 1983, 2:00 p.m. to 9:00 p.m., Civic Center Auditorium, Minden, Louisiana.
6. May 12, 1983, 2:00 p.m. to 4:00 p.m., Auditorium, Jefferson Davis Campus, Gulf Coast Community College, Gulf Port, Mississippi.
7. Texas (to be determined).

Written requests to schedule time for oral presentation are due by five calendar days before the hearing in question. Written comments on issues being addressed in the hearing are due by May 18, 1983.

FOR FURTHER INFORMATION CONTACT: For requests to speak at the hearing, and for further information contact: J. O. Neff, U.S. Department of Energy, NWTS Program Office, 505 King Avenue, Columbus, Ohio 43201, Telephone: (614) 424–5916.

Written comments should be submitted to: J. O. Neff, U.S. Department of Energy, NWTS Program Office, 505 King Avenue, Columbus, Ohio 43201. Telephone: (614) 424–5916.

SUPPLEMENTAL INFORMATION:

Public Hearings

Hearings will be conducted by the Department of Energy in Richton, Mississippi on April 28, 1983; Jackson, Mississippi on April 29, 1983; Monticello, Utah on May 3, 1983; Salt Lake City, Utah on May 4, 1983; Minden, Louisiana on May 10, 1983; and Gulf Port, Mississippi, on May 12, 1983. The dates and locations for the Texas hearings will be provided in a future Federal Register Notice. The purpose of these hearings is to inform the public of the activities and considerations that led to these proposed nominations and to receive comments. To support site nominations, the Department of Energy will develop Environmental Assessments that address site characterization activities. Pub. L. 97–425, Section 112(b)(1)(E), identifies issues that must be addressed by the Environmental Assessment.[1] An additional purpose of the Hearings is to solicit and receive recommendations with respect to specific issues that should be addressed in the aforementioned Environmental Assessment and also specific issues that should be addressed in any Site Characterization Plan which would subsequently be issued, if and when the location is approved by the President as a candidate site for site characterization. Also, the Department intends to provide the public and the States an opportunity to review and comment on a draft of the Environmental Assessments prior to their being finalized to support the site nominations.

Presentations

Parties interested in providing oral presentations at the Hearing may request time not to exceed ten minutes for the purpose of delivering that presentation. A typewritten copy of the presentation is requested and should be delivered to the presiding officer before being presented at the Hearing. Requests for scheduled presentation must be written and mailed or delivered so as to be received at the address noted above no later than five calendar days before the hearing in question. A person scheduled to appear at the hearing will be notified by DOE of his or her participation. Requests to speak should include a telephone number where the person can be reached up to the day of the hearing.

Individuals who do not make advance requests to speak at the Hearing may register to speak with the presiding officer prior to the start of the Hearing. An opportunity to speak will be provided to these individuals if time permits. However, time for these unscheduled presentations will be limited, depending on the number of requests received and time available.

Written Comments

Parties may also submit written comments on the proposed nomination; the issues to be addressed in the Environmental Assessment; and the issues to be addressed in any Site Characterization Plan. These comments will be added to the Hearing transcript

[1] Pursuant to Section 112a, proposed general guidelines for the recommendation of sites for repositories were published in the **Federal Register** on February 7, 1983 (48 FR 5670).

and constitute the official departmental record of the Hearing. Written comments should be mailed to reach the address noted above by May 18, 1983.

Conduct of Hearing

DOE reserves the right to arrange the schedule of presentations to be heard and to establish additional procedures governing the conduct of the Hearing. Questions may be asked only by those conducting the Hearing. Cross examination of persons presenting statements will not be permitted. Any further procedural rules needed for the proper conduct of the Hearing will be announced by the presiding officer.

Transcripts of the Hearing will be made, and the entire record of the Hearing, including the transcripts, will be retained by DOE and made available for inspection at public libraries in the vicinity of the proposed site, at the public document room, DOE Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585. Any person may purchase a copy of the transcript of the Hearing from the reporter so identified by the presiding officer.

Additional copies of the complete transcripts will also be available at the public document centers noted below:

Albuquerque Operations Office, National Atomic Museum, Kirkland Air Force Base East, Albuquerque, New Mexico;
Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho;
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nevada;
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tennessee;
Richland Operations Office, Federal Building, Richland, Washington;
San Francisco Operations Office, Wells Fargo Building, 1333 Broadway, Oakland, California;
Savannah River Operations Office, Savannah River Plant, Aiken, South Carolina.

For the Department of Energy, April 7, 1983.

Donald Paul Hodel,

Secretary of Energy.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[PF–315; PH–FRL 2342–1]

Certain Companies; Pesticide and Food Additive Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide and food additive petitions, relating to the establishment, correction, and/or withdrawal of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to: Production Manager (PM) 12, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number (PF–315) and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Jay Ellenberger, 703–557–2386.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide and food additive petitions relating to the establishment, correction, and/or withdrawal of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

I. Initial Filing

FAP 3H5387. Shell Oil Co., 1025 Connecticut Ave., NW., Washington, D.C. 20036. Proposes to amend 21 CFR 193.236 by establishing a tolerance for residues of the insecticide hexakis (2-methyl-2-phenylpropyl) distannoxane in or on the commodity dried prunes at 20.0 parts per million (ppm).

II. Amendment

PP 5F1547. Mobay Chemical Corp., P.O. Box 4913, Hawthorn Rd., Kansas City, MO 64120. EPA issued a notice, published in the **Federal Register** of August 11, 1982 (47 FR 34852), that announced that Mobay Chemical Corp., filed pesticide petition 5F1547 proposing the establishment of tolerances for residues of the insecticide *O,O*-dimethyl *S*-[(4-oxo-1,2,3-benzotriazin-3(4*H*)-yl)methyl] phosphorodithioate in or on the comodities corn fodder and forage at 5 ppm and field corn grain at 0.1 ppm, which was subsequently amended increasing the level for corn grain to 0.3 ppm and establishing a tolerance for corn grain, pop at 0.3 ppm and increasing the levels for corn fodder and forage to 10.0 ppm.

The petition was further amended by proposing a tolerance for eggs at 0.05 ppm. The proposed analytical method for determining residues is by gas chromatographic procedure with a thermionic detector for phosphorus.

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348))

Dated: March 29, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[OPP–180620; PH–FRL 2341–5]

Pesticides; Emergency Exemptions; Alabama Department of Agriculture and Industry, et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests in the States listed below. Also listed are four crisis exemptions initiated by four States.

DATES: See each specific and crisis exemption for its effective dates.

FOR FURTHER INFORMATION CONTACT: See each specific and crisis exemption for the name of the contact person. The following information applies to all contact people: Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 716, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202; (703–557–1192).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. Alabama Department of Agriculture and Industry for the use of benomyl on wheat to control powdery mildew; February 25, 1983 to May 30, 1983. EPA completed a rebuttable presumption against registration (RPAR) on this chemical; the final determination was published in the **Federal Register** of October 20, 1982 (47 FR 46747). (Jim Tompkins)

2. California Department of Food and Agriculture for the use of paraquat on dry beans (including mung beans) as a desiccant; March 7, 1983 to December 31, 1983. (Gene Asbury)

3. California Department of Food and Agriculture for the use of Metalaxyl on broccoli, cauliflower, and crucifers grown for seed to control downy mildew; February 24, 1983 to December 23, 1983. California had initiated a crisis exemption for this use. (Libby Welch)

4. California Department of Food and Agriculture for the use of metalaxyl on green onions to control downy mildew; February 24, 1983 to December 30, 1983. California had initiated a crisis exemption for this use. (Libby Welch)

5. California Department of Food and Agriculture for the use of triadimefon on grapes to control powdery mildew; February 9, 1983 to December 31, 1983. EPA registered this use on January 25, 1983, but California requires a mandatory 45-day public posting of proposed pesticide registrations prior to State registration. (Gene Asbury)

6. California Department of Food and Agriculture for the use of metalaxyl on hops to control downy mildew; February 15, 1983 to January 1, 1984. (Jim Tompkins)

7. Connecticut Department of Environmental Protection for the use of azimethiphos in layer poultry houses to control flies; February 10, 1983 to December 31, 1983. (Jim Tompkins)

8. Florida Department of Agriculture and Consumer Service for the use of azimethiphos in poultry houses to control flies; February 24, 1983 to December 31, 1983. (Jim Tompkins)

9. Maryland Department of Agriculture for the use of formetanate hydrocholoride on strawberries to control two-spotted spider mites; March 7, 1983 to November 30, 1983. (Jim Tompkins)

10. Maryland Department of Agriculture for the use of acephate on non-bell peppers to control European corn borers; March 10, 1983 to October 1, 1983. (Gene Asbury)

11. Michigan Department of Agriculture for the use of oxyflurofen on dry bulb onions to control broadleaf weeds; March 4, 1983 to August 31, 1983. EPA completed a rebuttable presumption against registration (RPAR) on this chemical; the final determination was published in the **Federal Register** of June 23, 1982 (47 FR-27118). (Jim Tompkins)

12. Michigan Department of Agriculture for the use of acephate on non-bell peppers to control European corn borers; February 24, 1983 to October 1, 1983. (Jim Tompkins)

13. Michigan Department of Agriculture for the use of metolachlor on cole crops (broccoli, Brussels sprouts, cabbage, and cauliflower) to control weeds; February 17, 1983 to July 31, 1983. (Gene Asbury)

14. Nebraska Deparment of Agriculture for the use of azimethiphos in poultry houses to control flies; February 24, 1983 to December 31, 1983. (Jim Tompkins)

15. New Jersey Department of Environmental Protection for the use of acephate on non-bell peppers to control European corn borers; March 7, 1983 to October 1, 1983. (Gene Asbury)

16. New Jersey Department of Environmental Protection for the use of azinphosmethyl on carrots to control carrot weevils; March 4, 1983 to July 31, 1983. (Gene Asbury)

17. New York Department of Environmental Conservation for the use of fenamiphos on apple trees (bearing) to control nematodes; February 15, 1983 to May 31, 1983. (Gene Asbury)

18. New York Department of Environmental Conservation for the use of azinphosmethyl on carrots to control carrot weevils; February 16, 1983 to September 30, 1983. (Gene Asbury)

19. North Carolina Department of Agriculture for the use of captafol on strawberries to control anthracnose; May 1, 1983 to September 30, 1983. (Libby Welch)

20. Oregon Department of Agriculture for the use of azimethiphos in layer poultry houses to control flies at the Oregon State University Poultry Research Facility; February 10, 1983 to July 30, 1983. (Jim Tompkins)

21. Oregon Department of Agriculture for the use of chlorothalonil on wheat to control *Septoria* glume blotch; March 8, 1983 to July 31, 1983. (Gene Asbury)

22. Pennsylvania Department of Agriculture for the use of mevinphos on watercress to control aphids; March 10, 1983 to October 31, 1983. (Jim Tompkins)

23. Tennessee Department of Agriculture for the use of captafol on strawberries to control anthracnose; May 1, 1983 to September 30, 1983. (Libby Welch)

24. Washington Department of Agriculture for the use of methomyl on caneberries to control spotted cutworms, obliquebanded leafrollers, and the orange tortrix; March 7, 1983 to September 30, 1983. (Jim Tompkins)

25. Washington Department of Agriculture for the use of metalaxyl on raspberries to control root rot; February 25, 1983 to November 30, 1983. (Jim Tompkins)

26. West Virginia Department of Agriculture for the use of fenamifos on apple trees (bearing) to contol nematodes (American dagger); February 4, 1983 to April 30, 1983. (Gene Asbury)

Crisis exemptions were initiated by the:

1. Arkansas State Plant Board on February 7, 1983, for the use of temephos on the Sulfur River to control buffalo gnats (black fly). The program ended on February 12, 1983. (Gene Asbury)

2. California Department of Food and Agriculture on February 17, 1983, for the use of triforine on almonds to control brown rot. Since it was anticipated that this program would be needed for more than 15 days, California has requested a specific exemption to continue it. The need for this program is expected to last until March 15, 1983. (Libby Welch)

3. New Mexico Department of Agriculture on February 11, 1983, for the use of oryzalin on alfalfa to control foxtail grass. Since it was anticipated that this program would be needed for more than 15 days, New Mexico has requested a specific exemption to continue it. The need for this program is expected to last until April 1, 1983. (Libby Welch)

4. Texas Department of Agriculture on February 12, 1983, for the use of temephos on the Sulfur River to control buffalo gnats (black fly). The program ended on February 12, 1983. (Gene Asbury)

(Sec. 18, as amended, 92 Stat. 819 (7 U.S.C. 136))

Dated: March 28, 1983.

Certain Companies; Applications to Register Pesticide Products Containing New Active Ingredients

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register pesticide products containing active ingredients not included in any previously registered pesticide products pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATE: Comments by May 13, 1983.

ADDRESS: Written comments, identified by the document control number (OPP-30226) and the file symbol, should be submitted to: Product Manager (PM), Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: The product manager at the telephone number cited.

SUPPLEMENTARY INFORMATION: EPA received applications as follows to register pesticide products containing active ingredients not included in any previously registered pesticide products pursuant to the provisions of section 2(c)(4) of FIFRA. Notice of receipt of these applications does not imply a

decision by the Agency on the applications.

Applications Received

1. File Symbol: 3240–GA. Applicant: Bell Laboratories, Inc., Madison, WI 53704. Product name: Ouintox 11 Rat and Mouse Bait. Rodenticide. Active ingredient: 1-Alpha-hydroxycholecalciferol .001%. Proposed classification/Use: General. For use in and around buildings. (Product Manager (PM) 16-William Miller, (703–557–2600)).

2. File Symbol: 39541–EE. Applicant: Montedison USA, Inc., 1114 Avenue of the Americas, New York, NY 10036. Product name: Technical Galden Fungicide. Fungicide. Active ingredient: *N*-(2,6-Dimethylphenyl)-*N*-(phenylacetyl)-DL-alanine methyl ester 94–96%. Proposed classification/Use: General. For formulating use only. (PM 21-Henry Jacoby, (703–557–1900)).

3. File Symbol: 100–AUG. Applicant: Ciba-Geigy Corp., PO Box 18300, Greensboro, NC 27419. Product Name: CGA–12223 4E Insecticide. Insecticide. Active ingredient: *O*-(5-Chloro-1-[methylethyl]-1*H*-1,2,4-triazol-3-yl) *O,O*-diethyl phosphorothioate 46.8%. Proposed classification/Use: General. For the control of insects on turf. (PM 16-William Miller, (703–557–2600)).

4. File Symbol: 33753–R. Applicant: The Boots Co., PLC. Nottingham, NG2 3AA, U.K. Product name: Bronopol-Boots. Disinfectant. Active ingredient: 2-Bromo-2-nitro-1,3-propanediol 98%. Proposed classification/use: General. A technical product for formulating biocides. (PM 31-John Lee, 703–557–3663).

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. Except for such material protected by section 10 of FIFRA, the test data and other scientific information deemed relevant to the registration decision may be available after approval under the provisions of the Freedom of Information Act. The procedure for requesting such data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the product manager's office to ensure that the file is available on the date of intended visit.

(Sec. 3(c)(4) of FIFRA, as amended)

Dated: March 30, 1983.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

[SAB–FRL 2344–3]

Science Advisory Board; High-Level Radioactive Waste Disposal Subcommittee; Open Meeting

Under Pub. L. 92–463, notice is hereby given that a two-day meeting of the High-Level Radioactive Waste Disposal Subcommittee of the Science Advisory Board will be held in Conference Room 2117, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C., on May 2–3, 1983. The meeting will begin at 9:00 a.m. and last until 5:00 p.m. each day.

The purpose of the meeting will be to continue the review of the scientific and technical basis of the Agency's proposed rules for the management and disposal of high-level radioactive wastes. The members of the Subcommittee, and the principal issues for the Subcommittee's consideration, were announced in the **Federal Register**, Wednesday, January 5, 1983, page 509.

The agenda for the meeting, which is the fourth in a series of meetings on the proposed rules, will include review of the geochemistry/ground water transport aspect of the proposed rules, briefings by Agency personnel on various risk-assessment methods in use in the Agency, and discussions on limiting disposal options to depositories located in geologic media.

The meeting is open to the public. Any member of the public wishing to attend or obtain further information about the meeting should contact Harry C. Torno, Executive Secretary, at (202) 382–2552, or Terry F. Yosie, Staff Director, Science Advisory Board, at (202) 382–4126. Public comment will be accepted at the meeting. Written comment will be accepted in any form, and there will be opportunity for brief oral statements. Anyone wishing to make such comment must contact Mr. Torno prior to April 25, 1983, in order to be placed on the agenda.

Dated: April 6, 1983.

Terry F. Yosie,

Staff Director, Science Advisory Board.

[OPP–00164; PH–FRL 2344–7]

State FIFRA Issues Research and Evaluation Group Working Committees; Open Meetings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: There will be a two-day meeting of the Working Committee on Registration and Classification of the State FIFRA Issues Research and Evaluation Group (SFIREG) and a two-day meeting of the SFIREG Working Committee on Enforcement and Certification to discuss various aspects of pesticides. The meetings will be open to the public.

DATES: The Working Committee on Registration and Classification will meet on Tuesday and Wednesday, May 3 and 4, 1983. The Working Committee on Enforcement and Certification will meet on Thursday and Friday, May 5 and 6, 1983. The meetings of both committees will start at 8:30 a.m. each day.

ADDRESS: Both meetings will be held at: Hilton Plaza Inn, 45th and Main Sts., Kansas City, MO 64111, (816–753–7400).

FOR FURTHER INFORMATION CONTACT: Philip H. Gray, Jr., Office of Pesticide Programs (TS–766C), Environmental Protection Agency, Rm. 1115B, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–7096).

SUPPLEMENTARY INFORMATION: The meeting of the Working Committee on Registration and Classification will be concerned with the following topics:

1. Label Improvement Program—storage and disposal statement.
2. Use of termiticides at less than label rate.
3. EPA review process for section 24(c) registrations.
4. Use of vetgetable oil as a diluent in LV/ULV applications.
5. Status of the Pesticide Incident Monitoring System.
6. Issuance of tolerances based on geographically limited data.
7. Classification of small size containers of methyl bromide.
8. Release of pesticide registration data to the States.
9. The National Forest Products Association's (NFPA) proposed policy for the use of pesticides in forest nurseries and seed orchards under section 2(ee).
10. Other topics as appropriate.

The meeting of the Working Committee on Enforcement and Certification will be concerned with the following topics:

1. Termiticides—air sampling and possible tolerances.
2. Child-resistant packaging regulation and enforcement.
3. Combatting adverse publicity given to pesticides.
4. Development of a tracking system for State referrals to EPA.
5. Development of a system to inform the States and EPA when enforcement actions are taken.
6. Acceptable exposure limits for workers in areas where fumigants have been used.
7. National advertising of section 18 and 24(c) registrations.
8. Response to the Pesticide Users Advisory Committee working paper on certification.
9. NFPA's proposed policy for the use of pesticides in forest nurseries and seed orchards under FIFRA section 2(ee).
10. Priority to be given to marketplace surveillance by States.
11. The determination of environmental results measurements from enforcement programs.
12. Priority setting for enforcement needs.
13. Verbal claims concerning pesticidal use for non-registered products.
14. Modification of PTSED FIFRA Compliance Program Policy No. 12.2 "Closed Application Systems" to permit State discretion in taking enforcement action.
15. Other topics as appropriate.

Dated: April 4, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

[PF-320; PH-FRL 2344-8]

Certain Companies; Pesticide and Feed Additive Petitions; FMC Corp. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide and feed additive petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each specific petition at the address below: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number [PF-320] and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide and feed additive petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

Initial filing

1. *PP 3F2824, PP 3F2825.* FMC Corp., 2000 Market St., Philadelphia, PA 19103. Proposes amending 40 CFR Part 180 by establishing tolerances for residues of the insecticide (±) cyano (3-phenoxyphenyl)methyl (±) *cis/trans* 3-(2,2-dichloroethenyl)-2,2 dimethylocyclopropanecarboxylate in or on the raw agricultural commodities lettuce at 4.0 parts per million (ppm) (PP 3F2824) and tomatoes at 0.6 ppm (PP 3F2825). The proposed analytical method for determining residues is gas chromatography. (PM-17, Franklin Gee, 703-2690).

2. *FAP 3H5386.* FMC Corp. Proposes amending 21 CFR Part 561 by establishing a regulation permitting residues of the insecticide (±) cyano (3-phenoxyphenyl) methyl (±) *cis/trans* 3-(2,2-dichloroethenyl)-2,2 dimethylcyclopropanecarboxylate in or on dry tomato pomace at 36.0 ppm. (PM-17, Franklin Gee, 703-557-2690).

3. *PP 3F2846.* E. I. du Pont de Nemours and Company, Wilmington, DE 19898. Proposes amending 40 CFR 180.396 by establishing tolerances for the combined residues of the herbicide hexazinone [3-cylohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4, (1*H*,3*H*)-dione] and its metabolites (calculated as hexazinone) in or on the raw agricultural commodities pineapple (whole fruit) at 0.5 ppm and pineapple forage at 5 ppm. The proposed analytical method for determining residues is nitrogen selective gas chromatography. (PM-23, Richard Mountfort, 703-557-1830).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348))

Dated: April 5, 1983.

BILLING CODE 6720-01-M

FEDERAL MARITIME COMMISSION

[Docket No. 83-21; Agreement No. 5700-29]

Modification of New York Freight Bureau; Order of Investigation and Hearing

Agreement No. 5700–29 was filed for approval pursuant to section 15 of the Shipping Act, 1916 (46 U.S.C. 814), on August 24, 1981. Agreement No. 5700–29 would modify the New York Freight Bureau (NYFB) [1] conference agreement by extending the scope of the basic agreement to include inland points or ports in the United States via Atlantic and Gulf Coast ports.[2] In addition, Agreement No. 5700–29 would extend NYFB's ratemaking authority to include through and joint rates, but would allow the individual members to file their own intermodal tariffs until the Conference files an intermdal tariff or tariffs publishing joint or through water-rail and/or truck rates.[3]

Because Agreement No. 5700–29 would extend ratemaking authority, it must be justified under the *Svenska* standard.[4] Specific guidelines for determining whether requested intermodal authority is justified under *Svenska* are set forth in *U.S. Atlantic & Gulf/Australia—New Zealand Conference (Agreement No. 6200–20—Intermodal Authority)*, 21 S.R.R. 89 (1981).

The Commission conditionally disapproved the Agreement by Order issued November 18, 1982, because Proponents had not demonstrated that the proposed intermodal authority was necessary to meet a serious transportation need or that it would provide important public benefits not now available through the intermodal services provided by the individual carriers. The Commission ordered Agreement No. 5700–29 disapproved effective January 21, 1983, unless on or before January 20, 1983, one or more of the member lines of NYFB filed with the Commission's Secretary a request for further hearing. The Commission also ordered that any request for further hearing be accompanied by a detailed recital of the facts that Proponents intended to prove, a description of the evidence intended to be used to prove such facts, and an explanation why the facts Proponents intended to prove would support approval of the agreement.

On January 20, 1983, Proponents filed a "Request for Further Hearing" which set forth a detailed recital of the facts which Proponents contend that they will prove in a further hearing. These contentions, if established by probative evidence, would appear to be sufficient to support approval of the Agreement under the guidelines set forth in *Agreement No. 6200–20, supra.*

Therefore it is ordered, That pursuant to sections 15 and 22 of the Shipping Act, 1916 (46 U.S.C. 814 and 821) an investigation and hearing is instituted to determine if Agreement No. 5700–29 should be approved, disapproved or modified;

It is further ordered, That the parties listed in Appendix A attached hereto are designated as Proponents in this proceeding;

It is further ordered, That pursuant to Rule 42 of the Commission Rules of Practice and Procedure (46 CFR 502.42), the Commission's Bureau of Hearing Counsel shall be a party to this proceeding;

It is further ordered, That this matter is assigned to an Administrative Law Judge for public hearing and decision at a date and place to be hereafter determined by the Administrative Law Judge. This hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents, or that the nature of the matters in issue otherwise requires an oral hearing and cross-examination for the development of an adequate record;

It is further ordered, That Proponents shall submit two copies of their direct case to the Secretary of the Commission, and one copy to each of the parties to this proceeding, on or before a date to be determined by the Administrative Law Judge;

It is further ordered, That discovery shall be in accordance with the procedures set forth in Rule 201 of the Commission's Rules of Practice and Procedure (46 CFR 502.201), but shall not commence until the receipt by the Commission of Proponents' direct case on or before a date to be determined by the Administrative Law Judge;

It is further ordered, That after completion of such discovery, all parties shall have an opportunity to submit written rebuttal testimony in accordance with a procedural schedule to be established by the Administrative Law Judge;

It is further ordered, That persons other than those already parties to this proceeding who desire to be parties to this proceeding and to participate herein shall file a petition for leave to intervene pursuant to Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72);

It is further ordered, That notice of this Order be published in the **Federal Register**, and a copy thereof be served upon all parties named herein;

It is further ordered, That hearings in this proceeding shall commence no more than six months from the date of publication of this Order in the **Federal Register**; and

It is further ordered, That, all documents submitted by any party in this proceeding be filed in accordance with Rule 118 of the Commission's Rules of Practice and Procedure (46 CFR 502.118), as well as being mailed directly to all parties of record.

By the Commission.

Francis C. Hurney,

Secretary.

FEDERAL RESERVE SYSTEM

Federal Open Market Committee; Domestic Policy Directive of February 8–9, 1983

In accordance with § 217.5 of its rules regarding availability of information, there is set forth below the Committee's Domestic Policy Directive issued at its meeting held on February 8–9, 1983.[1]

The following domestic policy directive was issued to the Federal Reserve Bank of New York:

---

[1] NYFB IS A CONFERENCE CONSISTING OF Japan Line, Ltd.; Mitsui OSK Lines, Ltd.; Nippon Yusen Kaisha; and Yamashita-Shinnihon S.S. Co., Ltd.

[2] NYFB's basic agreement covers the all-water trade from Hong Kong, Macao and Taiwan to United States Atlantic and Gulf ports. However, the members presently provide direct all-water service only to Atlantic Coast ports.

[3] NYFB previously possessed intermodal authority but allowed it to lapse without ever having implemented it.

[4] *Federal Maritime Commission v. Aktiebolaget Svenska Amerika Linien*, 390 U.S. 238 (1968).

[1] The Record of Policy Actions of the Committee for the meeting of February 8–9, 1983, is filed as part of the original document. Copies are available upon request to The Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

The Federal Open Market Committee seeks to foster monetary and financial conditions that will help to reduce inflation further, promote a resumption of growth in output on a sustainable basis, and contribute to a sustainable pattern of international transactions. In establishing growth ranges for monetary and credit aggregates for 1983 in furtherance of these objectives, the Committee recognized that the relationships between such ranges and ultimate economic goals have been less predictable over the past year; that the current impact of new deposit accounts on growth rates of monetay aggregates cannot be determined with a high degree of confidence; and that the availability of interest on large portions of transaction accounts, declining inflation, and lower market rates of interest may be reflected in some changes in the historical trends in velocity. A substantial shift of funds into M2 from market instruments, including large certificates of deposit not included in M2, in association with the extraordinarily rapid build-up of money market deposit accounts has distorted growth in that aggregate during the current quarter.

In establishing growth ranges for the aggregates for 1983 against this background, the Committee felt that growth in M2 might be more appropriately measured after the period of highly aggressive marketing of money market deposit accounts has subsided. The Committee also felt that a somewhat wider range was appropriate for monitoring M1. Those growth ranges will be reviewed in the spring and altered, if appropriate, in the light of evidence at that time.

The information reviewed at this meeting indicates that real GNP declined in the fourth quarter because of a sharp reduction in business inventories. Final sales increased appreciably, and the rise in prices remained much less rapid than in 1981. Retail sales and housing activity have strengthened in recent months, but business fixed investment has weakened further. Nonfarm payroll employment rose in January, after an extended period of declines, and the civilian unemployment rate fell 0.4 percentage point to 10.4 percent. In recent months the advance in the index of average hourly earnings has slowed further.

The weighted average value of the dollar against major foreign currencies depreciated moderately further from mid-December to mid-January, but a subsequent appreciation has more than offset that decline. In the fourth quarter the U.S. merchandise trade deficit was close to the relatively high third-quarter rate.

Growth of M2 surged to an extraordinary pace in January, apparently reflecting shifts of funds into recently authorized money market deposit accounts. Growth of M3 accelerated, following very slow expansion in December. Growth of M1 remained rapid in January, although it was down appreciably from the average pace in other recent months. Market interest rates on U.S. Treasury obligations have risen somewhat since the latter part of December, while rates on most private market instruments are about unchanged to slightly higher. Mortgage rates have declined further.

With these understandings, the Committee established the following growth ranges: for the period from February–March of 1983 to the fourth quarter of 1983, 7 to 10 percent at an annual rate for M2, taking into account the probability of some residual shifting into that aggregate from non-M2 sources; and for the period from the fourth quarter of 1982 to the fourth quarter of 1983, 6½ to 9½ percent for M3, which appears to be less distorted by the new accounts. For the same period a tentative range of 4 to 8 percent has been established for M1, assuming that Super Now accounts draw only modest amounts of funds from sources outside M1 and assuming that the authority to pay interest on transaction balances is not extended beyond presently eligible accounts. An associated range of growth for total domestic nonfinancial debt has been estimated at 8½ to 11½ percent.

In implementing monetary policy, the Committee agreed that substantial weight would be placed on behavior of the broader monetary aggregrates, expecting that current distortions in M2 from the initial adjustment to the new deposit accounts will abate. The behavior of M1 will be monitored, with the degree of weight placed on that aggregate over time dependent on evidence that velocity characteristics are resuming more predictable patterns. Debt expansion, while not directly targeted, will be evaluated in judging responses to the monetary aggregates. The Committee understood that policy impelementation would involve continuing appraisal of the relationships between the various measures of money and credit and nominal GNP, including evaluation of conditions in domestic credit and foreign exchange markets.

For the more immediate future, the Committee seeks to maintain the existing degree of restraint on reserve positions. Lesser restraint would be acceptable in the context of appreciable slowing of growth in the monetary aggregates to or below the paths implied by the long-term ranges, taking account of the distortions relating to the introduction of new accounts. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that pursuit of the monetary objectives and related reserve paths during the period before the next meeting is likely to be associated with a federal funds rate persistently outside a range of 6 to 10 percent.

By order of the Federal Open Market Committee, April 5, 1983.

Stephen H. Axilrod,

Secretary.

[FR Doc. 83-9665 Filed 4-12-83; 8:45 am]

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Commission Determination Re Barclay Cigarettes; Amendment of Report of "Tar," Nicotine, and Carbon Monoxide Content of 208 Varieties of Cigarettes; Request for Comment on Possible Testing Modifications

AGENCY: Federal Trade Commission.

ACTION: Announcement of Commission Determination, Amendment of Past Report, and Request for Comment on Possible Testing Modifications.

SUMMARY: This document announces the Commission's determination that the present FTC testing methodology does not assess accurately Barclay cigarettes and requests comment on possible testing modifications. In accordance with this determination the Commission is amending its March, 1983 *Report of "Tar," Nicotine and Carbon Monoxide of the Smoke of 208 Varieties of Cigarettes*, 48 FR 13268 (March 30, 1983).

ADDRESS: Comments should be filed in Room 130, Federal Trade Commission, 6th & Pennsylvania Avenue, NW., Washington, D.C. 20580, no later than June 30, 1983.

FOR FURTHER INFORMATION CONTACT: Judith P. Wilkenfeld, Federal Trade Commission, Bureau of Consumer Protection, (202) 724–1499, Washington, D.C. 20580.

SUPPLEMENTRY INFORMATION: In June, 1981 the Federal Trade Commission initiated an inquiry to examine allegations that its current "tar," nicotine, and carbon monoxide testing methodology, with the specifications as set forth in the Commission's announcements of July 31, 1967, 32 FR 11178, and January 18, 1979, 44 FR 3777,

does not assess accurately Barclay cigarettes.

The Commission's inquiry has been assisted by extensive comments and scientific studies submitted by Lorillard, R.J. Reynolds and Philip Morris, as well as Brown and Williamson, the manufacturer of Barclay cigarettes. The Commission also utilized three independent consultants to review the information submitted by these companies and make recommendations to the Commission and its staff. The consultants' reports were subsequently circulated to the companies for further comment.

Based on the information developed during the inquiry, the Commission has determined that its present testing methodology for "tar," nicotine, and carbon monoxide does not measure accurately Barclay cigarettes. The Commission has therefore determined it will not accept test results based on the current FTC method as substantiation for claims made about the "tar," nicotine, and carbon monoxide content of all varieties of Barclay cigarettes.

Without a new testing methodology, precise statements as to the appropriate "tar", nicotine, and carbon monoxide rankings for Barclay cigrettes are not possible. Independent estimates by the Commission's consultants for Barclay 80's and 85's, which are ranked by the present method as 1 mg. "tar" cigarettes, range from 3 to 7 mg. "tar." Similarly, the relative delivery of nicotine and carbon monoxide of these products is greater than suggested by the present FTC tests.

The Commission is therefore amending its March, 1983 *Report of "Tar," Nicotine and Carbon Monoxide of the Smoke of 208 Varieties of Cigarettes*, 48 FR 13268, by appending copies of this Notice to the Report. By this action, the Commission does not mean to imply that Brown and Williamson, the manufacturer of Barclay cigarettes, has violated any provision of the Federal Trade Commission Act for its past use and reliance on the FTC method to assess "tar", nicotine, and carbon monoxide levels. Unless and until the Commission adopts a new testing methodology that is able to measure Barclay cigarettes accurately, however, future reports will not include test results for these cigarettes.

The Commission has further determined that there is a significant likelihood that the current testing method does not assess accurately Brown and Williamson's Kool Ultra and Kool Ultra 100's each of which uses the Actron filter design used in Barclay cigarettes. The Commission is today requesting comment on the following limited issues: (1) Are Kool Ultra and Kool Ultra 100's assessed accurately by the current FTC method? (2) If not, how should these products be assessed?

The Commission wishes to reiterate that its "tar", nicotine, and carbon monoxide data are for comparative purposes only. How much "tar", nicotine, and carbon monoxide a particular cigarette delivers depends on the way it is smoked. "Tar", nicotine, and carbon monoxide delivery per cigarette will increase if the cigarette is inhaled more deeply, or puffed more frequently, by the smoker. If consumers who switch to lower yield cigarettes change their smoking pattern, for example, by smoking more cigarettes per day, they may receive a greater yield than suggested by the FTC test results.

All ventilated filter cigarettes pose a special problem. Many "lower tar" cigarettes achieve lower yields in part by use of a ventilated filter. Perforated holes or vents on the filter allow air to mix with the smoke during puffing, thus diluting the smoke and decreasing the yield. If the holes or vents are blocked, however, delivery will increase. Consumers will only achieve the relative "tar", nicotine, and carbon monoxide yields suggested by FTC tests for ventilated filter cigarettes if they avoid blocking the holes or vents on the filter with their lips or fingers while smoking the cigarettes.

If consumers avoid blocking ventilation holes, cigarettes smoked in the same fashion will yield "tar", nicotine, and carbon monoxide in general accordance with their relative FTC rankings. The Barclay filter, however, poses a unique problem. Reduced ventilation when smoking Barclay apparently occurs inevitably and cannot be avoided by informed consumers except by use of a cigarette holder. Therefore, the Commission is taking this action to correct the "tar", nicotine, and carbon monoxide figures for Barclay cigarettes previously disclosed in the FTC's 1983 Report.

Based on the evidence obtained in this inquiry, the Commission decided in June 1982 to solicit comments on proposals to modify its testing machine so that the relative yields of all cigarettes, including Barclay, may be assessed accurately. The Commission prepared a statement that shows how it determined that it needed to explore possible testing modifications. The Commission's statement and the underlying evidence are now under seal by a court order. Several members of the cigarette industry who participated in the investigation had access to the evidence prior to the imposition of the seal. The statement and the evidence, if available, would be helpful to those parties who did not participate in the investigation in preparing informed comment in response to this notice. The Commission does not know whether or when the court order sealing the evidence will be lifted. Therefore, to avoid further delay, the Commission has decided to seek public comment now rather than waiting to see if the seal will be lifted.

The Commission is seeking comments on each of the following proposed holders for its testing machine:

(A) The MK II "Filtrona" holder, manufactured by Cigarette Components Ltd. of London and sold in the United States by American Filtrona Corp., Richmond, Virginia. This holder increases the pressure on the filter, thereby reducing air flow through the channels on the Barclay-type filter.

(B) A modified version of the Cambridge holder currently used on the machine, containing a ring of foam rubber so as to abut the mouth end of the cigarette and block the exit channels on the Barclay-type filter.

(C) A cigarette holder designed so that one or more of the ventilation channels on the Barclay filter are blocked.

Each of these holders is intended to simulate the reduction in ventilation that occurs when humans smoke Barclay. The Commission has not yet determined whether any of these modifications are technically feasible and practicable, or whether some other modification will insure that all cigarettes, including Barclay can be ranked accurately.

The Commission also is requesting comments on the following specific questions and any other issues relevant to possible modifications of its testing methodology given the Commission's determinations regarding Barclay:

(1) Which of the proposed modifications, or what other modification, would yield the most appropriate test results for all cigarettes, given the Commission's finding in this matter and the consultants' estimates of Barclay's tar delivery?

(2) How quickly and easily, and at what cost, could the Commission implement each of the proposed modifications, or any other proposed modifications?

(3) Regarding proposal (C), which would more appropriately rank Barclay cigarettes—for example, a holder blocking two channels or one blocking three channels?

(4) Does the current FTC method accurately assess the relative "tar," nicotine, and carbon monoxide of Kool Ultra and Kool Ultra 100's each of which utilizes the Actron filter utilized in

Barclay? If not, how should these products be assessed?

(5) Given the Commission's findings, what action other than modification of the testing methodology, if any, is appropriate?

(6) Would there be unintended consequences from modifying the cigarette testing method and/or machine? What effect might modification have upon possible innovation in the cigarette design?

(7) Should the Commission further examine the implications for its testing program of the issues raised by compensatory smoking behavior, including hole blocking, when consumers smoke lower "tar" cigarettes? What is the evidence that smokers use higher "tar" cigarettes differently than lower "tar" cigarettes? What is the evidence regarding the extent of hole blocking by smokers of different ventilated filter cigarettes? How does behaviorally reduced air dilution affect the relative rankings of various brands? Are there problems regarding compensatory smoking behavior which are significant enough to warrant further exploration of changes in the method, beyond those necessitated by the Commission's findings concerning Barclay? What lines of inquiry would generate the most useful information if such an examination is undertaken? For example, should the Commission explore a system of categories or "bands" of "tar" content rather than specific numerical estimates? Also, should consumers be advised that the cigarettes' actual "tar" delivery depends on how it is smoked?

In addition to responses to these questions, the Commission will carefully consider any additional research, such as studies of blood cotinine in smokers and air dilution in ventilated filter cigarettes, or other relevant information bearing on the appropriate relative rankings of these products.

By direction of the Commission.

Benjamin I. Berman,

Acting Secretary.

BILLING CODE 6750-01-M

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPMR D-195]

Public Buildings and Space; Agency Space Reduction Plan

March 28, 1983.

1. *Purpose.* This bulletin establishes the format, the data required, and the completion date for Agency Space Reduction Plans, as well as the first interim space reduction target as required by FPMR Temporary Regulation D-68, submission of space plans.

2. *Expiration date.* This bulletin expires June 30, 1983.

3. *Background.* Pursuant to the President's goal of reducing the size and cost of Government and to ensure more efficient use of space and facilities assigned to Federal agencies, FPMR Temporary Regulation D-68, was issued revising the policy and procedures governing the assignment and utilization of GSA controlled space.

FPMR 101-17.303 requires Federal agencies to develop an annual agency-wide space plan that will achieve significant reductions in GSA controlled space; when fully implemented achieve the objective of a Government-wide office space utilization rate of 135 square feet per person. GSA is responsible for establishing interim targets, approving each agency's space plan and reporting on implementation progress. This bulletin specifies the first interim target, the plan's format, and completion date.

4. *Scope.* Each Agency Space Reduction Plan must cover the entire inventory of space assigned to the agency by GSA. The plan must include a narrative summary addressing future projections of space requirements, personnel forecasts, and target office space utilization rates. Future requirements should be addressed by region and by geographic areas within the United States. Reductions and expansions of activities should be supported by planned programmatic changes or projected demographic movement. Specific goals related to organizational components of the agency should be included as applicable. Where formal Space Allocation Standards exist between GSA and the responding agency, the narrative summary should discuss the agency's intentions with respect to early reexamination of those standards in order to improve office space utilization rates.

The Agency Space Reduction Plan must also be assignment-specific; that is, it must contain a plan for all current assignments as well as space under request indicating what actions the agency plans in terms of reductions, realignments, relocations, etc. GSA will provide data on all current assignments (see paragraph 7 below) as assistance to agencies in developing their assignment-specific plans. In order to maximize savings to the Government, Agency Plans should reflect emphasis on reductions in leased space consistent with the expiration of current lease terms and early reductions in large assignments in Government-owned space. Assignment-specific plans must be submitted to GSA by returning the completed data sheets, or a reduced copy thereof, as discussed in paragraph 7.

5. *Interim target for agency space plans.* The first interim space reduction target for agencies housed in GSA controlled space is the achievement of either a minimum 10 percent reduction in their current office space utilization rate or a rate of 135 square feet per person by the end of Fiscal Year 1984. This target shall be applied to a baseline consisting of the total of all agency space assignments classified as "office space" by GSA unless the assignment is mainly for purposes other than general office activities. Examples of this type of space may include office space in warehouses, clinics, laboratories, training facilities, border stations, and the like. The justification for, and the cumulative impact of, these space assignments for purposes other than office activities must be addressed in the narrative portion of the plan and the individual assignments must be identified on a case-by-case basis. This latter requirement shall be accomplished by annotating the data sheets provided by GSA and by subtracting the total amount of such space from the agency's total office space to arrive at the baseline for space reduction. Achievement of the 135 square foot utilization rate or a *minimum* 10 percent reduction from the baseline of office space is required.

6. *Plan approval criteria.* Consistent with the objective of maximizing savings to the Government and the interim target of reducing the office space utilization rate by 10 percent by the end of FY 84, the following criteria will be used in approving Agency Space Reduction Plans.

a. Immediate reductions wherever possible with minimal alterations.

b. Initial emphasis on reductions in Government-owned space so as to provide space for relocation of activities currently housed in leased space.

c. Continued occupancy at expiring leased locations should be at the 135 square foot rate objective, unless otherwise justified.

d. Requests for space at new locations or expansion of existing assignments should conform to the 135 square foot objective.

e. Implementation time frames for planned reductions should be reasonable.

f. Phased or multiple reductions at individual assignments must be held to a minimum.

g. Where applicable, a commitment for early review and revision of any formal Space Allocation Standard that is not consistent with the objective to achieve a Government-wide office utilization rate of 135 square feet per person. In any case, this review should be completed no later than the end of the first quarter of FY 1984.

7. *Space Reduction Plan data sheets.* In order to assist agencies in preparing their assignment-specific reduction plans GSA is providing data sheets on each agency assignment. The data sheets are arranged in order of the 30 largest GSA planning communities followed by assignments in all other locations listed by region, State and city. These data sheets establish the assignment-specific planning format and they can be obtained from the GSA Public Buildings Service, Space Management Division, FTS 566–1875. Attachment A contains instructions for completing the assignment-specific portion of the Agency Space Reduction Plan.

8. *Desk Officer.* GSA agency liaison desk officers are available to assist agencies in their space reduction plans. Identification of the desk assignments can be obtained by contacting the Space Management Division, FTS 566–1875.

9. *Completion date.* Agency Space Reduction Plans are to be submitted to GSA no later than May 15, 1983.

Charles W. Sampson,

Acting Commissioner, Public Buildings Service.

Agency Space Reduction Plan

Format and Instructions for Developing Assignment Specific Plans

Overview. The detailed assignment-specific portion of the Agency Space Reduction Plan shall be completed using the space reduction plan data sheets provided by GSA. A sample data sheet is Attachment B. The data sheets have been assembled in three sections. The first section requires agencies to specify their reduction plans, location by location, first within the top 30 GSA planning communities followed by all other locations by region, State and city for all current assignments. GSA will provide data on all of the current assignments as well as current request data pertaining to each assignment, if applicable. The current assignment data will be listed according to leased locations by day of lease expiration and according to Government-owned assignments by size of office space assignment.

An assignment summary page will be included for each planning community. These summary pages will list current assignment data and each agency will be required to state how much space it will require after implementation of the reduction plan for the planning community in question.

The second part of the detailed space plan format requires agencies to examine new space requests that are not associated with any existing assignment and to specify what their plans are relative to those requests. (All other types of space requests; e.g., expansion at an existing location or a continuing requirement, will be covered in the first section.) These new space requests (which GSA refers to as Type A) will be listed, first, by those SMSA's which corresponds to the planning communities in Section 1, followed by all other locations by region, city and State. Additional Type A space requests not listed should be inserted by the responding agency, as appropriate.

The third section of the detailed space plan is a single page summary. It requires each agency to compare all current assignment data with all assignment data after all reduction plans have been implemented. This will enable GSA to ensure that all reduction plans reflect accomplishment of the interim objective of reducing the average utilization rate by 10 percent.

Detailed Instructions for Reduction Plan Data Sheets

Section I, Current Assignments in Major Planning Communities and Other Locations

Section I of the detailed portion of the Agency Space Reduction Plan requires agencies to specify their planned reductions at leased locations within the top 30 GSA planning communities. A list of the GSA planning communities is attached as Attachment C. After all leased locations are listed, assignments in Government-owned locations will be listed. The data included in Section I will be grouped into three headings: Current assignment data, proposed changes, and finally, the Agency Space Plan data. Data for the first two groupings will be provided by GSA. The third category, Agency Space Plan, must, of course, be completed by the occupant agency. Please note that outside parking is not included in the data provided by GSA, nor requested of agencies as part of their reduction plan. Following the listings for the major planning communities, similar listings for all other locations will be given. A description of the data by element number follows:

Current Assignment Data will be provided in Elements 1A through 3C.

Element 1A: Assignment location: Location of the assignment by building name, street address, and city.

Element 1B through 1D: Agency bureau, bureau code, and activity housed will be listed respectively.

Element 1E: The GSA assignment number.

Element 1F: The GSA building number.

Element 2A: The GSA lease number.

Element 2B: The GSA lease expiration date.

Element 2C: The GSA lease termination date.

Element 2D: The number of renewal options, if any, remaining on the lease.

Element 2E: The number of years in each renewal option.

Note.—For Government-owned locations there will be no printout for elements 2A through 2E.

Element 3A: Assigned space by type; i.e., office, storage, special.

Note.—Errors in square footage should be corrected by "x-ing" out the printed figures and inserting the correct figures below. Major discrepancies should be coordinated with the appropriate GSA regional office. All changes in square footage must be supported by a completed GSA Form 2972 Agency Request for Adjustment FBF SLUC Billing. This form can be completed and submitted subsequently to the submission of the Agency Space Reduction Plan. Forms should be submitted to the appropriate GSA regional office following normal procedures.

Element 3B: Personnel housed by type of space; i.e., office, storage, special.

Note.—If the personnel data are not accurate, the printed data should be "x-ed" out and the correct numbers inserted below the "x-ed" out figures. This update of the personnel figures in current assignments will take the place of GSA's annual census. The personnel definition to be used in determinig the number of personnel housed is that as found in section 101–17.003–12 of Temporary Regulation D–68, i.e., the peak number of persons to be housed in a given space assignement for which a work station must be provided. In addition to permanent Federal personnel, this may include temporaries, part time, seasonal, and contractual employees that connot share existing workstations as well as budgeted vacancies. Double and triple shift personnel are not to be included. if two employees share one workstation, only one employee is counted under personnel housed.

Element 3C: The current office space utilization rate.

Data on proposed changes, if any, will be provided for each assignment as follows:

Elements 4A through 4C: Space requested, if any, by type: i.e., office, storage, special.

Element 4D: Office personnel associated with the spce request.

Element 4E: The office utilization rate for the space request.

Element 4F: The type of space action requested; i.e.,

Expansion—new location
Expansion—same location
Continuing Requirement
Relocation
Reduction
New Construction/Renovation
Alteration

Element 4G: The GAS space request number.

Note.—When there are no proposed changes for the existing assignment, the printout will state that there are no requested space changes now in our records.

Agency Space Plan data will be required for the following elements as they pertain to the current assignment. All entries must be legible and dark enough to be reproduced. *Do not use blue ink or pencil in entering data.* Data inserted in 8A through 8J should reflect the total requirement for the activity in question. Do not insert just the amount to be reduced or increased, etc.

Elements 8A through 8C: In these blanks, the responding agency should insert the amount of space required for the subject assignment by type of space; i.e., office, storage, special.

Elements 8A through 8F: In these blanks, the responding agency should insert the amount of personnel to be housed in each type of space as indicated.

Element 8G: Insert the office utilization rate based on the plan for the particular assignment.

Element 8H: Indicate by inserting "yes" or "no" as to whether the plan reflects a relocation or collocation of this assignment. Please note, even if the space request data reflects a relocation action, please reaffirm that by responding to 8H appropriately. Also, Please provide any comments that might be helpful to GSA with respect to where, for example, the assignment should be housed after relocation, if known.

Element 8I: Insert the fiscal year and quarter you plan to submit the Standard Form 81, Request for Space, to confirm the space plan for this assignment. If already submitted, insert actual quarter and final fiscal year the SF81 was submitted to GSA. If no SF81 is required insert "2/83" to reflect the second quarter of Fy 83.

Element 8J: Insert the implementation date desired for accomplishment of the agency plan. If no change in current assignment data is planned insert "2/83"; i.e., the second quarter of FY 83.

Element 9A: Insert in the space provided comments that will assist GAS in implementing the space reduction plan for the particular assignment in question. Also as applicable, provide the justification referenced in par. 5 of this bulletin that supports an exemption for space used primarily for non-office activities.

Note.—After each planning community, summary data is requested. GSA is providing all current assignment data within the community, the responding agency must insert the "plan" data. However, the Plan data must incorporate all new space action requests as contained in Section II of the plan. See below.

Section II, Requests for New Space Not Related to an Existing Assignment

Section II is concerned with current and future space requests that are not associated with any existing assignment. GSA will provide the basic space request data for each agency in its data base, first by major SMSA, followed by all other locations. The responding agency will insert the appropriate data in the spaces provided to reflect its plan with respect to that new space request. A description of each data element in this portion of the space plan follows below. Please note that the location, i.e., city and State will appear at the top of the printout.

Element 1A: The agency bureau code will be provided.

Element 1B: The GSA space reqest number will be provided.Elements 2A through 2C: The type and amount of space requested will be provided.

Elements 2D through 2F: The personnel to be housed in each type of space will be provided.

Note.—Currently our space request file only provides for office personnel, it is planned to expand this capability to accommodate all personnel.

Element 2G: The office utilization rate of the space request will be provided. If zero office personnel is listed, the utilization rate will be listed as zero.

Elements 3A through 3C: The responding agency must insert the type and amount of space it plans to obtain for this community.

Elements 3D through 3F: The responding agency must insert the number of personnel housed by type of space; i.e., office, storage, or special.

Element 3C: The responding agency must insert the planned office utilization rate for this new space.

Element 4A: The responding agency must submit the date for which the SF81 is to be submitted to formally notify GSA of the change in the space request. If there are no planned changes in the space data provided by GSA, repeat the data listed and state the date of the SF81 already submitted by quarter and fiscal year.

Element 4B: The responding agency must insert the target implementation date for this space action.

Element 5A: The responding agency should provide any comments that will assist GSA in satisfying this request. All comments must be typed or printed. *Do not use blue ink or pencil.* Also, as applicable, provide the justification referenced in par. 5 of this bulletin that supports an exemption for space used primarily for non-office activities.

Note.—If the responding agency is aware of future requests for new space that are not listed in the plan format, the agency must include them by listing the city and State and provide the data as required in elements 1A and 3A through 5A as well as any comments, as appropriate.

Section III, Summary Data

Section III of the detailed Agency Space Reduction Plan requires summary data on the amount of space to be occupied and the overall utilization rate for the agency. GSA will provide current assignment data. The responding agency must insert the summary data for the space plan assuming full implementation of all planned space actions contained in parts I and II. Entry blanks provided for projected SLUC rates may be disregarded. For convenience purposes, this summary page has been placed at the beginning of the data sheets package.

Office of the Administrator

Advisory Board; Meeting

Notice is hereby given that the GSA Advisory Board's Subcommittee on Contracting will meet on April 18, 1983, from 10:00 a.m. to 4:00 p.m., in Room 328 of the John W. McCormack Federal Post Office/Courthouse, located on Post Office Square, Boston, Massachusetts. This session will be open to the public and will be devoted to a discussion and review of the subcommittee's efforts to assist GSA in improving its internal contracting policy formulation process, develop plans to increase the use of automated technology in procurement, and to review progress in enhancing the professionalism of the agency's contracting workforce.

Less than fifteen (15) days notice of this meeting is being provided due to scheduling difficulties.

For further information on room location or other details, contact Roger C. Dierman, Deputy Associate Administrator, on (202) 523-1141.

Charles S. Davis III,

Associate Administrator.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-83-1226]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed infromation collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410, telephone (202) 755-5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Submission of Proposed Information Collection to OMB

Proposal: Annual Housing Survey—National Sample
Office: Housing
Form number: AHS-1, AHS-2 and AHS-394(CC)
Frequency of submission: Biennially
Affected public: Individuals or Households
Estimated burden hours: 38,423
Status: Revision
Contact: Duane T. McGough, HUD, (202) 755-5060, Robert Neal, OMB, (202) 395-7316

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: March 25, 1983.

Judith L. Tardy,

Assistant Secretary for Administration.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Intent To Prepare an Environmental Impact Statement and Notice of Public Scoping Meetings for Proposed Marina Project on Swinomish Indian Reservation, Washington

AGENCY: Bureau of Indian Affairs, Department of the Interior.

ACTION: Notice of meeting.

SUMMARY: This notice advises the public that the Bureau of Indian Affairs intends to have prepared and to issue an Environmental Impact Statement (EIS) on a lease (25 CFR Part 162) of part of the Swinomish Indian Reservation in Washington for use as a marina. This notice is being published as required by the National Environmental Policy Act (NEPA) regulations (40 CFR 1501-7) to obtain information and comments from other agencies and the public on the scope of issues to be addressed in the EIS. Participation in this scoping process by all interested parties is solicited. Public scoping meetings will be held.

DATE: Two public scoping meetings will be held on May 10, 1983 at the Community Service Building, 1656 Reservation Road, Swinomish Tribal Community, LaConner, Washington. These meetings will commence at 2:00 p.m. and 7:00 p.m.

ADDRESS: Comments should be addressed to: Area Director, Bureau of Indian Affairs, Portland Area Office, P.O. Box 3785, Portland, Oregon, 97208.

FOR FURTHER INFORMATION CONTACT: Bob Taylor, Environmental Coordinator, Bureau of Indian Affairs, Portland Area Office, P.O. Box 3785, Portland, Oregon 97208, Telephone Number: (503) 231–2208; FTS 429–2208.

SUPPLEMENTARY INFORMATION: The Swinomish Tribe proposes to negotiate a lease agreement providing for the use of approximately 132 acres of reservation lands as a marina and complementary shore facilities. The Tribe's purpose in proposing this project is to diversify from the existing limited economic base of fish processing and retail business and provide additional economic development opportunity for the Tribe. Review and approval of the negotiated lease agreement by the Bureau of Indian Affairs will be required.

The proposed project, located on the Reservations' Industrial Port District will involve the dredging and disposal of approximately 50 acres of tidelands for the development of a 1,000 slip marina, and the construction of upland complementary shore facilities. The upland portion of the proposed project includes approximately 35 acres of previously filled wetlands.

The proposed project site is under Federal Trust ownership status. The 132 acre site lies on the westerly shores of the Swinomish Channel, directly north of State Highway 20. The site abuts Marches Point to the west. Padilla Bay National Estuarine Sanctuary, established by NOAA in 1982, is separated from the site by the Swinomish Channel, a navigational waterway maintained through periodic dredging operations by the U.S. Army Corps of Engineers.

The entire proposed project is located in an area of the Swinomish Reservation that is zoned Industrial. A portion of the site was developed as an Industrial Port District Under the Economic Development Administration's Industrial Development Project in 1974. Phase III of that development called for filling all remaining tribal lands south of the Burlington Northern tracks. Those remaining tribal lands consist of a tidal basin of approximately 26 acres which will be used as the dredge spoils site. The property is currently vacant.

The site is crossed by the Burlington Northern Railroad, the Anacortes water transmission pipeline, and a Puget Power transmission line.

The environmental review of this proposed project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4371 et seq.), Council on Environmental Quality regulations (40 CFR Parts 1500–1508), and the Department of the Interior procedures (516 DM 1–6) for compliance with those regulations. We estimate that a draft EIS will be made available to the public about October 1983.

The meeting site can be reached by crossing the Rainbow Bridge at LaConner and proceeding past Snee-oosh Road one-half block on right.

In accordance with the Council on Environmental Quality Regulations for implementing procedural provisions of the National Environmental Policy Act (40 CFR 1501.7, 1506.6), the purpose of the meetings will be to determine the scope of issues to be addressed in the EIS and to identify significant issues related to the proposed action. Comments may be presented orally or in writing at the public scoping meetings Written comments to supplement or in lieu of oral presentations should be received by May 9, 1983 to be included in the scoping record.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Dated: April 6, 1983

Kenneth Smith,

Assistant Secretary—Indian Affairs

BILLING CODE 4310-02-M

Bureau of Land Management

California, Resource Management Plan/Environmental Impact Statement

April 5, 1983.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of Draft Resource Management Plan/ Environmental Impact Statement.

SUMMARY: Pursuant to Section 202(f) of the Federal Land Policy and Management Act of 1976 and Section 102(c) of the National Environmental Policy Act of 1969, a Draft Resource Management Plan/Environmental Impact Statement (RMP/EIS) has been prepared for the Alturas Resource Area. The Alturas Resource Area, Susanville District, contains approximately 407,300 acres of public land located in Northeastern California, including Modoc County and the Northern portion of Lassen County. The Draft RMP/EIS examines five management plan alternatives: Maximized production; balanced use; maximized protection (including no grazing); present management (no-action); and the preferred alternative.

SUPPLEMENTARY INFORMATION:

Public Participation

Copies of the Draft RMP/EIS are available from the Alturas Resource Area Office: P.O. Box 771, Centerville Road, Alturas, California 96101, phone (916) 233–4666 and the Susanville District Office: P.O. Box 1090, 705 Hall Street, Susanville, California 96130, phone (916) 257–5381.

Written comments on the Draft RMP/ EIS should be submitted between April 15 and July 15 (90 day comment period) to Richard Drehobl, Area Manager, Bureau of Land Management, P.O. Box 771, Alturas, California 96101.

All comments concerning the adequacy of the Draft RMP/EIS will be considered in the preparation of the final RMP/EIS for the Alturas Resource Area.

FOR FURTHER INFORMATION CONTACT: Richard Drehobl, Alturas Area Manager, (916) 233–4666.

Bruce P. Conrad,

Acting State Director.

California; Filing of Plat of Survey

April 1, 1983.

1. This plat of survey of the following described land will be officially filed in the California State Office, Sacramento, California immediately:

San Bernardino Meridian, California

T. 10 N., R. 1 E.

2. This supplemental plat of section 22, T. 10 N., R. 1 E., San Bernardino Meridian, was accepted March 11, 1983.

3. The plat will immediately become the basic record for describing the land for all authorized purposes. The plat has been placed in the open files and is available to the public for information only.

4. This survey was executed to meet certain administrative needs of this Bureau.

5. All inquiries relating to this land should be sent to the California State Office, Bureau of Land Management, Federal Office Building, 2800 Cottage

Way, Room E–2841, Sacramento, California 95825.

Lakeview District Advisory Council; Meeting

Notice is hereby given in accordance with Pub. L. 94–579 and 43 CFR 1780 that a meeting of the Lakeview District Advisory Council will be held on May 12, 1983. The meeting will begin at 8:00 a.m. at the Lakeview District Office at 1000 So. Ninth St., Lakeview, Oregon.

The agenda for the meeting will include:

1. Organization and role of the District Advisory Council.
2. Asset Management/DLE's.
3. Range Program Summary (RPS) Updated.

Field tour to discuss:

4. Wilderness.
5. State Land Exchange.
6. Range Management Topics.

Interested persons may make oral statements before the Council or file written statements for the Council's consideration.

Summary minutes of the Council Meeting will be maintained in the District Office and available for public inspection (during regular business hours) within 30 days following the meeting.

Dated: April 4, 1983.

Richard A. Gerity,

District Manager.

Wyoming; Invitation for Coal Exploration License, Wyodak Resources Development Corporation

April 1, 1983.

Wyodak Resources Development Corporation hereby invites all interested parties to participate on a pro rata cost sharing basis in its coal exploration program concerning federally owned coal underlying the following described land in Campbell County, Wyoming:

6th Principal Meridian, Wyoming

T. 49 N., R. 71 W.,
Sec. 2: NW¼;
Sec. 3: E½NE¼, NE¼SE¼;

6th Principal Meridian

T. 50 N., R. 71 W.,
Sec. 35: SW¼
Containing 440.00 acres.

All of the coal in the above lands consists of unleased Federal coal within the Powder River Basin Known Recoverable Coal Resource Area. The purpose of the exploration program is to determine the quantity of coal available as well as other coal resource data.

A detailed description of the proposed drilling program is available for review during normal business hours in the following offices (under serial number W–84561): The Bureau of Land Management, 2515 Warren Avenue, P.O. Box 1828, Cheyenne, Wyoming 82001; and the Bureau of Land Management, 951 Rancho Road, Casper, Wyoming 82601.

This notice of invitation will be published in this newspaper once each week for two consecutive weeks beginning the week of April 18, 1983, and in the **Federal Register**. Any party electing to participate in this exploration program must send written notice to both The Bureau of Land Management and Wyodak Resources Development Corporation no later than 30 days after publication of this invitation in the **Federal Register**. The written notice should be sent to the following addresses: Wyodak Resources Development Corporation, 625 Ninth Street, P.O. Box 1400, Rapid City, South Dakota 57709; and the Bureau of Land Management, Wyoming State Office, Branch of Solid Minerals, P.O. Box 1828, Cheyenne, Wyoming 82001.

The foregoing notice is published in the **Federal Register** pursuant to Title 43, Code of Federal Regulations, § 3410.2–1(c)(1).

Judith A. Moffitt,

Acting Chief, Branch of Solid Minerals.

Wyoming; Invitation for Coal Exploration License, Northwestern Resources Company

April 1, 1983.

Northwestern Resources Company hereby invites all interested parties to participate on a pro rata cost sharing basis in its coal exploration program concerning federally owned coal underlying the following described land in Hot Springs County, Wyoming:

6th Principal Meridian

T. 44 N., R. 95 W.,
Sec. 5, SW¼, W½SE¼;
Sec. 6, Lots 6, 7, E½SW¼, SE¼;
Sec. 7, Lots 1, 2, W½NE¼, E½NW¼, SE¼;
Sec. 8, NE¼, N½NW¼, SE¼NW¼, S½;
Sec. 9, NW¼NW¼, S½NW¼, SW¼.

6th Principal Meridian

T. 44 N., R. 96 W.,
Sec. 1: Lots 1, 2, S½NE¼, SE¼.
Containing 2,138.85 acres.

All of the coal in the above lands consists of unleased Federal coal. The purpose of the exploration program is to determine the quantity and quality of the coal within the boundaries of the application area.

A detailed description of the proposed drilling program is available for review during normal business hours in the following offices (under serial number W–84562): The Bureau of Land Management, 2515 Warren Avenue, P.O. Box 1828, Cheyenne, Wyoming 82001; and the Bureau of Land Management, 1700 Robertson Avenue, P.O. Box 119, Worland, Wyoming 82401.

This notice of invitation will be published in this newspaper once each week for two consecutive weeks beginning the week of April 18, 1983, and in the **Federal Register**. Any party

electing to participate in this exploration program must send written notice to both the Bureau of Land Management and Northwestern Resources Company no later than 30 days after publication of this invitation in the **Federal Register**. The written notice should be sent to the following addresses: Northwestern Resources Company, c/o Thomas L. Loberg, P.O. Box 1899, Billings, Montana 59103; and The Bureau of Land Management, Wyoming State Office, Branch of Solid Minerals, P.O. Box 1828, Cheyenne, Wyoming 82001.

The foregoing notice is published in the **Federal Register** pursuant to Title 43, Code of Federal Regulations, §3410.2–1(c)(1).

Realty Action; Competitive Sale of Public Land in Bear Lake County, Idaho

The following described land has been examined, and through the development of land use decisions based on public input, it has been determined that the sale of this tract is consistent with Section 203(a) of the Federal Land Policy and Management Act of 1976. The land will be offered for sale at public auction for no less than the appraised fair market value indicated below. Both sealed and oral bids will be accepted.

Tract No. 1, 80 Acres, $17,400 Value.
T. 16 S., R. 45 E., B.M.,
Sec. 11: E½SE¼.

The above aggregates 80 acres.

Upon publication of this Notice in the **Federal Register**, the land described above will be segregated from all forms of appropriation under the public land laws, including the mining laws, but excepting the mineral leasing laws, for a period of two years, or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two-year period.

The lands will be subject to the following reservations when patented:

1. Ditches and Canals.
2. Mineral Reservation.
3. Subject to All Existing Rights.

DATE: The public auction will be held on June 14, 1983 at 1:30 p.m.

ADDRESS: The public auction will be held at the Sheriff's Building, Commissioners Annex, 50 N. Main, Paris, Idaho. Additional information concerning these lands, terms and conditions of the sale and bidding instructions may be obtained from Marvin R. Bagley, Area Manager, at the Soda Springs Resource Area Office, 490 East 2nd South, Soda Springs, Idaho or by calling (208) 547–2161 during office hours.

SUPPLEMENTARY INFORMATION: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: O'dell Frandsen, District Manager, Bureau of Land Management, 940 Lincoln Road, Idaho Falls, Idaho 83401.

Dated: April 4, 1983.

O'dell A. Frandsen,

District Manager.

BILLING CODE 4310-84-M

Bureau of Reclamation

Tualatin Project, Second Phase, Oregon; Intent To Prepare a Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior intends to prepare a draft environmental statement (ES) on the Tualatin Project, Second Phase, located on the Tualatin River in northwestern Oregon. The draft ES will be integrated with a planning report which will present actions purposed for the unit.

A feasibility study, authorized by Public Law 89–561, has investigated the potential for a multipurpose water and related land resource development. The key features of the plan would be a dam and reservoir on the Tualatin River upstream from the town of Gaston.

Implementation of the plan would provided: (1) Additional municipal and industrial water supplies; (2) increased streamflows to improve water quality in the Tualatin River; (3) a wide variety of recreation opportunities associated with the reservoir and Tualatin River; (4) water for irrigation of lands along the Tualatin River; (5) a reduction of flood damages on the Tualatin River; and (6) fish and wildlife measures.

The recommended plan is based on construction of a dam and 110,000 acre-foot reservoir at the Mount Richmond site, about 2 miles west of Gaston. The alternative plan would move the dam downstream about 1¾ miles to the Gaston site. Both the recommended plan and the alternative plan would meet the same level of needs. Development at either site would essentially inundate the town of Cherry Grove. The reasons for selecting the Mount Richmond site for the recommended plan include fewer total areas inundated, less cropland and pasture inundated, fewer archeological sites affected and fewer miles of free-flowing river lost. In addition, anadromous and resident fishery costs would be less at the recommended site, hydropower generation potential would be greater, and the reservoir resident fishing would be better.

There have been several opportunities to date for public input into the investigation and identification of potential environmental effect. A multidisciplinary public and agency team evaluated the effects of the alternative plans. In addition, the Bureau of Reclamation and other participating agencies have met numerous times with local officials and groups to discuss the project proposal. The Regional Director's field draft report on the project was released for public review in April 1980. This report included a discussion on anticipated environmental impacts and proposed mitigation measures. Comments and suggestions from the public have been used in completing the feasibility investigation.

Because of the extensive input, review, and comment received from interested agencies and individuals, on formal scoping session is planned.

Interested public entities and individuals may still obtain information on the project and provide input to the draft ES. The integrated report/draft ES is expected to be available for review and comment by July 1983.

The contact person for this draft ES is Mr. Robert A. Adair, Environmental Specialist, Bureau of Reclamation, Box 043, 550 West Fort Street, Boise, Idaho 83724, telephone (208) 334–1209.

Dated: April 7, 1983.

Robert N. Broadbent,

Commissioner.

BILLING CODE 4310–MR–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–143]

Amorphous Metal Alloys and Amorphous Metal Articles; Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. section 1337 and 19 U.S.C. section 1337a.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on March 11, 1983, under section 337 of the Tariff Act of 1930, 19 U.S.C. section 1337, and under 19 U.S.C. section 1337a, on behalf of Allied Corporation, Park Avenue and Columbia Road, Morristown, New Jersey 07960. The complaint alleges unfair methods of competition and unfair acts in the importation of certain amorphous metal alloys and amorphous metal articles into the United States, or in their sale, by reason of alleged (a) infringement of at least claims 1, 3 and 4 of U.S. Letter's Patent No. 3,856,513; (b) infringement of at least claims 1 and 2 of U.S. Letters Patent No. 4,331,739; and (c) infringement of at least claims 1, 2, 3, 5, 8 and 12 of U.S. Letters Patent No. 4,221,257. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests the Commission to institute an investigation and, after a full investigation, to issue a permanent exclusion order and a permanent cease and desist order.

Authority: The authority for instutition of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of Investigation

Having considered the complaint, the U.S. International Trade Commission, on April 6, 1983, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain amorphous metal alloys and amorphous metal articles into the United States, or in their sale, by reason of alleged (a) infringement of the claims of U.S. Letters Patent No. 3,856,513; (b) infringement of the claims of U.S. Letters Patent No. 4,331,739; and (c) infringement of the claims of U.S. Letters Patent No. 4,221,257, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—Allied Corporation, Park Avenue and Columbia Road, Morristown, N.J. 07960.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

TDK Electronics, Co., Ltd., 13–1, 1 Chome, Nichonbashi, Chuo-ku, Tokyo 103, Japan

Vacuumschmelze GmbH, Gruener Weg 37, D–6450 Hanau 1, West Germany

Hitachi, Ltd., New Marunouchi Bldg., 5–1, 1-chome, Marunouchi, Chiyoda-ku, Tokyo, Japan

Hitachi Metals, Ltd., Kishinoto Bldg., 2–1, Marunochi 2-chome, Chiyoda-ku, Tokyo, Japan

TDK Electronics Co., Ltd., 12 Harbor Park Drive, Port Washington, N.Y. 11050

M H & W International Corporation, 14 Leighton Place, Mahwah, N.J. 07430

Siemens Corporation, 186 Wood Ave. South, Iselin, N.J. 08830

Hitachi Metals International, Ltd., 1 Red Oak Lane, White Plains, N.Y. 10604

Hitachi Magnetics Corporation, Neff Road, Edmore, MI 48829

(c) Lynn Levine, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 124, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR

§ 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is avaiable for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202–523–0471.

FOR FURTHER INFORMATION CONTACT: Lynn Levine, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202–523–0419.

By order of the Commission.

Issued: April 7, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-130 (Preliminary)]

Chloropicrin From the People's Republic of China

AGENCY: United States International Trade Commission.

ACTION: Institution of a preliminary antidumping investigation and scheduling of a conference to be held in connection with the investigation.

EFFECTIVE DATE: April 6, 1983.

SUMMARY: The United States International Trade Commission hereby gives notice of the institution of a preliminary antidumping investigation under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from the People's Republic of China of chloropicrin, provided for in items 408.16, 408.29, or 425.52 of the Tariff Schedules of the United States, which is alleged to be sold in the United States at less than fair value.

FOR FURTHER INFORMATION CONTACT: Mr. George Deyman, Office of Investigations, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, telephone 202–523–0481.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted in response to a petition filed on April 6, 1983, on behalf of LCP Chemicals and Plastics, Inc. and Niklor Chemical Co., Inc., U.S. producers of chloropicrin. The Commission must make its determination in the investigation within 45 days after the date of the filing of the petition, or by May 23, 1983 (19 CFR 207.17).

Participation

Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided for in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11) not later than seven (7) days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the notice.

Service of documents

The Secretary will compile a service list from the entries of appearance filed in the investigation. Any party submitting a document in connection with the investigation shall, in addition to complying with § 201.8 of the Commission's rules (19 CFR 201.8), serve a copy of the nonconfidential version of each such document on all other parties to the investigation. Such service shall conform with the requirements set forth in § 201.16(b) of the rules (19 CFR 201.16(b), as amended by 47 FR 33682, Aug. 4, 1982).

In addition to the foregoing, each document filed with the Commission in the course of this investigation must include a certificate of service setting forth the manner and date of such service. This certificate will be deemed proof of service of the document. Documents not accompanied by a certification of service will not be accepted by the Secretary.

Written submissions.—Any person may submit to the Commission on or before May 2, 1983, a written statement of information pertinent to the subject matter of this investigation (19 CFR 207.15). A signed original and fourteen (14) copies of such statements must be submitted (19 CFR 201.8).

Any business information which a submitter desires the Commission to treat as confidential shall be submitted separately, and each sheet must be clearly marked at the top "Confidential Business Data." Confidential submissions must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6) All written submissions, except for confidential business data, will be available for public inspection.

Conference

The Director of Operations of the Commission has scheduled a conference in connection with this investigation for 9:30 a.m., on April 28, 1983, at the U.S. International Trade Commission Building, 701 E Street, NW., Washington, D.C. Parties wishing to participate in the conference should contact the staff investigator, Mr. George Deyman (202–523–0481), not later than April 26, 1983, to arrange for their appearance. Parties in support of the imposition of antidumping duties in the investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Public inspection

A copy of the petition and all written submissions, except for confidential business data, will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E. Street, NW., Washington, D.C.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure , part 207, subparts A and B (19 CFR Part 207, as amended by 47 FR 33682, Aug. 4, 1982), and part 201 subparts A thorugh E (19 CFR part 201, as amended by 47 FR 33682, Aug. 4, 1982). Further information concerning the conduct of the conference will be provided by Mr. Deyman.

This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR 207.12).

Issued: April 8, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-144]

Direct Current Brushless Axial Flow Fans; Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. section 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on March 11, 1983, under section 337 of the Tariff Act of 1930 (19 U.S.C. section 1337), on behalf of Papst Mechatronic Corporation, Aquidneck Industrial Park, Middletown, Rhode Island 02840. The complaint alleges unfair methods of competition and unfair acts in the importation of certain direct current brushless axial flow fans into the United States, or in their sale, by reason of alleged (a) infringement of claims 1, 2 and 33 of U.S. Letters Pateant No. 4,371,817; (b) infringement of claims 1, 12 and 70 of U.S. Letters Patent No. 4,322,666; and (c) infringement of claims 16 and 17 of U.S. Letters Patent No. 4,030,005. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to prevent the establishment of an efficiently and economically operated industry in the United States.

The complainant requests the Commission to institute an investigation and, after a full investigation, to issue both a permanent exclusion order and a permanent cease and desist order.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 C.F.R. 210.12)

Scope of Investigation

Having considered the complaint, the U.S. International Trade Commission, on April 6, 1983, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain direct current brushless axial flow fans into the United States, or in their sale, by reason of alleged (a) infringement of the claims of U.S. Letters Patent No. 4,371,817; (b) infringement of the claims of U.S. Letters Patent No. 4,322,666; and (c) infringement of the claims of U.S. Letters Patent No. 4,030,005, the effect or tendency of which is to prevent the establishment of an efficiently and economically operated domestic industry in the United States.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is Papst Mechatronic Corp., Aquidneck Industrial Park, Middletown, Rhode Island 02840.

(b) The respondents are the following compaines, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Matsushita Electric Industrial Co., Ltd., Daito, Osaka, Japan.

Matsushita Electric Electric Corp. of America, 1 Panasonic Way, Secaucus, New Jersey 07094.

(c) Harold Brandt, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 16, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR § 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202-523-0471.

FOR FURTHER INFORMATION CONTACT: Harold Brandt, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202-523-0498.

By order of the Commission.

[Investigation No. 337-TA-132]

Hand-Operated, Gas-Operated, Welding, Cutting, and Heating Equipment and Component Parts Thereof; Denial of Motion to Designate Investigation "More Complicated"

AGENCY: U.S. International Trade Commission.

ACTION: Denial of joint motion to designate investigation "more complicated" pursuant to 19 U.S.C. 1337(b)(1).

Authority: The authority for the Commission's disposition of this matter is contained in 19 U.S.C. 1337(b)(1) and in § 210.15 of the Commission's Rules of Practice and Procedure (19 CFR 210.15).

SUPPLEMENTARY INFORMATION: This investigation was instituted on September 29, 1982, and concerns certain hand-operated, gas-operated, welding, cutting, and heating equipment and component parts thereof. At the time of institution, complainant Victor Equipment Co. requested that the Commission conduct an expedited temporary relief proceeding. 47 FR 44172 (Oct. 6, 1982).

The temporary relief hearing commenced on December 14, 1982. On February 7, 1982, the presiding officer ("ALJ") issued an initial determination

denying temporary relief. The initial determination was appealed to the Commission and is currently under review.

On March 17, 1983, the Commission investigative attorney moved that the investigation be designated "more complicated" pursuant to 19 U.S.C. 1337(b)(1). Complainant Victor supported the motion, while respondents opposed it. On March 18, 1982, the ALJ issued a recommendation that the motion be granted and the investigation designated "more complicated" (Order No. 28).

Copies of the Commission's Action and Order and all other non-confidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Warren H. Maruyama, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0375.

By order of the Commission.

Issued: April 6, 1983.

[Investigation No. 337-TA-129]

Limited-Charge Cell Culture Microcarriers; Decision Not To Review Initial Determination

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determination (Order No. 28) amending the notice of investigation in the above-referenced investigation.

Authority: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in §§ 210.53(c) and 210.53(h) of the Commission's Rules of Practice and Procedure (47 FR 25134, June 10, 1982 and 48 FR 9242, March 4, 1983; to be codified at 10 CFR 210.53(c) and (h)).

SUPPLEMENTARY INFORMATION: On March 14, 1983, the presiding officer issued an initial determination granting the joint motion of complainants and respondents to amend the notice of investigation in the above-captioned investigation. Under § 210.54(a) of the Commission's rules the deadline for filing petitions for review expired on March 28, 1983. No petitions were filed.

Copies of the presiding officer's initial determination and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

BILLING CODE 7020-02-M

[Investigations Nos. 701-TA-187 (Final) and 731-TA-100 (Final)]

Tool Steels From Brazil and the Federal Republic of Germany; Continuation of Final Countervailing Duty Investigation

AGENCY: United States International Trade Commission.

ACTION: Continuation of final countervailing duty investigation concerning tool steels from Brazil and scheduling of a joint hearing to be held in conjunction with final investigation of certain tool steels from the Federal Republic of Germany.

EFFECTIVE DATE: March 22, 1983.

SUMMARY: On March 21, 1983, the United States Department of Commerce suspended its countervailing duty investigation concerning certain tool steels from Brazil (48 FR 11731). The basis for the suspension was an agreement by the Government of Brazil to offset completely the amount of net subsidy determined by Commerce to exist with respect to the subject products. Accordingly, pursuant to section 704(f)(1)(B) of the Tariff Act of 1930 (19 U.S.C. 1671c(f)(1)(B)), the United States International Trade Commission suspended its countervailing duty investigation on certain tool steels from Brazil. On March 22, 1983, however, a request to continue the investigation was filed by counsel for the petitioners pursuant to section 704(g)(2) of the Tariff Act (19 U.S.C. 1671(g)(2)). Accordingly, the Commission hereby gives notice of the continuation of investigation No. 701–TA–187 (Final), Certain Tool Steels from Brazil.

On March 30, 1983, the Commission announced in the **Federal Register** (48 FR 13278) that is was postponing the hearing scheduled for investigation No. 731–TA–100 (Final), Certain Tool Steels from the Federal Republic of Germany. The revised schedule for this investigation, which is identical to the schedule for 701–TA–187 (Final), Certain Tool Steels from Brazil, is set forth below.

SUPPLEMENTARY INFORMATION:

Background. On January 3, 1983, Commerce preliminarily determined that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Brazil of tool steel. On March 14, 1983, a suspension agreement was signed by the Government of Brazil. Commerce and the Commission subsequently suspended their respective investigations of the subject merchandise from Brazil. On January 12, 1983, Commerce preliminarily determined that tool steel from the Federal Republic of Germany is being sold, or is likely to be sold in the United States at less than fair value. On February 18, 1983, Commerce announced the postponement of its final determination with respect to tool steels from the Federal Republic of Germany. The Commission subsequently postponed its joint hearing scheduled for these investigations.

Revised Hearing Schedule.—The Commission will hold a joint hearing for investigations Nos. 701–TA–187 (Final) and 731–TA–100 (Final), Certain Tool Steels from Brazil and from the Federal Republic of Germany, beginning at 10 a.m. on June 7, 1983, at the U.S. International Trade Commission Building, 701 E Street, NW., Washington, D.C. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on May 20, 1983. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs (not later than June 1) and attend a prehearing conference to be held at 10 a.m. on May 25, 1983 in room 117 of the U.S. International Commission Building. Posthearing briefs and written statements should be filed on or before June 17, 1983. Commerce has advised the Commission that it will make its final determinations in these investigations by May 27, 1983. The Commission would then be required to make its final injury determinations within 45 days of this date, or July 11, 1983.

This notice amends the investigation schedules set forth in the Commission

notices of January 26, 1983 (48 FR 3665) and February 2, 1983 (48 FR 4744).

FOR FURTHER INFORMATION CONTACT: Mr. Stephen P. Miller (202–523–305), Office of Investigations, U.S. International Trade Commission.

By order of the Commission.

Issued: April 4, 1983.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Finance Applications; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

PHANTOM FREIGHTERS, INC.—Purchase exemption—SMITH MOTOR XPRESS, INC. MC–F–15218. Phantom Freighters, Inc. (No. MC–165681), seeks an exemption from the requirements under section 11343 of prior regulatory approval for the purchase of a portion of the operating rights of Smithway Motor Xpress, Inc. (No. MC–138627), authorizing the irregular-route, motor common carrier transportation of (1) foodstuffs, between points in Webster County, IA, on the one hand, and, on the other, points in the U.S., (2) clay, concrete, glass or stone products, and building materials, between points in IA, OH, and PA, on the one hand, and, on the other, points in 12 specified States, (3) general commodities (with an exception), between points in Polk County, IA, on the one hand, and, on the other, points in the U.S., and (4) metal products and building materials, between points in 19 specified States, on the one hand, and, on the other, points in the U.S. Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423, and (2) Petitioner's representative: Arlyn L. Westergren, Suite 201, 9202 West Dodge Rd., Omaha, NE 68114. Comments should refer to No. MC–F–15218.

[FR Doc 83–9899 Filed 4–12–83; 8:45 am]

BILLING CODE 7035–01–M

[No. 39142]

Motor Carriers; Horizon Transport, Inc.; Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Horizon Transport, Inc., a motor contract carrier, has requested an exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted for future as well as existing contracts.

DATES: Comments are due April 28, 1983. The sought relief will become final May 13, 1983, unless the Commission issues a further decison withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: Room 2139, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Robin Williams, (202) 275–7697, or Howell I. Sporn, (202) 275–7691.

SUPPLEMENTARY INFORMATION: Section 10702(b) of the Interstate Commerce Act requires contract carriers to file with the Commission actual and minimum rates for the transportation they provide. Section 10761 prohibits transportation without a tariff on file with the Commission, and section 10762 sets forth general tariff requirements including authority to file only minimum rates. Each of these sections authorizes the Commission to grant exemptions to contract carriers when relief is consistent with the public interest and the transportation policy of section 10101. 49 U.S.C. 10702(b), 10761(b), and 10762(f).

Petitioner holds a single permit (No. MC–150927F) which authorizes the transportation of building materials and contractor's equipment, lumber and forest products, feed and fertilizer, and baling twine, between points in the United States, under contract with one shipper. Petitioner describes itself as a wholly-owned subsidiary of the contracting shipper and, under its contract carrier authority, exclusively hauls products of the parent company.

We see no reason to deny this carrier the savings to be realized from a tariff filing exemption.[1] It appears that exemption of this carrier from the requirements that it file tariffs covering its contract operations is consistent with the public interest and the transportation policy of 49 U.S.C. 10101.

We further conclude that an exemption is justified for future contracts and services. Previously we consistently denied exemptions for future contracts and services. We found that because the terms and scope of those contracts are unknown, any exemption of future contracts could only be based on general findings about the continuing need for contract filing requirements for any contract carrier. However, after weighing the advantages and disadvantages to the parties involved and to the public, we conclude that the exemption of this carrier from the requirement that if file tariffs governing its future contract operations, is warranted.[2] The requirement that a contract carrier file a separate exemption request for each new contract is unduly burdensome and time-consuming for both the carrier and the Commission. We also recognize that, for this carrier and its contract shippers, the savings to be realized from a tariff filing exemption for future contracts will be just as real and just as important as those realized from an exemption for existing contracts. Moreover, allowing this contract carrier to participate more freely in the marketplace is in the public interest and is consistent with the national transportation policy.

We provisionally grant petitoner exemption from the contract carrier tariff filing requirements for future as well as existing contracts. If we receive timely filed adverse comments, we will issue a further decision addressing them and deciding whether this provisional approval ought to be withdrawn or permitted to become final.

This action does not significantly affect either the quality of the human environment or conservation of energy resources. However, comments may be submitted on these issues.

Authority: 49 U.S.C. 10702(b), 10761(b), and 10762(f).

Decided: April 4, 1983.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this

---

[1] A proceeding to investigate the exemption of motor contract carriers on an industry-wide basis has been instituted in Ex Parte No. MC–165, *Exemption of Motor Contract Carriers from Tariff Filing Requirements*, 47 FR 57303 (December 23, 1982).

[2] See No. 38983, *Red & Tan Tours—Petition for Exemption from Tariff Filing Requirements*, decided February 24, 1983.

Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 30116]

Motor Carriers; Southeastern Wisconsin Transportation Corp.; Exemption, Issuance of Notes

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission has exempted the issuance of securities by the Southeastern Wisconsin Transportation Corporation in the amount of $150,000.

DATES: This exemption will become effective on May 13, 1983. Petitions to stay must be filed by April 25, 1983, and petitions for reconsideration must be filed by May 3, 1983.

ADDRESSES: Send pleadings referring to Finance Docket No. 30116 to: (1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423. (2) Petitioner's representative: Francis G. McKenna, Suite 707, 1000 Connecticut Ave. N.W., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write T.S. InfoSystems, Inc., Room 2227, Interstate Commission, Washington, DC 20423, or call 289-4357 (D.C. metropolitan area) or toll free (800) 424-5403.

Decided: April 7, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83-9692 Filed 4-12-83; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decision; Decision-Notice

90-Day Intrastate Motor Common Carriers of Passengers. The following applications, filed on or after November 19, 1982, are governed by Part 1168 of the Commission's Rules of Practice. See 49 CFR Part 1168, published in the **Federal Register** on November 24, 1982, at 47 FR 53275. For compliance procedures, see 49 CFR 1168.6 and 49 U.S.C. 10922(c)(2)(E).

Persons wishing to oppose an application must follow the rules under 49 CFR Part 1168. In addition to fitness grounds, applications may be opposed on the grounds that the transportation to be authorized would directly compete with a commuter bus operation and would have a significant adverse effect on all commuter bus service in the area in which the competing service will be performed. Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 25 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 30 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are filed under 49 U.S.C. 10922(c)(2)(A) for authority to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant has interstate, regular-route authority on November 19, 1982.

For the following, please direct status calls to Team 1 at 202-275-7992.

Volume No. OP1-124

Decided: April 7, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier. (Member Fortier not participating.)

MC 149081 (Sub-5), filed March 28, 1983. Applicant: SUBURBAN TRAILS, INC., 750 Somerset Street, New Brunsick, NJ 08901. Representative: Michael J. Mazano, 99 Kinderkamack Road, Westwood, NJ 07675; (201) 666-5111. Applicant seeks authority in intrastate commerce to conduct service at all intermediate points on routes in No. MC-149081 and MC-149081 (Sub-Nos. 1 and 2), as follows: (a) In No. MC-149081 (Sub-No. 2), over all of the routes in their entirety which traverse New Jersey, (b) in No. MC-149081, over all the routes in their entirety in parts (2), (3), and (4) therein which traverse New Jersey and, in part (1), between the New York-New Jersey state line and the New Jersey-Pennsylvania state line, and (c) in No. MC-149081 (Sub-No. 1), over all of the routes in their entirety in parts (2), (3), and (4) therein whch traverse New Jersey and, in part (1) between Plainsboro, NJ and the New Jersey-New York state line.

For the following, please direct status calls to Team 5 at 202-275-7289.

Volume No. OP5-169

Decided: April 5, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC 57298 (Sub-14), filed March 22, 1983. Applicant: TRAILWAYS TEXAS, INC., 1500 Jackson St., Dallas, TX 75201. Representative: George W. Hanthorn, (same address as applicant.) Dallas, TX 75201; (214) 655-7937. Applicant seeks authority in intrastate commerce to conduct service at all intermediate points on the route in MC-57298 (Sub 11) as follows: Over U.S. Hwy 90, between San Antonio and Del Rio, TX.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representatives of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decision; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of applications may have been modified

prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 2, (202) 275–7030.

Volume No. OP2–164

Decided: April 6, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier. (Member Fortier not participating.)

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register.**

An original and one copy of petition for leave to intervene must be filed with the Commission within 30 days after the date of this **Federal Register** notice addressing specifically the issue(s) indicated as the purpose for republication.

Agatha L. Mergenovich,

Secretary.

Volume No. OP3–152

Decided: April 7, 1983.

MC 119774 (Sub-116) (Republication) filed August 11, 1981, published in the **Federal Register** issue of September 2, 1981, and republished this issue. Applicant: EAGLE TRUCKING COMPANY, P.O. Box 471, Kilgore, TX 75662. Representative: Bernard H. English, 6270 Firth Road, Fort Worth, TX 76116, (817) 731–8431. A Decision of the Entire Commission, decided March 10, 1983, and served March 17, 1983 finds that the performance by applicant of the service described herein to operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting general commodities (except classes A and B explosives), between points in the United States; that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to remove the facilities restriction and to show full nationwide authorization for the transportation of general commodities has been warranted.

Volume No. OP5–165

MC—163528 (Republication), filed October 4, 1982, published in the **Federal Register** issue of November 1, 1982, and republished this issue. Applicant: QUARRY TRANSPORT CO., INC., 11 S 22 Madison Street, Hinsdale, IL 60521. Representative: Albert A. Andrin, Suite 3520, 180 North LaSalle Street, Chicago, IL 60601. An Order of the Commission, Review Board 3, decided February 23, 1983, and served March 3, 1983, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *commodities in bulk* between points in Illinois, Indiana, Michigan, Missouri, Iowa, and Wisconsin, and (2) *waste or scrap materials not identified by industry producing,* between points in Illinois, Indiana, and Michigan, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the applicant's actual grant of authority.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

The following restriction removal applications, are governed by 49 CFR Part 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminary, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

Agatha L. Mergenovich,

Secretary.

Please Direct Status Inquiries to Team 2, at (202) 275-7030

Volume No. OP2-162

Decided: April 6, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 143193 (Sub-3X), filed March 28, 1983. Applicant: GORDON POCH COMPANY, INC., Route 1, Hwy 33, Horicon, WI 53032. Representative: James A. Spiegel, Olde Towne Office Park, 6333 Odana Rd., Madison, WI 53719, 608-273-1003. BILLING CODE 7035-01-M

Motor Carrier; Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicted, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F-253

The following applications were filed in Region I: Send protests to Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

BILLING CODE 7035-01-M

[Ex Parte No. 387]

Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway (202) 275–7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Sub-No.	Name of railroad, contract No. and specifics	Review Board [1]	Decided date
891	Norfolk and Western Railway Co., ICC-NW-C-6015, (Bituminous coal) via Port of Lamberts Point, VA	1	4-6-83
892	Norfolk and Western Railway Co., ICC-NW-C-0010, Supplement 2, (Iron or steel bars)	2	4-6-83
893	The Baltimore and Ohio Railroad Co., ICC-BO-C-0023, (Copper)	3	4-6-83
894	Norfolk and Western Railway Co., ICC-NW-C-0055, (Grain and soybeans)	1	4-6-83

[1] Review Board No. 1, Members Parker, Chandler, and Fortier; Review Board No. 2, Members Carleton, Williams, and Ewing; Review Board No. 3, Members Krock, Joyce, and Dowell.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10505)

[Docket No. AB-39 (Sub-No. 3)]

Rail Carriers: St. Louis Southwestern Railway Co. and St. Louis Southwestern Railway Co. of Texas; Abandonment; in Cherokee and Angelina Counties, TX; Findings

The Commission has issued a certificate authorizing the St. Louis Southwestern Railway Company and the St. Louis Southwestern Railway Company of Texas to abandon the 40.13 mile rail line between Rusk (milepost 594.00) and Keltys (milepost 634.13) in Cherokee and Angelina Counties, TX. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicants, with copies to Mr. Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC. 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10 days.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

BILLING CODE 7035-01-M

[Order No. P-50]

Rail Carriers; Passenger Train Operation; Western Pacific Railroad Co.

It appearing, that the National Railroad Passenger Corporation (Amtrak) has established through passenger train service between Seattle, Washington and Los Angeles, California. The operation of these trains requires the use of tracks and other facilities of Southern Pacific Transportation company (SP). A portion of the SP tracks at Gibson, California, are temporarily out of service because of a derailment. An alternative route is available via the Western Pacific Railroad Company between Sacramento and Bieber, California.

It is the opinion of the Commission that the use of such alternate route is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered

(a) Pursuant to the authority vested in me by order of the Commission decided April 29, 1982, and of the authority vested in the Commission by Section 402(c) of the Rail Passenger Service Act of 1970 (45 U.S.C. 562(c)), the Western Pacific Railroad Company (WP), is directed to operate trains of the National Railroad Passenger Corporation (Amtrak) between a connection with Southern Pacific Transportation Company (SP) at Sacramento, California and Bieber, California.

(b) In executing the provisions of this order, the common carriers involved shall proceed even though no agreements or arrangements now exist between them with reference to the compensation terms and conditions applicable to said transportation. The compensation terms and conditions shall be, during the time this order remains in force, those which are voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, the compensation terms and conditions shall be as hereafter fixed by the Commission upon

petition of any or all of the said carriers in accordance with pertinent authority conferred upon it by the Interstate Commerce Act and by the Rail Passenger Service Act of 1970, as amended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(d) *Effective date.* This order shall become effective at 8:15 p.m., March 27, 1983.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., March 28, 1983, unless otherwise modified, amended, or vacated by order of this Commission.

This order shall be served upon the Western Pacific Railroad Company and upon the National Railroad Passenger Corporation (Amtrak), and a a copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., March 27, 1983.

Interstate Commerce Commission.

John H. O'Brien,

Agent.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Office of the Attorney General

Proposed Consent Order in Action Alleging Violations of State and Federal Regulations Applicable to the Transportation, Storage, and Disposal of Hazardous Wastes

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on March 31, 1983, a proposed consent order in *United States* v. *Monochem, Inc., et al.*, Civil Action No. 8-81-64, was lodged with the United States District Court for the Southern District of Texas, Brownsville Division. The proposed consent order provides for injunctive relief and a monetary penalty with respect to alleged violations of State and federal regulations applicable to the storage of hazardous waste by a commercial warehouse facility located in Hidalgo, Texas.

The Department of Justice will receive, for thirty (30) days from the date of publication of this notice, written comments relating to the proposed order. Comments should be addressed to F. Henry Habicht, Acting Assistant Attorney General, Land and Natural Resources Division, U.S. Department of Justice, Washington, D.C. 20530, and refer to *United States* v. *Monochem, Inc., et al.*, D.J. Ref. 90-7-1-194.

The proposed consent order may be examined at the Office of the United States Attorney, Room 1200, United States Courthouse, 515 Rusk Street, Houston, Texas 77002; at the Region VI Office of the Environmental Protection Agency, Office of Regional Counsel, 28th Floor, 1201 Elm Street, Dallas, Texas 75270; and at the Environmental Enforcement Section, Land and Natural Resources Division, U.S. Department of Justice (Room 1515), Ninth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed consent order may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, U.S. Department of Justice.

F. Henry Habicht II,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-313]

Arkansas Power & Light Co., Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 74 to Facility Operating License No. DPR-51, issued to Arkansas Power and Light Company (the licensee), which revised the Technical Specifications (TSs) for operation of Arkansas Nuclear One, Unit No. 1 (ANO-1) located in Pope County, Arkansas. The amendment is effective as of the date of issuance.

The amendment revises the TSs to allow the Acoustic Emission method for the inservice volumetric examination of the reactor coolant pump flywheels.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior Public notice of this amendment was not required

since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The licensee's application for amendment dated February 22, 1979, as supplemented August 18, November 30, and December 23, 1982, and February 15, 1983, (2) Amendment No. 74 to License No. DPR–51, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Arkansas Tech University, Russellville, Arkansas. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of April 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch #4, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50–237]

Commonwealth Edison Co.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 75 to Provisional Operating License No. DPR–19, issued to Commonwealth Edison Company (the licensee), which revised the License and Technical Specifications for operation of the Dresden Nuclear Power Station, Unit 2 (the facility), located in Grundy County, Illinois. The amendment is effective as of the date of issuance.

The amendment approves changes to the License and Technical Specifications to support Cycle 9 operation of the facility using reload fuel supplied by, and the associated analyses performed by the Exxon Nuclear Company. The amendment also modifies technical specifications to: (1) Allow full-time operation utilizing hydrogen addition to the primary coolant; (2) change the floor drain leakage detection program; (3) change the pressure setpoints for three safety relief valves; and (4) allow removal of a safety-related snubber in order to maximize the efficiency of the pipe support system.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this action was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The applications for amendment dated December 21, 1982, February 1 and 7, and March 24, 1983 as supplemented by letters dated February 24, and March 10, 11, 18, and 31, 1983, (2) Amendment No. 75 to License No. DPR–19, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, Washington, D.C. 20555 and at the Morris Public Library, 604 Liberty Street, Morris, Illinois. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 7th day of April 1983.

BILLING CODE 7590-01-M

[Docket Nos. 50–213, 50–245 and 50–336]

Connecticut Yankee Atomic Power Co.; Northeast Nuclear Energy Company, et. al.; Issuance of Amendments to Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 55 to Facility Operating License No. DPR–61 issued to Connecticut Yankee Atomic Power Company for the Haddam Neck Plant and Amendment Nos. 90 and 84 to Provisional Operating License No. DPR–21 and Facility Operating License No. DPR–65, respectively, issued to The Connecticut Light and Power Company, The Hartford Electric Light Company, Western Massachusetts Electric Company and Northeast Nuclear Energy Company for the Millstone Nuclear Power Station, Units 1 and 2. The amendments revise the licenses for operation for the facilities. Haddam Neck is located in Middlesex County, Connecticut and Millstone Station is located in the Town of Waterford, Connecticut. The amendments are effective as of their date of issuance. However, the approved plans are to be implemented within 30 days of the date of issuance.

The amendments add license conditions to include the Commission-approved Safeguards Contingency Plan as a part of the licenses.

The licensees' filings, which have been handled by the Commission as applications, comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made apppropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

The Connecticut Yankee's filing dated March 31, 1982 and a revision thereto dated November 24, 1982, and the filing by Northeast Nuclear Energy Company dated June 2, 1982, consist of Safeguards Information and are being protected from unauthorized disclosure pursuant to 10 CFR 73.21.

For further details with respect to these actions, see: (1) Amendment No. 55 to License No. DPR–61 and Amendment Nos. 90 and 84 to License Nos. DPR–21 and DPR–65, respectively and (2) the Commission's related letter of transmittal dated April 5, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, the Russell Library, 119 Broad Street, Middletown, Connecticut 16457 and at the Waterford

Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut. A copy of items (1) and (2) may be obtained upon request to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 5th day of April 1983.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch No. 5, Division of Licensing.

BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget Review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) the following information collection requirements for reclearance under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission: Reclearance.

2. The title of the information collection: NRC Form 4, Occupational External Radiation Exposure History.

3. The form number if applicable: NRC-4.

4. How often the collection is required: On occasion.

5. Who will be required or asked to report: NRC Licensees.

6. An estimate of the number of responses: 37,200.

7. An estimate of the total number of hours needed annually to complete the requirement or request: 37,200.

8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: 10 CFR Part 20 establishes standards for protection against radiation hazards for all NRC Licensees. NRC Form 4 is used to keep records of the occupational exposure of individuals to ensure that the accumulated exposure does not exceed regulatory limits.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street N.W., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer Jefferson B. Hill, (202) 395-7340.

NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Maryland this 6th day of April 1983.

For the Nuclear Regulatory Commission.

Patricia G. Norry,

Director, Office of Administration.

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission..

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) the following information collection requirements for reclearance under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission: Revision.

2. The title of the information collection: 10 CFR 70.32(e) "Changes in Physical Security Plans; Licensees Possessing or Using Special Nuclear Material of Moderate and Low Strategic Significance."

3. The form number if applicable: NA.

4. How often the collection is required: On occasion.

5. Who will be required or asked to report: NRC Licensees.

6. An estimate of the number of responses: 57.

7. An estimate of the total number of hours needed annually to complete the requirement or request: 57.

8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: The final rule would allow licensees possessing special nuclear material of low and moderate strategic significance to make minor changes to their physical security plans without having to file a license amendment.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street NW., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395-7340.

BILLING CODE 7590-01-M

[Docket No. 50-334]

Duquesne Light Co.; Ohio Edison Co.; Pennsylvania Power Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 67 to Facility Operating License No. DPR-66 issued to Duquesne Light Company, Ohio Edison Company, and Pennsylvania Power Company (the licensees), which revised Technical Specifications for operation of the Beaver Valley Power Station, Unit No. 1 (the facility) located in Beaver County, Pennsylvania. The amendment is effective as of the date of issuance.

The amendment changes the Technical Specifications on the membership and responsibilities of the Onsite Safety Committee and Offsite Review Committee.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated December 6, 1982, (2) Amendment No. 67 to License No. DPR-66 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of April 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

Gulf States Utilities Co., et al. (River Bend Station, Units 1 and 2); Prehearing Conference Order

April 5, 1983.

Pursuant to 10 CFR § 2.751a, and the telephone request of counsel for the State of Louisiana concerning the prehearing conference date, his oral representation that none of the parties objected to a change in the date, and upon consideration of the entire record in this matter, it is this 5th day of April, 1983, Ordered:

1. That the prehearing conference shall commence at 9:30 a.m. on Tuesday, June 7, 1983 in Courtroom 801 of the State District Court, 19th Judicial District, Governmental Bldg., 222 St. Louis Street, Baton Rouge, LA 70801, and continue from day to day until completed;

2. That limited appearances will not be entertained at that time but will be scheduled to take place at a future date; and

3. That, in addition to the matters prescribed in section 2.751a, the parties indicated shall be prepared to discuss and, where appropriate, stipulate the following matters:

a. The Staff shall be prepared to state as precisely as possible the dates when the Safety Evaluation Report and its first supplement and the Final Environmental Statement will issue, identifying in some detail what subject matter may be missing from, or incomplete in those documents at the time of issuance;

b. Applicant shall be prepared to report on the status of Unit 2 and its relationship to this proceeding;

c. Intervenors and the State of Louisiana shall consult and prepare to state the extent to which their respective contentions can and should be consolidated;

d. The nature, extent, and timing of any discovery that may become necessary; and

e. The date when any or all of such matters as may be at issue would be ripe for hearing.

The service list is the most current and shall be used by all parties.

For the Board.

B. Paul Cotter, Jr.,

Administrative Judge.

BILLING CODE 7590-01-M

[Docket No. 50-331]

Iowa Electric Light and Power Company, et al.; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No 85 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revises the Technical Specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of the date of issuance.

This change to the Technical Specifications allows the licensee to change the trip level setting requirements for the residual heat removal and core spray pump discharge pressure interlock.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated November 18, 1982, (2) Amendment No. 85 to License No. DPR-49, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Cedar Rapids Public Library, 426 Third Avenue, SE., Cedar Rapids, Iowa 52401. Iowa Electric Light and Power Company, et al.; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 86 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revises the Technical Specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of its date of issuance.

This change to the Technical Specifications establishes revised vessel level setpoints that are consistent with a new common instrument zero level.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated December 13, 1982, (2) Amendment No. 86 to License No. DPR-49, and (3) the Commission's related Safety Evalution. [Docket No. 50-410]

Niagara Mohawk Power Corp.; Rochester Gas & Electric Corp.; Central Hudson Gas & Electric Corp.; New York State Electric & Gas Corp.; Long Island Lighting Co.; Notice of Receipt of Antitrust Information

The captioned applicants have submitted antitrust information in conjunction with their application for an operating license for a boiling water nuclear reactor known as Nine Mile Point Nuclear Station, Unit 2, located on the southeast shore of Lake Ontario, Oswego County, New York. The data submitted contains antitrust information for review pursuant to NRC Regulatory Guide 9.3 necessary to determine whether there have been any significant changes since the completion of the antitrust review at the construction permit stage.

On completion of the staff's antitrust review, the Director of Nuclear Reactor Regulation will issue an initial finding as to whether there have been "significant changes" under section 105c(2) of the Atomic Energy Act. A copy of this finding will be published in the **Federal Register** and will be sent to the Washington, D.C. and local public document rooms and to those persons providing comments or information in response to this notice. If the initial finding concludes that there have not been any significant changes, requests for reevaluation may be submitted for a period of 30 days after the date of the **Federal Register** notice. The results of any reevaluation that is requested will also be published in the **Federal Register** and copies sent to the Washington, D.C. and local public document rooms.

A copy of the general information portion of the application for an operating license and the antitrust information submitted is available for public examination and copying for a fee at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. 20555, and at the local public document room at the Penfield Library, State University College at Oswego, Oswego, New York 13126.

Any person who desires additional information regarding the matter covered by this notice or who wishes to have his views considered with respect to significant changes related to antitrust matters which have occurred in the applicants' activities since the construction permit antitrust review should submit such request for information or views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Section Leader, Antitrust and Economic Analysis Section, Site Analysis Branch, Office of Nuclear Reactor Regulation, on or before May 18, 1983.

Dated at Bethesda, Maryland this 6th day of April 1983.

BILLING CODE 7590-01-M

[Docket Nos. 50-259/260/296]

Tennessee Valley Authority; Notice of Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) is issued Amendment Nos. 87, 84 and 58 to Facility Operating License Nos. DPR-33, DPR-52 and DPR-68 issued to the Tennessee Valley Authority (the licensee), which revised Technical Specifications for operation of the Browns Ferry Nuclear Plant, Units, 1, 2 and 3. The amendments are effective as of the date of issuance.

The amendments delete the Appendix B Environmental Technical Specifications (ETS) which pertain to non-radiological water quality-related requirements, as required by the Federal Water Pollution Control Act Amendments of 1972.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendments is a ministerial action required as a matter

of law and will not result in any significant environmental impact and pursuant to 10 CFR 51.5(d)(4), an environmental impact statement, or negative declaration and environmental impact appraisal, need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see: (1) The application for amendments dated February 11, 1983, (2) Amendment Nos. 87, 84, and 58 to Facility Operating License Nos. DPR–33, DPR–52, and DPR–68 and (3) the Commission's letter to the licensee dated March 11, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Athens Public Library, South and Forrest, Athens, Alabama. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Vermont Yankee Nuclear Power Corp.; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 76 to Facility Operating License No. DPR–28, issued to Vermont Yankee Nuclear Power Corporation which revised Technical Specifications for operation of the Vermont Yankee Nuclear Power Station (the facility) located near Vernon, Vermont. The amendment is effective as of its date of issuance.

The amendment modifies the Technical Specifications with respect to limiting conditions of operation and surveillance requirements for the scram discharge system and the analog trip system.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) The application for amendment dated January 10, 1983, (2) Amendment No. 76 to License No. DPR–28, and (3) the Commission's related Safety Evaluation. Vermont Yankee Nuclear Power Corp.; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 77 to Facility Operating License No. DPR–28, issued to Vermont Yankee Nuclear Power Corporation which revised Technical Specifications for operation of the Vermont Yankee Nuclear Power Station (the facility) located near Vernon, Vermont. The amendment is effective as of its date of issuance.

The amendment modifies the Technical Specifications pertaining to spiral unloading and reloading of the reactor core.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significance hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) The application for amendment dated February 22, 1982 (2) Amendment No. 77 to License No. DPR–28, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Brooks Memorial Library, 224 Main Street, Brattleboro, Vermont 05301. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 28th day of March 1983.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

BILLING CODE 7590–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13146; (812–5289)]

CIMCO Money Market Trust; Filing of Application

Notice is hereby given that CIMCO Money Market Trust ("Applicant), Heritage Way, Waverly, Iowa 50677, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on August 23, 1982, and an amendment thereto on March 14, 1983, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder, to the extend necessary to permit Applicant to compute its net asset value per share, using the amortized cost method of valuing portfolio securities. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act and

rules thereunder for the text of the provisions from which Applicant seeks to be exempted.

Applicant states that it is a no-load, "money market" fund organized as a business trust under Massachusetts law. Applicant states that Century Investment Management Co., a wholly-owned subsidiary of Lutheran Mutual Life Insurance Company, serves as its investment adviser. Applicant states that its investment objective is to attain the highest current income consistent with the preservation of capital and the maintenance of liquidity. Applicant states that it will pursue its objective by investing in instruments that mature within twelve months from the date of purchase, including, but not limited to, the following: (1) Obligations issued by or guaranteed as to principal and interest either by the United States Government or its agencies or instrumentalities; (2) certificates of deposit, time deposits, bankers' acceptances and obligations of savings institutions, issued by banks regulated by the United States Government; (3) securities of foreign branches of United States banks and foreign securities payable in United States dollars; (4) commercial paper that is rated (at the time of purchase) at least A–1 by Standard and Poor's Corporation or Prime–1 by Moody's Investors Services, Inc., or, if not rated, then issued by a company having an outstanding debt issue rated at least "AA" by such services; (5) short-term corporate obligations rated at least "AA" by Standard and Poor's Corporation or Moody's Investors Services, Inc.; and (6) repurchase agreements with respect to its portfolio securities. Applicant represents that it will not invest in a repurchase agreement maturing in more than seven days if any such investment, together with other illiquid securities held by Applicant, would exceed 10% of Applicant's total assets.

Applicant represents that the maturities of it portfolio securities will be determined in accordance with the procedures set forth in Proposed Rule 2a–7 (Investment Company Act Release No. 12206, February 1, 1982) or, if that rule should ultimately be adopted, in accordance with the procedures set forth in the rule, as adopted. Applicant further represents that, when it enters into a reverse repurchase or firm commitment agreement, it will maintain in a segregated account, from the date it enters into such agreement, liquid assets equal in value to the amount due on the settlement date under the agreement, in accordance with Investment Company Act Release No. 10666 (April 18, 1979).

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the Act or any rules or regulations thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the relief requested, Applicant states that in order to attract and retain investors, it must maintain a stable net asset value and a constant and steady flow of investment income. Applicant believes that it can provide these qualities by valuing its assets on the basis of amortized cost. Applicant states that, given the nature of its policies and operations, there will normally be a relatively negligible discrepancy between the market value and the amortized cost value of its portfolio securities. Applicant represents that its board of trustees has determined in good faith that, absent unusal or extraordinary circumstances, the amortized cost value reprsents fair value of its portfolio securities and that the amortized cost method of valuation is appropriate and preferable for the Applicant.

Applicant has agreed that the following conditions may be imposed in any order of the Commission granting the exemptive relief requested:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, Applicant's board of trustees undertakes—as a particular responsibility withn its overall duty of care owed to Applicant's share-holders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objectives, to stabilize Applicant's net asset value per share, as computed for the purposes of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by the board of trustees shall be the following:

a. Review by the board of trustees, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of Applicant's net asset value per share as determined by using available market quotations from the $1.00 amortized cost price per share, and maintenance of records of such review. To fulfill this condition, Applicant states that it intends to use actual quotations or estimates of market value reflecting current market conditions chosen by its board of trustees in the exercise of its discretion to be appropriate indicators of value, which may include *inter alia*, (i) quotations or estimates of market value for individual portfolio instruments, or (ii) values obtained from yield data relating to classes of money market instruments published by reputable sources.

b. The board of trustees will promptly consider what action, if any, should be taken, in the event such deviation from Applicant's $1.00 amortized cost price per share exceeds 1/2 of 1 percent.

c. Where the board of trustees believes that the extent of any deviation from Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten Applicant's average portfolio maturity; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days. In fulfilling this condition, if the disposition of a portfolio instrument results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant states that it will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

4. Applicant will record, maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of trustees' considerations and actions taken in connection with the

discharge of its responsibilities, as set forth above, to be included in the minutes of the board of trustees' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act as though such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which the board of trustees determines present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, are of comparable quality as determined by the board of trustees.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement as to whether any action pursuant to condition 2 (c) above was taken during the preceding fiscal quarter, and, if any action was taken, Applicant will describe the nature and circumstances of such action.

Applicant asserts that, in light of the foregoing, the exemption requested is appropriate in the public interest and consistent with the protection of investors, and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 2, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

Cincinnati Stock Exchange; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

April 7, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following stocks:

Hercules Incorporated
Common Stock, No Par Value (File No. 7–6558)
Northwest Industries Inc.
Common Stock, No Par Value (File No. 7–6559)
Tesoro Petroleum Corporation
Common Stock, $0.16 2/3 Par Value (File No. 7–6560)
Texas International Company
Common Stock, $0.10 Par Value (File No. 7–6561)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before April 28, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[File No. 22–12304]

The Dow Chemical Co., and Union Carbide Corp.; Application and Opportunity for Hearing

April 7, 1983.

Notice is hereby given that The Dow Chemical Company, a Delaware corporation ("Dow") and Union Carbide Corporation, a New York corporation ("Carbide"), have filed a joint application pursuant to clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939, as amended (the "Act"), for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeships of Citibank, N.A., a national banking association ("Citibank"), under four existing indentures of Dow and one existing indenture of Carbide, all five indentures being qualified under the Act (the "Five Qualified Indentures") and the trusteeship by Citibank under a proposed Trust Agreement to be dated on or after March 1, 1983 and to be entered into between the DCS Capital Corporation (the "Company") and Citibank, Trustee (the "New Indenture" or the "Trust Agreement", the Five Qualified Indentures and the New Indenture being referred to collectively as the "Indentures"), are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Citibank from acting as Trustee under the Five Qualified Indentures.

Dow and Carbide allege that:

1. Pursuant to the New Indenture, the Company proposes to issue its short-term promissory notes (the "Promissory Notes") to purchasers. The proceeds of the sale of these Promissory Notes will in turn be loaned to an affiliated Delaware general partnership, DCS Capital Partnership (the "Partnership") pursuant to a Financing Agreement to be dated on or after March 1, 1983 between the Company and the Partnership (the "Financing Agreement"). The proceeds of the loan from the Company will be used by the Partnership to facilitiate the construction of an ethylene plant in Joffre, Alberta.

The Partnership will be composed of three partners, Prentiss Glycol Company ("PGC"), a wholly-owned subsidiary of Carbide, Dofinco, Inc. ("Dofinco"), a wholly-owned subsidiary of Dow and Scotlene, Inc., ("Scotlene"), a wholly-owned subsidiary of Shell Canada Limited, a Canadian corporation ("Shell Canada"). Dow and Carbide, as the respective parents of Dofinco and PGC, will each have certain ultimate obligations to provide funds in the event that other funds available to the Partnership are insufficient to pay certain indebtedness of the Partnership.

2. Dow had outstanding on February 1, 1983 the following described securities issued under the following indentures, each of which was qualified under the Act in connection with the registration under the Securities Act of 1933 of the securities issued thereunder, the file

number of each Registration statement being set forth in parentheses below:

(a) $100,000,000 4.35% Debentures due September 15, 1988, under Indenture dated as of September 15, 1963, between Dow and Citibank, Trustee (File No. 2-21682);

(b) $150,000,000 8.875% Debentures due May 1, 2000 under Indenture dated as of May 1, 1979 between Dow and Citibank, Trustee (File No. 2-38607);

(c) $100,000,000 7.625% Debentures due July 1, 2003, under Indenture dated as of July 1, 1973, between Dow and Citibank, Trustee (File No. 2-48318).

(d) $300,000,000 8.65% Debentures due February 15, 2008, under Indenture dated February 15, 1978, between Dow and Citibank, Trustee (File No. 2-60717).

3. Carbide had outstanding on February 1, 1983, $200,000,000 7.5% Debentures due December 15, 2006, under Indenture dated December 15, 1976 between Carbide and Citibank, Trustee.

4. The securities issued under each of the indentures listed in paragraphs 2 and 3 are wholly unsecured.

5. On or after March 1, 1983, Citibank, as Trustee, plans to enter into the Trust Agreement with the Company, pursuant to which the Company intends to issue Promissory Notes. Since it is intended that the Promissory Notes will be exempt securities under Section 3(a)(3) of the 1934 Act, no qualification of the Trust Agreement will be sought under the Act.

6. As stated in paragraph 1 above, the Company will lend the proceeds of the sale of its Promissory Notes to the Partnership, and pursuant to the Financing Agreement the Partnership will issue its partnership note (the "Partnership Note") in a principal amount equal to the principal amount of the Promissory Notes outstanding from time to time. The Partnership Note will be pledged to Citibank as Trustee under the trust Agreement as security for the Promissory Notes.

7. In order to facilitate the construction of an ethylene plant at Joffre, Alberta, to be owned and operated by The Alberta Gas Ethylene Company Ltd., an Alberta corporation ("AGEC"), the Partnership intends to make loans from time to time to AGEC pursuant to a Loan Agreement to be dated on or after March 1, 1983 (the "Loan Agreement") between AGEC and the Partnership, such loans to be evidenced by one or more notes issued to the Partnership by AGEC (the "AGEC Notes").

8. In order to provide credit support for the Partnership, PGC, Dofinco and Scotlene as partners in the Partnership will enter into a Cash Deficiency Agreement, to be dated on or after March 1, 1983 (the "Cash Agreement"), with the Partnership, whereby PGC, Dofinco and Scotlene will agree severally to make certain deficiency payments, in amounts as determined therein, in the event that other funds available to the Partnership are insufficient to pay amounts due under the Parntership Note or certain other indebtedness of the Partnership. In addition, the Partnership will enter into three separate Guarantee Agreements, each to be dated on or after March 1, 1983 (the "Guarantee Agreements"), with each of Dow, Carbide and Shell Canada as the respective parent corporations of Dofinco, PGC and Scotlene. Pursuant to the Guarantee Agreements, Dow, Carbide and Shell Canada will agree to guarantee the obligations of their respective subsidiaries under the Cash Deficiency Agreement.

9. The payment obligations contained in the Guarantee Agreements are unsecured general obligations of the respective corporations. Pursuant to a Consent, Assignment and Agreement, to be dated on or after March 1, 1983 (the "Consent"), the Partnership will pledge and assign to Citibank as Trustee, as security for payment on the Partnership Note, certain of its rights under the Cash Deficiency Agreement and the Guarantee Agreements. As parties to the Consent, PGC, Dofinco and Scotlene will consent to such pledge and assignment.

10. Under Section 7.08 of the 1963, 1970, 1973, and 1978 Dow Indentures (the "Dow Indentures"), Citibank shall not be deemed to have a conflicting interest by reason of being a trustee under another indenture under which any other securities of Dow are outstanding if Dow shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that the trusteeships under the four Dow Indentures and such other indenture are not so likely to involve a material conflict of interest as to disqualify Citibank from acting as trustee under one of such indentures.

11. A similar provision is contained in Section 7.08 of the 1976 Carbide Indenture with respect to trusteeships held by Citibank under other indentures relating to securities where Carbide is the obligor.

12. Dow alleges that no default has existed at any time under the Dow Indentures. Similarly, Carbide alleges that no default has at any time existed under the 1976 Carbide Indenture. The respective obligations of Dow and Carbide in connection with the securities issued under such Indentures and, pursuant to their respective Guarantee Agreements in connection with the Partnership Note are wholly unsecured and rank *pari passu* with their respective obligations under the Five Qulaified Indentures.

13. The Dow Indentures all include sinking fund provisions as well as covenants relating to limitations on liens and sale and lease-back arrangements. Additionally, all of the Dow Indentures contain covenants to secure the debentures in the event that certain liens are incurred or in certain events relating to the merger or consolidation of Dow. The 1976 Carbide Indenture contains similar provisions as to a sinking fund, covenants of limitations on liens and sale and lease-back arrangements and the obligation of Carbide to secure the debentures in the event that certain liens are incurred or in certain events relating to the merger or consolidation of Carbide. The Cash Deficiency Agreement and the Guarantee Agreements include no comparable covenants.

14. The respective obligations of (a) Dow under the Dow Indentures and under the Guarantee Agreement to which Dow is a party and (b) Carbide under the 1976 Carbide Indenture and under the Guarantee Agreement to which Carbide is a party are all wholly unsecured and rank *pari passu* and are therefore not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Citibank from acting as Trustee under any of such Indentures.

Dow and Carbide have each waived notice of hearing and any and all rights to specify procedures under Rule 8 (b) of the Commission's Rules of Practice with respect to the application.

Notice is further given that any interested person may, not later than April 30, 1983, request in writing that a hearing be held on such matter, stating the nature of his interest, the reason for such request, and the issues of law or fact raised by such application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after such date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13150; (812-5481)]

Federal Life Insurance Company (Mutual), Federal Life Variable Annuity account A, Federal Life Variable Annuity Account C; and Fed Mutual Financial Services, Inc.; Application for an Order

April 7, 1983.

Notice is hereby given that Federal Life Insurance Company ("Federal Life") Federal Life Variable Annuity Account A ("Variable Account A") and Federal Life Variable Annuity Account C ("Variable Account C") separate accounts of Federal Life registered under the Investment Company Act of 1940 ("Act") as a single unit investment trust, and FED Mutual Financial Services, Inc. ("FED Mutual"), 3750 West Deerfield Road, Riverwoods, Illinois 60015, (collectively, "Applicants"), filed an application on March 8, 1983, and an amendment thereto on April 5, 1983 for an order amending a prior order pursuant to Section 11 of the Act for approval of the terms of certain offers of exchange and pursuant to Section 6(c) of the Act for exemption from the provisions of Sections 2(a)(32), 2(a)(35), 22(c), 26(a), 27(c)(1), 27(c)(2) and 27(d) of the Act and Rule 22c-1 thereunder to the extent necessary to permit the transactions described in the application. All interested persons are referred to the application and amendment on file with the Commission for a statement of the facts and representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder for a statement of the relevant provisions.

Federal Life established Variable Account C to fund group variable annuity contracts ("Contracts"). Variable Account C consists of two account divisions, each investing in the shares of one of two portfolios of Federal Life Money Market Fund, Inc.

Applicants received an order of the Commission on September 1, 1982 (Investment Company Act Release No. 12624), pursuant to Section 6(c) of the Act, including Variable Account C in the exemptive relief from various provisions of the Act previously accorded Federal Life, FED Mutual, and Variable Account A and, pursuant to Section 11 of the Act, approving the terms of certain offers of exchange. Applicants now seek an order of the Commission amending the prior orders to the extent necessary to establish three new account divisions in Variable Account C to invest in the shares of Portfolio of Bond Fund Shares, Inc., Portfolio of Equity Fund Shares, Inc., and Portfolio of Mutual Fund Shares, Inc., ("Portfolio Funds"), respectively, and to amend the terms of the Contracts. Applicants state that the amended Contracts provide for: (i) The deduction of premium taxes; (ii) the deduction of a contingent deferred sales charge of 1.5% of an aggregate amount withdrawn exceeding 10% of the contract value determined as of the beginning of the contract year; (iii) the deduction of an annual administrative fee of $25 at the end of each contract year; (iv) the assessment of a mortality, expense and distribution expense risk charge ("risk charge") at the rate of .95% annually; and (v) transfers of contract value among account divisions at relative net asset values, subject to certain conditions.

Relief Requested

Applicants request an exemption from Sections 2(a)(32), 2(a)(35), 22(c), 26(a), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rule 22c-1 thereunder to the extent necessary or appropriate to allow Federal Life to recoup the expenses of distributing the amended Contracts from the contingent deferred sales charge on specified surrenders.

Applicants request an exemption from Sections 26(a) and 27(c)(2): (i) to allow Variable Account C, in connection with the three new account divisions, to act as custodian of its assets and to hold those assets not in trust; (ii) to allow Variable Account C to accept "book shares" issued by the Portfolio Funds in open account in lieu of actual share certificates; (iii) to allow Federal Life to deduct the risk charge from Variable Account C; (iv) to permit Federal Life to deduct a flat annual administrative fee of $25 per participant to reimburse it for bookkeeping and other administrative services performed by Federal Life which normally be performed by the custodian or trustee; and (v) to allow Federal Life to deduct premium taxes, if applicable, from premium payments allocated to Variable Account C.

In support of their requests, Applicants represent, among other things, that: (i) The contingent deferred sales charge will not under any circumstances exceed 1.5% of the total amount of premium payments made by a contract owner; (ii) to the best of Applicant's knowledge and belief, the annual administrative fee is the actual cost of providing those services and Applicants do not expect to profit from such fee; (iii) the risk charge is reasonable in relation to the risks assumed by Federal Life under the Contracts, consistent with the protection of investors insofar as it is designed to be competitive while not exposing Federal Life to undue risk of loss, and falls within the range of similar charges imposed upon competitive variable annuity products. Applicants state that the latter representation is based on their analysis of publicly available information about similar industry practices, taking into consideration such factors as current charge levels and the existence of expense charge guarantees and guaranteed annuity rates. Applicants further represent that Federal Life will maintain a memorandum at its Home Office, available to the Commission, setting forth in detail the products analyzed in the course of, and the methodology and results of, Federal Life's comparative survey. Federal Life also represents that it has determined that the use of the asset charge for distribution expenses has a reasonable likelihood of benefiting Variable Account C and its contract owners, and that a memorandum setting forth the basis for this representation will be maintained at Federal Life's Home Office and will be available to the Commission. Finally, Applicants represent that as a condition for obtaining relief, Variable Account C will only invest in funds which undertake to have a board of directors with a disinterested majority formulate and approve any plan under Rule 12b-1 to finance distribution expenses.

Section 6(c) of the Act provides, in pertinent part, that the Commission may exempt any person of the Act or its Rules and Regulations if and to the extent necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants also request approval pursuant to Sections 11(a) and 11(c) of the Act to permit Variable Account C participants to transfer part or all of their contract value in any account division to one or more other account divisions.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 29, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington,

D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon it own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19659; SR-MSE-83-1]

Midwest Stock Exchange, Inc.; Order Approving Proposed Rule Change

April 7, 1983.

The Midwest Stock Exchange, Incorporated ("MSE"), 120 LaSalle Street, Chicago, Illinois 60603, submitted on February 7, 1983, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to amend Article XXX, Rule 15 of the MSE rules to require that claims for transaction reports be made within five business days of: (i) the original trade date if the claim involves an erroneous comparison, or (ii) the date an order should have been executed if the claim involves the omission of a report. The existing MSE rules permit such claims to be filed within 10 business days.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19537 (February 24, 1983)) and by publication in the **Federal Register** (48 FR 9116, March 3, 1983). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6, and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulations, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-9795 Filed 4-12-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19656; File No. SR-OCC-83-6]

Options Clearing Corporation ("OCC"); Filing and Immediate Effectiveness of Proposed Rule Change

April 6, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 25, 1983, OCC filed with the Securities and Exhange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would amend OCC's foreign currency settlement procedures to allow OCC to pay settlement money in respect of foreign currency that has been delivered to OCC's foreign correspondent bank either: (i) To the delivering clearing member or (ii) if the delivering clearing member so authorizes, directly to a bank designated by the delivering clearing member and approved by OCC.

The purpose of the proposed rule change is to alleviate financing problems that a number of smaller capitalized clearing members are experiencing under OCC's current foreign currency exercise settlement procedures. Because OCC acts as a conduit in facilitating foreign currency exercise settlement, a delivering clearing member must deliver the underlying currency to OCC prior to receiving settlement funds.[1] As a practical matter, smaller capitalized clearing members must finance foreign currency delivery by obtaining a "loan" of the currency from a bank. In its filing, OCC stated that the current OCC settlement rule, which provides that OCC will pay the aggregate exercise price to delivering clearing members, does not provide the "lending" bank with adequate assurance that delivering clearing members will pay them the exercise price they receive in settlement.

The proposed rule change is intended to obviate this problem by enabling clearing members to authorize OCC to pay the aggregate exercise price directly to the delivering member's foreign currency bank. In its filing, OCC stated that the banks have indicated to OCC that this would be a satisfactory way to resolve their concern and therefore would make them more amenable to participating in foreign currency settlement for smaller clearing members.

OCC believes that the proposed rule change is consistent with the Act because it facilitates the participation of all clearing members in trading foreign currency options. In addition, OCC stated that the proposed rule change will not effect OCC's ability to safeguard securities and funds which are in its custody or control or for which it is responsible.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of pubication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR-OCC-83-6.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in

[1] OCC's foreign currency exercise settlement procedures consist of three steps. First, prior to the opening of business on the day before settlement date, clearing members with receive obligations must pay OCC the aggregate exercise price for all foreign currency option contracts due to settle the following day. Second, on the exercise settlement date, clearing memers with delivery obligations must direct delivery of the underlying foreign currency from their respective foreign correspondent bank account to OCC's foreign correspondent bank account. Third, after the first two steps are successfully completed and OCC receives notice from its correspondent bank that the specific foreign currency has been delivered, OCC will pay the delivering member the aggregate exercise price and concurrently cause OCC's foreign correspondent bank to deliver the foreign currency to the account of the receiving clearing member at that member's foreign correspondent bank.

accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C.

Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SUSQUEHANNA RIVER BASIN COMMISSION

Public Hearing; Proposed Comprehensive Plan Addition—Clover Creek Watershed Plan

The Susquehanna River Basin Commission (SRBC) will hold a public hearing to receive comments from citizens, government agencies and others on the proposed addition of the Clover Creek Watershed Plan to its *Comprehensive Plan for Management and Development of the Water Resources of the Susquehanna River Basin.* The hearing has been scheduled for Thursday, May 12, 1983 at the Commission headquarters building, 1721 N. Front St., Harrisburg, Pa. following the regular meeting of the Commission which begins at 9:00 a.m.

The Susquehanna River Basin Compact, Pub. L. 91–575, 84 Stat. 1509 et seq., requires the Commission to maintain a Comprehensive Plan for the immediate and long-range use, management and development of the water and related resources of the basin. Initially adopted in December 1973, the Plan provides a basinwide strategy to guide the Commission and others in the management, use and conservation of the basin's resources. The Plan is also used to evaluate proposed water resurce developments that the Commission must, by law, approve. Federal agencies must exercise their powers in a manner that does not substantially conflict with the Comprehensive Plan.

Clover Creek is a tributary of the Frankstown Branch of the Juniata River and covers a watershed area of 33,280 acres in Blair County Pa. The Clover Creek Watershed Plan is a U.S. Soil Conservation Service (SCS) land treatment project, sponsored by the Blair Conservation District, which incudes measures to reduce erosion and sediment on agricultural land, soil nutrient losses, sediment and nutrient loading of streams and agricultural pollutants from livestock wastes.

Total project cost is estimated to be about $1,853,800 of which $1,279,400 is to be borne by Pub. L. 83–566 funds and $574,400 by project sponsors and landowers.

At its regular meeting on March 31, 1983, the Commission agreed to consider the project for adoption into the SRBC Comprehensive Plan. Adoption into the Comprehensive Plan will affirm the project's compliance with the goals and objectives of the Comprehensive Plan, thus clearing the way for project implementation by the Federal Government and local sponsors.

The May 12th hearing will be informal in nature. Interested parties are invited to attend the hearing and to participate by making oral or written statements presenting their data, views and comments on the proposed addition. Those wishing to personally appear to present their views are urged to notify the Commission in advance that they desire to do so. However, any person who wishes to be heard will be given opportunity to be heard, whether or not they have given such notice. After the hearing, the Commission will evaluate all relevant material and decide whether to adopt the project into the Comprehensive Plan.

Further background information on the Clover Creek Watershed Plan is available at the offices of the Susquehanna River Basin Commission, 1721 N. Front St., Harrisburg, Pa. 17102, (717) 238–0423, during regular business hours. Additional information may also be obtained through the Soil Conservation Service, P.O. Box 985, Federal Square Station, 228 Walnut St., Harrisburg, Pa. 17108, (717) 782–4453.

Dated: April 15, 1983.

Robert J. Bielo,

Executive Director.

BILLING CODE 4910-22-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

[Docket No. 83–15]

Policy Statement Regarding Non-Bank Bank Approvals

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Policy Statement on Non-bank Bank Approvals.

SUMMARY: The Bank Holding Company Act defines a bank as an institution which both accepts demand deposits and makes commercial loans. If an institution does not offer one of these services, it is not subject to the Act. Recently there has been an increasing interest in the chartering of such limited purpose institutions, which are commonly referred to as "non-bank banks." This trend involves questions of public policy which Congress has begun to explore and debate. The Office of the Comptroller of the Currency ("Office") believes that free and open debate on these public policy questions will be encouraged by the absence of the pressure of market place innovations at the national level which could outpace Congressional deliberations. Therefore, the Office is announcing a moratorium on approvals on non-bank banks. The moratorium will run to January 1, 1984.

The moratorium does not apply to those applications for non-bank banks that were accepted by the Office for filing before April 6, 1983. The Office will continue to accept new applications for non-bank banks, but will not issue

decisions on those applications while the moratorium is in effect. In addition, the Office will accept and decide applications for (1) National banks whose acquisition by a bank holding company across state lines is authorized by state law under the terms of the Douglas Amendment to the Bank Holding Company Act (12 U.S.C. 1842(d)); and (2) most national trust banks (*see* 12 CFR 5.22). However, the moratorium will cover decisions on applications for national trust banks by organizers who act as the investment advisors to open-end investment companies.

EFFECTIVE DATE: April 6, 1983.

FOR FURTHER INFORMATION CONTACT: Ford Barrett, Assistant Chief Counsel (202) 447–1896; or Alan Priest, Attorney (202) 447–1880; Comptroller of the Currency, 490 L'Enfant Plaza East SW., Washington, D.C. 20219.

Authority: 12 U.S.C. 1 *et seq.*

Policy Statement Regarding Non-Bank Bank Approvals

Over the past year, several institutions have sought to expand their retail financial services by establishing banks that do not make commercial loans. These limited purpose institutions (so-called "non-bank banks") have afforded financial service providers an opportunity to expand their consumer service activities in compliance with the federal banking laws.

The delivery of financial services today is more costly and less efficient because of the restrictions on banks' product lines and geographic locations. In an earlier era of regulated interest rates, banks built brick and mortar delivery systems with high fixed costs to gather low-cost deposits. Today, in an era of deregulated interest rates, those costs may not be supportable by limited product lines. Technology may be quickly making banks' brick and mortar delivery systems obsolete.

Congress has recognized the significance of these and other structural changes that have already occurred and will continue to occur. Congress has begun hearings on the Glass-Steagall Act, which restricts banks' products, and the McFadden Act and Douglas Amendment to the Bank Holding Company Act, which limit banks' ability to expand geographically. In addition, the Administration will soon resubmit its proposal to expand the powers of bank holding companies.

In light of the hearings, the Office believes that a moratorium on non-bank banks at this time will help foster free and open debate on these important policy issues by reducing the pressure of escalating marketplace innovations at the national level that could outpace Congressional deliberations. Therefore, the Office is announcing a moratorium on the approval of new applications for non-bank banks. The moratorium will run to January 1, 1984.

The moratorium does not apply to those applications for non-bank banks that were accepted for filing before April 6, 1983. The Office will continue to accept new applications for non-bank banks, but will not issue decisions on those applications while the moratorium is in effect. In addition, the Office will accept and decide applications for (1) National banks whose acquisition by a bank holding company across state lines is authorized under state law under the terms of the Douglas Amendment to the Bank Holding Company Act (12 U.S.C. 1842(d)); and (2) most national trust banks (*see* 12 CFR 5.22). However, the moratorium will cover decisions on applications for national trust banks by organizers who act as the investment advisors to open-end investment companies.

The moratorium has not been imposed on those applications which were accepted for filing before April 6, 1983, because the Office has determined that such a policy would be unfair to the applicants involved. The moratorium has been applied to new national trust bank applications by organizers who advise open-end investment companies, but not to other national trust bank applications, because the former applications involve issues in the current public debate while the latter applications do not.

The moratorium has been adopted for reasons of public policy. The office reaffirms that all non-bank bank charters issued by it to date have been in full compliance with all applicable laws. The Office believes they also represent good public policy. The moratorium has been imposed because the Office recognizes that important, broad policy issues are raised by the charters, as well as other marketplace innovations, that the Congress may wish to debate. During the moratorium, the Office looks forward to working with Congress to examine the full range of changes in the financial services industry, including changes in the thrift industry, changes in state law that affect geographic and product restrictions for state chartered banks, and technological developments that make new financial products and delivery systems possible.

Dated: April 7, 1983.

C. T. Conover,

Comptroller of the Currency.

[FR Doc. 83-9703 Filed 4-12-83; 8:45 am]

BILLING CODE 4810-33-M

VETERANS ADMINISTRATION

Privacy Act of 1974, Amendment of Systems Notices; Change Other Than Routine Use Statements

Notice is hereby given that the Veterans Administration is revising the paragraph pertaining to categories of individuals in the system, in the system of records entitled: Compensation, Pension, Education and Rehabilitation Records—VA (58 VA 21/22/28) as set forth on page 372 of the **Federal Register** of January 5, 1982. The above named paragraph of the systems notice is being rewritten to add two categories of records to the existing list. Currently, there is no mention in the "categories of individuals covered by the system" of individuals discharged under dishonorable conditions, nor is there any mention of those persons whose character of discharge was other than honorable and the VA determined that service was dishonorable for VA benefit purposes. Finally, there is no mention of individuals (other than spouses or dependents) who have erroneously or improperly filed a claim and who are, therefore, not entitled to title 38 benefits, and who do not have any military service. Category number 13 is being added to provide notice to the public that records are maintained in this system on all these individuals. Also, as a result of P.L. 96–342, claimants will begin training under the section 901 and section 903 programs of that Act. Category number 14 is being added to notify the public that records are maintained in this system on such individuals.

The Privacy Act of 1974, 5 U.S.C. 552a(e), requires agencies to inform the public of any changes to their system of records. However, since these changes do not alter the uses of the information in the system of records, public comment is not required. The changes are effective May 13, 1983.

Dated: April 7, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

In the system identified as 58 VA 21/22/28, "Compensation, Pension, Education and Rehabilitation Records—VA," appearing at page 372 of the **Federal Register** of January 5, 1982, the system notice is revised as follows:

58 VA 21/22/28

SYSTEM NAME:

Compensation, Pension, Education and Rehabilitation Records—VA.

* * * * *

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The following categories of individuals will be covered by this system.

1. Veterans who have applied for compensation for service-connected disability under 38 U.S.C. Chapter 11.

2. Veterans who have applied for nonservice-connected disability, under 38 U.S.C. Chapter 23.

3. Veterans entitled to burial benefits under 38 U.S.C. Chapter 15.

4. Surviving spouses and children who have claimed pension based on nonservice-connected death of a veteran under 38 U.S.C. Chapter 15.

5. Surviving spouses and children who have claimed pension based on service-connected death of a veteran under 38 U.S.C. Chapter 11.

6. Surviving spouses and children who have claimed dependency and indemnity compensation for service-connected death of a veteran under 38 U.S.C. Chapter 13.

7. Parents who have applied for death compensation based on service-connected death of a veteran under 38 U.S.C. Chapter 11.

8. Parents who have applied for dependency and indemnity compensation for service-connected death of a veteran under 38 U.S.C. Chapter 13.

9. Veterans who have applied for VA educational benefits under 38 U.S.C. Chapter 31, 32, and 34.

10. Spouses, surviving spouses and children of veterans who have applied for VA educational benefits under 38 U.S.C. Chapter 35.

11. Servicemembers who have applied for educational benefits under 38 U.S.C. Chapter 34 and 35.

12. Servicemembers who have contributed money from their military pay to the post-Vietnam Era veterans Educational Account under 38 U.S.C. Chapter 32.

13. Individuals who have applied for title 38 benefits but who do not meet the requirements under title 38 to receive such benefits.

14. Veterans, servicemembers, spouses, surviving spouses and dependent children who have applied for benefits under the Educational Assistance Test program under sections 901 and 903 of Pub. L. 96-342.

[FR Doc. 83-9732 Filed 4-12-83; 8:45 am]

BILLING CODE 8320-01-M

Special Medical Advisory Group; Meeting

The Veterans Administration gives notice under Pub. L. 92-463 that a meeting of the Special Medical Advisory Group will be held in the Administrator's Conference Room at the Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, DC, on May 18 and 19, 1983. The purpose of the Special Medical Advisory Group is to advise the Administrator and the Chief Medical Director relative to the care and treatment of disabled veterans, and other matters pertinent to the Veterans Administration's Department of Medicine and Surgery.

The sessions will convene at 8:30 a.m. both days. These sessions will be open to the public up to the seating capacity of the room. Because this capacity is limited, it will be necessary for those wishing to attend to contact Mrs. Von Hudson, Program Assistant, Office of the Chief Medical Director, Veterans Administration Central Office (phone 202/389-2298) prior to May 6, 1983.

Dated: April 5, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

CIVIL AERONAUTICS BOARD

Notice of additions to the April 7, 1983 meeting.

TIME AND DATE: 9:30 a.m. April 7, 1983.
PLACE: Room 1027 (Open), Room 1012 (Closed), 1825 Connecticut Avenue, NW., Washington, D.C. 20428.
SUBJECT:

25. Discussion on Peru. (BIA)
26. Discussion on Canada. (BIA)

STATUS: Closed.
PERSON TO CONTACT: Phyllis T. Kaylor, The Secretary (202) 673–5068.

2

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, April 18, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

SUMMARY AGENDA: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations regarding the Corporation's assistance agreements with insured banks pursuant to section 13(c) of the Federal Deposit Insurance Act.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c) (6), (c) (8), and (c) (9) (A) (ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c) (6), (c) (8), and (c) (9) (A) (ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda

Application for consent to merge and establish branches:

The Community Savings Bank, Rochester, New York, an insured mutual savings bank, for consent to merge, under its charter and with the title "Rochester's Community Savings Bank," with Rochester Savings Bank, Rochester, New York, and to establish the nineteen offices of Rochester Savings Bank as branches of the resultant bank.

Application for consent to exercise limited trust powers:

The Bowery Savings Bank, New York City (Manhattan), New York.

Applications pursuant to section 19 of the Federal Deposit Insurance Act for consent to service of a person convicted of an offense involving dishonesty or a breach of a trust as a director, officer, or employee of an insured bank:

Names of persons and of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c) (8), and (c) (9) (A) (ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c) (8), and (c)(9) (A) (ii)).

Request for relief from adjustment for violations of Regulation Z:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8) and (c)(9)(A)(ii)).

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550–17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: April 11, 1983.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

BILLING CODE 6714–01–M

3

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11:05 a.m. on Wednesday, April 6, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider a recommendation regarding the granting of assistance, under section 13(c)(2) of the Federal Deposit Insurance Act, to United Southern Bank of Nashville, Nashville, Tennessee.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation Business required its consideration of the matter on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting pursuant to

subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

Dated: April 8, 1983.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

4

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, April 18, 1983, to consider the following matters:

SUMMARY AGENDA:

No substantive discussion of the following items is anticipated. These matter will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for Federal deposit insurance for a state-licensed United States branch of a foreign bank:

Hongkong and Shanghai Banking Corporation, Hong Kong, for Federal deposit insurance of deposits received at and recorded for the account of its state-licensed branch to be located at 36–54 Main Street, Flushing, New York.

Applications for consent to merge and establish branches:

Home Bank, Signal Hill, California, an insured State Nonmember bank, for consent to merge, under its charter and title, with Bank of Manhattan, Manhattan Beach, California, and to establish the sole office of Bank of Manhattan as a branch of the resultant bank.

Branch Banking and Trust Company, Wilson, North Carolina, an insured State Nonmember bank, for consent to merge, under its charter and title, with City National Bank, Charlotte, North Carolina, and to establish the five offices of City National Bank as branches of the resultant bank.

Farmers Bank and Trust Company of Hanover, Hanover, Pennsylvania, an insured State Nonmember bank, for consent to merge, under its charter and title, with The First National Bank of Fairfield, Fairfield, Pennsylvania, and to establish the three offices of The First National Bank of Fairfield as branches of the resultant bank.

Application for consent to merge, establish one branch and exercise limited trust powers:

Springfield Institution for Savings, Springfield, Massachusetts, an insured State mutual savings bank, for consent to merge, under its charter and title, with Nonotuck Savings Bank, Northampton, Massachusetts, to establish the sole office of Nonotuck Savings Bank as a branch of the resultant bank, and to exercise limited trust powers.

Applications for consent to purchase assets and assume liabilities and for consent to establish one branch:

Iowa Trust & Savings Bank, Oskaloosa, Iowa, an insured State nonmember bank, for consent to purchase the assets of and assume the liability to pay deposits made in First State Bank of What Cheer, What Cheer, Iowa, and to establish the sole office of First State Bank of What Cheer as a branch of the Iowa Trust & Savings Bank.

American Marine Bank, Winslow, Washington, an insured State nonmember bank, for consent to purchase the assets of and assume the liability to pay deposits made in the Third and Marion Branch of Seattle-First National Bank, Seattle, Washington, and to establish that office as a branch of American Marine Bank.

Application for consent to convert into a non-FDIC insured institution:

Jamaica Savings Bank, New York City (Jamaica), New York.

Request for an extension of time to establish a branch:

St. Joseph Bank and Trust Company, South Bend, Indiana, South Bend, Indiana, for an extension of time within which to establish a branch at 401 Lincoln Way West, Mishawaka, Indiana.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,655–L: Banco Credito y Ahorro Ponceno, Ponce, Puerto Rico.

Case No. 45,658–NR: United States National Bank, San Diego, California.

Memorandum and Resolution re: The First National Bank in Humboldt, Humboldt, Iowa.

Recommendations with respect to payment for legal services rendered and expenses incurred in connection with receivership and liquidation activities:

Gable & Gotwals, Tulsa, Oklahoma, in connection with the receivership of Penn Square Bank, National Association, Oklahoma City, Oklahoma.

Schall, Boudreau & Gore, San Diego, California, in connection with the liquidation of Pacific Coast Bank, San Diego, California (two memorandums).

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications or requests approved by the Director or Associate Director of the Division and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Reports of the Director, Office of Corporate Audits and Internal Investigations:

Audit Report re: Assessment Audit Activities, dated November 30, 1982.

Audit Report re: Project Review of the Remote Entry Examination Processing System—Interim Audit Report #2, dated March 16, 1983.

Discussion Agenda:

No matters scheduled

The meeting will be held in the Board Room on the sixth Floor of the FDIC Building located at 550–17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: April 11, 1983.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,

6

FEDERAL RESERVE SYSTEM (BOARD OF GOVERNORS)

TIME AND DATE: 10:00 a.m., Monday, April 18, 1983.

PLACE: Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Proposal to reduce requirements for reporting of deposits by small depository institutions. (Proposed earlier for public comment; Docket No. R-0459.)
2. Any items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452-3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Dated: April 8, 1983.

James McAfee,

Associate Secretary of the Board.

[S-514-83 Filed 4-11-83; 11:29 am]

BILLING CODE 6210-01-M

7

FEDERAL RESERVE SYSTEM (BOARD OF GOVERNORS)

TIME AND DATE: Approximately 10:30 a.m., Monday, April 18, 1983, following a recess at the conclusion of the open meeting.

PLACE: 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed acquisition of high-speed currency processing equipment within the Federal Reserve System.
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Proposed acquisition of computers within the Federal Reserve System. (This item was originally announced for a meeting on April 13, 1983.)
4. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Dated: April 8, 1983.

James McAfee,

Associate Secretary of the Board.

[S-515-83 Filed 4-11-83; 11:30 am]

BILLING CODE 6210-01-M

8

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE.

TIME: 9:00 a.m. to 5:00 p.m., 9:00 a.m. to 4:00 p.m.

DATE: April 20 and 21, 1983, respectively.

PLACE: Hyatt Regency Washington Capitol Hill Yellowstone Room.

STATUS: Open.

MATTERS TO BE DISCUSSED: Opening Remarks, Chairman; Chairman's Report; Approval of Agenda; Approval of November 22-23, 1982, Minutes; Executive Director's Report; Status Reports on FY 1983 Programs; Task Force Report—Library and Information Services to Cultural Minorities; Videotape—Joint Congressional Hearing on Information Needs of Rural America; Task Force Report—Community Information and Referral Services; Old Business; New Business—School Media Center Corcerns, Preliminary Discussion of FY 1985 Programs; Task Force Report—The Role of the Special Library in Nationwide Networks and Cooperatives; Stephen D. Bryen, Deputy Assistant Secretary of Defense, International Economic, Trade and Security Policy on Reciprocity and Technology Transfer.

CONTACT PERSON FOR MORE INFORMATION: Toni Carbo Bearman, Executive Director.

Dated: April 8, 1983.

Toni Carbo Bearman,

NCLIS Executive Director

[S-521-83 Filed 4-11-83; 12:24 pm]

BILLING CODE 7527-01-M

9

NATIONAL COMMISSION ON STUDENT FINANCIAL ASSISTANCE

DATE: April 25 and 26, 1983.

PLACE: Room 311, Cannon H.O.B., Washington, D.C.

TIME: April 25, 1:00 p.m. to 5:00 p.m., April 26, 10:00 a.m. to 1:00 p.m.

PURPOSE: The Washington hearing will focus on alternative loan programs. In particular, supplemental options for the existing programs, tax incentives and alternatives that would replace the existing system.

FOR FURTHER INFORMATION CONTACT: Donna M. Lumia, Public Hearings Coordinator (202) 724-2914.

Submitted the 8th day of April, 1983.

Richard T. Jerue,

Chief Executive Officer.

BILLING CODE 6820-BC-M

10

NATIONAL LABOR RELATIONS BOARD

TIME AND DATE: 9 a.m., Wednesday April 13, 1983.

PLACE: Board Conference Room, Sixth Floor, 1717 Pennsylvania Avenue, NW.

STATUS: Closed to public observation pursuant to 5 U.S.C. Section 552b(c)(2) (internal personnel rules and practices) and (c)(6) (personal information where disclosure would constitute a clearly unwarranted invasion of personal privacy).

MATTERS TO BE CONSIDERED: To consider candidates for Regional Director, Region 24, Puerto Rico, and other personnel matters.

CONTACT PERSON FOR MORE INFORMATION: John C. Truesdale, Executive Secretary, Washington, D.C. 20570, telephone: (202) 254-9430.

Dated: Washington, D.C., April 8, 1983.

By direction of the Board.

John C. Truesdale,

Executive Secretary, National Labor Relations Board.

[S-511-83 Filed 4-8-83; 4:26 pm]

BILLING CODE 7545-01-M

11

NATIONAL LABOR RELATIONS BOARD.

ACTION: Notice.

SUMMARY: Notice is hereby given of the schedule for awarding Senior Executive Service bonuses.

FOR FURTHER INFORMATION CONTACT: Ernest Russell, Director of Administration, National Labor Relations Board, 717 Pennsylvania Avenue, NW., Washington, D.C. 20570, (202) 254-9200.

SUPPLEMENTARY INFORMATION: Office of Personnel Management guidelines require that each agency publish a notice in the **Federal Register** of the agency's schedule for awarding Senior Executive Service bonuses at least 14 days prior to the date on which the awards will be paid.

Schedule for Awarding Senior Executive Service Bonuses: The National Labor Relations Board intends to award Senior Executive Service bonuses for the performance rating cycle of January 1, 1982 through December 31, 1982, with payouts scheduled by September 30, 1983.

Dated: Washington, D.C., April 8, 1983.

By direction of the Board.

John C. Truesdale

Executive Secretary, National Labor Relations Board.

[S-512-83 Filed 4-8-83; 4:26 p.m.]

BILLING CODE 7445-01-M

12

NATIONAL TRANSPORTATION SAFETY BOARD.

[NM-83-9]

TIME AND DATE: 9 a.m., Tuesday, April 19, 1983.

PLACE: NTSB Board Room, 800 Independence Ave. SW., Washington, D.C. 20594.

STATUS: The first two items will be open to the public; the third item will be closed under Exemption 10 of the Government in the Sunshine Act.

MATTERS TO BE CONSIDERED:

1. *Railroad Incident Report:* Fire on Amtrak Train No. 11, The Coast Starlight, Gibson, California, June 23, 1983, and *Recommendations* to the National Railroad Passenger Corporation (Amtrak) and the Federal Railroad Administration.
2. *Notice of Proposed Rulemaking* to amend 49 CFR Part 821, The Board's Rules of Practice in Air Safety Proceedings.
3. *Opinion and Order:* Administrator v. Golden Eagle Air Service, Inc., Docket SE–5589; disposition of the Administrator's appeal.

CONTACT PERSON FOR MORE INFORMATION: Sharon Flemming, (202) 382–6525.

Dated: April 8, 1983.

BILLING CODE 4910–58–M

13

NUCLEAR REGULATORY COMMISSION.

DATE: Week of April 11, 1983.

PLACE: Commissioners' Conference Room, 1717 H Street NW., Washington, D.C.

STATUS: Open and Closed.

MATTERS TO BE DISCUSSED:

Monday, April 11

10:00 a.m.

Discussion/Possible Vote on Proposed Response to Union of Concerned Scientists Petition for Rulemaking on Emergency Planning (Closed—Ex. 10).

Thursday, April 14

9:30 a.m.

Discussion/Possible Vote on Restart of Salem Units 1 and 2 (Public Meeting)

11:00 a.m.

Discussion of Management-Organization and Internal Personnel Matters (Closed—Ex. 2 & 6)

2:00 p.m.

Discussion of Regulatory Reform Task Force—Administrative Proposals—Backfit Rule (Public Meeting)

3:30 p.m.

Affirmation/Discussion and Vote (Public Meeting)

a. Waste Confidence Order (Tentative)

b. Rule on Extended Spent Fuel Storage (Tentative)

c. Final Rulemaking Concerning Licensed Operator Staffing at Nuclear Power Units and Draft Policy Statement on Shift Crew Qualifications

d. Proposed Response to Union of Concerned Scientists Petition for Rulemaking on Emergency Planning (Tentative)

Friday, April 15

2:00 p.m.

Discussion of Steps to Decision in TMI–1 Restart Proceeding (Open/Portions Closed—Ex. 10).

ADDITIONAL INFORMATION:

On March 30 the Commission voted 5–0 to hold Affirmation of Indian Point Order; Regulations to Implement Public Law 97–415; and Sua Sponte Review of Order in Commanche Peak, held that day.

Briefing on Systems Interaction scheduled for March 31, *postponed.*

On April 1 the Commission voted 4–0 (Commissioner Gilinsky not present) to hold Affirmation of Commanche Peak Order and NFS–Erwin Order, held that day.

Briefing on Shoreham scheduled for March 30 *moved* to April 5.

On April 6, Affirmation of Proposed Response to Union of Concerned Scientists Petition for Rulemaking on Emergency Planning was held part open and part closed.

On April 6 the Commission voted 4–0 (Commissioner Gilinsky not present), to hold discussion of Possible Enforcement Action and Related Investigation, to be held April 8.

Hearing on NFS–Erwin scheduled for April 7 was *cancelled.*

AUTOMATIC TELEPHONE ANSWERING SERVICE FOR SCHEDULE UPDATE: (202) 634–1498. Those planning to attend a meeting should reverify the status on the day of the meeting.

CONTACT PERSON FOR MORE INFORMATION: Walter Magee (202) 634–1410.

Walter Magee,

Office of the Secretary.

14

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL (NORTHWEST POWER PLANNING COUNCIL)

ACTION: Meeting notice.

STATUS: Open.

TIME AND DATE: April 12–13; 1983, 9:00 a.m.

PLACE: Council Central Office, 700 S.W. Taylor, Suite 200, Portland, Oregon

MATTERS TO BE CONSIDERED:

- Discussion of Comments Relating to the Draft Energy Plan.
- Council Business.

FOR FURTHER INFORMATION CONTACT: Ms. Bess Wong (503) 222–5161. The Council determined, by recorded vote on April 7, 1983, that agency business requires a meeting on April 12–13, 1983, even though it is not practicable to provide seven (7) days notice of the meeting.

Edward Sheets,

Executive Director.

BILLING CODE 6055–00–M

15

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of April 18, 1983, at 450 5th Street, N.W., Washington, D.C.

A closed meeting will be held on Tuesday, April 19, 1983, at 10:00 a.m. An open meeting will be held on Wednesday, April 20, 1983, at 10:00 a.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b (c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10).

Commissioner Evans, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Tuesday, April 19, 1983, at 10:00 a.m. will be:

Formal order of investigation.

Institution of injunctive actions.

Litigation matter.

Institution of administrative proceedings of an enforcement nature.

Settlement of injunctive action.

The subject matter of the open meeting scheduled for Wednesday, April 20, 1983, at 10:00 a.m. will be:

1. Consideration of whether to grant the application of James V. Kimsey to become associated with Asset Management International, Inc., in a propietary capacity. For further information, please contact Mary Binno at (202) 272–2318.

2. Consideration of whether to (i) issue a letter granting the Pacific Stock Exchange, Inc. an exemption from Rule

11Ac1–1 ("Quote Rule") under the Securities Exchange Act of 1934, and (ii) delegate to the Director of the Division of Market Regulation the authority to grant exemptions from the Quote Rule to exchanges and national securities associations. For further information, please contact William W. Uchimoto at (202) 272–2409.

3. Consideration of whether to propose for public comment Rule 22d–6 under the Investment Company Act of 1940 which would permit investment companies issuing redeemable securities, principal underwriters of such securities, and dealers therein to establish variations including negotiation in the sales loads on such securities under certain conditions. For further information, please contact Jeffrey S. Puretz at (202) 272–3036.

4. Consideration of whether to adopt technical amendments relating to various rules, forms and schedules under the Securities Act of 1933 and the Securities Exchange Act of 1934. For further information, please contact V. Gerard Comizio at (202) 272–2589.

5. Consideration of whether to publish for comment proposed Rule 158 under the Securities Act of 1933, which would define the terms "earning statement", "made generally available to its security holders" and "effective date of the registration statement" for purposes of the last paragraph of section 11(a) of the Securities Act. For further information, please contact Steven L. Molinari at (202) 272–2589.

6. Consideration of whether to propose for public comment Rule 3a12–8 under the Securities Exchange Act of 1934 ("Act") designating certain foreign government debt instruments as exempted securities under the Act solely for purposes of the trading of futures contracts covering such instruments. For further information, please contact Kevin Fogarty at (202) 272–2416.

7. Consideration of whether to issue a notice on an application filed by ML Venture Partners I, L. P. ("Partnership"), a limited partnership registered with the Commission as a business development company, and Merrill Lynch Venture Capital Co., L. P. ("Managing General Partner"), a registered investment adviser which serves as managing general partner of the Partnership, requesting an order pursuant to Section 206A of the investment Advisers Act of 1940 exempting them from the provisions of Section 205(1) thereof to permit the Managing General Partner to receive, under certain circumstances, a performance fee on the basis of unrealized capital gains upon the Partnership's portfolio securities. For further information, please contact Brian Kaplowitz at (202) 272–2028.

At times changes in commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Diane Klinke at (202) 272–2014.

Dated: April 8, 1983.

Part II

Nuclear Regulatory Commission

Proposed Commission Policy Statement on Severe Accidents and Related Views on Nuclear Reactor Regulation

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Proposed Commission Policy Statement on Severe Accidents and Related Views on Nuclear Reactor Regulation

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of proposed Commission Policy Statement.

SUMMARY: This proposed Policy Statement summarizes the changes in rules, policies, and regulatory practices that constitute the NRC approach for severe accident rulemaking. The new approach as presented in the Policy Statement would, for all classes of existing or proposed nuclear power plants, replace unfocused, long-term generic rulemaking with: (1) Severe accident rulemakings designed to certify future standard plant designs and (2) regulatory decisions based on generic evaluations and decisions regarding all existing or proposed plants for which the standard plant rulemaking would not apply. The Policy Statement is presented in proposed form to provide all affected nuclear power plant licensees and applicants and other interested persons an opportunity to comment.

DATES: Submit comments by July 9, 1983. Comments received after that date will be considered if its is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Submit comments, suggestions, or recommendations to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments received may be examined in the NRC Public Documents Room, 1717 H Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Roger J. Mattson, Director, Division of Systems Integration, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone (301) 492–7373.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission published "The Advanced Notice of Rulemaking" in the **Federal Register** on October 2, 1980 [45 FR 65474]. In that notice, the Commission indicated that a long-term rulemaking effort was being initiated that would establish policy, goals, and requirements relating to core-melt accidents greater than the present design basis accident and invited public comment on proposals for treating severe accident issues. This Policy Statement summarizes the changes in rules, policies, and regulatory practices that constitute the NRC approach for severe accident rulemaking. The new approach would, for all classes of reactors, replace an unfocused, long-term generic rulemaking effort with severe accident rulemakings designed to certify specific standard plant design applications and with regulatory decisions based on generic evaluations and decisions regarding other classes of operating plants, plants under construction or proposed plants. It is expected that this approach would fully resolve the severe accident safety issues in the course of these rulemakings on specific standard plant designs and regulatory decisions on other classes of existing or future plants which may, or may not, include rulemaking. The Policy Statement proposes that final decisions on severe accident considerations for operating plants and plants under construction be accomplished in parallel with the standard plant reviews.

Proposed Commission Policy Statement on Severe Accidents and Related Views on Nuclear Reactor Regulation

I. Introduction: History and Purpose of the Policy Statement
II. Proposed Policy on Safety Goals
III. Use of Probabilistic Risk Assesment in Severe Accident Decisionmaking
IV. Lessons Learned from Three Mile Island
V. Standard Review Plan
VI. Standardization Policy
VII. Further Research on Severe Accidents
VIII. Treatment of Severe Accidents in Ongoing Licensing Proceedings
IX. Present Views on Other Safety Issues and Efforts in Progress
X. Implementation Guidelines for Severe Accident Policy

I. Introduction: History and Purpose of the Policy Statement

The Nuclear Regulatory Commission mandated a series of changes in design and operation of nuclear power plants as a response to deficiencies revealed by the accident at Three Mile Island (TMI). The changes began with the operating Babcock and Wilcox plants and then the other operating plants. Later, the Commission set requirements for plants whose operating license (OL) review had been interrupted by the attention paid to operating plants. Still later, a separate set of requirements was developed for plants whose construction permit (CP) review had been interrupted. This last set of requirements, embodied in the Construction Permit/Manufacturing License Rule (hereinafter, the CP Rule) was published in effective form on January 15, 1982 (47 FR 2286).

In this Policy Statement, the Commission describes its policy and requirements for new CP applications and reactivated CP applications, and the Commission reiterates and discusses its present requirements with respect to accidents more severe than design basis accidents. We connect all of these requirements to our "Proposed Policy Statement on Safety Goals for Nuclear Power Plants" (48 FR 10772, March 14, 1983); to our standardization rules; and to other policy guidance under development such as siting policy. Although gascooled or other types of advanced reactors may be proposed in the future, they have not been considered in the development of this policy statement. Some of the policy points would apply to such plants; others would not.

As part of the Commission's response to TMI, an Action Plan (NUREG–0660, May 1980) was issued. Section II.B of that plan deals with the siting of plants and the requirements for coping with severe accidents. Consistent with that plan, the Commission has already issued one final and one proposed interim rule concerning hydrogen control issues in degraded core cooling (46 FR 58484, December 2, 1981, and 46 FR 62281, December 23, 1981). The concept of a generic rulemaking to reach final decisions on severe accidents also took form in the TMI Action Plan, Task II.B.8, "Rulemaking Proceeding on Degraded Core Accidents." This plan envisioned a long-term rulemaking extending beyond 1982 to establish policy, goals, and requirements related to accidents involving core damage greater than the present design basis for all classes of reactors: those operating, under construction, proposed for construction, or proposed as new standard plant designs. The task also included the interim step of an Advanced Notice of Rulemaking, issued on October 2, 1980 (45 FR 65474).

The presently proposed Policy Statement replaces this advanced notice of rulemaking. It represents a change from the envisioned plan for long-term rulemaking covering all classes of nuclear power plants in that the focus of rulemaking would, if adopted, be reduced to only one class of plants, namely, those proposed as new standard plants designs. However, the proposed Policy Statement provides the current views of the Commission on the process for arriving at severe accident decisions for operating plants, those under construction, or proposed for

construction for which standard plant rulemaking would not apply.

For the reasons discussed below, the Commission believes that nuclear power plants of modern designs (such as those proposed in CP applications docketed after the promulgation of the Standard Review Plan or now under consideration by U.S. vendors for future sales) can be shown to be acceptable for severe accident concerns if they meet the requirements of the CP Rule; if they achieve a technical resolution of Unresolved Safety Issues; and if they are adequately responsive to insights afforded by probabilistic risk assessments. This conclusion embodies due consideration of the Commission's Policy Statement on safety goals. It permits plants of modern design to be sited at locations with demographic and other safety-related characteristics that conform to our siting regulations and guidance. Further discussion of siting policy revision is found in Section IX of this Policy Statement.

As discussed below, our policy for the consideration of severe accidents contains nine interelated components: (1) Policy Statement on safety goals; (2) use of probabilistic risk analysis in severe accident decision making; (3) lessons learned from TMI; (4) the Standard Review Plan; (5) standardization policy; (6) further research on severe accidents; (7) treatment of sever accidents in ongoing licensing proceedings; (8) present views on other safety issues and efforts in progress; and (9) implementation of severe accident policy.

In accordance with the activities, views, and policy developments discussed in this Policy Statement, the Commission believes that it is possible to begin reviews of specific standard plant design applications with an expectation of fully resolving the severe accident questions in the course of the review. This belief is predicated on the availability of results from ongoing NRC, Industry Degraded Core Rulemaking (IDCOR), and vendor research; and insights from the Zion, Indian Point, and other risk assessments. The review of standard designs for future CPs provides incentive to industry to address severe accident phenomena. These reviews and ongoing research will also provide information needed for final decisions on severe accident considerations for operating plants and plants under construction. We expect to reach those final decisions within the next several years.

A three-step process will be used for severe accident decisions for plants in operation, under construction, or other classes of plants proposed for construction for which standard plant rulemaking would not apply. First, quantitative risk assessment techniques will be used to estimate the relative importance of potential nuclear power plant accident sequences or other features where sufficient data exists to make comparisons.

We do not plan for additional probabilistic risk assessments (PRAs) to be generated for this purpose. The existing ensemble of available PRAs (presently about 13 in number), will be normalized by updating of accident likelihood predictions and by recalculations of accident consequences using revised source terms currently being evaluated by the NRC staff. This approach will provide better understanding of the design features and site characteristics that are more favorable or less favorable to various risk contributions relative to the plants in the ensemble. Second, a range of possible design and operational changes to improve accident prevention and consequence mitigation capabilities will be studied to determine the costs and safety benefits of backfitting them to plants in operation or under construction. Finally, using engineering and policy judgment, supplemented by probabilistic risk assessment where apppropriate, decisions will be made on whether reductions in severe accident risk are necessary. If reductions are necessary, our research should tell us how best to achieve them, whether by accident prevention or consequence mitigation, or by what balance of the two. We will also be able to decide whether the costs for various safety improvements are justified. Particular attention will be paid in these studies to areas of plant safety and safeguards where quantitative risk assessment techniques provide no guidance, or at best guidance of great uncertainty. Examples are resistance to sabotage or to massive external events such as earthquakes.

Our current general licensing policy and outline of future activities and schedules for severe accidents are treated in more detail below. Especially important for decisions on operating plants and plants under construction is their connection with severe accident research as described below.

II. Policy on Safety Goals

The Commission published a policy statement on safety goals for the operation of nuclear power plants in the **Federal Register** on March 14, 1983 [48 FR 10772]. The policy statement contains qualitative safety goals and quantitative design objectives which are intended to be consistent with the qualitative goals. The Commission also announced the start of a two-year period of evaluation for the policy statement in March, 1983. During the evaluation period, the qualitative safety goals and quantitative design objectives will not be used in the licensing process or be interpreted as requiring the performance of probabilistic risk assessments by applicants or licensees (see Part III). Rather, the NRC will continue to use conformance to regulatory requirements as the exclusive licensing basis for plants. Use of the policy statement during the evaluation period will be limited to uses such as examining proposed and existing regulatory requirements, establishing research priorities (see Part VII), resolving generic issues (see Parts IX, X), and defining the relative importance of issues as they arise. At the conclusion of the evaluation period, the Commission will consider if any revisions are necessary before the issuance of a final policy statement and a plan for its implementation.

III. Use of Probabilistic Risk Assessment in Severe Accident Decisionmaking

Probabilistic risk assessment is a process that can be used to supplement the current deterministic approach for reviewing design and operation of a nuclear power plant. It provides an integrated assessment of the relative importance of potential accident sequences and helps identify the weaknesses in plant design and operation that contribute to the most importance accident sequences. Many PRAs of U.S. nuclear power plants have been made since two plants were analyzed and reported in the Reactor Safety Study (WASH–1400). These PRAs include risk assessments done under the NRC's Reactor Safety Study Methodology Application Program (RSSMAP) and the Interim Reliability Evaluation Program (IREP), as well as a number of industry studies (Big Rock Point, Limerick, Zion, and Indian Point).

A continuation of IREP has been designated the National Reliability Evaluation Program (NREP). In the future, NREP may be implemented on other operating plants within the United States, individually or in groups, using a standard methodology emanating from IREP or the NRC and industry forum on PRA procedures sponsored by the Institutes of Electrical and Electronics Engineers (IEEE) and the American Nuclear Society (ANS).

Thus far, the PRAs of nuclear power plants have varied in scope, depth, and quality; but, taken as a whole, they indicate measurable growth in the

constructive use of the techniques of PRA to develop supplements to current regulatory practice. They lead us to conclude that PRA improves our unstanding of the severe accident sequences to which plants are most vulnerable and therefore of the dominant constituents of the risk posed by specific plants. In sum, considering the experience with risk assessments thus far made, we conclude that the cost-effectiveness of risk reduction measures can be studied through PRA. Although there are limitations due to the many uncertainties associated with the use of PRA, the Commission considers it to be a valuable adjunct to the established regulatory process and NRC's reactor safety regulations in 10 CFR, Chapter I.

Some of the previous risk assessments have identified new equipment that, if added, and specific plant features that, if modified, have a high potential for risk reduction. Such features typically involve details of system design and operation and not the more fundamental and costly aspects of design. Some examples of details of system design and operation are discussed in Sections VIII and IX of this Policy Statement.

It is our judgment that the utility of PRA can be improved if it is integrated with the design process. To take advantage of this improved use of PRA, the Commission will require the performance of a PRA that is as complete as practical for any standardized design to be referenced in future CP applications. The purpose of these PRAs is twofold: to encourage the development of an effective reliability and risk management program beginning at the design stage and to determine if there should be additional regulatory requirements imposed because of insight gained from the PRA before issuance of a license referencing that design. We believe that such studies can help to identify design features that would lessen the likelihood of degraded-core-cooling events (accident prevention), arrest the extent of damage by successful interdiction of a degraded-core-cooling event (accident management), or lessen the ensuing consequences of a core meltdown (consequence mitigation). We expect that PRA can help to illuminate those design requirements that are practical and that can make a significant, cost-effectiveness contribution to risk reduction. Our regulations already require for near-term CPs that PRA be factored into the design process shortly after CP issuance. Thus, our policy for new CP applications referencing standardized designs is simply to require that the PRA and associated reliability engineering programs be performed earlier in both the design and regulatory processes than is now the case. The specifics our standardization policy are discussed more fully in Section VI of this Policy Statement.

We emphasize that PRA is only one of several tools to be used in making backfit decisions for plants already licensed and in developing safety rulemaking for future standardized designs. We also caution that although we intend to encourage broad uses of the PRA methodology in regulatory decisionmaking—including severe accident analysis in operating nuclear power plants—we do not expect to develop widespread requirements for compliance with any numerical safety goal design objectives that might be approved for individual licensing reviews until refinements in PRA methodology make it more appropriate for this purpose. Some discussions of provisional numerical guidelines and PRA methodology will emerge in certain licensing hearings where PRAs have been required (e.g., OL applications for plants in high population density sites and new CP applications).

IV. Lessons Learned From Three Mile Island

The lessons learned from TMI have been applied to operating plants, plants in operating license review, and plants now undergoing construction permit review. The lessons are summarized as licensing requirements for operating plants and plants under construction in "Clarification of TMI Action Plan Requirements" (NUREG–0737, November 1980). The Commission's policy for pending CP applicants is that they comply with the CP Rule (47 FR 2286, January 15, 1982). It is our policy that future CP applications or reactivations of CP applications previously docketed also comply with the CP Rule.

Since effective implementation of the actions summarized in NUREG–0737 and the CP Rule have significantly upgraded nuclear power plant safety, a deliberate approach to decisionmaking is described in Section X of this Policy Statement.

V. Standard Review Plan

On March 18, 1982, the Commission announced the issuance of a rule (47 FR 11651) that requires future applicants for operating licenses, construction permits, manufacturing licenses, the preliminary or final design approvals for standard plants to identify and evaluate differences from the acceptance criteria of the applicable revision of the Standard Review Plan (SRP) as part of the technical information to be submitted as part of an application. The SRP was originally issued in 1975 with the most recent revision being issued in September 1981 (NUREG–0800).

The SRP describes acceptance bases and criteria for conclusions which are presented in a staff Safety Evaluation Report (SER). Although conformance with the SRP is not a regulatory requirement, the acceptance criteria of the SRP provide for greater stability in the licensing process and, in a growing number of areas, also provide quantitative guidance for ensuring safe performance of a plant. The lessons learned from TMI have also been incorporated into the SRP. Accordingly, the strengthening of the SRP and procedures for its application reduce the urgency for final decisions on severe accidents for plants under construction. Moreover, SRPs provide a useful fiducial for considering new safety requirements for the next generation of plants. Hence, staff review against the SRP is an important part of the network of assurance needed on the acceptability of new plants.

VI. Standardization Policy

On August 31, 1978, the Commission issued a policy statement, "Statement on Standardization of Nuclear Power Plants," that expanded on the standardization concept for nuclear plants and described specific policy changes being made to improve the usefulness of the Commission's standardization program (43 FR 38954). That policy statement, among other things, defines the effective time periods for design approvals under each of the four standardization concepts: (i) The reference system concept; (ii) the duplicate plant concept; (iii) the manufacturing license concept; and (iv) the replicate plant concept.

The Commission reiterates its support for standardization. To this end, holders of, and applicants for, Preliminary or Final Design Approvals should modify their applications to take into account the guidance of this Policy Statement if the design approvals are to be used in future CP applications. The requirements to be met are enumerated in Section X of this Policy Statement. We expect to complete our reviews within a year or two such applications. In the interim until a severe accident review is completed and a new design approval is granted, a standard design with an approval granted pursuant to present Commission regulations must be updated in order to be referenced in new or reactivated CP applications by

showing that it meets the new CP Rule, and an application must be filed for a severe accident review pursuant to the requirements of Section X, below.

When reviewed by the staff and approved in rulemaking, the Commission expects that the approval of the standardized designs for referencing in future CP applications would be binding on both the staff and applicants for a period of ten years unless significant new safety information becomes available. Design changes considered in response to this new information would be reviewed to ensure that risk reduction is cost-effective before initiating further rulemaking to incorporate the changes. Regulatory or national standards issued subsequent to the approval of a standardized design (e.g., later editions of the ASME Code) may be proposed by applicant and used when agreed to by the staff in lieu of or in addition to those referenced if commercial practice makes it desirable.

Ten-year referenceability of approved designs appears to be a reasonable choice in view of the long lead times experienced in the past five to ten years in effecting significant design improvements; further, it is a time span consistent with practical use of standardized designs.

The Commission intends that approval of standard designs in accordance with Section X, below, be accomplished by rulemaking in accordance with 10 CFR Part 50, Appendix O, Section 7. Applicants seeking this course will be given priority over applicants for new custom plant approvals in the assignment of staff review resources.

The Commission acknowledges the importance of having final design information. This may require essentially an FDA-level of design detail for the nuclear steam supply system (NSSS) and for a substantial portion of the balance-of-plant (BOP) equipment before successful completion of a PRA for a standardized plant. It may be possible to compensate for lack of design detail by providing appropriate interface performance specifications. To conserve resources in the conduct of licensing reviews, the Commission will give priority, at the time of docketing, to standard plant applications for which a substantial portion of the NSSS and BOP design has been completed.[1]

[1]See previous Commission policy statement (43 FR 38954, August 31, 1978) with respect to antitrust aspects involved in the standardization approach.

Standardization policy will be more effective in achieving its objectives when coupled with regulatory reform initiatives for amending NRC regulations to provide for early and separate approvals of sites; for early and separate approvals of standardized nuclear power plant designs, including the balance of plant to the extent practicable; and for one-step licensing in cases using standardized whole-plant designs.

VII. Further Research on Severe Accidents

The Commission is conducting a research program on severe accidents. This program complements the IDCOR program of industry (see below) and it includes studies on the following:

- Probabilistic risk assessment methods, including those treating external events;
- Common-cause accident contributors;
- System interactions, including analysis of systems transients involving core damage;
- Accident management, including guidelines for recovery from a core-damaging event;
- Phenomenological research on fuel and fission product behavior of damaged cores and containment response to severe loadings;
- Human factors;
- Applications research on behavior of existing systems and components in the severe accident environment;
- Fission product release and transport; and
- Safety-cost tradeoff analysis of changes in hardware.

Among other things, the research is intended to reduce the substantial uncertainty in the risk calculations that would be used in implementing our safety policy. A basic problem to be addressed by the research program is that the uncertainty in the "front end" of PRAs (the likelihood of various accident sequences) is currently believed to be optimistically biased due to (a) possible lack of completeness in identifying all possible scenarios and describing their event sequences and (b) difficulties in identifying and modeling common-cause failures. However, the "back end" (consequence estimation) of risk assessment, is currently believed to be conservatively biased because of two basic assumptions. First, the partial failure of core cooling is usually assumed to result in total core melt. Second, recent research (see NUREG-0772) indicates that radioactive releases in dominant accident sequences are likely to be substantially lower than predictions based on the conservative assumptions in current licensing requirements or the assumptions in WASH-1400. These conservatisms concern the plateout of fission products in the primary system and the fallout of airborne radionuclides inside containments. These biases interfere with the usefulness of PRA for weighing the relative merits of different design or operating features. Research is needed to reduce the interference.

Our research program on severe accidents has two distinct phases. The first phase (scheduled for completion in early 1984) is designed to answer the necessary technical questions before final regulatory decisions on severe accidents are made. The objectives of Phase I (see Draft NUREG-0900, "Nuclear Plant Severe Accident Research Plan") are to provide the following:

- An improved methodology for probabilistic risk assessment plus a significant extension of the data base for severe accident assessment;
- Data for a better estimate of the radiological source term used to assess accident consequences; and
- A technical basis for regulatory decisions to add or modify principal design features and operating guides and procedures of existing plants with respect to their ability to prevent and mitigate severe accidents.

In Phase II (to be completed by the end of calendar year 1985), the objectives of the program are to complete development of the data base, to further improve PRA methodology and its applications, and to confirm and render more precise the bases for regulatory decisions and guidance. Of particular importance to rulemaking on standard plant designs for future applications is that the first phase of severe accident research will enable a more precise appraisal of specific design and operational refinements, especially from the standpoint of cost-effectiveness or risk/net benefit criteria. This will serve to indicate whether further reduction of risk is justifiable. In addition, better understanding of the dominant severe accident sequences and of the magnitude of radioactive releases in the first phase of the research is expected to lead to substantial improvements in emergency preparedness and procedures.

The Commission also notes a substantial commitment of industry resources for severe accident evaluation under the Industry Degraded Core Rulemaking (IDCOR) Program (see "IDCOR Program Plan," November 1981, Technology for Energy Corporation, Knoxville, Tennessee), to be completed

by mid-1983. In support of the IDCOR Program, the Nuclear Power Division of the Electric Power Research Institute has scheduled a number of important projects under its Degraded System Technology Program. The Commission feels it is prerequisite to the objectives and schedules set forth in this Policy Statement on Severe Accidents that the IDCOR Program continue on its present course and schedule.

We do not expect our present views on severe accident considerations to change substantially as a result of ongoing NRC-sponsored or industry research with respect to the fundamentals of the present designs and their general adherence to our safety policy. However, it is possible—though not necessarily likely for any or all classes of nuclear power plants reactors—that new information will demonstrate the desirability of certain lesser changes such as improved reliability of some engineered safety features and addition of filtered vents to some types of containment and design features that would reduce the risk from sabotage and earthquakes. Also, we expect research results to permit further risk reduction by identifying worthwhile refinements in the design of operating nuclear plants or their operating practices rather than indicating major redesign needs. The research will also help to develop more accurate probabilistic risk assessment methods for use in regulatory desision-making and to provide greater assurance of adequate protection of public health and safety.

VIII. Treatment of Severe Accidents in Ongoing Licensing Proceedings

The Commission has considered the question of whether additional regulations should be issued at this time to require more capability to mitigate the consequences of severe accidents in operating plants and plants under construction. Although, as noted above there are large programs presently ongoing that will provide information related to this question, they have not yet produced significant new insights into consequence mitigation features sufficient to support further regulatory changes, nor have they yet shown a clear need to add such features.

There are presently two rules, one final and one proposed, on hydrogen control and related matters (46 Fr 58484, December 2, 1981, and 46 Fr 62281, December 23, 1981). These rules are intended to provide reasonable assurance, pending generic resolution, that the risk of degraded-core accidents for plants designed in accordance with current regulatory requirements is acceptable. Accordingly, individual licensing proceedings are not appropriate forums for a broad examination of the Commission's regulatory requirements relating to control and mitigation of accidents more severe than the design basis. Similarly, notwithstanding the Class 9 accidents review requirements for environmental hearings of the Commission's Statement of Interim Policy on "Nuclear Power Plant Accident Considerations Under the National Environmental policy Act of 1969" (45 FR 40101, June 13, 1980), the capability of current designs or procedures (or alternatives thereto) to control or mitigate severe accidents should not be addressed in case-related safety hearings. Likewise, our new rule for pending construction permits (47 FR 2286, January 15, 1981) is sufficient for licensing of that class of plant insofar as severe accident management or consequence mitigation is concerned.

The ongoing programs of severe accident study and research described in Section VII of this Policy Statement will provide new information. The Commission will ensure that these programs are closely coordinated and will concentrate on specific analyses and experiments needed for operating plants and plants under construction and on new standardized designs for future construction permit applications. The research will be designed to furnish information for regulatory decisions regarding features for accident prevention and management as well as consequence mitigation. The research will also improve our understanding of plant response to severe accidents so that their characteristics can be implanted into operator training and procedures. The intent is to obtain sufficient information in about two years to complete policy development and decisionmaking on severe accidents for all classes of plants. Confirmatory research may extend another several years.

In this regard, the Commission notes that much of the work to be done by the staff and its contractors as part of the Severe Accident Research Plan can be applied to light-water reactors either yet to be designed or to reactors now in operation. In some cases, the value of a change may be realized on either old or new designs. Examples of this would be changes in operator training or procedures for severe accidents and the addition of hydrogen ignition systems. In other cases, the cost of design variations could only be justified for new designs. Examples would be variations in the construction material of the containment basemat or variations in the ultimate strength of containment (See Section IX of this Policy Statement).

As described in Section VII, information on the potential for degraded-core accidents (to the extent allowed by the existing data base) is being assembled and assessed under the Industry Degraded Core Rulemaking Program. This effort is directed solely toward the current generation of operating plants. Thus, there are concurrent interests of NRC and IDCOR in assessing costs and relative benefits of potential changes in design and operations for operating plants. Accordingly, we expect that our staff will meet periodically with IDCOR staff to review progress, assess the safety significance of new information, and ensure that, to the extent feasible, the programs of study are closely coordinated and complementary.

Moreover, we expect the staff and the industry to interact periodically with the ACRS on severe accident research matters applicable to plants in operation or under construction or applicable to standard designs under review for construction permit applications. The staff should exchange views intially with the ACRS to agree on a tabulation of the fundamental severe accident questions and on the approach to answering these questions for the various classes of plants operating or planned. As the programs progress in NRC and industry, the ACRS will be asked to review progress and offer suggestions for change where needed to answer these fundamental questions.

The Commission will conduct an annual review of severe accident research to determine progress and to ascertain whether any substantial and significant new information has been developed that would require additional rules for severe accident protection features for operating plants and plants under construction. The Commission expects to conduct this annual review twice (the first time in the Spring of 1983 and the second, one year later), finally resolving this matter for operating plants and plants under construction by mid-1984.

IX. Present Views on Other Safety Issues and Efforts In Progress

A. Striking a Balance Between Accident Prevention and Consequence Mitigation.

The general thrust of Item II.B.8 of the TMI Action Plan (NUREG–0660) was for NRC and the nuclear industry to give further consideration to severe accidents beyond the design basis and, more specifically, to explore means to decrease the probability as well as

mitigate the consequences of such accidents. By using this approach the Commission seeks to strengthen its defense-in-depth policy by striking a new balance between accident prevention and consequence mitigation in controlling the risk of nuclear power plant accidents.

Preventive measures to reduce the probability of severe accidents have been at the heart of reactor safety regulations for many years—for example, most of the General Design Criteria of 10 CFR Part 50, Appendix A. Since the accident at TMI, there has been increased recognition that one of the most important systems in providing assurance of core-melt prevention following transients is a reliable decay heat removal system (DHRS). This had led NRC to approve shutdown decay heat removal requirements as an unresolved saftey issue (Task A–45).

The objective of this task is to develop a comprehensive and consistent set of shutdown cooling requirements for existing and future LWRs, including the study of alternative means of shutdown decay heat removal and of diverse "dedicated" systems for this purpose. This effort is supported by numerous research tasks. It is our hope that this will result in establishing technical performance criteria for decay heat removal systems.

However, the General Design Criteria also require that there be containment systems to control the effects of severe accidents. This is a form of consequence mitigation. Consideration of specific consequence mitigative measures for the dominant core-melt accident sequences in a new ingredient in reactor safety, and further clarification of the current policy and direction of Commission thinking on this subject for new CPs is provided below.

B. Containment Strength

In exploring the need for additional design or operational features in the next generation of plants to mitigate the consequences of core-melt accidents, the Commission will emphasize actions that improve understanding of containment building failure characteristics and design features or emergency actions that decrease the likelihood of containment building failures. The Commission has learned in its licensing activities and studies since the accident at TMI that some containments are better than others for mitigating core-melt consequences. Although not specifically designed to accommodate the hostile environments resulting from severe accidents, they can contain a large fraction of the radiological inventory from a spectrum of severe accidents. For example, large, dry containments may be sufficiently capable of mitigating the consequences of a wide spectrum of core-melt accidents; hence, further requirements may be unnecessary or, at most, upgrading current requirements to gain limited improvements of their existing capability may be necessary. The Commission expects that these matters will continue to be subjects for study (e.g., in the NRC research program and in further plant-specific studies such as the Zion and Indian Point probabilistic risk assessments).

Through an intergrated systems analysis it may be possible to demonstrate that other containment types exhibit a functional containment capability equivalent to that of large, dry containments. Although containment strength is an important feature to be considered in such an analysis, credits should also be given to the inherent energy and radionuclide absorption capabilities of the various designs as well as other design features that limit or control combustible gases.

A major difficulty in assessing systems behavior under the transient conditions of a core melt is the state of knowledge of the performance of containment and other consequence mitigation technologies. Probabilistic risk assessment appears to be fairly well developed for large, dry containment types, and the staff expects that comparable knowledge will be available soon for other containment types (Ice-Condenser and Mark I, II, and III).

It is clear that core-melt accident evaluations and containment failure evaluations should continue to be performed for a representative sample of operating plants and plants under construction and for all future plant designs. These studies should improve our understanding of the containment loading and failure characteristics for the various classes of facilities. The analyses should be as realistic as possible and should include, where appropriate, dynamic and static loadings from combustion of hydrogen and other combustibles, static pressure and temperature loadings from steam and non-condensibles, basemat penetration by core-melt materials, and effects of aerosols on engineered safety features. Following the outcome of severe accident research, a decision will be made whether to establish performance criteria for containment systems.

In addition to energy absorption capabilities mentioned above, several features that may decrease the chances of containment failure for some accidents in some containment designs are listed in Item II.B.8 of the TMI Action Plan, namely:

- Filtered venting of containment;
- Core-retention devices; and
- Hydrogen control features.

The NRC has been studying these and other mitigation features and is now in a position to give the following preliminary guidance about them for the designers of plants for new construction permit applications.

C. Filtered-Vented Containment Systems

In future CP applications for both pressurized water reactors (PWRs) and boiling water reactors (BWRs), filtered-vented containment systems, or a variation of such systems, should be provided if these yield a cost-effective reduction in risk. Some recent information indicates these systems may not be cost-effective for large, dry containments while other studies indicate these may be of value for some pressure suppression containments such as the MK III design of General Electric, or if the risk is dominated by large seismic events. GE has also considered a wet-well vent for its standardized Mark III design. These preliminary conclusions need to be addressed and final conclusions reached for new designs before they are applied to future plants.

D. Core-Retention Devices

Over the past several years, studies (such as NUREG–0650) of large, dry containment buildings indicate that classical core-retention devices are probably not cost-effective in reducing the release of radioactive materials to the atmosphere. Post-accident flooding of the reactor cavity may be all that is necessary to establish a coolable debris bed and prevent basemat penetration. However, unique basemat designs and unique or undesirable liquid-pathway characteristics [2] should be carefully weighed in future CP applications before deciding that this concept can be dismissed. Also, the materials of construction in the basemat can reduce or eliminated aerosols, combustibles (hydrogen and carbon monoxide), and non-condensibles arising from melted core and concrete interactions. Such gases and aerosols could contribute to the overpressurization threat to containment building integrity and should be considered in an integrated evaluation of the adequacy of containment performance.

[2] For example, a core-retention device is required on the floating nuclear plant because of liquid pathway issues.

E. Hydrogen Control Systems

The Commission intends to require hydrogen control systems to deal with degraded-core accidents for all dry containments, ice condenser containments, and the Mark I, II, and III containments. The requirements for plants in operation or under construction are contained in two rules (one final and one proposed) on "Interim Requirements Related to Hydrogen Control" (46 FR 58484, December 2, 1981, and 46 FR 62281, December 23, 1981). Somewhat more stringent requirements have been set forth in the CP rule. Our existing requirements for hydrogen control systems are based on a presumption that core cooling would be restored following a severe accident and that the reactor vessel and primary heat-transport systems would maintain their integrity. The cost-effectiveness of combustible gas control systems for even more sever accidents (i.e., accidents proceeding with core melt and vessel melt-through and large combustible gas releases) should be examined for future CP applications.

F. Reliable Containment Heat Removal

The staff is studying the need for more reliable subsystems for containment heat removal (in addition to systems normally provided in the past) as possible alternatives to filtered venting for prevention of gradual over-pressurization failure of the containment building. The cost-effectiveness of this alternative should be considered in the design of plants for new CP applications. In addition to a reduction of probability of gradual over-pressurization failure, the effective design of containment heat removal subsystems may also reduce the source term for the release of radioactive materials to the environment. Research tasks directed to these alternatives could provide information useful to the cost-effectiveness analysis of alternatives and possibly in establishing technical performance criteria if these subsystems prove cost-effective. Applicants for standard design approvals or construction permits should give special consideration to reliability of decay heat removal systems as a margin of conservatism to allow for the limitations of risk assessment methods for extraordinary events such as earthquakes and sabotage.

G. Other Consequence Mitigation Measures

There are other issues listed in Item II.B.8 of NUREG-0660 that the Commission believes have minimal value for improved safety and, therefore, need not be considered further; namely, effects of severe accidents at multi-unit sites and post-accident recovery plans. One item deserving consideration, however is the location outside containment of systems that could become highly radioactive following a severe accident. This item is not a policy question, but it is a matter of good engineering practice. The Commission expects that designers and applicants for future plants will show that these systems have been located to facilitate human access and to enhance their long-term, post-accident control and maintenance.

In general, core-melt consequence mitigation design features and procedures should be evaluated on as realistic a basis as possible. Considering the low probability of core-melt accidents, the Commission does not intend to require the use of conservative design criteria and analysis methods of the sort that have been applied to engineered safety features (safety-related equipment) required by NRC regulations for design basic accidents. Nonetheless, it is important to note that there may be more extreme design conditions for these mitigation system that might compromise safety-related systems. For example, if post-accident inerting is being considered for hydrogen control following a severe accident, then the inadvertent inserting of the containment building should not violate requirements appropriate for a design basis accident (i.e., service level A for steel containment buildings, including the effects of buckling). It is also important that attendant risks be taken into account in considering design and operational improvements for core-melt mitigation. Attendant risks introduced by new systems (e.g., inadvertent operation of a system for filtered venting of containment) are an important consideration.

H. External Events, Human Errors, and Sabotage

Another class of issues is the relation to severe accident considerations of sabotage and external events such as floods, winds, and earthquakes, as well as other accident initiators that are difficult to quantify, including multiple human errors and design errors. The Commission has addressed external events and operator errors in its "Policy Statement on Safety Goals for the Operation of Nuclear Power Plants" (48 FR 10772, March 14, 1983) within the context of the plan to evaluate the safety goal policy statement. Although the Commission has explicitly excluded sabotage from the safety goal policy statement, the Commission recognizes the merit of providing guidance on plant design that inhibit sabotage.

Pending decision on the final content of the safety goal policy statement, the Commission expects that applicants for standard design approvals will adddress these issues in their Safety Analysis Reports. Along with external events and human errors, these reviews will include design considerations to inhibit sabotage. Special attention should be paid to the potentially conflicting design objectives that may arise from safety and sabotage considerations. Applicants for standard design approvals or construction permits are to give specific consideration of plant design features that would decrease the probability of damage from sabotage.

In addressing potential accident initiators (including earthquakes, sabotage, and multiple human errors) where empirical data are limited and residual uncertainty is large, the use of conceptual modeling and scenario assumptions in Safety Analysis Reports will be helpful. They should be based on the best qualified judgments of experts, either in the form of subjective numerical probability estimates or qualitative assessments of initiating events and casual linkages in accident sequences. In addition to this design analysis approach for new plants, the Commission's continuing practice of conservatism and use of the defense-in-depth concept for the design basis required by current regulations are intended to provide the requisite margin of protection for accident initiators of these kinds.

I. Siting Policy

Appropriate site selection can hold significant implications for reducing the contribution to overall risk of severe nuclear accidents from external event initiators such as earthquakes, floods, and tornadoes. Moreover, site characteristics such as meteorology and terrain have significant influence on the distribution and dispersal of any accidental releases of radioactive materials. Also, the population distribution in the vicinity of the site affects the magnitude and location of potential consequences from radiation releases.

Current siting regulations are set forth in 10 CFR Part 100, and siting guidance is given in Regulatory Guide 4.7, "General Site Suitability Criteria for Nuclear Power Stations." Siting policy and planning guidance for further improvements are set forth in "U.S. Nuclear Regulatory Commission Policy and Planning Guidance, 1982" (NUREG-

0885, Issue 1, January 1982, page 10) as follows:

Policy

Siting criteria for nuclear power plants and other major nuclear facilties need improvement. The staff has been working to prepare in the very near term modified regulations concerning the siting of nuclear power plants. The Commission has decided to better define its safety objectives and better characterize the radioactive source term before proceeding with new siting regulations.

Any new siting rule will be consistent with new radioactive source term information for severe accidents that are expected to be available in mid-1983. A program plan for issuing a siting rule that is consistent with the Commission's reassessment of the source term for radioactive material releases and the Commission's future policy on safety goals will be developed following completion of these actions. Based on staff work to date, the new siting rule is expected to apply to future sites only and to be a refinement of present siting guidance rather than a drastic revision of it.

X. Implementation Guidelines for Severe Accident Policy

Pending final resolution of current NRC initiatives regarding legislative and administrative regulatory reforms, as well as safety goals and their implementation plans, the Commission sets the following conditions for standard designs for reference in future CP applications or in any reactivations of previously docketed CP applications:

(1) Demonstration of compliance with current Commission regulations,

(2) Completion of a Probabilistic Risk Assessment before standard design approval through rulemaking. The applicant will be required to install those design features for prevention, management, or mitigation of severe accidents that are considered in light of Section IX above and shown to be cost-effective in the course of rulemaking for standard design approval;

(3) Completion of a staff review of the standard design with a conclusion of safety acceptability; the review will be based upon the updated version of the Standard Review Plan (NUREG–0800) and 10 CFR 50.34(g) that requires applicants to evaluate differences from the Standard Review Plan (see 47 FR 11651, March 18, 1982, and 47 FR 15569, April 12, 1982):

(4) Consideration of all applicable Unresolved Safety Issues; and

(5) Adherence to the requirements coming from the experience at TMI and set forth in the CP Rule 10 CFR 50.34(f) (47 FR 2286, January 15, 1982).

Regarding the last item, the CP Rule applied initially to a narrow group of CP applications. However, the Commission intends that the CP Rule become a minimum requirement for new plants and, in due course, intends to modify the regulations to that effect. For those CP applications and reactivations of previously docketed CP applications meeting the guidelines above, the Commission expects that no additional fundamental design requirements relating to severe accidents will be issued, unless new safety information shows an unacceptably wide departure from the safety goals and numerical guidelines that may be issued by the Commission.

The only exception to the conditions listed above is that, between now and completion of a review of a standard plant design for severe accident considerations, the Commission will grant CPs, under its previous standardization policy, to applicants for plants referencing a standard design approval supplemented by a showing of conformance to the CP Rule, under the conditions cited in Section VI, "Standardization Policy," above. Regulatory decisions affecting operating plants and plants under construction, regarding any safety requirements being imposed on plants of new design, will be made only after due consideration of the safety-cost tradeoff criteria and available new research information on severe accidents.

Secretary of the Commission.

Additional Views of Commissioner Asselstine Agreeing in Part and Dissenting in Part

Summary

I support the *concept* embodied in the Commission's proposed policy statement of replacing the broad, open-ended generic rulemaking on severe accidents, as contained in Task II. B. 8 of the TMI Action Plan, with more specific, focused and near-term efforts to consider severe accident issues for various categories of existing and future nuclear power plants. In particular, I believe that the Commission's proposed policy statement provides a much-improved framework for addressing severe accidents through the Commission's consideration of standardized nuclear power plant designs that might be referenced in any future nuclear power plant construction permit applications. I therefore support in general these elements of the Commission's proposed policy statement.

However, I do *not* believe that the Commission's proposed policy statement adequately defines the process for deciding what changes, if any, in the current generation of nuclear power plants (the 79 plants now holding operating licenses and the 59 plants presently under construction) are needed to take into account severe accidents (i.e., accidents beyond those considered in the current design basis accident approach such as core-melt accidents). In marked contrast to the detailed rulemaking process established for standardized designs for *future* plants, the Commission's proposed policy statement provides, for the 138 plants now in operation or under construction, only the general outlines of an internal NRC review process for severe accident issues in place of the Commission's previous decision to conduct a generic rulemaking. Moreover, I believe that the Commission's policy statement reaches certain judgments on the likely outcome of the Commission's evaluations of severe accidents for future as well as existing plants that are unjustified on the basis of information now before the Commission. For these reasons, as discussed in greater detail below, I cannot support either the approach taken in the proposed policy statement for resolving severe accident questions for *existing* plants or the judgments in the proposed policy statement on the likely outcome of the Commission's evaluations of severe accidents. In at least these respects, I reach the same conclusion as did our Advisory Committee on Reactor Safeguards—that the Commission's proposed policy statement is "seriously flawed."

Discussion

One of the more significant lessons learned from the Three Mile Island accident was that severe accidents—

that is, accidents involving serious disruption or melting of the reactor core—can in fact occur, and with greater likelihood than was generally thought previously to be the case. Indeed, prior to the Three Mile Island accident, it was thought that such accidents were so unlikely as to be virtually incredible. For this reason, the Commission's regulations defined such accidents as being beyond the "design basis" for nuclear power plants, and they effectively precluded in the licensing process consideration of issues relating to a plant's ability to withstand such accidents.

Following the Three Mile Island accident, the Commission announced its intent to conduct a long-term, generic rulemaking effort (including the possibility of a hearing) that was intended to establish requirements relating to core-melt accidents (Task II. B. 8 of the TMI Action Plan). An advance notice of proposed rulemaking on this subject was published on October 2, 1980 (45 FR 65474). The Commission's proposed policy statement being issued today would replace this largely unfocused, long-term generic rulemaking effort with two new approaches: one for new standardized plant design (that may serve as the design basis for as-yet-unordered future plants) and a second for the 138 existing plants with operating licenses and construction permits.

For standardized designs, the Commission's proposed policy statement defines in considerable detail the process to be used to resolve severe accident considerations. This process calls for a rulemaking proceeding to certify the acceptability of the design. Since the Commission has recently submitted legislation to the Congress that would require the use of hybrid hearing procedures for the approval of standardized plant designs, I would expect the Commission to employ these or other adjudicatory procedures in these proceedings. The proposed policy statement further specifies that this rulemaking proceedings must include a severe accident review. This review must, in turn, address a number of specific severe accident issues described in detail in section IX of the proposed policy statement. Finally, the proposed policy statement specifies that the design must meet the requirements of the Commission's Construction Permit rule, must achieve a technical resolution of the Unresolved Safety Issues and must be adequately responsive to insights afforded by probabilistic risk assessments.

Taken together, I believe that these elements of the Commission's proposed policy statement provide a much-improved framework for considering severe accidents in standardized designs for future plants. However, even this framework poses certain practical difficulties. For example, the proposed policy statement predicts completion of the severe accident reviews for standardized designs within two years. This time period may not be sufficient to conclude ongoing generic programs to address certain of the more complex Unresolved Safety Issues, such as shutdown decay heat removal. Yet these generic programs may be essential to determine whether a technical resolution of the Unresolved Safety Issues has been achieved in the proposed new designs. The approach also entails some reliance on the use of probabilistic risk assessment techniques which may not be sufficiently matured within the next year or two to resolve severe accident issues. Thus, it may not be possible to conclude these severe accident reviews for standardized designs within the rather optimistic time schedule contemplated in the proposed policy statement.

Nevertheless, on balance, I believe that the proposed policy statement sets forth an acceptable overall approach to addressing severe accident considerations for standardized designs for future plants.

The approach taken by the policy statement for *existing* plants is an entirely different matter. In marked contrast to the approach taken for standardized designs, the policy statement specifies only a process for "regulatory decisions" for existing plants that "may, or may not, include rulemaking." Thus, for existing plants, the Commission may well rely on internal judgments that could remain untested by the types of administrative procedures that will be employed for standardized designs. Moreover, although the policy statement calls for the study of "a range of possible design and operational changes to improve accident prevention and consequence mitigation capabilities" for existing plants, these changes are not identified in the statement.

I would have treated the 138 plants in much the same manner as standardized designs. That is, I would have defined more clearly the process and procedures to be used to evaluate severe accidents, and the severe accident issues that must be considered, for existing plants. Specifically, I would have incorporated a list of severe accident design and procedural changes that should be considered for existing plants. Upon completion of the staff's evaluation of these possible changes based upon our ongoing severe accident research programs and those of the industry (within one to two years), I would have commenced a rulemaking proceeding using hybrid hearing procedures to assess the adequacy of the conclusions reached and to determine whether additional changes might be needed to address severe accident considerations for various categories of existing plants. I believe that such a process would have provided a necessary means both for testing the adequacy of the staff's judgments and for assuring public involvement in our decisionmaking on severe accident issues.

My second concern regarding the Commission's proposed policy statement relates to certain judgments in the statement about the likely outcome of the Commission's evaluations of severe accidents for future and existing plants. Each of these judgments purports to be a judgment by the Commission. In each case, I do not believe that the Commission now has before it sufficient information to support these judgments.

Specifically, the proposed policy statement contains four judgments on the likely outcome of the Commission's severe accident evaluations that I believe are unsupported. First, according to the statement, the Commission believes that nuclear power plants of modern designs can be shown to be acceptable for severe accident concerns if they meet the requirements of the CP rule, if they achieve a technical resolution of the Unresolved Safety Issues and if they are adequately responsive to insights afforded by probabilistic risk assessments. Second, according to the statement, the existing group of about 13 probabilistic risk assessments for specific plants will provide a satisfactory basis for developing insights on severe accident considerations for all existing nuclear power plants. Third, according to the statement, the Commission does not expect its present views on severe accident considerations to change substantially as a result of ongoing NRC-sponsored or industry research with respect to the fundamentals of present plant designs and their general adherence to NRC safety policy. Finally, according to the statement, the Commission expects that no additional fundamental design requirements relating to severe accidents will be issued unless the Commission adopts for use safety goals and numerical guidelines, and new information shows

an "unacceptably wide departure" from them.

I want to emphasize that my concern with these judgments is not that they will eventually be found to be unwarranted. It could well be that the Commission's ongoing severe accident research program (at a funding level of about $50 million per year) will over the next year or two provide the necessary support for these judgments. That comprehensive and complex research program has been underway since as early as 1980 and the Commission has yet to have its first briefing on the overall results obtained thus far.

Information to support these judgments may also become available as a result of the industry's IDCOR program, but again, the Commission has yet to receive any results of that effort. Much of the same is also true for the NRC staff's ongoing effort to review and evaluate the adequacy of the existing plant-specific probabilistic risk assessments. Again, the Commission has yet to see any concrete results from this effort. In the absence of this type of information, I simply do not see a basis for the Commission to reach these judgments on the likely outcome of the severe accident evaluations. For this reason, I would have deleted these judgments from the proposed policy statement.

Commissioner Gilinsky's Separate Views on the Severe Accident Policy

I share Commissioner Asselstine's concerns and those of the Commission's Advisory Committee on Reactor Safeguards over the application of this policy. I share especially the ACRS's strong reservations about the overemphasis in this policy statement on use of "probabilistic risk assessment" in design decisions dealing with protection against severe accidents. In view of the lack of reliability data and the uncertainties in calculational techniques, reactor safety must continue to depend on time-tested engineering principles. Particularly important in this context are redundant and diverse means of protection against, and mitigation of, reactor core damage. The Commission should now be giving additional guidance on what it will require in these areas.

I find it surprising and disappointing that after all this time, despite the large research programs we conduct, and the extensive expertise and experience of our staff, we have not yet—in the words of this policy statement—"produced significant new insights into consequence mitigation features sufficient to support further regulatory changes * * *".

In a sense, this increases the importance of public comments on this policy, for it appears that conceptual improvements in reactor safety will have to come from outside this agency.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 73
Thursday, April 14, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 574]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period April 15–April 21, 1983. Such action is needed to provide for orderly marketing of fresh navel oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION:

Findings

This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel orange crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This regulation is issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on September 21, 1982. The committee met again publicly on April 11, 1983 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified week. The committee reports the demand for navel oranges is lower than last week.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared policy of the Act to make this regulatory provision effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 907

Marketing agreement and orders, California, Arizona, Oranges (navel).

PART 907—[AMENDED]

1. Section 907.874 is added as follows:

§ 907.874 Navel orange regulation 574.

The quantities of navel oranges grown in California and Arizona which may be handled during the period April 15, 1983 through April 21, 1983, are established as follows:

(1) District 1: 1,600,000 cartons;
(2) District 2: Unlimited cartons;
(3) District 3: Unlimited cartons;
(4) District 4: Unlimited cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: April 12, 1983.

D. S. Kuryloski,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 83–10188 Filed 4–13–83; 11:42 am]
BILLING CODE 3410–02–M

7 CFR Parts 925 and 944

[California Desert Grape Reg. 3; Table Grape Import Reg. 1]

Grapes Grown in a Designated Area of Southeastern California, and Table Grapes Imported into the United States

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule establishes minimum requirements for table grapes grown in southeastern California and for table grapes imported into the United States, except for the Emperor, Calmeria, Almeria, and Ribier varieties which are not grown in the production area in southeastern California. Such grapes are required to meet the minimum grade and size requirements for U.S. No. 1 Table grade, as defined in the United States Standards for Grades of Table Grapes (European or Vinifera Type), and minimum maturity standards as defined in the Administrative Code of California. For table grapes grown in southeastern California additional requirements are effective, including container and pack, container marking, and packing holidays. These actions are needed to assure the shipment of ample supplies of table grapes of acceptable quality and to promote orderly marketing in the interests of producers and consumers.

DATES: Effective May 1, 1983, through August 15, 1983. The Director of the **Federal Register** approves the incorporation by reference of certain publications in 7 CFR 925.302 and 944.501 effective May 1, 1983 through August 15, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California desert grape crop and of imported table grapes for the benefit of producers and consumers, and will not substantially affect costs for the persons directly regulated.

California Desert Grape Regulation 3 is issued under the marketing agreement and Order No. 925 (7 CFR Part 925), regulating the handling of table grapes grown in a designated area of southeastern California. This marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Table Grape Import Regulation 1 is issued under Section 8e (7 U.S.C. 608e–1) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). Section 8e requires that when specified commodities, including table grapes, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity.

It is hereby found that this final rule will tend to effectuate the declared policy of the Act.

The California Desert Grape Administrative Committee has recommended grade, size, maturity, container, pack, and other requirements for table grapes grown in southeastern California, to be effective for the period May 1–August 15, 1983. A proposed rule relative to regulation of such grapes was published February 23, 1983, in the **Federal Register** (48 FR 7581), providing for comments through March 25, 1983. A proposed rule relative to regulation of imported table grapes was published March 8, 1983, in the **Federal Register** (48 FR 9657), providing for comments through March 23, 1983.

Exceptions were filed by the Imported Winter Grape Association, San Francisco, California, regarding both proposals. The Association represents importers and distributors of grapes grown in Chile. The exception would change the effective date of the regulations from May 1, 1983, to June 1, 1983. The Association maintains that sales of California desert grapes on May 1 are generally not substantial and the grape import regulation effective on that same date would result in unnecessary regulation of end-of-season shipments of Chilean grapes.

An exception was also filed by the Chilean Ambassador requesting that the effective date of the import regulation be changed to May 15, 1983. The exception indicated that the May 1 effective date would seriously affect imports of Chilean grapes.

The California Desert Grape Administrative Committee has projected that shipments of grapes regulated under the Federal marketing order will begin on or about May 1, 1983. Moreover, even if substantial shipments do not develop by May 1, there would exist a good possibility for some shippers to harvest immature grapes and ship them prior to May 15 in order to take advantage of the early season high prices. This could negate the effectiveness of the entire seasonal regulation since the desert grape season is relatively short. The intent of the domestic regulation is to prevent the shipment of immature grapes that could destroy product quality image. Since Chilean grapes that would arrive in May are end-of-season grapes, there should not be any problem meeting minimum requirements. Accordingly, it is found that the effective date of the domestic and import regulation should be set at May 1 and the exceptions are denied.

The exception filed by the Imported Winter Grape Association requests that the final import grape regulation be variety specific and contain exemptions for Emperor, Calmeria, Almeria, and Ribier. The proposed and final import grape regulations specifically exempt Emperor, Calmeria, Almeria and Ribier varieties, as these varieties are not grown in the production area. It is impracticable to prescribe specific varieties of grapes in the regulations as minor varieties may not be identified and would be unregulated.

California Desert Grape Regulation 3 requires shipments of table grapes grown in southeastern California to meet the minimum grade and size requirements of U.S. No. 1 Table Grade as specified in the United States Standards for Grades of Table Grapes (European or Vinifera Type.) In addition, such grapes will also be required to meet the minimum maturity requirements for table grapes as specified in the California Administrative Code. Table Grape Import Regulation 1 requires table grapes imported into the United States to meet these same minimum grade, size, and maturity requirements. Table grapes of the Emperor, Calmeria, Almeria, and Ribier varieties are specifically exempted from both the domestic and import regulations because they are not grown in the production area covered by Marketing Order 925.

California Desert Grape Regulation 3 also establishes certain container and pack requirements as well as container marking requirements in order to standardize packing practices. Container and packing requirements are specified in the regulation and in the California Administrative Code. Experimental containers approved by the committee may also be used. A minimum of 22 pounds of grapes must be packed in each of the authorized containers, except for certain packs and experimental containers. Containers must bear the minimum net weight of the grapes in the container, the name of the grape variety, the name of the shipper, and the lot stamp inspection number on the outside of the container. Such requirements are designed to facilitate identification of shipments and promote orderly marketing of these grapes. Packing holidays on Saturdays and Sundays and certain holidays during the regulation period are also established and are designed to prevent an accumulation of excessive supplies of table grapes at distribution points during periods of reduced demand or market inactivity. The regulation exempts "organically-grown" table grapes from the minimum individual berry size requirement, while table grapes for processing are exempt from regulation, if certain conditions and safeguards are met.

It is found that it is impracticable and contrary to the public interest to postpone the effective date of these regulations until 30 days after publication in the **Federal Register** (5 U.S.C. 553), and good cause exists for making these regulatory provisions effective as specified in that: (1) The regulatory provisions of these regulations must become effective by May 1, 1983, in order to effectuate the declared policy of the Act; (2) the regulatory requirements in the final rule are the same as those in the proposed rules published in the **Federal Register**, including the effective period; and (3) the import requirements for table grapes are mandatory under section 8e of the Act, and the required 3 days notice is provided.

List of Subjects

7 CFR Part 925

Marketing agreement and orders, Grapes, California, Incorporation by reference.

7 CFR Part 944

Fruits, Import regulations, Grapes, Incorporation by reference.

Therefore, new §§ 925.302 and 944.501 are added, and § 944.400 is amended by revising the title and paragraph (a) thereof, to read as follows: (Sections 925.302 and 944.501 expire August 15, 1983, and will not be published in the annual Code of Federal Regulations).

PART 925—[AMENDED]

§ 925.302 California Desert Grape Regulation 3.

During the period May 1, 1983, through August 15, 1983, no person shall handle any variety of grapes, except Emperor, Calmeria, Almeria, and Ribier varieties unless such grapes meet the following requirements: *Provided,* That no person shall pack any such grapes on any Saturday or Sunday, or on May 30 or July 4, 1983, unless approved in accordance with paragraph (e)—

(a) *Grade, size, and maturity.* Such grapes shall meet the minimum grade and size requirements specified in § 51.884 for U.S. No. 1 Table Grade, as set forth in the U.S. Standards for Grades of Table Grapes (European or vinifera type, 7 CFR 51.880 through 51.912), and minimum maturity standards in accordance with applicable sampling and testing procedures specified in sections 1436.3 through 1436.17 of the Administrative Code of California (Title 3).

(b) *Container and Pack.* (1) Such grapes shall be packed in one of the following containers, which are new and clean, and which otherwise meet the requirements of sections 1359 (a), (b), (d), 1380.19, 1436.35, 1436.37, 1436.38 and 1436.40 of the Administrative Code of California (Title 3):

(i) Sawdust pack with inside dimensions of 7¾×14^{15}⁄$_{16}$×18⅝ inches, specified as container 28;

(ii) Polystyrene lug with inside dimensions of 6¾×12½×15⅝ inches, specified as container 38J;

(iii) Standard grape lug with dimensions in inches of 4½ to 8½ (inside) × 13½ to 14½ (outside) × 16⅝ to 17⅞ (outside); specified as container 38K;

(iv) Polystyrene lug with inside dimensions of 6¼ or 8¼×11½×18⅝ inches, specified as container 38Q;

(v) Grape lug with dimensions in inches of 4 to 7 inches (inside) × 15⅝ (outside) × 19^{11}⁄$_{16}$ (outside), specified as container 38R;

(vi) Such other types and sizes of containers as may be approved by the committee for experimental or research purposes.

(2) The minimum net weight of grapes in any such containers, except for containers containing grapes packed in sawdust, cork, excelsior or similar packing material, and experimental containers, shall be 22 pounds based on the average net weight of grapes in a representative sample of containers.

(3) Such containers of grapes shall be plainly marked with the minimum net weight of grapes contained therein (with numbers and letters at least one-fourth inch in height), the name of the variety of the grapes and the name of the shipper.

(4) Such containers of grapes shall be plainly marked with the lot stamp number corresponding to the lot inspection conducted by an authorized inspector, except that such requirement shall not apply to containers in the center tier of a lot palletized in a 3 box by a 3 box pallet configuration.

(c) *Organically grown grapes.* Organically grown grapes (defined to mean grapes which have been grown for market as natural grapes by performing all the normal cultural practices, but not using any inorganic fertilizers or agricultural chemicals including insecticides, herbicides, and growth regulators, except sulfur) need not meet the minimum individual berry size requirements of this section if the following conditions and safeguards are met: (1) The handler of such grapes has registered and certified with the committee on a date specified by the committee the location of the vineyard, the acreage and variety of grapes, and such other information as may be needed by the committee to carry out these provisions; (2) each container of organically grown grapes bears the words "organically grown" on one outside end of the container in plain letters in addition to requirements specified under paragraph (b)(3) of this section.

(d) *By-product grapes.* The handling of grapes for processing (raisins, crushing and other by-products) is exempt from requirements specified in paragraphs (a), (b), and (c) of this section if the committee determines that the person handling such grapes has secured the appropriate permit or order from the County Agricultural Commissioner, and the by-product plant or packing plant to which the grapes are shipped has adequate facilities for commercial processing, grading, packing, or manufacturing of by-products for resale.

(e) *Suspension of packing holidays.* Upon approval of the Committee, the prohibition against packing grapes on any Saturday or Sunday, or on May 30 or July 4, 1983, may be modified or suspended to permit the handling of grapes provided such handling complies with procedures and safeguards specified by the committee.

(f) Certain maturity, container, and pack requirements cited in this regulation are specified in the Administrative Code of California (Title 3), and are incorporated by reference. Copies of such requirements are available from William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250. Telephone 202–447–5975. They are also available for inspection at the office of the Federal Register Information Center, Room 8301, 1100 L Street, NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register on March 29, 1983. These materials are incorporated as they exist on the date of the approval and a notice of any change in these materials will be published in the Federal Register.

PART 944—[AMENDED]

§ 944.501 Table Grape Import Regulation 1.

(a) *Applicability to imports.* Pursuant to section 8e of the Act and Part 944—Fruits; Import Regulations, during the period May 1, 1983, through August 15, 1983, the importation into the United States of any variety of vinifera species table grapes, except Emperor, Calmeria, Almeria, and Ribier varieties, is prohibited unless such grapes meet the minimum grade and size requirements specified in § 51.884 for U.S. No. 1 Table Grade, as set forth in the U.S. Standards for Grades of Table Grapes (European or Vinifera Type, 7 CFR 51.880–51.912), and minimum maturity standards in accordance with applicable sampling and testing procedures specified in §§ 1436.3–1436.17 of the administrative Code of California (Title 3).

Such minimum maturity standards are incorporated by reference, copies of which are available from William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975. They are also available for inspection at the office of the Federal Register Information Center, Room 8301, 1100 L Street, NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register on March 29, 1983. These materials are incorporated as they exist

on the date of approval and a notice of any change in these materials will be published in the **Federal Register**.

(b) The Federal or Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, is designated as the governmental inspection service for certifying the grade, size, quality, and maturity of table grapes that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of table grapes, is required on all imports. The inspection and certification services will be available upon application in accordance with the rules and regulations governing inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 51) and in accordance with the Procedure for Requesting Inspection and Designating the Agencies to Perform Required Inspection and Certification (7 CFR Part 944.400).

(c) The term "importation" means release from custody of the United States Customs Service.

(d) Any lot or portion thereof which fails to meet the import requirements may be reconditioned or exported. Any failed lot which is not exported shall be disposed of under the supervision of the Federal or Federal-State Inspection Service with the costs of certifying the disposal of said lot borne by the importer.

(e) It is determined that imports of table grapes, during the effective time of this regulation, are in most direct competition with table grapes grown in southeastern California, under M.O. 925 (7 CFR part 925). The grade, size, quality and maturity requirements of this section are the same as those applicable to table grapes grown in southeastern California.

§ 944.400 Designated inspection services and procedure for obtaining inspection and certification of imported avocados, grapefruit, limes, oranges, and table grapes regulated under section 8e of the Agricultural Marketing Agreement Act of 1937, as amended.

(a) The Federal or Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, is hereby designated as the governmental inspection service for the purpose of certifying the grade, size, quality, and maturity of avocados, grapefruit, limes, oranges and table grapes that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with appropriate evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of the specified fruit, is required on all imports. Such inspection and certification services will be available upon application in accordance with the Regulations Governing Inspection, Certification and Standards for Fresh Fruits, Vegetables, and Other Products (7 CFR part 51) but, since inspectors are not located in the immediate vicinity of some of the small ports of entry, such as those in southern California, importers of avocados, grapefruit, limes, oranges, and table grapes should make arrangements for inspection, through the applicable one of the following offices, at least the specified number of days prior to the time when the fruit will be imported:

BILLING CODE 3410-02-M

---

7 CFR Part 1139

Milk in the Lake Mead Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action continues through July 1983 a previous suspension of certain provisions of the Lake Mead Federal milk order. The suspension removes the limit on the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. The continuation of the earlier suspension for December 1982 through March 1983 was requested by a cooperative association to assure the efficient disposition of milk not needed for fluid use and still maintain producer status under the order for its dairy farmer members regularly associated with the market. Based on available information concerning the market's current supply conditions, continuation of the suspension is necessary to accommodate the efficient and orderly disposition of reserve milk supplies that are available to the market.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–7183.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Proposed Suspension: Issued March 18, 1983; published March 24, 1983 (48 FR 12388).

This action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It has been determined that the need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register**. However, this would not permit the issuance of the suspension in time to include April 1983 in the suspension period. The initial request for this action was received on March 9, 1983. A notice of proposed suspension was issued on March 18, 1983, inviting interested parties to comment on the proposed action by March 31, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action would not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Lake Mead marketing area.

Notice of proposed rulemaking was published in the **Federal Register** (48 FR 12388) concerning a proposed suspension of certain provisions of the order. Interested parties were afforded opportunity to file data, views, and arguments thereon. No opposing views were received.

After considering all relevant material, including the proposal in the notice, and other available information, it is hereby found and determined that

for the months of April 1983 through July 1983 the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1139.13(d)(2), the sentence "The total quantity of milk so diverted may not exceed 30 percent in the months of March through July and 20 percent in other months of the producer milk which the association causes to be delivered to pool plants during the month".

2. In § 1139.13(d)(3), the sentence "The total quantity of milk so diverted may not exceed 30 percent in the months of March through July and 20 percent in other months of the milk received at such pool plants from producers and for which the operator of such plant is the handler during the month".

Statement of Consideration

This action continues through July 1983 a similar suspension that has been in effect since April 1982 (47 FR 17036, 47 FR 38496, 47 FR 55201). The suspension removes the limit on the amount of producer milk that a cooperative association or other handlers may divert from pool plants to nonpool plants. The order now provides that a cooperative association may divert up to 30 percent of its total member milk received at all pool plants or diverted therefrom during the months of March through July and 20 percent during all other months. Similarly, the operator of a pool plant may divert up to 30 percent of its receipts of producer milk (for which the operator of such plant is the handler during the month) during the months of March through July and 20 percent during all other months.

A continuation of the suspension was requested by the Lake Mead Cooperative Association, which supplies a substantial part of the market's fluid milk needs and handles most of the market's reserve milk supplies. The basis for the cooperative's request is a continuing imbalance between the market's fluid milk requirements and the milk supplies available from producers. The same marketing conditions that prompted the previous suspension request are expected to prevail for the immediate future.

The cooperative stated that milk production continues to be heavy without a corresponding increase in sales to fluid milk outlets. Consequently, the cooperative expects its reserve milk supplies during the next few months to exceed the quantity of producer milk that may be diverted to nonpool manufacturing plants under the order's present diversion limitations. Unless the suspension is continued, the cooperative asserts that some of the milk of its member producers who have regularly supplied the fluid market would have to be moved uneconomically first to pool plants and then to nonpool manufacturing plants in order to continue producer status for such milk.

The cooperative association requested continuation of the current suspension until a more permanent regulatory solution to the supply-demand imbalance in the market could be formulated based on the record of a public hearing. The cooperative association has filed proposed amendments to the order that would accommodate present marketing conditions. It is expected that a hearing will be held in the near future on these as well as other proposals to amend the order.

Based on available information concerning the market's current supply conditions, a continuation of the suspension for the months of April through July 1983 is warranted, as it will accommodate the pooling and efficient handling of the proponent cooperative's reserve milk supplies pending a hearing at which proposals to amend the diversion provisions may be considered. In the absence of continuing the suspension, costly and inefficient movements of producer milk would have to be made solely for the purpose of pooling the milk of dairy farmers who have been regularly associated with the market. Continuation of the suspension for the next several months will provide the necessary flexibility in the handling of the market's reserve milk supplies and thus prevent uneconomic movements of some milk through pool plants merely for the purpose of qualifying it for producer milk status under the order.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that the most efficient method of handling milk not needed for the fluid market is by direct movements from producers' farms to manufacturing outlets. This suspension allows for such economic movements of milk while the dairy farmers involved retain producer status;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to comment. No opposing views were received.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register.**

List of Subjects in 7 CFR Part 1139

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the aforesaid provisions in § 1139.(d)(2) and (3) of the order are hereby suspended for April 1983 through July 1983.

(Secs 1–19, 48 Stat. 31, as amended, 7 U. S. C. 601–674)

Effective date: April 14, 1983.

Signed at Washington, D.C., on April 8, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 82

[Docket No. 83-047]

Exotic Newcastle Disease; Areas Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document quarantines a portion of Sonoma County and a portion of Santa Clara County in California because of the existence of exotic Newcastle disease. Exotic Newcastle disease was confirmed in such portions of Sonoma County and Santa Clara County on April 5, 1983. Therefore, in order to prevent the dissemination of exotic Newcastle disease, it is necessary to take this action.

EFFECTIVE DATE: April 11, 1983.

FOR FURTHER INFORMATION CONTACT: W. W. Buisch, Chief, National Emergency Field Operations, Emergency Programs, Veterinary Services, USDA, Federal Building, Room 748, Hyattsville, MD 20782, 301–436–8073.

SUPPLEMENTARY INFORMATION: Exotic Newcastle disease is a communicable viral disease affecting all species of poultry and birds. This disease was diagnosed on a premises in Sonoma County and a premises in Santa Clara County on April 5, 1983.

This document on an emergency basis amends 9 CFR Part 82 by quarantining those portions of Sonoma County and Santa Clara County, California, where the disease was diagnosed. Therefore, the restrictions pertaining to the

interstate movement of poultry, mynah, and psittacine birds, and birds of all other species under any form of confinement, and their carcasses and parts thereof, and certain other articles, from the areas quarantined, as contained in 9 CFR Part 82, as amended, will apply to the quarantined areas.

Executive Order 12291 and Emergency Action

This final action has been reviewed in accordance with Executive Order 12291 and has been determined to be not a "major rule." The Department has determined that this rule will have an annual effect on the economy of less that $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not have any significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived their review process required by Executive Order 12291.

Dr. E. C. Sharman, Assistant Deputy Administrator, Animal Health Programs, APHIS, VS, USDA, has determined that the emergency nature of this interim rule warrants publication without opportunity for public comment. This amendment is necessary to prevent the interstate spread of exotic Newcastle disease, a communicable disease of poultry and birds, and must be made effective immediately to accomplish its purpose in the public interest.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest and good cause is found for making this final rule effective less than 30 days after publication of this document in the **Federal Register**.

Certification Under the Regulatory Flexibility Act

James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because the quarantine imposed due to the existence of exotic Newcastle disease affects only two premises.

List of Subjects in 9 CFR Part 82

Animal diseases, Poultry and Poultry Products, Quarantine, Transportation, Exotic Newcastle disease.

PART 82—[AMENDED]

Accordingly, 9 CFR Part 82 is amended as follows:

In § 82.3 new paragraph (c)(2) is added to read:

§ 82.3 Imposition and removal of quarantine.

BILLING CODE 3410-34-M

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30, 40, and 70

Regional Licensing Program; Further Implementation

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The NRC is amending its regulations concerning the domestic licensing of source, byproduct, and special nuclear material (hereafter referred to as nuclear materials) to provide information about the expansion of NRC's decentralized licensing program. The amendment expands the program for materials licensees from Region I and III to include Regions II, IV, and V. Publication of the amendment is to inform present or prospective licensees of current NRC practice and organization.

EFFECTIVE DATE: April 1, 1983.

FOR FURTHER INFORMATION CONTACT: Vandy L. Miller, Chief, Material Licensing Branch.

ADDRESS: Division of Fuel Cycle and Material Safety, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone: (301) 427–4002.

SUPPLEMENTARY INFORMATION: On May 27, 1982, the Nuclear Regulatory Commission (NRC) amended its rules on the domestic licensing of nuclear materials to decentralize part of its licensing program (47 CFR 23138). The NRC is again amending its regulations concerning the domestic licensing of materials to expand decentralization of the licensing program. The revised provisions in §§ 30.6, 40.5, and 70.5 specify that inquiries concerning NRC regulations in 10 CFR Parts 30, 33, 35, 40, and 70, and applications for certain types of licenses, license renewals, and revisions be sent to the appropriate regional office, rather than NRC headquarters offices. These amendments do not apply to Agreement States and Federal facilities, but do apply to all other licensees and applicants in non-Agreement States and the District of Columbia. Delegations of authoriy to the Regional Administrators are contained in NRC Manual Chapter 0128. The changes to §§ 30.6, 40.5, and 70.5 are nonsubstantive amendments. The revised sections indicate the type of licensing authority delegated to Regional Administrators and the addresses for NRC regional offices. Since these are minor procedural amendments, the notice and comment procedures of the Administrative Procedure Act (5 U.S.C. 553) do not apply.

Paperwork Reduction Act Statement

This final rule contains no new requirement for recordkeeping, reporting, application, or any other type of information collection and, therefore, is not subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501, et seq.).

List of Subjects in 10 CFR Parts 30, 40, and 70

Nuclear power plants, Nuclear materials.

Under the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 552 and 553, the following amendments to 10 CFR Parts 30, 40, and 70 are published as a document subject to codification.

The authority citation for this document is:

Authority: Sec. 161, Pub. L. 83–703, 68 Stat. 948, as amended (42 U.S.C. 2201); Sec. 201, Pub. L. 93–438, 88 Stat. 1242, as amended (42 U.S.C. 5841).

PART 30—RULES OF GENERAL APPLICABILITY TO DOMESTIC LICENSING OF BYPRODUCT MATERIAL

1. Section 30.6 is revised to read as follows:

§ 30.6 Communications.

(a) Unless otherwise specified or covered under the regional licensing program as provided in paragraph (b) of this section, any communication or report concerning the regulations in Parts 30 through 35 of this chapter and any application filed under these regulations may be submitted to the Commission as follows:

(1) By mail addressed to: Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(2) By delivery in person to the Commission's offices to the Director, Office of Nuclear Material Safety and Safeguards at:

(i) 1717 H Street, N.W., Washington, D.C.; or

(ii) 7915 Eastern Avenue, Willste Building, Silver Spring, Maryland.

(b) The Commission has delegated to the five Regional Administrators licensing authority for selected parts of its decentralized licensing program for nuclear materials as described in paragraph (b)(1) of this section. Any communication, report, or application covered under this licensing program must be submitted as specified in paragraph (b)(2) of this section.

(1) The delegated licensing program includes authority to issue, renew, amend, cancel, modify, suspend, and revoke licenses for nuclear materials issued pursuant to 10 CFR Parts 30, 33, 35, 40, and 70 to all persons (except Federal agencies) for academic, medical, and industrial uses, with the following exceptions:

(i) Irradiators.

(ii) Cardiac pacemakers.

(iii) Medical teletherapy units.

(iv) Well logging.

(v) Manufacturing or distribution of nuclear materials or products containing nuclear materials.

(vi) Activities in the fuel cycle and special nuclear material in quantities sufficient to constitute a critical mass in any room or area. This exception does not apply to license modifications relating to termination of special nuclear material licenses that authorize possession of larger quantities when the case is referred for action from NRC's headquarters to the Regional Administrators.

(vii) Health and safety design review of sealed sources and devices, and approval, for licensing purposes, of sealed sources and devices.

(viii) Industrial radiography.

(ix) Commercial nuclear laundries.

(x) Processing for extraction of other elements (zirconium, halfnium, or rare earths).

(xi) Commercial low-level waste receipt and/or packaging.

(2) *Submissions.* (i) *Region I.* With the exception of Federal facilities, the regional licensing program involves the following Region I non-Agreement States and the District of Columbia: Connecticut, Delaware, Maine, Massachusetts, New Jersey, Pennsylvania, and Vermont. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region I, Nuclear Material Section B, 631 Park Avenue, King of Prussia, Pennsylvania 19406.

(ii) *Region II.* With the exception of Federal facilities, the regional licensing program involves the following Region II non-Agreement States and territories: Virginia, West Virginia, Puerto Rico, and the Virgin Islands. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region II, Material Radiation Protection Section, 101 Marietta Street, Suite 2900, Atlanta, Georgia 30303.

(iii) *Region III.* With the exception of Federal facilities, the regional licensing program involves the following Region III non-Agreement States: Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region III, Material Licensing Section, 799 Roosevelt Road, Glen Ellyn, Illinois 60137.

(iv) *Region IV.* With the exception of Federal facilities, the regional licensing program involves the following Region IV non-Agreement States: Montana, Oklahoma, South Dakota, Utah, and Wyoming. All inquires, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region IV, Material Radiation Protection Section, 611 Ryan Plaza Drive, Suite 1000, Arlington, Texas 76011.

(v) *Region V.* With the exception of Federal facilities, the regional licensing program involves the following Region V non-Agreement States and a territory: Alaska, Hawaii, and Guam. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region V, Material Radiation Protection Section, 1450 Maria Lane, Suite 210, Walnut Creek, California 94596.

PART 40—DOMESTIC LICENSING OF SOURCE MATERIAL

2. Section 40.5 is revised to read as follows:

§ 40.5 Communications.

(a) Unless otherwise specified or covered under the regional licensing program as provided in paragraph (b) of this section, any communication or report concerning the regulations in this part and any application filed under these regulations may be submitted to the Commission as follows:

(1) By mail addressed to: Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(2) By delivery in person to the Commission's offices to the Director, Office of Nuclear Material Safety and Safeguards at:

(i) 1717 H Street, N.W., Washington, D.C.; or

(ii) 7915 Eastern Avenue, Willste Building, Silver Spring, Maryland.

(b) The Commission has delegated to the five Regional Administrators licensing authority for selected parts of its regional licensing program for nuclear materials as described in paragraph (b)(1) of this section. Any communication, report, or application covered under this licensing program must be submitted as specified in paragraph (b)(2) of this section.

(1) The delegated licensing program includes authority to issue, renew, amend, cancel, modify, suspend, and revoke licenses for nuclear materials issued pursuant to 10 CFR Parts 30, 33, 35, 40 and 70 to all persons (except Federal agencies) for academic, medical, and industrial uses, with the following exceptions:

(i) Irradiators.

(ii) Cardiac pacemakers.

(iii) Medical teletherapy units.

(iv) Well logging.

(v) Manufacturing or distribution of nuclear materials or products containing nuclear materials.

(vi) Activities in the fuel cycle and special nuclear material in quantities sufficient to constitute a critical mass in any room or area. This exception does not apply to license modifications relating to termination of special nuclear material licenses that authorize possession of larger quantities when the case is referred for action from NRC's headquarters to the Regional Administrators.

(vii) Health and safety design review of sealed sources and devices, and approval, for licensing purposes, of sealed sources and devices.

(viii) Industrial radiography.

(ix) Commercial nuclear laundries.

(x) Processing for extraction of other elements (zirconium, halfnium, or rare earths).

(xi) Commercial low-level waste receipt and/or packaging.

(2) *Submissions.* (i) *Region I.* With the exception of Federal facilities, the regional licensing program involves the following Region I non-Agreement States and the District of Columbia: Connecticut, Delaware, Maine, Massachusetts, New Jersey, Pennsylvania, and Vermont. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region I, Nuclear Material Section B, 631 Park Avenue, King of Prussia, Pennsylvania 19406.

(ii) *Region II.* With the exception of Federal facilities, the regional licensing program involves the following Region II non-Agreement States and territories: Virginia, West Virginia, Puerto Rico, and the Virgin Islands. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region II, Material Radiation Protection Section, 101 Marietta Street, Suite 2900, Atlanta, Georgia 30303.

(iii) *Region III.* With the exception of Federal facilities, the regional licensing program involves the following Region III non-Agreement States: Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin. All inquiries, communications and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region III, Material Licensing Section, 799 Roosevelt Road, Glen Ellyn, Illinois 60137.

(iv) *Region IV.* With the exception of Federal facilities, the regional licensing program involves the following Region IV non-Agreement States: Montana, Oklahoma, South Dakota, Utah, and Wyoming. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region IV, Material Radiation Protection Section, 611 Ryan Plaza Drive, Suite 1000, Arlington, Texas 76011.

(v) *Region V.* With the exception of Federal facilities, the regional licensing program involves the following Region V non-Agreement States and a territory: Alaska, Hawaii, and Guam. All inquiries, communications and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region V, Material Radiation Protection Section, 1450 Maria Lane, Suite 210, Walnut Creek, California 94596.

PART 70—DOMESTIC LICENSING OF SPECIAL NUCLEAR MATERIAL

3. Section 70.5 is revised to read as follows:

§ 70.5 Communications.

(a) Unless otherwise specified or covered under the regional licensing program as provided in paragraph (b) of this section, any communication or report concerning the regulations in this part and any application filed under these regulations may be submitted to the Commission as follows:

(1) By mail addressed to: Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C.20555.

(2) By delivery in person to the Commission's offices to the Director, Office of Nuclear Material Safety and Safeguards at:

(i) 1717 H Street, N.W., Washington, D.C.; or

(ii) 7915 Eastern Avenue, Willste Building, Silver Spring, Maryland.

(b) The Commission has delegated to the five Regional Administrators licensing authority for selected parts of its regional licensing program for nuclear materials as described in paragraph (b)(1) of this section. Any communication, report, or application covered under this licensing program must be submitted as specified in paragraph (b)(2) of this section.

(1) The delegated licensing program includes authority to issue, renew, amend, cancel, modify, suspend, and revoke licenses for nuclear materials issued pursuant to 10 CFR Parts 30, 33, 35, 40 and 70 to all persons (except Federal agencies) for academic, medical, and industrial uses, with the following exceptions:

(i) Irradiators.

(ii) Cardiac pacemakers.

(iii) Medical teletherapy units.

(iv) Well logging.

(v) Manufacturing or distribution of nuclear materials or products containing nuclear materials.

(vi) Activities in the fuel cycle and special nuclear material in quantities sufficient to constitute a critical mass in any room or area. This exception does not apply to license modifications relating to termination of special nuclear material licenses that authorize possession of larger quantities when the case is referred for action from NRC's headquarters to the Regional Administrators.

(vii) Health and safety design review of sealed sources and devices, and approval, for licensing purposes, of sealed sources and devices.

(viii) Industrial radiography.

(ix) Commercial nuclear laundries.

(x) Processing for extraction of other elements (zirconium, halfnium, or rare earths).

(xi) Commercial low-level waste receipt and/or packaging.

(2) *Submissions.* (i) *Region I.* With the exception of Federal facilities, the regional licensing program involves the following Region I non-Agreement States and the District of Columbia: Connecticut, Delaware, Maine, Massachusetts, New Jersey, Pennsylvania, and Vermont. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region I, Nuclear Material Section B, 631 Park Avenue, King of Prussia, Pennsylvania 19406.

(ii) *Region II.* With the exception of Federal facilities, the regional licensing

program involves the following Region II non-Agreement States and territories: Virginia, West Virginia, Puerto Rico, and the Virgin Islands. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region II, Material Radiation Protection Section, 101 Marietta Street, Suite 2900, Atlanta, Georgia 30303.

(iii) *Region III.* With the exception of Federal facilities, the regional licensing program involves the following Region III non-Agreement States: Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region III, Material Licensing Section, 799 Roosevelt Road, Glen Ellyn, Illinois 60137.

(iv) *Region IV.* With the exception of Federal facilities, the regional licensing program involves the following Region IV non-Agreement States: Montana, Oklahoma, South Dakota, Utah, and Wyoming. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region IV, Material Radiation Protection Section, 611 Ryan Plaza Drive, Suite 1000, Arlington, Texas 76011.

(v) *Region V.* With the exception of Federal facilities, the regional licensing program involves the following Region V non-Agreement States and a territory: Alaska, Hawaii, and Guam. All inquiries, communications, and applications for a new license or an amendment or renewal of an existing license specified in paragraph (b)(1) of this section must be sent to: U.S. Nuclear Regulatory Commission, Region V, Material Radiation Protection Section, 1450 Maria Lane, Suite 210, Walnut Creek, California 94596.

Dated at Bethesda, Md., this 31st day of March 1983.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

BILLING CODE 7590-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83-CE-36-AD; Amdt. 39-4626]

Airworthiness Directives; Aeronautica Macchi S.p.A. Model AL60 and AL60-B Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Aeronautica Macchi S.p.A. Model AL60 and AL60-B airplanes which requires visual inspection of the engine mount structure front left hand (L.H.) brace for dents caused by possible contact with the engine exhaust manifold and pipe, and repair if necessary. Repeated contact by an improperly located exhaust pipe attach collar can dent the engine mount front L.H. strut and weaken it seriously. This AD will assure inspection and repair of the engine mount dents due to contact with engine exhaust system and relocation of the exhaust system to preclude damage to the engine mount structure.

DATES: Effective Date: April 14, 1983. Compliance: As prescribed in the body of the AD.

ADDRESSES: Aeronautica Macchi S.p.A. Service Bulletin No. SB-L-0005, Revision 1, dated September 26, 1978, applicable to this AD may be obtained from Aeronautica Macchi S.p.A., Via Sanvito Silvestro, 80, 21100 Varese, Italy. A copy of this information is also contained in the Rules Docket, FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. A. Astorga, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium, Telephone 513.38.30; or Mr. Larry Werth, Foreign FAR-23 Section, ACE-109, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374-6932.

SUPPLEMENTARY INFORMATION: Aeronautica Macchi S.p.A. has determined that a condition may exist wherein an improperly installed exhaust pipe can vibrate against the front L.H. brace of the engine mount and dent it enough to create a hazard on its Model AL60 and AL60-B airplanes. As a result, Aeronautica Macchi S.p.A. has issued Aer Macchi Service Bulletin No. SB-L-0005, Revision 1, dated September 26, 1978, which recommends visual inspection of the engine mount front L.H. brace for dents produced by possible contact with the exhaust pipe/manifold connecting collar, and repair if necessary. The Registro Aeronautico Italiano (RAI) who has responsibility and authority to maintain the continuing airworthiness of these airplanes in Italy has classified this Service Bulletin and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under Italian registration, this action has the same effect as an AD on airplanes certified for operation in the United States. The FAA relies upon the certification of the RAI combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness and conformity of products of this design certificated for operation in the United States.

The FAA has examined the available information related to the issuance of Aer Macchi Service Bulletin No. SB-L-0005, Revision 1, dated September 26, 1978, and the mandatory classification of this Service Bulletin by the RAI.

Based on the foregoing, the FAA has determined that the condition addressed by this Service Bulletin is an unsafe condition that may exist on other products of the same type design certificated for operation in the United States. Therefore, an AD is being issued requiring visual inspection of the engine mount front L.H. brace for dents caused by contact with engine exhaust system and repair, if necessary, in accordance with Aer Macchi Service Bulletin No. SB-L-0005 on Aeronautica Macchi Model AL60 andAL60-B airplanes. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

AERONAUTICA MACCHI S.P.A.: Applies to Model AL60 and AL60-B airplanes certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To preclude failure of the engine mount structure, accomplish the following:

(a) Within the next 100 hours time-in-service and thereafter at intervals not to exceed 100 hours time-in-service, visually inspect the front left-hand brace of the engine mount for dents as specified in Aer Macchi Service Bulletin No. SB-L-0005, Revision 1, dated September 26, 1978; herein referred to as the Service Bulletin.

(1) If no dents are found in the front left hand brace of the engine mount during accomplishment of the visual inspection in accordance with paragraph (a) of this AD, return aircraft to service.

(2) If dents of a depth less than 0.5mm are found in the front left hand brace of the engine mount during accomplishment of the visual inspection in accordance with paragraph (a) of this AD, before further flight, reposition attaching collar of the exhaust ducts as high as possible to obtain clearance between the attaching collar and the left hand brace of the engine mount and return aircraft to service.

(3) If dents of a depth of 0.5mm or greater are found in the front left hand brace of the engine mount during accomplishment of the visual inspection in accordance with paragraph (a) of this AD, before further flight, repair in accordance with instructions provided in the "Description and Instruction Data" section of the Service Bulletin, reposition attaching collar of the exhaust ducts as high as possible to obtain clearance between the attaching collar and the left hand brace of the engine mount and return aircraft to service.

(b) Repair those aircraft which have previously been modified in accordance with the instructions contained in Aer Macchi Service Bulletin No. AL80/12 dated November 23, 1984, within the next 1200 hours time-in-service of the modification, in accordance with paragraph (a)(3) of this AD.

(c) Operators who have not kept records of hours time-in-service of the engine mounting structure must substitute airplane hours time-in-service in lieu thereof.

(d) Aircraft may be flown in accordance with Federal Aviation Regulation 21.197 to a location where this AD can be accomplished.

(e) An equivalent method of compliance with this AD, if used, must be approved by the Manager, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium.

This amendment becomes effective on April 14, 1983.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89)).

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "**ADDRESSES**" at the location identified.

Issued in Kansas City, Missouri, on March 29, 1983.

John E. Shaw,

Acting Director, Central Region.

14 CFR Part 39

[Docket No. 83-NM-21-AD; Amdt. 39-4629]

Airworthiness Directives; McDonnell Douglas Model DC-9 and Military C-9 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This document amends an existing Airworthiness Directive (AD) applicable to McDonnell Douglas Model DC-9 and Military C-9 series airplanes which requires inspection, rework and/or replacement, if necessary, of the forward galley service doors, to prevent crack growth. This amendment provides for use of a method outlined in the manufacturer's service bulletins (which were not available when the AD was originally issued) for the inspection/rework and replacement of forward galley service doors, and also provides termination action. This amendment provides an alternate means of compliance, and imposes no additional burden on any person.

DATE: Effective April 20, 1983. Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained from: McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1-750 (54-60). This information also may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Michael N. Asahara, Sr., Aerospace Engineer, Airframe Branch, ANM-120L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808, telephone (213) 548-2824.

SUPPLEMENTARY INFORMATION: Airworthiness Directive AD 81-10-10, Amendment 39-4116 (46 FR 27096, dated 5/18/81), applicable to McDonnell Douglas Model DC-9 series airplanes, requires inspection, rework and replacement, if necessary, of the forward galley service doors. After issuance of Amendment 39-4116, McDonnell Douglas issued DC-9 Service Bulletins 52-125, dated August 11, 1981, and 52-127, dated January 10, 1983, providing additional instructions for the inspection/rework and replacement of forward galley service door. Service Bulletins 52-125 and 52-127, provide for terminating action.

Since this amendment is clarifying in nature and provides an alternate means of compliance, it has no adverse economic impact, and imposes no additional burden on any person, notice and public procedures hereon are unnecessary and the amendment may be made effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by amending AD81-10-10, Amendment 39-4116 (46 FR 27096, dated May 18, 1981), by revising paragraphs A, B and C to read as follows:

A. Within the next 30 days after the effective date of this amendment, unless accomplished within the last 3,100 landings, perform an operational check of the door, and a visual inspection for general condition of door, pan and seals, door stops, and set screws. If corrective actions are deemed necessary, accomplish rework and/or replacement per operator's approved maintenance program.

Note.—Removal of seals and liner not required to perform this inspection.

B. In accordance with the schedule below, perform a close visual inspection of the door pan, forward and aft ends of horizontal beams (frames), including the bend radius along the upper and lower flanges, tee fittings and clips, or inspect in accordance with McDonnell Douglas DC-9 Service Bulletins 52-125 dated August 11, 1981, or 52-127 dated January 10, 1983, as applicable.

Note.—Removal of seals is not required to perform this inspection.

1. Initial visual inspection schedule (unless accomplished within the last 3,100 landings):

Accumulated landings (on effective date of this AD)	Initial inspection (from effective date of this AD) (landings)
12,000 to 14,499	4,000
15,000 to 19,999	2,500
20,000 to 24,999	1,800
25,000 and over	000

Note.—If the total number of landings cannot be determined for a particular door, for the purpose of this AD it must be assumed the door has 25,000 or more landings.

2. Repeat the inspections specified in paragraph B.1., above, at intervals not to exceed 4,000 landings from the last inspection until terminating action specified in paragraph C., below, is accomplished.

3. For airplanes with less than 12,000 landings on the effective date of this AD, inspect in accordance with paragraph B., above, before the accumulation of 16,000 landings.

4. If no cracks are found, continue repetitive inspections per paragraph B.2., above, until terminating actions specified in paragraph C.1., below, is accomplished.

5. If cracks are found, install applicable repairs on cracked pan and/or beams and accomplish repetitive inspections per paragraph B.2., above, until terminating action specified in paragraph C.2., below, is accomplished. For Part Numbers 5910084–(* * *) and 5910583–(* * *), with cracks which exceed the limits defined in Douglas Service Rework Drawing 5939988 or 3060167, respectively, the affected beam(s) must be replaced with new like beam(s) prior to installing preventative repairs.

Note.—* * * denotes any configuration.)"

6. Previous accomplishment of preventative repairs, required by this AD, which are outlined in McDonnell Douglas Service Rework Drawing 5939988, may be considered as equivalent methods for complying with the requirements of this AD.

C. Terminating Action: The following constitutes terminating action for this AD:

1. For aircraft found to be crack free, accomplish the applicable preventative repair per Paragraph 2, Accomplishment Instructions specified in McDonnell Douglas DC–9 Service Bulletins 52–125 dated August 11, 1982, or 52–127 dated January 10, 1983, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

2. For aircraft found to have cracks, accomplish the applicable repairs and inspections and install preventative repairs per Paragraph 2, Accomplishment Instructions specified in McDonnell Douglas DC–9 Service Bulletins 52–125 dated August 11, 1982, or 52–127 dated January 10, 1983, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region."

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). These documents also may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

This Amendment becomes effective April 20, 1983.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The Federal Aviation Administration has determined that this document involves an amendment that provides an alternate means of compliance, and does not impose any additional burden on any person. Therefore: (1) It is not major under Executive Order 12291 (46 FR 13193; February 19, 1981) and (2) it is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Because its anticipated impact is so minimal, it does not warrant preparation of a regulatory evaluation. I certify that it will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act because it is relieving in nature, and because it involves few, if any, small entities.

Issued in Seattle, Washington on March 31, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 83-NM-26-AD; Amdt. 39-4630]

Airworthiness Directives; Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Amendment adds a new Airworthiness Directive (AD) which requires that the drain valves in the forward and aft cargo compartments of certain Boeing 767 aircraft be inspected to ensure that valve closure occurs when the airplane is pressurized. One airplane was found to have interference between the drain housing and valve components resulting in the valve failing to seal. The leakage resulting from an improper seal will compromise the fire protection system in the affected compartment, by allowing fire extinguishing agent to escape at a high rate.

DATE: Effective April 25, 1983.

ADDRESSES: The service bulletin specified in this Airworthiness Directive may be obtained from The Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may also be examined at the FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert C. McCracken, Systems & Equipment Branch, ANM–130S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767–2500. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: During an inflight test of the cargo compartment fire protection system at Boeing, the fire extinguishing agent escaped through a drain hole that had a drain valve stuck in the open position. The extinguishing agent concentration decayed at a significantly greater rate than was demonstrated during airplane certification testing. An inspection of the open valve showed that the drain housing was interfering with the spring and valve travel due to incorrect installation. Airplanes affected by this AD may also have drain valves that were incorrectly installed. This action is necessary to locate any sticking drain valves and to correct the valve installation, if necessary, to prevent the potential loss of extinguishing agent and preserve the integrity of the cargo compartment fire protection system.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this Amendment effective in less than 30 days.

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Boeing: Applies to Boeing Model 767 Airplanes VA006–VA012, VA302–VA306, VA501–VA503, VA701–VA702, VA801–VA802, and VA805. To prevent degradation of cargo compartment fire protection system effectiveness, accomplish the following, unless already accomplished.

A. Within 30 days after the effective date of this AD, inspect all forward and aft cargo

compartment drain valves and rework, if necessary, in accordance with Boeing Service Bulletin 767-51-1 dated January 14, 1983, or later FAA approved revision.

B. Aircraft may be operated after the 30 day compliance period if the inspection has not been completed, provided no cargo is carried in the affected cargo compartments.

C. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the above specified Service Bulletin from the manufacturer may obtain copies upon request to The Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124, or it may also be examined at FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This Amendment becomes effective April 25, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Seattle, Washington on April 5, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-NM-16-AD; Amdt. 39-4631]

Airworthiness Directives; De Havilland Aircraft of Canada Model DHC-7 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) applicable to De Havilland Aircraft of Canada Model DHC-7 airplanes which requires periodic functional checks of the ground spoilers until a prescribed modification is incorporated. An incident was reported where, prior to takeoff, the ground spoilers were extend without the caution light indicating any abnormality. This condition will result in loss of lift.

DATES: Effective April 25, 1983.

ADDRESSES: The service bulletin specified in this airworthiness directive may be obtained upon request to De Havilland Aircraft of Canada, Ltd., Garrat Blvd., Downsview, Ontario M3K 1Y5, Canada, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aricraft Certification Branch, ANM-150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: The Canadian Department of Transport (DOT) has classified De Havilland of Canada, Ltd., Alert Service Bulletin No. A7-27-46 as mandatory. In a recent incident, ground spoilers were extended prior to takeoff. This condition was caused by both ground spoiler selector solenoid valves failing in the open position holding the spoilers in the extended position. An investigation determined that "O" ring debris from the No. 1 hydraulic system pressure manifold had jammed the spool of each valve in mid stroke, blocking off the return port. Due to both spools jamming in the same position, the caution light did not indicate any abnormality since it only shows a problem when a difference in position exists between the valves. The service bulletin prescribed repetitive inspections on the ground spoiler control system until Modification No. 7/2294 or 7/2796 is incorporated.

This airplane model is manufactured in Canada and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable airworthiness bilateral agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, the FAA has determined that an AD is necessary which would require periodic functional checks on the ground spoiler control system until Modification No. 7/2294 or 7/2296 is incorporated on all De Havilland Aricraft of Canada Model DHC-7 Airplanes.

Further, since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

De Havilland Aircraft of Canada: Applies to all Model DHC-7 airplanes, certificated in all categories. To detect failure of the ground spoiler selector valves accomplish the following, unless already accomplished:

1. Perform a functional check on the ground spoiler control system within the next 15 hours or seven days time in service, whichever occurs first, after the effective date of this AD, in accordance with the Accomplishment Instructions of De Havilland Aircraft of Canada Alert Service Bulletin No. A7-27-46, Revision A, Dated November 19, 1982.

2. If the check described shows incorrect indications, operate the airplane in accordance with the Aircraft Flight Manual Minimum Equipment List Supplement No. 4 until corrective modification is accomplished.

3. Repeat the functional check at intervals not greater than 15 hours or seven days time in service, whichever occurs first, until Modification No. 7/2294 or No. 7/2296 is corporated.

4. Terminating action to this AD is achieved by incorporating Modification No. 7/2294 or No. 7/2296.

5. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

6. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment or inspections and/or modifications required by this AD.

This amendment becomes effective April 25, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is

not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a singificant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION."

Issued in Seattle, Washington on April 5, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 83-AWA-1]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Alteration of VOR Federal Airways, Amarillo, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revokes certain alternate VOR Airways and renumbers other alternate segments in the Amarillo, TX, area. This eliminates the assignment of alternate airway segments for the affected airways and supports the FAA's commitment to the International Civil Aviation Organization (ICAO) to phase out alternate airway descriptions in the National Airspace System.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Bill Hill, Airspace Regulations and Obstructions Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On February 7, 1983 (48 FR 5572), the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revoke certain alternate VOR Federal Airways and renumber others in the Amarillo, TX, area. This action is consistent with the FAA's commitment to ICAO to phase out alternate airways, either by renumbering or revoking, throughout the National Airspace System. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections to the proposal were received. This amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations revokes and renumbers certain alternate airways between Amarillo, TX, and Texico, NM, Sayre, OK, and Dalhart, TX.

List of Subjects 14 CFR Part 71

VOR Federal Airways.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., June 9, 1983, as follows:

V-81 [Amended]

By deleting the words "including a west alternate via INT Amarillo 301° and Dalhart 157° radials;"

V-140 [Amended]

By deleting the words "via Sayre, OK, including a N alternate via INT Amarillo 072° and Sayre 288° radials;" and substituting for them the words "via Sayre, OK;"

V-440 [Amended]

By deleting the words "From Sayre, OK, via" and substituting for them the words "From Amarillo, TX, via INT Amarillo 072° and Sayre, OK, 288°; Sayre;"

V-288 [Amended]

By deleting the words "INT Texico 021° and Amarillo, TX, 252° radials; Amarillo, including a south alternate from Texico to Amarillo via INT Texico 044° and Amarillo 252° radials;" and substituting for them the words "INT Texico 044° and Amarillo, TX, 252° radials; Amarillo;"

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on April 7, 1983.

John W. Baier,

Acting Manager, Airspace—Rules and Aeronautical Information Division.

14 CFR Part 71

[Airspace Docket No. 83-AWA-7]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Amendment to Continental Control Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This action adds Restricted Areas R-3202D and R-2930 to the Continental Control Area and deletes Restricted Areas R-5504 and R-2602 from the Continental Control Area.

DATES: Effective date April 14, 1983. Comments must be received on or before May 30, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Director, FAA, Great Lakes Region, Attention: Manager, Air Traffic Division, Docket No. 83-AWA-7, Federal Aviation Administration, 2300 East Devon, Des Plaines, IL 60018.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Boyd Archer, Airspace Regulations and Obstructions Branch (AAT-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves adding and deleting restricted areas to/from the Continental Control Area and was not preceded by notice and public

procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.151 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to add Restricted Areas R-3202D, Saylor Creek, ID, and R-2930, Cape Kennedy, FL, to the Continental Control Area. These restricted areas were established in Airspace Dockets 82-ANM-3 and 82-ANM-6 respectively, published October 28, 1982. Addition of these areas was inadvertently not included in the Continental Control Area when published. Additionally, this amendment deletes Restricted Areas R-5504, Wilmington, OH, and R-2602, Ft. Carson, CO, from the Continental Control Area. These areas were previously revoked and subsequent deletion from Continental Control Areas was not accomplished. Section 71.151 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

Under the circumstances presented, the FAA concludes that notice or public procedure under 5 U.S.C. 553(b) is unnecessary and that good cause exists for making this amendment effective in less than 30 days after its publication in the **Federal Register.**

List of Subjects in 14 CFR Part 71

Continental Control Area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.151 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., April 14, 1983, as follows:

1. R-2602 Ft. Carson, CO [Revoked]
2. R-2930 Cape Kennedy, FL [Added]
3. R-3202D Saylor Creek, ID [Added]
4. R-5504 Wilmington, OH [Revoked]

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

14 CFR PART 71

[Airspace Docket No. 83-ASO-16]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, And Reporting Points; Alteration of Control Zone, Sumter, South Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Sumter, South Carolina, control zone by realigning and reducing the size of the arrival extensions. Instrument approach procedures at Shaw Air Force Base are predicated, in part, upon the Shaw TACAN. The Air Force has relocated the TACAN from an off-airport location to a new site located on the airport. This relocation requires a realignment of instrument approach procedure final approach courses and permits a reduction in the size of the control zone arrival extension.

DATES: Effective Date: 0901 G.m.t., June 9, 1983.

Comments must be received on or before May 9, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Manager, Airspace and Procedures Branch, ASO-530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Request for Comments of the Rule

Although this action is in the form of a final rule, which involves realignment and reduction in size of control zone arrival extensions and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rule making proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspect of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Sumter, South Carolina, control zone by realigning and reducing the size of arrival extensions associated with instrument approach procedures at Shaw AFB. The Air Force has relocated the Shaw TACAN to a new on-airport site which resulted in changes to instrument approach procedures. The changes necessitate a realignment of control zone arrival extensions and permit a reduction in the size of the extensions. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983. Under the circumstances presented, the FAA concludes that there is a need to alter the control zone so that it is properly aligned to accommodate instrument approach procedures and to ensure that the size of the arrival extensions are not excessive. The changes are so minor and nonsubstantive I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., June 9, 1983, as follows:

Sumter, SC—Revised

Within a 5-mile radius of Shaw AFB (Lat. 33°58'15"N., Long. 80°28'19"W.); within 1.5 miles each side of Shaw TACAN 037° and 217° radials, extending from the 5-mile radius zone to 7 miles northeast and southwest of the TACAN.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291: (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

14 CFR Part 71

[Airspace Docket No. 83-ASO-14]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Alteration of Control Zone and Transition Area, Kinston, North Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Kinston, North Carolina, control zone and transition area by revising the geographical coordinates of the airport and the name of the airport. The coordinates and airport name are improperly listed in the descriptions and this amendment will correct the deficiencies so that the descriptions are technically correct. No change in airspace is intended by this action.

DATES:

Effective date: 0901 G.m.t., June 9, 1983.

Comments must be received on or before May 9, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Manager, Airspace and Procedures Branch, ASO-530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves technical revisions to the description of the control zone and transition area and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 and § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to revise the geographical coordinates of Stallings Field and to revise the name of the airport upon which controlled airspace is predicated. The coordinates and airport name contained in the present descriptions are improper. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were republished in Advisory Circular AC 70-3A dated January 3, 1983. Under the circumstances presented, the FAA concludes that there is a need to list the proper geographical coordinates of the airport and to revise the name Stallings Field to Eastern Regional Jetport at Stallings Field so that the description of the control zone and transition area will be technically correct. The changes are so minor and nonsubstantive I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone, Transition area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 and § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) are further amended, effective 0901 G.m.t., June 9, 1983, as follows:

Kinston, NC—Revised

By amending 71.171 in the description of the Kinston, NC, control zone by deleting the words, "Stallings Field (lat. 35°19'36" N., long. 77°37'02" W.)", and substituting for them the words, "Eastern Regional Jetport at Stallings Field (Lat. 35°19'36" N., Long. 77°37'01" W.)."

By amending 71.181 in the description of the Kinston, NC, transition area by deleting the words, "Stallings Field (lat. 35°19'36" N., long. 77°37'02" W.)", and substituting for them the words "Eastern Regional Jetport at Stallings Field (Lat. 35°19'36" N., Long. 77°37'01" W.)."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on March 29, 1983.

George R. LaCaille,

Acting Director, Southern Region.

[FR Doc. 83-9630 Filed 4-13-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 83-ASW-5]

Alteration of Transition Area and Designation of Control Zone: Houma, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will alter the transition area and designate a control zone at Houma, LA. The intended effect of the amendment is to provide adequate controlled airspace for aircraft executing standard instrument approach procedures (SIAP's) to the Houma-Terrebonne Airport. This amendment is necessary since the FAA will commission an airport traffic control tower (ATCT) at Houma-Terrebonne and the airport will meet the requirements for the establishment of controlled airspace to the surface. In addition, the RNAV approaches to Runways 17 and 35 require 700-foot transition area extensions to the north and south.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, telephone (817) 877-2630.

SUPPLEMENTARY INFORMATION:

History

On February 10, 1983, a notice of proposed rulemaking was published in the **Federal Register** (48 FR 6125) stating that the Federal Aviation Administration proposed to alter the Houma, LA, transition area and designate a control zone. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Comments were received without objections. Except for editorial changes, this amendment is that proposed in the notice.

List of Subjects in 14 CFR Part 71

Control zones, Transition Areas, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, by the Administrator, Subpart G of Part 71, § 71.181 and Subpart F of Part 71, § 71.171, of the Federal Aviation Regulations (14 CFR Part 71) as republished in Advisory Circular AC 70-3A dated January 3, 1983, are amended, effective 0901 G.m.t., June 9, 1983, as follows:

Subpart F § 71.171:

Houma, LA [New]

Within a 5-mile radius of the Houma-Terrebonne Airport (latitude 29°34'03" N., longitude 90°39'37" W.); and within 2 miles each side of the 123° radial of the Tibby VORTAC extending from the 5-mile radius area to the VORTAC. This control zone is effective during the specific dates and times established in advance by a Notice of Airmen. The effective dates and times will thereafter be continuously published in the Airport/Facility Directory.

Subpart G § 71.181:

Houma, LA [Revised]

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Houma-Terrebonne Airport (latitude 29°34'03"N., longitude 90°39'37"W.); and within 2 miles each side of the 123° radial of the Tibby VORTAC extending from the 6.5-mile radius area to the VORTAC; and within 4.5 miles each side of a 360° bearing from the airport extending from the 6.5-mile radius area to 13 miles north of the airport; and within 4.5 miles each side of a 180° bearing from the airport extending from the 6.5-mile radius area to 9 miles south of the airport.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on April 4, 1983.

F. E. Whitfield,

Acting Director, Southwest Region.

14 CFR Part 71

[Airspace Docket No. 83-ASW-3]

Designation of Transition Area and Alteration of Control Zone: Wink, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will designate a transition area and alter the control zone at Wink, TX. The intended effect of the amendment is to provide adequate controlled airspace for aircraft executing standard instrument approach procedures (SIAP's) to the Winkler County Airport. This amendment is necessary since a review of the designated airspace revealed that no 700-foot transition area existed, and the control zone is improperly described and inadequate for the protection of aircraft.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, telephone (817) 877-2630.

SUPPLEMENTARY INFORMATION:

History

On February 7, 1983, a notice of proposed rulemaking was published in the **Federal Register** (48 FR 5571) stating that the Federal Aviation Administration proposed to designate the Wink, TX, transition area and alter the control zone. The docket number was inadvertently printed as 83-ASW-33 instead of the correct number 83-ASW-3. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Comments were received without objections. Except for editorial changes, this amendment is that proposed in the notice.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, by the Administrator, Subpart G of Part 71, § 71.181 and Subpart F of Part 71, § 71.171, of the Federal Aviation Regulations (14 CFR Part 71) as republished in Advisory Circular AC 70-3A dated January 3, 1983, are amended, effective 0901 G.m.t., June 9, 1983, as follows:

Subpart G 71.181:

Wink, TX [New]

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the Winkler County Airport (latitude 31°46'45" N., longitude 103°12'15" W.).

Subpart F 71.171:

Wink, TX [Revised]

Within a 5-mile radius of the Winkler County Airport (latitude 31°46'45"N., longitude 103°12'15"W.). This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective dates and times will thereafter be continuously published in the Airport/Facility Directory.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on April 4, 1983.

14 CFR Part 71

[Airspace Docket No. 83-ASW-7]

Designation of Transition Area; Port O'Connor, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will designate a transition area at Port O'Connor, TX. The intended effect of the amendment is to provide controlled airspace for helicopters executing a new point-in-space instrument approach procedure to the Petroleum Helicopters, Inc., (PHI) Heliport. This amendment is necessary since a new point-in-space helicopter approach procedure will exist to the PHI Heliport located approximately 3 miles west of Port O'Connor, TX.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch (ASW-535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, telephone (817) 877-2630.

SUPPLEMENTARY INFORMATION:

History

On February 10, 1983, a notice of proposed rulemaking was published in the **Federal Register** (48 FR 6127) stating that the Federal Aviation Administration proposed to designate the Port O'Connor, TX, transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. No comments were received. Except for editorial changes, this amendment is that proposed in the notice.

List of Subjects in 14 CFR Part 71

Control zones and/or transition areas, Aviation safety.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, by the Administrator, Subpart G of Part 71, § 71.181, of the Federal Aviation Regulations (14 CFR Part 71) as republished in Advisory Circular AC 70-3A dated January 3, 1983, is amended, effective 0901 GMT, June 9, 1983, as follows:

Port O'Connor, TX—New

That airspace extending upward from 700 feet above the surface 2.5 miles each side of the Palacios VORTAC (latitude 28°45'51" N., longitude 96°18'21" W.) 208° radial extending from 18 miles to 25 miles southwest of the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on April 4, 1983.

14 CFR Part 95

[Docket No. 23596; Amdt. No. 95-310]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rule) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: April 14, 1983.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO-730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 95 of the Federal Aviation Regulations (14 CFR Part 95) prescribes new, amended, suspended, or revoked IFR altitudes governing the operation of all aircraft in IFR flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in Part 95. The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference.

The reasons and circumstances which create the need for this amendment involve matters of flight safety, operational efficiency in the National Airspace System, and are related to published aeronautical charts that are essential to the user and provides for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these

regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment is unnecessary, impracticable, or contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 95

Aircraft, Airspace.

Adoption of the Amendment

Accordingly and pursuant to the authority delegated to me by the Administrator, Part 95 of the Federal Aviation Regulations (14 CFR Part 95) is amended as follows effective at 0901 GMT, April 14, 1983. (Secs. 307 and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348 and 1510); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. The FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C. on April 5, 1983.

John M. Howard,

Manager, Aircraft Programs Division.

CIVIL AERONAUTICS BOARD

14 CFR Part 389

Waiver of Filing—Fee Requirements

AGENCY: Civil Aeronautics Board.

ACTION: Waiver of filing—fee requirements.

SUMMARY: Following requests on behalf of certain foreign carriers, the Director, Bureau of International Aviation, acting under delegated authority, has waived the requirements of Part 389 of the Board's Organization Regulations to the extent necessary to relieve the carriers of Singapore (designated airline(s) only; by letter dated 3/17/83), Belgium (by letter dated 3/28/83), Chile (by letter dated 3/30/83), New Zealand (by letter dated 3/30/83), Thailand (by letter dated 4/5/83), Argentina (by letter dated 4/7/83), and Spain (by letter dated 4/8/83), from paying the filing fees set forth in § 389.25. Each action was effective immediately on the date of the letter and the filing of a petition for review will not alter its effectiveness.

FOR FURTHER INFORMATION CONTACT: Allen Brown, Regulatory Affairs Division, Bureau of International Aviation, Civil Aeronautics Board; (202) 673–5134.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket 8899]

Sterling Drug, Inc., et al.; Correction

AGENCY: Federal Trade Commission.

ACTION: Correction.

SUMMARY: This document corrects a Commission document previously published in the **Federal Register** on Wednesday, April 6, 1983. Chairman James C. Miller III's Separate Statement was inadvertently omitted.

DATE: The correction is effective upon publication.

FOR FURTHER INFORMATION CONTACT: FTC/PC, Connie Vecellio, Washington, D.C. 20580. (202) 376–3465.

SUPPLEMENTARY INFORMATION: In FR Doc. 83–9016, appearing in the **Federal Register** issue for Wednesday, April 6, 1983, 48 FR 14891, the Separate Statement of Chairman James C. Miller III was omitted. The Separate Statement reads as follows:

Separate Statement of Chairman James C. Miller III, in the Matter of Sterling Drug, Inc.

I concur in the Commission's unanimous decision to modify the existing order in this matter and require a reasonable basis for Sterling's advertising claims for Lysol. Sterling will now be permitted to make truthful claims, subject to proper substantiation, that environmental surfaces can play a significant role in transmitting colds and that using a household disinfectant may reduce the incidence or prevent the spread of colds.

Stering has presented to the Commission a significant amount of new scientific evidence on how cold viruses are spread. This evidence represents a change in the facts underlying the original order and forms the justification for the current modification. In 1974, when the Commission issued the original order, the prevailing view in the scientific community was that airborne germs and viruses were the primary cause of colds. Accordingly, the Commission prohibited any claims that environmental surfaces play a significant role in transmitting colds, and that using household disinfectants such as Lysol can help prevent colds.

Sterling's detailed petition indicates that, contrary to the Commission's premise in bringing this case, there is a substantial body of reputable scientific evidence indicating that environmental surfaces play a significant role in spreading colds. Indeed, at least two of the three experts on whom the Commission relied in bringing the case now support Sterling's position. Morever, no one disputes that Lysol effectively cleans environmental surfaces. Although Sterling's evidence does not show, nor have they claimed, that spraying Lysol absolutely prevents colds, this should not preclude Sterling from making properly qualified, substantiated efficacy claims.

In moving from a total prohibition of certain claims to allowing those for which there is a reasonable basis, I believe the Commission is recognizing that Sterling currently has a reasonable basis for making some advertising claims concerning the product's effectiveness. If a majority of the Commission did not agree with this, it would have been more appropriate to deny the order modification. Of course, the Commission has not seen any specific advertising claims and we will scrutinize any Sterling claim to be certain it is substantiated.

As with most medical and many other types of claims, absolute certainty is not feasible. The proper role of the Federal Trade Commission is not to ban all claims unless they can be shown to be true beyond a shadow of a doubt,[1] but to weigh the costs and benefits of allowing or banning the dissemination of information about which some uncertainty may exist. Here, if the Commission allows claims for which there is a reasonable basis and they are later determined to be false, consumers are injured only to the extent of the cost of their Lysol purchases.[2] If the Commission bans the claims and they turn out to be *true*, consumers will be prevented from learning of an effective method to reduce the incidence and spread of colds, America's most prevalent disease.

Sterling has made a strong showing that its theory of how colds are spread is valid, and that the Commission's theory in bringing this case is not. Sterling has also provided evidence that Lysol kills cold viruses. Therefore, Sterling should be permitted to make adequately substantiated claims at least on these two points. Prohibiting such claims, as Commissioner Pertschuk apparently prefers (although he supported the change) would not strengthen the advertrising susbstantiation doctrine. It would instead deprive consumers of valuable, truthful information.

Benjamin I. Berman,

Acting Secretary.

[FR Doc. 83-9890 Filed 4-13-83; 8:45 am]

BILLING CODE 6750-01-M

[1] As the Commission indicated in *Pfizer*, 81 F.T.C. 23, 64 (1972), the amount of testing necessary to support a claim depends on the circumstances, including the type of claims, the cost of obtaining the supporting evidence, and the possible consequences of a false claim. Particularly given Commissioner Pertschuk's description of the testing procedure here, obtaining empirical evidence of absolute proof of efficacy would be far more costly than the attendant risks and benefits warrant.

[2] Because the product has other values, the expenditures will not be totally wasted for many consumers.

16 CFR Part 13

[Docket No. 8792]

Golden Tabs Pharmaceutical Co., Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: This order reopens the proceeding and modifies the Commission's order issued on March 16, 1970 (35 FR 5809), by allowing respondent to disclose, clearly and conspicuously any place in the advertisement, that there are conditions and obligations attendant upon acceptance of free or nominally priced offers. The modified order also reflects the company's new name and deletes from the order the name of the company's founder, Michael Posen.

DATES: Final Order issued March 16, 1970. Modifying Order issued March 17, 1983.

FOR FURTHER INFORMATION CONTACT: FTC/PC, Robert Barton, Washington, D.C. 20580. (202) 376–2894.

SUPPLEMENTARY INFORMATION: In the Matter of Golden Tabs Pharmaceutical Co., Inc., a corporation. Codification

appearing at 35 FR 5809 remains unchanged.

List of Subjects in 16 CFR Part 13

Advertising, Trade practices.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the matter of Golden Tabs Pharmaceutical Co., Inc., a corporation; Docket No. 8792; Order Reopening the Proceeding and Modifying Cease and Desist Order.

On November 17, 1982 Golden Tabs Pharmaceutical Co., Inc., respondent in the above-captioned matter, filed a petition pursuant to Rule 2.51 of the Commission's Rules of Practice to reopen the proceeding and modify the order entered therein.

The order, which was entered in 1970, covers "Golden 50 Tabulets" or any food, drug, device or cosmetic. The complaint, which was issued on July 17, 1969, alleged, among other things, that respondent had represented in advertisements that Golden 50 Tabulets would be sent free to persons responding to respondents' advertisements and that persons answering said advertisements will be under no obligation to purchase additionl supplies of respondents' products. In truth and in fact, the Hearing Examiner found that the 30 day supply of respondents' product was not free for the reason that the offer was an inseparable part of a plan under which respondents, after the receipt of the 30 day supply by those who accepted the offer, shipped additional monthly supplies of the product and attempted to collect the price for these shipments. Furthermore, the Examiner found that persons answering the ads are under an obligation to purchase additional supplies or to notify respondents to cancel further shipments. After sending the 30 day supply, respondents shipped additional supplies each month, mailed statements requesting payment and threatened visits by company representatives in an attempt to collect payment. The Examiner also found that in many cases even if persons notified respondents that they did not wish additional supplies to be sent, respondents continued to ship supplies of said product to those persons and attempted to collect the price.

The Examiner issued an order, which, among other things, prohibited respondent in paragraph 1(b) of the order from representing that "any product is offered free or under any other terms when the offer is used as a means of enrolling those who accept the offer in a plan whereby additional supplies of the product are shipped at an additional charge unless all of the conditions of the plan are disclosed clearly and conspicuously and within close proximity to the 'free' or other offer." The respondents did not appeal from the initial decision and the Commission thereafter adopted the decision and order.

Petitioner now seeks to modify one provision of that order, by adding a provision to paragraph 1(b) of the order which would permit respondent to have the option of clearly and conspicuously disclosing, when the free or other offer is made, that there are obligations attendant upon acceptance of the free or nominally priced offer and then clearly and conspicuously disclosing the complete terms of the offer elsewhere. Thus, the alternative language would not require that respondent disclose all the conditions "within close proximity to the free or other offer" as is now mandated.

While the Commission supports petitioner's proposed revisions to the order, the Commission has, without objection from petitioner, added a proviso to that portion of paragraph 1(b)(2) which would permit respondent to disclose the complete terms of the offer elsewhere in the advertisement. As revised herein, where respondent exercises this option and also includes in the advertisement a coupon, signature space or other means by which a consumer is intended to accept the offer, it is required to disclose the complete terms of the offer on or in close proximity to the coupon or other space provided.

The alternative language, as revised, should be sufficient to ensure that consumers are aware of their obligations in accepting the free or other offer. Not only would respondent be required by the modified order to disclose clearly and conspicuously and within close proximity to the offer that there are other conditions that a consumer assumes upon accepting the offer, but the respondent must clearly and conspicuously set forth on a coupon or other offer acceptance form included in the advertisement or, if no such form is provided, elsewhere in the advertisement the complete details, conditions, and obligations. Thus, assuming that the proper language is used, a consumer can be expected to be aware of the obligations attendant upon acceptance of the offer.

In its petition at page 8, respondents suggests that the modified order would be satisfied by placing, clearly, conspicuously, and within close proximity to the offer, such terms as "with membership", "with club membership", "when you join", "when you rejoin", "see details of plan in enrollment coupon", "see details of offer below", "see details inside", and other similar terms which clearly convey to the consumer a further obligation upon acceptance of the offer. Respondent should be advised that, in granting the petition, the Commission does not agree that all of the above terms would constitute satisfactory compliance with the modified order. In particular, in the Commission's view, the terms "see details inside" or "see details of offer below," even if placed "clearly, conspicuously and in close proximity" to the offer, are too imprecise to adequately inform consumers that there are further *obligations* attendant upon acceptance of the offer.

With the above noted order revision and compliance caveat, the Commission has decided to grant the petition. Moreover, having been informed by staff that the petitioner has no objection, the Commission also has made two other changes in the order. Because respondent Michael Posen has died, the Commission has deleted his name from the order, and it has changed the name of the corporate respondent, from Golden Fifty Pharmaceutical Co., Inc. to Golden Tabs Pharmaceutical Co., Inc.

It is therefore ordered that the proceeding is hereby reopened and the Decision and Order issued July 17, 1969, in Docket No. 8792 is hereby modified to read as follows:

Order

It is ordered, That respondent Golden Tabs Pharmaceutical Co., Inc., a corporation, and its officers, agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of the preparation designated "Golden 50 Tabulets," or any food, drug, device or cosmetic do forthwith cease and desist from directly or indirectly:

1. Disseminating or causing the dissemination of, by means of the United States mails or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, any advertisement which:

(a) Represents directly or by implication that respondent is a manufacturer of vitamin and/or mineral preparations or maintains laboratory facilities concened with the formulation, testing or performance of vitamin and/or mineral preparations.

(b) Represents directly or by implication that any product is offered free or under any other terms when the offer is used as a means of enrolling

those who accept the offer in a plan whereby additional supplies of the product are shipped at an additional charge unless all of the conditions of the plan are disclosed clearly and conspicuously and within close proximity to the "free" or other offer,

or, alternatively,

represents directly or by implication that any product is offered free or under any other terms when the offer is used as a means of enrolling those who accept the offer in a plan whereby additional supplies of the product are shipped at an additional charge unless (1) respondent discloses clearly, conspicuously, and within close proximity to the free or other offer that there is a further obligation upon the consumer upon acceptance of the offer, and (2) respondent also discloses clearly and conspicuously elsewhere in the advertisement the complete details, conditions, and obligations attendant upon acceptance of the offer, provided further that, if the advertisement includes a coupon, signature space, or other designated means by which the consumer is intended to accept the offer, respondent discloses clearly and conspicuously on or in close proximity to the coupon or other space provided for acceptance of the offer the complete details, conditions and obligations attendent upon acceptance of the offer, but such complete disclosure need not appear more than once in the advertisement, including the coupon.

(c) Represents directly or by implication that an offer is made without "further obligation," or with "no risk," or words of similar import denoting or implying the absence of any obligation on the part of the recipient of such offer when in fact there is an obligation incurred by the recipient.

(d) Represents directly or by implication that an offer is made to only a limited customer group or for only a limited period of time when no such limitations are imposed by respondents.

(e) Represents directly or by implication that such products are guaranteed unless the nature and extent of the guarantee, the identity of the guarantor and the manner in which said guarantor will perform thereunder are clearly and conspicuously disclosed therewith.

(f) Represents directly or indirectly that any product or combination of products identified, described or specified, directly or by implication, is being offered for sale, as a "gift" or otherwise, unless such offer does contain the items as specified, described or otherwise identified.

(g) Represents directly or indirectly that any product or combination of products which are offered for sale, "free," as a "gift," or otherwise is or are of regular commercial size when such product or products are of "trial," "sample," or otherwise less than regular commercial size.

2. Disseminating, or causing to be disseminated, by any means, for the purpose of inducing, or which is likely to induce, directly or indirectly, the purchase of respondent's products in commerce, as "commerce" is defined in the Federal Trade Commission Act, any advertisement which contains any of the representations or misrepresentations prohibited by Paragraph 1 hereof.

It is further ordered, That respondent and its officers, agents, representatives and employees, directly or through any corporate or other device, in connection with the advertising, offering for sale, sale or distribution of "Golden 50 Tabulets" or other products, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Shipping or sending any merchandise to any person without the prior authorization or prior consent of the person to whom such merchandise is sent and attempting, or causing to attempt, the collection of the price thereof.

2. Shipping or sending any merchandise to any person and attempting, or causing to attempt, the collection of the price thereof when a notification of refusal of such merchandise, or a notification of cancellation for any further shipments of merchandise, has been sent by such persons and received by respondent.

It is further ordered, That respondent notify the commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That respondent shall, within sixty (60) days after service of this modified order upon it, file with the commission a report in writing, signed by respondent, setting forth in detail the manner and form of its compliance with the order to cease and desist.

It is further ordered, That the foregoing modification shall become effective upon service of this Order.

Issued: March 17, 1983.

By direction of the Commission.

Benjamin I. Berman,

Acting Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 1 and 4

[Docket No. RM81-15-000]

Revisions to Certain Regulations Governing Applications for Preliminary Permit and License for Water Power Projects

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order granting rehearing in part and denying rehearing in part.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is issuing an order that grants in part and denies in part a petition for rehearing of a final rule that clarifies and streamlines the requirements for certain hydroelectric project applications.

For reasons detailed in the rehearing order, the Commission largely denies the petitioner's request for modification of the final rule. The Commission grants rehearing to clarify that: (1) the Commission will not change the date of acceptance of a permit application when a state or a municipality amends its preliminary permit application under § 4.33(g)(4) to make its plans as well adapted as plans of an applicant that is not a state or a municipality; (2) the Commission will not change the date of acceptance of a license application when a preliminary permittee amends its license application under § 4.33(h)(2) to make its plans as well adapted as plans of another applicant; and (3) a municipal charter may be acceptable evidence of municipal competence to engage in the electric power business.

EFFECTIVE DATE: The clarifications made in 18 CFR 4.35 and 4.81 will be effective May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph H. Long, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, (202) 357-8033.

SUPPLEMENTARY INFORMATION: In the matter of revisions to certain regulations governing applications for preliminary permit and license for water power projects; Docket No. RM81-15-000,

Order No. 183–A; order granting rehearing in part and denying rehearing in part.

Issued April 8, 1983.

I. Introduction

On October 29, 1981, the Federal Energy Regulatory Commission (Commission) isued a final rule revising regulations that govern applications for preliminary permits and licenses for water power projects under Part I of the Federal Power Act (Act).[1] On November 30, 1981, the law firm of Spiegel and McDiarmid (Spiegel) filed a timely petition for rehearing. On December 30, 1981, the Commission granted the Spiegel petition solely for purpose of further consideration.

II. Background

As noted in its preamble, the final rule is designed to expedite further the licensing of water power projects by clarifying and streamlining some Commission procedures by: (1) Automatically granting (with some exceptions) timely uncontested petitions to intervene in preliminary permit application proceedings [§§ 385.214(c)(2) and 4.31(h)]; (2) reminding applicants for a permit or a license to include as a co-applicant any entity having or intending to obtain and maintain any proprietary or other interest necessary to construct, operate, or maintain the water power project [§ 4.30(d)]; (3) eliminating, for certain kinds of water power projects at existing dams, notices of intent to submit competing preliminary permit applications and allowing 90 days for competitors to file [§ 4.33 (a) and (b)]; (4) deleting reference to the ability of respective applicants to carry out the proposed plans of development for those cases where a municipality or a state and a private entity compete for a preliminary permit or a license [§ 4.33(g) (3) and (4)]; (5) requiring a municipal applicant for a preliminary permit or a license to submit as part of its application appropriate evidence that it is legally competent under applicable local law to engage in the business of developing, transmitting, utilizing, or distributing power [§§ 4.33(i), 4.51(a)(5)(i) and 4.81(a)(4)]; and (6) adding a new provision to indicate that after an application for a preliminary permit or a license is filed with the Commission, the submittal of a amendment to that application that changes the status or identity of the applicant or materially amends the proposed plans of development will result in its treatment as a new application and a change in the date of its acceptance for filing to the date of the filing of the amendment [§ 4.35].

III. Issues on Rehearing

The petitioner raises a number of arguments on rehearing. Most of these arguments were considered by the Commission in promulgating the final rule, and the Commission believes that no purpose in served by further discussion of many of these issues. These include petitioner's contention, which is now moot, that there are administrative difficulties with the automatic intervention provisions,[2] the objection that the elimination of notices of intent to submit preliminary permit applications for certain water power projects will burden the Commission and competing applicants, and the objection to using "project" and not "project works" in § 4.33(a), which the Commission has previously addressed.[3] There remain a few issues that merit some additional clarification, including minor changes to the regulations.

A. Identity of Applicants with Rights in Proposed Projects [§ 4.30(d)]

Section 4.30(d) states that any entity "which has or intends to obtain, and will maintain, any proprietary right necessary to construct, operate, or maintain a water power project for which an application for a preliminary permit or license is filed, should be identified as an applicant in such documents."[4] The petitioner argues that this new provision provides that any owner of project-related land that the applicant expects to purchase or condemn should be listed as an applicant. The Commission finds this to be a misreading of § 4.30(d). That section provides that entities that have and would maintain any proprietary right in the project after it is licensed should be listed as applicants. An owner of any property that the applicant intends to obtain by purchase or condemnation clearly would not *maintain* any proprietary right necessary to construct, operate, or maintain that applicant's project and, therefore, should not be listed as an applicant under § 4.30(d).

Petitioner's recommendation that the Commission guard against hidden hybrid applications by requiring identification of all persons with property related to a proposed project and submittal of "copies of all proposed or executed contracts and agreements with any other entity relating to the control or use of any proposed project," is not adopted. There are questions about the usefulness of such a requirement, particularly in the case of preliminary permit applications. The Commission does not wish, in any event, to establish a filing requirement of the sort recommended by the petitioner at this late stage of this proceeding. This information is currently obtainable by the Commission in those few cases where it is needed.

B. Substantiation of Competence as a Municipality Under State Law [§§ 4.51(a)(5)(i) and 4.81(a)(4)]

In the final rule, §§ 4.51(a)(5)(i) and 4.81(a)(4) are amended to require a municipality to submit as part of its application evidence of competency under state law to develop, transmit, utilize or distribute power. Petitioner believes these provisions will result in a municipality being automatically treated as a non-public entity if the application is deficient in this respect. As the preamble clearly states, this is not the case. "If a municipality fails to submit evidence of competence, this fact will be included in the Commission's assessment of any application deficiencies and, if the cumulative deficiencies do not warrant rejection of the application, the municipality will be granted the usual time to submit the needed information before the priority status obtained by filing is lost." 46 FR 55246. Petitioner's argument nothwithstanding, failure to provide the necessary substantiation on this point will be part of the Commission's

[1] Final Rule, "Revisions to Certain Regulations Governing Applications for Preliminary Permit and License for Water Power Projects," (Docket No. RM81–15–000) issued October 29, 1981, 46 Fed. Reg. 55,245 (November 9, 1981), FERC Stat. and Reg. Preambles (1977–1981) ¶30,305.

[2] On April 28, 1982, the Commission issued Order No. 225, which revised and reorganized its Rules of Practice and Procedure (47 FR 19014, May 3, 1982). That final rule replaced the automatic intervention provision in Order No. 183 applicable only to preliminary permit proceedings with a provision (§ 385.214(c)) making automatic intervention possible, with certain limitations, in all Commission proceedings. Rule 214 is based on the Commission's belief that intervention by notice serves the interests that both the Commission and prospective participants have in efficient administration.

[3] Final Rule, "Amendments to Regulations Governing Case-by-Case Exemption From All or Part of Part I of the Federal Power Act for Small Hydroelecric Power Projects With an Installed Capacity of 5 Megawatts or Less," (Docket No. RM82–2–000) issued August 27, 1982, 47 FR 38506 (September 1, 1982) at 38511.

[4] The preamble to the final rule explains that "§ 4.30(d) is added to remind applicants that any person possessing or intending to acquire such proprietary interests and to maintain them when the proposed project is operational should be a coapplicant for a permit or a license. When, at the licensing stage, the Commission accounts for all interests in a project, the license applicant(s) must be determined to control all the interests essential to managing the development. If other persons in fact have or share those interests, the applicant risks loss of whatever priorities it may have established." 46 FR 55246.

consideration of whether the application is deficient.

Petitioner also notes that § 4.51(a)(5)(i) specifies that municipal charters may be acceptable evidence of competency to engage in the power business, but that § 4.81(a)(4) does not.[5] The Commission considers a municipal charter to be acceptable evidence under the term "appropriate legal authority" in § 4.81(a)(4). Therefore, in order to eliminate any possible misunderstanding, the Commission is clarifying § 4.81(a)(4) to specify that a municipal charter may be acceptable evidence of municipal competency.

C. Changing Filing Dates of Applications When Material Amendments are Made (§ 4.35)

Under new § 4.35, a material amendment to a pending preliminary permit or license application results in the application being assigned a new filing date as a new application, conceivably at the expense of priority in time. Although the Commission has previously addressed petitioner's objections to this provision [6]—*i.e.*, that it impedes the licensing process, fails to remedy the situation it was intended to remedy, and retards the fullest and best development of hydropower resources—two contentions do warrant discussion.

The petitioner argues that the regulation is contrary to section 7(a) of the Federal Power Act (Act) because it does not allow a state or a municipality the right to upgrade its application *at any time*. Section 7(a) states that, in considering permit applications and license applications where no permit has been issued, the Commission must give preference to applications by states and municipalities, "provided the plans for the same are deemed by the Commission equally well adapted, or shall *within a reasonable time to be fixed by the Commission* be made equally well adapted, to conserve and utilize in the public interest the water resources of the region * * *." (emphasis added). The Commission does not agree that the Act provides an unlimited right to amend. However, the Act does afford a state or a municipality a "reasonable time" to make its plans equally well adapted in response to a competitor's plans, presumably to preserve the importance of the preference clause while ensuring optimal development.

Section 4.35 of the Commission's regulations is not intended to curtail this right and cannot be used as a means of assigning a new filing date if an amendment is designed to make a preference applicant's plans "equally well adapted" as the plans of a competing applicant. When the Commission notifies the state or municipality that its plans are inferior, it will fix a reasonable period of time for the state or municipality to amend its plans to make them equally well adapted.[7] In such cases, § 4.35 would not apply and the original filing date would be retained. The practice of not applying the provisions of § 4.35 to amendments such as these is not clear on the face of that section. The Commission is, therefore, amending § 4.35 to clarify this point.[8]

For the foregoing reasons, the Commission orders that: The Application for Rehearing by the law firm of Spiegel and McDiarmid is denied in part and is granted in part, to the extent of the clarifications set forth below.

(Federal Power Act, as amended, 16 U.S.C. 792–828c (1976); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (Supp. IV 1980); E.O. No. 12009, 3 CFR Part 142 (1978); 5 U.S.C. 553 (Supp. IV 1980))

List of Subjects in 18 CFR Part 4

Electric power.

In consideration of the foregoing, Part 4, Chapter 1 of Title 18, Code of Federal Regulations, is amended as set forth below, effective May 16, 1983.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 4—[AMENDED]

1. In § 4.35, paragraph (a) is revised to read as follows:

§ 4.35 Amendment of application; date of acceptance.

(a) *General rule.* (1) Except as provided in subparagraph (a)(2), if an applicant amends its filed license or preliminary permit application in order to change the status or identity of the applicant or materially amend the proposed plans of development, the Commission will change the date of acceptance of the application under § 4.31(e) to the date on which the amendment is filed with the Commission and consider the amended application as a new filing for the purposes of disposing of competing applications under § 4.33 and reissuing public notice of the application under § 4.31(c)(2).

(2) *Exceptions.* This section does not apply to:

(i) Any corrections of deficiencies made pursuant to § 4.31(d)(1);

(ii) Any amendments made pursuant to § 4.33(g)(4) by a state or a municipality to amend its proposed plans of development to make them as well adapted as the proposed plans of an applicant that is not a state or a municipality;

(iii) Any amendments made pursuant to § 4.33(h)(2) by a priority applicant to amend its proposed plans of development to make them as well adopted as the proposed plans of an applicant that is not a priority applicant.

* * * * *

2. In § 4.81, paragraph (a)(4) is revised to read as follows:

§ 4.81 Contents of application.

* * * * *

(a) *Initial statement:* * * *

(4) [Name of applicant] is a [citizen, association of citizens, domestic corporation, municipality, or state, as appropriate]. [If the applicant is a municipality, the applicant must submit copies of applicable state or local laws or a municipal charter or, if such laws or documents are not clear, any other appropriate legal authority, evidencing that the municipality is competent under such laws to engage in the business of developing, transmitting, utilizing, or distributing power].

[Docket No. RM81-10-000]

Application for License for Minor Water Power Projects and Major Water Projects 5 Megawatts or Less

Issued: April 8, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order denying rehearing.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is issuing an order that denies a petition for rehearing of the final rule that expands the applicability of the so-called "short-form" license application to include both minor water power projects and major water power projects of 5 megawatts or less. For reasons detailed in the rehearing order, the Commission denies the petitioner's request for modification of the final rule.

[5] Sections 4.41(a)(5)(i) and 4.61(b)(6)(i) also specify that municipal charters are evidence of competency to engage in the power business.

[6] 46 FR 55249.

[8] This dicussion applies equally to a permittee that submits an acceptable application for license within the permit period. *See* § 4.33(h)(2).

EFFECTIVE DATE: April 8, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph H. Long, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, (202) 357-8033.

SUPPLEMENTARY INFORMATION:

In the matter of application for license for minor water power projects and major water power projects 5 megawatts or less, Docket No. RM81-10-000, Order No. 185-A; order denying rehearing.

Issued April 8, 1983.

I. Introduction

On November 6, 1981, the Federal Energy Regulatory Commission (Commission) issued a final rule which, among other things, expands the applicability of the so-called "short-form" application to include both minor water power projects and major water power projects of 5 megawatts (MW) or less.[1] This rule was designed in general to simplify and expedite hydropower development by easing the burden of preparing license applications and by assisting the Commission in more rapid processing of applications.

On December 7, 1981, the Municipals filed a timely petition for rehearing.[2] On January 6, 1982, the Commission granted rehearing of the Municipals' petition solely for the purpose of further consideration.

II. Background

Prior to the final rule in this docket, short-form license applications could be filed under §§ 4.60 and 4.61 only for minor water power projects of 1.5 MW or less installed capacity. In the final rule, the Commission expanded the applicability of §§ 4.60 and 4.61 to also include applications for initial or new licenses for major water power projects of 5 MW or less installed capacity. The Commission thereby greatly reduced the amount of information required from a license applicant for a water power project with an installed capacity of between 1.5 MW and 5 MW.[3]

The final rule has been designed to ensure that the Commission can still meet its responsibilities under the Federal Power Act even though license applicants for smaller, major water power projects could now use the short-form application.

III. Issues Raised by Municipals

The Municipals raise three issues on rehearing of this rule. First, the Municipals argue that license applicants for major water power projects of 5 MW or less should be required to state "the measure of control or ownership exercised by the applicant in any other organization or over applicant by any other organization * * *."[4] Second, the Municipals assert that § 4.61 should require a license applicant for such a project to submit a "statement of the applicant's plans, if any, for future development of the project or of any other existing or proposed water power project on the stream or other body of water, indicating the approximate location and estimated installed capacity of the proposed developments."[5] Third, the Municipals argue that § 4.61(a)(3) is not sufficiently clear that maintenance and repair work is permitted on an existing dam at the proposed project site to the extent necessary to protect lives or preserve the structural integrity of the dam.[6]

In expanding the applicability of §§ 4.60 and 4.61 to include license applications for major water power projects with 5 MW or less installed capacity, the Commission excluded information that was not needed at all or that was needed only infrequently. This reduction in required information relieves both an undue filing burden on applicants and an administrative burden on the Commission. The information desired by the Municipals, that on "control" and on "future plans of development," has not been sufficiently useful in the past to warrant a generic requirement on all prospective licensees. In the unusual case where the Commission believes that this type of information is necessary to determine whether to issue a license, the Commission can and will request such information on a case-by-case basis.[7]

With respect to the Municipals' third argument on rehearing, the Commission believes that the final rule and its preamble clearly state the Commission's position, *i.e.*, forbidding prelicense work on proposed project works but allowing limited emergency work on an existing dam that would be part of a proposed project.[8] The Commission does not interpret § 4.61(a)(3) to prohibit such work, and the preamble of the final rule adequately explains the meaning of § 4.61(a)(3).

For the foregoing reasons, the Commission orders that: That Application for Rehearing by the Massachusetts Municipal Wholesale Electric Company and the Cities and Towns of Bedford, Blackstone, Culpeper, Danville, Elkton, Franklin, Front Royal, Harrisonburg, Manassas, Martinsville, Radford, Richlands, Salem and Wakefield, Virginia is denied.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9962 Filed 4-13-83; 8:45 am]

BILLING CODE 6717-01-M

---

[1] Docket No. RM81-10-000, Order No. 185, issued Nov. 6, 1981, 46 FR 55,944 (Nov. 13, 1981); FERC Stat. and Reg. Preambles (1977-1981) ¶ 30,309. The provisions of the final rule are codified primarily in 18 CFR 4.60 and 4.61.

[2] "Application For Rehearing On Behalf of The Massachusetts Municipal Wholesale Electric Company and The Cities and Towns of Bedford, Blackstone, Culpeper, Danville, Elkton, Franklin, Front Royal, Harrisonburg, Manasses, Martinsville, Radford, Richlands, Salem and Wakefield, Virginia" ("Municipals' Application"). The petitioners are referred to collectively as the "Municipals."

[3] The Commission and its predecessor, the Federal Power Commission, have maintained a distinction between "major" and "minor" projects based on section 10(i) of the Federal Power Act (Act). That provision permits waiver of some provisions or requirements of the Act for projects with not more than 2000 horsepower, or 1.5 MW, of installed capacity. Such a waiver is manifested in the kinds of conditions contained in licenses for projects above ["major"] and below ["minor"] the 1.5 MW demarcation. *See* 18 CFR 2.9. The construction and operation of minor projects under less stringent license conditions than major projects will continue unchanged by this rule. However, this rule allows license application procedures for minor projects to apply (with the exception of an Exhibit E for unconstructed projects) to major projects with an installed capacity of 5 MW or less.

[4] Municipals' Application, at 1. Former § 131.2(4) required all prospective licensees to provide this statement in their license applications. Section 131.2 was revoked in Docket No. RM80-39, Order No. 184, issued Nov. 6, 1981, 46 FR 55,926, (Nov. 13, 1981). Accordingly, this aspect of the Municipals' rehearing petition is not within the scope of this rulemaking.

[5] Municipals' Application, at 2 and 3. This information is required in the license application for a proposed project with installed capacity of more than 5 MW. *See* § 4.51(c)(4).

[6] Municipals' Application, at 2 and 3.

[7] *See, e.g.*, section 9(c) of the Federal Power Act, 16 U.S.C. 802(c).

[8] The preamble states that prelicense work "should be undertaken only to the extent necessary to protect lives or preserve the structural integrity of the dam." The preamble also makes it clear that the project works described in an application should not be changed substantially while the Commission reviews an applicant's proposal. 46 FR, at 55,946.

18 CFR Part 271

[Order No. 286; Docket No. RM79-76-141 (Texas-24)]

High-Cost Gas Produced From Tight Formations; Texas

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions

which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.203). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This final order adopts the recommendation of the Railroad Commission of Texas that the Garza Sand be designated as a tight formation under § 271.703(d).

EFFECTIVE DATE: This rule is effective May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Steven Ross, (202) 357–8571, or Walter Lawson, (202) 357–8556.

SUPPLEMENTARY INFORMATION:

Issued: April 7, 1983.

The Federal Energy Regulatory Commission (Commission) hereby amends § 271.703(d) of its regulations to include the Garza Sand, underlying land in Duval County, Texas, as a designated tight formation, eligible for incentive pricing under § 271.703. The amendment was proposed in a Notice of Proposed Rulemaking by the Director, Office of Pipeline and Producer Regulation, issued October 28, 1982 (47 FR 49852, November 3, 1982),[1] based on a recommendation by the Railroad Commission of Texas (Texas), in accordance with § 271.703, that the Garza Sand be designated as a tight formation.

Evidence submitted by Texas supports the assertion that the Garza Sand meets the guidelines contained in § 271.703(c)(2). the Commission adopts the Texas recommendation.

This amendment shall become effective thirty days after publication in the **Federal Register**.

Natural gas, Incentive price, Tight formations.

(Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432; Administrative Procedure Act, 5 U.S.C. 553)

In consideration of the foregoing, Part 271 of Subchapter H, Chapter I, Code of Federal Regulations, is amended as set forth below.

[1] No comments or requests for a public hearing were received by the Commission in this docket.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraph (d)(122) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(122) *Garza Sand in Texas.* RM79–76–141 (Texas-24).

(i) *Delineation of Formation.* The Garza Sand is found in Duval County in Texas. The designated area is located approximately 3 miles west of the city of Concepcion, Texas, in Railroad Commission District 4 and includes portions of the following surveys: Andres Garcia Heirs Survey, Abstract 657; Santos Flores Survey, Abstract 475; R. Ramirez Survey, Abstract 475; and Marcello Ynojosa Survey, Abstract 628.

(ii) *Depth.* The top of the Garza Sand ranges from a measured depth of −6,700 feet to approximately −7,400 feet subsea.

18 CFR Part 271

[Order No. 287; Docket No. RM79–76–147 (Texas-3 Addition II Amendment)]

High-Cost Gas Produced From Tight Formations; Texas

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determined that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.203). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This final order adopts the recommendation of the Railroad Commission of Texas that the Credo, East (Cisco, Upper) Field Formation, designated as a tight formation in Docket No. RM79–76 (Texas-3 Addition II), be amended.

EFFECTIVE DATE: This rule is effective May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Steven Ross, (202) 357–8571, or Walter Lawson, (202) 357– 8556.

SUPPLEMENTARY INFORMATION:

Issued: April 7, 1983.

The Federal Energy Regulatory Commission (Commission) hereby amends § 271.703(d) of its regulations to include an additional area of the Credo, East (Cisco, Upper) Field Formation, underlying lands in Sterling County, Texas, as a designated tight formation, eligible for incentive pricing under § 271.703. The amendment was proposed in a Notice of Proposed Rulemaking by the Director, Office of Pipeline and Producer Regulation, issued November 18, 1982. FR 53033, November 24, 1982),[1] based on an amended recommendation by the Railroad Commission of Texas (Texas) in accordance with § 271.703, that the additional area of the Credo, East (Cisco, Upper) Field Formation be designated as a tight formation.

The Commission previously adopted Texas' original recommendation that the Credo, East (Cisco, Upper) Field Formation be designated as a tight formation.[2] However, in the text of its original recommendation, Texas inadvertently omitted eleven sections of land from the recommended area, and thus such land was not included in the area designated in Order No. 239. Texas subsequently submitted an amended recommendation, in this docket, for the Credo, East (Cisco, Upper) Field Formation to include those areas omitted from the original recommedation.

Evidence submitted by Texas supports the assertion that the addition area of the Credo, East (Cisco, Upper) Field Formation meets the guidelines contained in § 271.703(c)(2). The Commission adopts the Texas amended recommendations.

This amendment shall become effective thirty days after publication in the **Federal Register.**

High-Cost Gas Produced From Tight Formations; Order Remanding Recommendation to Jurisdictional Agency

Issued April 7, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order remanding recommendation to jurisdictional agency.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain

[1] Comments were invited on the proposed rule and one comment supporting the recommendation was received. No party requested a public hearing and no hearing was held.

[2] The calculations for permeability and flow rates submitted by Texas are based on median values, rather than average values. However, using the data submitted by Texas in support of its recommendation, the Commission has determined that the arithmetic average values for permeability and flow rates for the subject formation also satisfy the Commission's guidelines in § 271.703(c)(2).

types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.203). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This order remands to the State of Montana Board of Oil and Gas Conservation (Montana) its recommendation that the Bowdoin, Greenhorn, and Phillips Formations each be designated as a tight formation under § 271.703(d), and requests that Montana provide additional information and resubmit its recommendation.

DATE: This order is issued April 7, 1983.

FOR FURTHER INFORMATION CONTACT: Steven Ross, (202) 357–8571 or Victor Zabel (202) 357–8616.

SUPPLEMENTARY INFORMATION:

Order Remanding Jurisdictional Agency Recommendation for Tight Formation Designation

Issued April 7, 1983.

In the matter of high-cost gas produced from tight formations; Docket No. RM79–76–096, (Montana—1).

I. Background

On January 29, 1982, the Federal Energy Regulatory Commission (Commission) received a recommendation pursuant to § 271.703 of the Commission's regulations (18 CFR 271.703), from the State of Montana Board of Oil and Gas Conservation (Montana), that the Bowdoin, Greenhorn, and Phillips Formations located in Phillips and Valley Counties, Montana, each be designated as a tight formation. The recommendation was proposed in a Notice of Proposed Rulemaking by the Director, Office of Pipeline and Producer Regulation (Director), issued June 1, 1982 (47 FR 24342, June 4, 1982). Inasmuch as approximately 70% of the recommended area underlies Federal land and is under the jurisdiction of the United States Department of the Interior, Minerals Management Service (MMS), MMS reviewed the recommendation. By letter dated February 24, 1982, MMS informed the Commission that it did not appprove Montana's recommendation, stating that the production of gas from the subject formations presented neither extraordinary risk nor cost. By a letter to the Commission dated March 26, 1982, MMS reversed its position, and concurred with Montana's recommendation.[1]

In response to the June 1, 1982 Notice of Proposed Rulemaking, the Commission received several comments and requests for a public hearing. A public hearing concerning Montana's recommendation was held at the Commission on August 20, 1982. For purposes of this Order, those who responsed to the Notice of Proposed Rulemaking or testified at the public hearing, and urged the Commission to deny Montana's recommendation, will be described collectively as the "opposing commenters."[2]

The opposing commenters argued that gas produced from the subject area was not high-cost natural gas, and that the production of such gas did not involve extraordinary risks or costs. These commenters pointed to the fact that numerous applications for infill drilling in adjacent areas have been received by Montana subsequent to its recommendation to the Commission regarding the subject formation. Applications for infill drilling arguably indicate that the area can be economically developed absent the tight formation incentive price.

The opposing commenters also stated that Montana's recommendation failed to meet the Commission's guidelines. In support of this allegation, these commenters stated that excessive net pay thicknesses were used for the calculations of average permeability in the recommendation, which resulted in lower permeability calculations. The opposing commenters also argued that drill-stem tests of dry holes were included in the recommendation, which also lowers the permeability and flow rate values.

The accuracy of the production rates submitted to Montana was also questioned. One opposing commenter argued that Petroleum Corporation of America (PCA), a company which supplied data to Montana in the proceedings which Montana held on the subject formations, excluded drill-stem tests which yielded high permeabilities, while including tests with zero production rates. These zero production rates submitted by PCA were alleged by the opposing commenters to be from plugged and abandoned wells that were never put on production, in contravention of the requirement in § 271.703(c)(2)(i)(B) that information be included in the recommendation concerning the stabilized production rates of wells *completed for production*. This opposing commenter also noted that information on the Petroleum Information Service cards regarding production rates for various wells in the recommended area, differed from that submitted to Montana. Finally, one opposing commenter asserted that there was no evidence in the record to indicate that the flow rates submitted were made under stabilized conditions, as is required in § 271.703(c)(2)(i)(B).

The opposing commenters also addressed the propriety of actions taken by MMS in this docket. In its February 24, 1982 letter, MMS stated that it believed that the applicant seeking the tight formation designation from Montana, as well as its expert witnesses, employed excessive manipulation of the data to establish permeability values and prestimulation flow rates. MDU alleges that MMS' March 26, 1982 letter, in which it reversed its position, was written after MMS made post-hearing contacts with persons who had filed the applications seeking the subject tight formation recommendations. MDU further claims that those opposing the application had no knowledge of these post-hearing contacts, and thus had no opportunity to counter the off-the-record arguments, cross-examine the witnesses, or consider any of the information presented during these contacts.

On June 30, 1982, an attorney for PCA stated the February 24, 1982 analysis by MMS was an inaccurate review of the tight formation application. Such inaccuracy was said to result from the consideration by MMS of wells that were not within the recommended area. According to PCA, the March 26, 1982 letter reflected a more thorough investigation of the application. In a letter dated August 12, 1982, Mr. Harold L. Doley, Jr., of MMS, reiterated his agreement with the conclusion submitted to the Commission in the March 26, 1982 letter.[3] The opposing

[1] On April 22, 1982, the Commission received a letter from Montana-Dakota Utilities Co. (MDU) protesting the actions of MMS. On April 26, 1982, the Commission received a similar letter from the Montana Public Service Commission (MPSC), which requested that the Commission investigate the circumstances behind the MMS March 26, 1982 letter. The Commission was subsequently notified on May 11, 1982, by Senator Max Baucus, that the matter raised by MDU and MPSC had been forwarded to the United States Comptroller General. The GAO report on MMS involvement in the subject tight formation recommendation has yet to be released.

[2] Those commenters opposing Montana's recommendation are Montana-Dakota Utilities Co., Montana Public Service Commission, and Southern California Gas Company with Pacific Lighting Gas Supply Company. A comment in support of Montana's recommendation was filed by Petroleum Corporation of America.

[3] Mr. Doley further added that MMS "strongly opposes and rejects the rationale that drilling of

commenters requested that the Commission consider only the February 24, 1982 letter opposing the tight formation recommendation, and desregard MMS' March 26, 1982 letter.

II. Discussion

In support of this recommendation, and in response to issues raised by the opposing commenters, the Commission has received six separate sets of data regarding the permeability and flow rate values for the recommended area. Three sets of data were sent to the Commission by Montana in the original application. On July 19, 1982, the Commission received a letter from Dr. James W. Crafton, a witness for PCA at the hearing before Montana. Dr. Crafton submitted new pre-stimulation production rate averages, as well as new *in situ* permeability averages for the subject formations. Dr. Crafton defended the analysis employed, stating that it is especially suited for the recommended area.

At the August 20, 1982 public hearing, PCA presented a fifth set of averages for *in situ* permeability and pre-stimulation production rates. Finally, the Commission received a letter from PCA's attorney on September 7, 1982, in which he submitted further revised data and stated that the Montana order excluded more land than had been voted on at the Montana hearing. By letter received by the Commission on September 17, 1982, Montana concluded that the acreage description in its order was correct.

Under the tight formation program, as detailed in Order No. 99,[4] tight formation recommendations submitted to the Commission by the various jurisdictional agencies are approved under the Commission's rulemaking authority. The Commission is not limited by the evidence in the record presented to it by the jurisdictional agency and the various commenters, and accordingly is free to request or to develop any additional evidence which it deems necessary in order for it to issue a rule in a tight formation designation proceeding.

Review of Montana's recommendation, as it presently stands, reveals that there are six sets of data for permeability averages and production rates and that there are problems attendant with each set. The first five sets included data on wells which were not within the recommended area. The accuracy of all of the data submitted has been challenged by the opposing commenters. It has also been alleged that the incentive price is not necessary to encourage production of this gas, and that the numerous applications for infill drilling orders for the recommended area indicate that the gas can be developed absent the incentive price. Moreover, it is also apparent that PCA, up to the time of the public hearing convened by this Commission, was unaware of the delineation of the acreage that had actually been recommended by Montana. Further, there are allegations of improper actions by MMS, as well as an ongoing investigation into these allegations by the GAO. Due to these problems, the Commission believes that it would be premature and inappropriate to take action in this docket based on the current state of the record. Montana and the interested parties should evaluate the problems raised regarding the accuracy and persuasiveness of the evidence submitted, as well as the other problems raised in this proceeding. Should Montana decide to resubmit its recommendation, it should include with that recommendation any new evidence that addresses the issues that have been raised in this docket.

III. The Commission Orders

Based on the above, the Commission hereby remands to the State of Montana Board of Oil and Gas Conservation its recommendation that the Bowdoin, Greenhorn, and Phillips Formations be designated as a tight formation so that Montana may obtain additional information and resubmit its recommendation, in accordance with the Commission's regulations in § 271.703 in accordance with the above discussion.

By the Commission.

Kenneth F. Plumb,

Secretary.

18 CFR Part 294

[Docket No. RM79-52-000]

Interim Procedures for Shortages of Electric Energy and Capacity Under Section 206 of the Public Utility Regulatory Policies Act of 1978

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Extension of interim rule.

SUMMARY: The Federal Energy Regulatory Commission amends its rules to extend, through a period ending April 30, 1984, the interim rule implementing reporting procedures for shortages of electric energy and capacity, under section 206 of the Public Utility Regulatory Policies Act of 1978. Under the rule, each public utility now serving firm power wholesale customers must report to the Commission, the utility's customers, and appropriate State authorities, any shortages of electric energy or capacity anticipated to occur prior to April 30, 1984. Also, the rule requires each public utility to report any modifications of its plans for accommodating shortages which may occur before April 30, 1984.

EFFECTIVE DATE: May 1, 1983.

FOR FURTHER INFORMATION CONTACT: Bernard B. Chew, Office of Electric Power Regulation, 825 North Capitol Street NE., Room 504RB, Washington, D.C. 20426 (202) 376-9264; Kenneth J. Malloy, Rulemaking and Legislative Analysis Section, Office of General Counsel, 825 North Capitol Street NE., Room 8602-A, D.C. 20426 (202) 357-8033.

SUPPLEMENTARY INFORMATION:

Extension of Interim Rule

Issued: April 8, 1983.

The Federal Energy Regulatory Commission (Commission) is amending § 294.101 of its regulations (18 CFR 294.101 (1982)), which is an interim rule that requires electric utilities to report to the Commission anticipated shortages of electric energy and capacity as required by section 206 of the Public Utility Regulatory Policies Act of 1978 (PURPA). The amendment extends the effectiveness of the rule through April 30, 1984.

I. Discussion

Section 206 of PURPA amended the Federal Power Act by adding a new subsection (g) to section 202, under which the Commission is directed to require, by rule, that each public utility (1) provide prompt notice to the Commission and the appropriate state regulatory authority of any anticipated shortages of electric energy or capacity which would affect the utility's capability of serving its wholesale customers, (2) prepare and submit to the Commission and to any appropriate state regulatory authority contingency plans that would outline what circumstances might give rise to such shortages, and (3) accommodate such shortages while giving due consideration to the public health, safety, and welfare, and assuring that all persons served directly and indirectly are treated

without undue prejudice or disadvantage.

On June 15, 1979, the Commission issued, on an interim basis, 18 CFR 294.101 to implement section 206 of PURPA.[1] The Commission also issued a Notice of Inquiry requesting comments on various issues relating to the implementation of section 206 of PURPA.[2]

The Commission initially required public utilities serving firm power wholesale customers to submit a plan indicating how the utility would accommodate any shortages of electric energy or capacity affecting its firm power customers (accommodation plan), that might occur prior to September 30, 1979. 18 CFR 294.101(b)(1982). The accommodation plans were filed in 1979. The Commission currently requires all utilities to file amendments made prior to April 30, 1983, to the accommodation plans filed in 1979.

Paragraph (c) of the interim rule requires each utility to report immediately any shortage of electric energy or capacity that the utility anticipates will occur. In that report the utility must provide the Commission with certain information, including information regarding any procedures for accommodating a particular shortage, if they differ from the procedures set out in the utility's statement submitted pursuant to paragraph (b) of the interim rule.

II. Amendment to Interim Rule

Prior to this amendment, paragraph (a) defined "anticipated shortages of electric capacity or energy" as those situations which would result in shortages "anticipated to occur prior to April 30, 1983."[3] This amendment will extend the definition to cover shortages anticipated to occur prior to April 30, 1984, so that the Commission will be advised of any anticipated shortages which may occur during the coming year. Accordingly, the Commission is amending the interim rule.

Additionally, the interim rule is amended to extend to April 30, 1984, the requirement of paragraph (c) that a utility file a supplemental statement setting forth changes in the contingency plan on file with the Commission. A utility need not file a statement of its plan to accommodate shortages prior to April 30, 1984, if that plan does not vary from that set out in the statement already filed pursuant to paragraph (b).

III. Effective Date

Since the Commission is required by statute to have rules in effect regarding the continuance of electric service, good cause exists under 5 U.S.C. 553(b) to make this amendment effective on May 1, 1983, and to do so without prior notice and comment.

(Public Utility Regulatory Policies Act of 1978, Pub. L. 95-617, 92 Stat. 3117 (1978); Federal Power Act, 16 U.S.C. 792-828c (1976 & Supp. IV 1980))

List of Subjects in 18 CFR Part 294

Electric utilities, Reporting requirements.

In consideration of the foregoing, Part 294 of Chapter I, Title 18 of the Code of Federal Regulations, is amended as set forth below.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 294—[AMENDED]

§ 294.101 [Amended]

In § 294.101, paragraphs (a)(1), (a)(2), and (b)(4) are amended by removing the date "1983" each time it appears and inserting in its place, the date "1984".

[FR Doc. 83-9965 Filed 4-13-83; 8:45 am]

BILLING CODE 6717-01-M

[1] Interim Regulations, 18 CFR 294.101 (1979), Docket No. RM79-52 (issued June 15, 1979), 44 FR 37,500 (June 27, 1979).

[2] Inquiry Implementing Section 206 of the Public Utility Regulatory Policies Act of 1978, Continuance of Service, Docket No. RM79-52, (issued April 22, 1980), 45 FR 28,162 (April 28, 1980). The Commission staff is reviewing the comments received in order to determine whether there are additional appropriate means of implementing section 206 of PURPA.

[3] This date was initially September 30, 1979, but was extended to April 30, 1980, by Interim Regulations, Docket No. RM79-52 (issued Oct. 23, 1979), 44 FR 61,953 (Oct. 29, 1979). It was extended to April 30, 1981, by Amendment to Extend Interim Regulations, Docket No. RM79-52 (issued April 1, 1980), 45 FR 23,684 (April 8, 1980), to April 30, 1982, by Amendment to Extend Interim Regulations, Docket No. RM79-52 (issued April 23, 1981), 46 FR 24,550 (May 1, 1981), and to April 30, 1983, by Amendment to Extend Interim Regulations, Docket No. RM79-52 (issued May 5, 1982), 47 FR 20,296 (May 12, 1982).

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 947

Surface Mining and Reclamation Operations Under a Federal Program for Washington

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Postponement of Effective Date and Extension of Comment Period on the Interim Federal Program for Washington.

SUMMARY: The Office of Surface Mining (OSM) is announcing the postponement of the effective date and the extension of the comment period for the interim final Federal program to regulate surface coal mining and reclamation operations in the State of Washington. This action is taken in response to the comments received.

DATES: The effective date is postponed until May 13, 1983 and written comments will be accepted until 5:00 p.m. April 28, 1983, at the address below.

ADDRESSES: Written comments must be mailed to: Administrative Record Room (R & I-21), Office of Surface Mining, Wyoming Field Office, P.O. Box 1420, Mills, Wyoming 82644

or hand delivered to:

Office of Surface Mining, Wyoming Field Office, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82644

FOR FURTHER INFORMATION CONTACT: James M. Kress, Branch of Regulatory Programs, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Room 204, Washington, D.C. 20240, Telephone: (202) 343-5866.

SUPPLEMENTARY INFORMATION: On February 24, 1983, the Office of Surface Mining published an interim final Federal program for Washington in the **Federal Register** to regulate coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands in that State. 48 FR 7870, February 24, 1983. At that time, OSM announced that the effective date of the program would be April 25, 1983, and that comments would be accepted until April 14, 1983, on whether the pending revisions to OSM's permanent program rules made it necessary or desirable for OSM to modify the Washington Federal program, since the Washington Federal program cross-references those rules.

In response to public comment, OSM is now postponing the effective date of the Washington Federal program until May 13, 1983, and extending the comment period until April 28, 1983.

Because public hearings were held for the proposed Washington Federal program, none will be scheduled during this comment period. However, persons wishing to meet with OSM officials should contact the person listed above under **"FOR FURTHER INFORMATION CONTACT"** in order to schedule such a meeting.

Dated: April 11, 1983.

William B. Schmidt,

Assistant Director, Program Operations and Inspection, Office of Surface Mining.

[FR Doc. 83-9945 Filed 4-13-83; 8:45 am]

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 92

[CGD 78-079a]

St. Marys River Vessel Traffic Service

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is presently developing a final rule for St. Marys River Vessel Traffic Service (VTS). One purpose of the rulemaking is to delete several sections of the existing anchorage and navigation regulations for the St. Marys River which conflict with the Inland Navigation Rules. Because the Inland Navigation Rules came into effect on the Great Lakes on March 1, 1983 and the St. Marys River VTS regulations have yet to be issued, immediate action is required to eliminate existing conflicts. To that end, this docket has been split in two parts. This action, CGD 78-079a, removes sections of the existing anchorage and navigation regulations for the St. Marys River which conflict with the Inland Navigation Rules. A second action, CGD 78-079b, will deal with the remainder of the regulations discussed in the Notice of Proposed Rulemaking.

EFFECTIVE DATE: April 14, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Edward J. LaRue Jr., Project Manager, Office of Marine Environment and Systems, (202) 426-4958, between the hours of 8 a.m. and 4 p.m. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: On January 5, 1981, the Coast Guard published a Notice of Proposed Rulemaking for St. Marys River VTS regulations (46 FR 946). Publication of the final rule was expected to predate the effective date of the statutory Inland Navigation Rules on the Great Lakes. This would have allowed the Coast Guard to remove several sections from the existing anchorage and navigation regulations for the St. Marys River (33 CFR Part 92) before they were superseded by parts of the Inland Navigation Rules. Because some questions concerning the proposed VTS regulations (mostly in the area of communication rules) have yet to be resolved, the entire final rule is not ready for publication. Therefore, the Coast Guard is dividing the rulemaking into two parts. This action, CGD 78-079a, removes the six sections of 33 CFR Part 92 which are in conflict with the Inland Navigation Rules. It is effective immediately. A separate action, CGD 78-079b, will contain the remainder of the regulations discussed in the Notice of Proposed Rulemaking and will be published at a later date.

Discussion

Section 92.39 of Title 33, Code of Federal Regulations, is deleted because Rule 27 of the Inland Navigation Rules (33 U.S.C. 2027) prescribes the visual signals for a vessel engaged in dredging or underwater operations, when restricted in her ability to manuever.

Section 92.41 is deleted because Rule 30 (33 U.S.C. 2030) prescribes the visual signals for a vessel aground.

Section 92.43 is deleted because Rule 35 (33 U.S.C. 2035) prescribes the sound signals for a vessel aground.

Section 92.45 is deleted because Rule 34 (33 U.S.C. 2034) prescribes the signals for vessels nearing a bend.

Section 92.63 is delete because Rules 9, 13, and 34 (33 U.S.C. 2009, 2013, 2034) prescribe the requirements for narrow channels, overtaking, and sound signals for overtaking, respectively.

Section 92.81 is deleted because Rule 18 (33 U.S.C. 2018) outlines responsibilities between vessels.

The deletion of the above sections was discussed in the Notice of Proposed Rulemaking. Although several comments were received, none addressed any of the six sections to be deleted. Recently, however, the Coast Guard received inquiries about whether the above sections, or the Inland Navigation Rules which conflict with those sections, take precedence. In order to avoid confusion, the Coast Guard is deleting the conflicting regulations immediately, before the navigation season is in full swing.

Regulatory Evaluation

This action has been reviewed under the provisions of Executive Order 12291 and under DOT Order 2100.5, dated May 5, 1980, and has been determined to be non-major and non-significant. This document deletes several sections of regulations which have been superseded by statute. No additional requirements are imposed on the public as a result of this rulemaking. For these reasons, in accordance with section 605(b) of the Regulatory Flexibility Act [94 Stat. 1164], it is certified that this rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 92

Anchorage grounds, Navigation (water), Waterways.

PART 92—[AMENDED]

In consideration of the foregoing, Part 92 of Title 33 of the Code of Federal Regulations is amended as follows:

§§ 92.39, 92.41, 92.43, 92.45, 92.63 and 92.81 [Removed]

1. Sections 92.39, 92.41, 92.43, 92.45, 92.63, and 92.81 are removed.

(Secs. 1-3, 29 Stat. 54-55, as amended. sec. 6 (b)(1), 80 Stat. 937; 33 U.S.C. 474, 49 U.S.C. 1655(b)(1); 49 CFR 1.46(b))

Dated: March 30, 1983.

B. F. Hollingsworth,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

[FR Doc. 83-9955 Filed 4-13-83; 8:45 a.m.]

BILLING CODE 4910-14-M

46 CFR Part 150

[CGD 82-100a]

Compatibility of Cargoes; Consolidation of Requirements

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: 46 CFR Part 150 contains requirements for compatible stowage of bulk liquid hazardous materials on tank vessels. This final rule updates the Compatibility of Cargoes Table found in Part 150 by adding additional cargoes approved for carriage since the final rule was published on October 23, 1980 (45 FR 70262).

EFFECTIVE DATE: April 14, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph J. Jakabcin, Telephone 202-426-6262.

SUPPLEMENTARY INFORMATION: On November 15, 1982 (47 FR 51427), the Coast Guard published a notice of proposed rule-making. Interested persons were given a deadline of December 30, 1982 for submission of written comments. A public hearing was to be scheduled if requested by anyone raising a genuine issue. No request for a public hearing has been received. However, comments received called attention to several commodities which had been approved for bulk carriage but were not included in the notice of proposed rule-making. These commodities will be included in a forthcoming notice of proposed rule-making. It should be noted that the compatibility chart, its authorized exceptions and companion tables, listing chemicals alphabetically and by group,

will be updated periodically as the Coast Guard approves new chemical cargoes for carriage.

The addition of commodities to the table in Part 150 neither authorizes nor prohibits the carriage of a particular cargo. Authorized cargoes are listed in 46 CFR 151.01–10. The regulations in Part 150 simply identify those cargoes which are not compatible and prescribe minimum standards for keeping incompatible cargoes separated while being carried. Thus the rules in this part have only minimal economic impact.

Several changes are made to correct typographical errors of no substantive effect.

Regulatory Evaluation

These regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be a major rule. In addition, these regulations are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification Analysis and Review of Regulations (DOT Order 2100.5 of 5–22–80). For the reasons set forth above, these rules have only a minimal impact; therefore, a full regulatory evaluation has not been prepared.

Regulatory Flexibility Evaluation

These regulations primarily involve tankbarge fleets owned and operated by major corporations. Accordingly, it is certified that under the Regulatory Flexibility Act this rule will not, if promulgated, have a substantial economic impact on a significant number of small entities.

List of Subjects in 46 CFR Part 150

Hazardous materials transportation.

Accordingly, Part 150 of Title 46 of the Code of Federal Regulations is amended as follows:

PART 150—COMPATIBILITY OF CARGOES

1. By adding the following in alphabetical order in Table I:

Acetophenone....18
Acetyl Tibutyl Citrate....34
Acrylamide Solution....10
Alcohols (Mixed)....20
Alkyl Phthalates (n-)....34
(2-Aminoethoxy) Ethanol, 2-....8
Ammonium Polyphosphate....43
Ammonium Sulfate Solution (20% or less)....43
Behenyl Alcohol....20
Butyl Heptyl Ketone (iso-)....18
Butyl Methacrylate, Decyl Methacrylate, Cetyl Eicosyl Methacrylate Mixture....14
Calcium Bromide Solution....43
Calcium Chloride Solutions....43
Carbon Black Base....33
Cashew Nut Shell Oil (untreated)....4
Chloronitrobenzene, 2-See Nitrochlorobenzene, ortho-
Chlorotoluene (m-, o-, p-)....36
Choline Chloride Solutions....20
Cresylic Acid....21
Cyclopentadiene Polymers....30
Cyclopentadiene, Styrene, Benzene Mixture....30
Diammonium Salt of Zinc Ethylene Diamine Tetraacetic Acid Solution....43
Dichloroisopropyl Ether....36
Dichlorophenol, 2,4-....21
Dichloropropane/1,3-Dichloropropene Mixture....15
Dichloropropionic Acid, 2,2-....4
Diethyl Sulfate....34
Diethylene Glycol Monophenyl Ether....40
Diglycidyl Ether of Bisphenol A....41
Diisononyl Phthalate....34
Diisooctyl Phthalate....34
Diisopropyl Benzene....32
Diisopropyl Napthalene....32
Dimethyl Acetamide....10
Dimethylcyclohexylamine....7
Dimethyloctanoic Acid, 2,2-....4
Dimethyl Phthalate....34
Dimethyl Polysiloxane....34
Dimethylpropane-1-3-Diol, 2,2-....20
Dipentene....30
Dipropylamine....7
Dipropylene Glycol Dibenzoate....34
Dodecylamine, Tetradsecylamine Mixture....7
Dodecyl Diphenyl Oxide Disulfonate Solution....43
Dodecyl Pentadecyl Methacrylate....14
Epoxy Resin....18
Ethyl-6-Methyl-n-(1-Methyl-2-Methoxy Ethyl) Aniline,2-....9
Ethylbutylamine(n-)....7
Ethylene Glycol Monoisopropyl Ether....40
Ethylene Glycol Phenyl Ether....40
Ethylidene Norbornene....30
Ethyl Hexylamine....7
Ethylhexioc Acid, 2-....4
Fatty Acid Amides....33
Formaldehyde, Methanol Mixtures....19
Glutaraldehyde Solution....19
Glyceryl Triacetate....34
Glycidyl Ester of Versatic Acid....34
Glycols, Resins, and Solvents Mixture....33
Heptanoic Acid(n-)....4
Heptene, 1....30
Herbicide ($C_{13}H_{20}NO_2Cl$)....33
Hydrofluorosilicic Acid....1
Kaolin Clay Slurry....43
Lignin Liquor (Calcium Ligno-Sulfonate, Water Solution)....43
Magnesium Nonyl Phenol Sulfide....33
Maleic Anhydride....11
Maleic Anhydride Copolymer....33
Methacrylic Acid....4
Methoxy Triglycol....40
Methyl Acetoacetate....34
Methylamine Solutions....7
Methyl iso-Amyl Ketone....18
Methyl-6-Ethyl Aniline, 2-....9
Methyl Heptyl Ketone....18
Methyl-2-Hydroxy-3-Butyne, 2-....20
Methyl Naphthalene....32
Methylolureas (20% Free Formaldehyde)....19
Methyl Pyridine, 2....9
Methyl Pyridine,3....9
Methyl Pyrrolidone (N-)....9
Methyl tert-Butyl Ether....41
Molassas....20
Naphtha, Cracking Fraction....33
Napthenic Acid....4
Nitrochlorobenzene, ortho-....42
Nonyl Phenol Sulfide....33
Octadecene-1....30
Octadecenoamide (Oleamide)....10
Oils, Aliphatic....33
Oils, Oiticia....34
Oils, Seal....34

Oils, Tung....34
Oils, White (Mineral)....33
Oils, Edible, Babassu....34
Oils, Edible, Coconut, Methyl Ester....34
Oils, Edible, Corn....34
Oils, Edible, Cotton Seed Fatty Acid....34
Oils, Edible, Rapeseed....34
Oils, Edible, Rice Bran....34
Oils, Edible, Soybean (epoxidized)....40
Oils, Edible, Sunflower Seed....34
Oleic Acid....4
Pentenenitrile (crude), 3-....37
Pentadiene, 1,3-....30
Pinene....30
Polyethylene Polyamines....7
Polyvinylbenzyltrimethyl Ammonium Chloride Solution....43
Pseudocumene (1,2,4-Trimethylbenzene)....32
Propionitrile....37
Rum....20
Sewage Sludge....43
Sodium Borohydride Solution (15% or less)/Sodium Hydroxide Solution....5
Sodium Carbonate Solutions....5
Sodium Cyanide Solution (30% or less)....5
Sodium Dimethyl Naphthalene Sulfonate, Aq. Solution....34
Sodium Hypochlorite Solution (15% or less)....5
Sodium Polyacrylate Solution....43
Sodium Silicate Solution....43
Stearic Acid....4
Tall Oil, Fatty Acid....34
Tallow Fatty Acid....34
Tallow Nitrile....37
Toluenediamine....9
Toluidine (ortho-)....9
Triarylphosphate....34
Tributyl Phosphate....34
Trichloroethane, 1,1,1-....36
Trichloro-1-2-2-Trifluoroethane, 1,1,2-....36
Tridecane....34
Triethylene Glycol Butyl Ether Mixture....40
Triethylene Glycol Ether Mixture....40
Triethyl Phosphate....34
Triisooctyl Trimellitate....34
Trimethyl Benzene, 1,2,4....32
Trimethyl Pentanediol-1-3-Diisobutyrate, 2,2,4-....34
Trimethyl-3-Pentanol-1-Isobutyrate, 2,2,4-....34
Tripropylene....30
Vinyl Acetate, Fumarate Copolymer....34
Vinyl Neodecanate....13
Zinc Bromide, Calcium Bromide Solution....43

2. In footnote 1, immediately following Table I, by changing G–MHM–3/TP to G–MTH–3

3. By adding the following entries in alphabetical order, under the headings indicated, in Table II:

1. *Non-Oxidizing Mineral Acids:*
Hydrofluorosilicic Acid
4. *Organic Acids:*
Cashew Nut Shell Oil (untreated)
Dichloropropionic Acid, 2,2-
Dimethyloctanoic Acid, 2,2-
Ethylhexoic Acid, 2-
Heptanoic Acid (n-)
Methacrylic Acid
Napthenic Acid
Oleic Acid
Stearic Acid
5. *Caustics:*
Sodium Borohydride Solution (15% or less)/
Sodium Hydroxide Solution
Sodium Carbonate Solutions
Sodium Cyanide Solution (30% or less)
Sodium Hypochlorite Solution (15% or less)
7. *Aliphatic Amines:*
Dimethylcyclohexylamine
Dipropylamine
Dodecylamine, Tetradecylamine Mixture
Ethylbutylamine (n-)
Ethyl Hexylamine
Methylamine Solutions
Polyethylene Polyamines
8. *Alkanolamines:* (2-Aminoethoxy) Ethanol, 2-
9. *Aromatic Amines:*
Ethyl-6-Methyl-n-(1-Methyl-2-Methoxy Ethyl) Aniline, 2-
Methyl-6-Ethyl Aniline, 2-
Methyl Pyridine, 2
Methyl Pyridine, 3
Methyl Pyrrolidone (N-)
Toluenediamine
Toluidine (ortho-)
10. *Amides:*
Acrylamide Solution
Dimethyl Acetamide
Octadecenoamide (Oleamide)
11. *Organic Anhydrides:* Maleic Anhydride
13. *Vinyl Acetate:* Vinyl Neodecanate
14. *Acrylates:*
Butyl Methacrylate, Decyl Methacrylate, Cetyl Eicosyl Methacrylate Mixture
Dodecyl Pentadecyl Methacrylate
15. *Substituted Allyls:* Dichloropropane/1,3-Dichloropropene Mixture
18. *Ketones:*
Acetophenone
Butyl Heptyl Ketone (iso-)
Epoxy Resin
Methyl iso-Amyl Ketone
Methyl Heptyl Ketone
19. *Aledhydes:*
Formaldehyde, Methanol Mixtures
Glutaraldehyde Solution
Methylorlureas (20% free Formaldehyde)
20. *Alcohols, Glycols:*
Alcohols (Mixed)
Behenyl Alcohol
Choline Chloride Solutions
Dimethylpropane-1-3-Diol, 2,2-
Methyl-2-Hydroxy-3-Butyne, 2-
Molassas
Rum
21. *Phenols and Cresols:*
Cresylic Acid
Dichlorophenol, 2,4-
30. *Olefins:*
Cyclopentadiene Polymers
Cyclopentadiene, Styrene, Benzene Mixture
Dipentene
Ethylidene Norbornene
Heptene, 1-
Octadecene-1
Pentadiene, 1,3-
Pinene
Tripropylene
32. *Aromatic Hydrocarbons:*
Diisopropyl Benzene
Diisopropyl Napthalene
Methyl Naphthalene
Pseudocumene (1,2,4-Trimethylbenzene)
Trimethyl Benzene, 1,2,4-
33. *Misc. Hydrocarbon Mixtures:*
Carbon Black Base
Fatty Acid Amides
Glycols, Resins, and Solvents Mixture
Herbicide ($C_{15}H_{22}NO_2C1$)
Magnesium Nonyl Phenol Sulfide
Maleic Anhydride Copolymer
Naphtha, Cracking Fraction
Nonyl Phenol Sulfide
Oils, Aliphatic
Oils, White (Mineral)
34. *Esters:*
Acetyl Tributyl Citrate
Alkyl Phthalates (n-)
Diethyl Sulfate
Diisononyl Phthalate
Diisooctyl Phthalate
Dimethyl Phthalate
Dimethyl Polysiloxane
Dipropylene Glycol Dibenzoate
Glyceryl Triacetate
Glycidyl Ester of Varsatic Acid
Methyl Acetoacetate
Oils, Oiticia
Oils, Seal
Oils, Soapstock
Oils, Tung
Oils, Edible, Babassu
Oils, Edible, Coconut, Methyl Ester
Oils, Edible, Corn
Oils, Edible, Cotton Seed Fatty Acid
Oils, Edible, Rapeseed
Oils, Edible, Rice Bran
Oils, Edible, Sunflower Seed
Sodium Dimethyl Naphthalene Sulfonate, Aq. Solution
Tall Oil, Fatty Acid
Tallow Fatty Acid
Triarylphosphate
Tributyl Phosphate
Tridecane
Triethyl Phosphate
Trilsooctyl Trimellitate
Trimethyl Pentanediol-1-3-Diisobutyrate, 2,2,4-
Trimethyl-3-Pertanol-1-Isobutyrate, 2,2,4-
Vinyl Acetate, Fumarate Copolymer
36. *Halogenated Hydrocarbons:*
Chlorotoluene (m-, o-, p-)
Dichloroisopropyl Ether
Trichloroethane, 1,1,1-
Trichloro-1-2-2-Trifluoroethane, 1,1,2-
37. *Nitriles:*
Pentenenitrile (crude), 3-
Propionitrile
Tallow Nitrile
40. *Glycol Ethers:*
Diethylene Glycol Monophenyl Ether
Ethylene Glycol Monoisopropyl Ether
Ethylene Glycol Phenyl Ether
Methoxy Triglycol
Oils, Edible, Soybean (epoxidized)
Triethylene Glycol Butyl Ether Mixture
Triethylene Glycol Ether Mixture
41. *Ethers:*
Diglycidyl Ether of Bisphenol A
Methyl tert-Butyl Ether
42. *Nitrocompounds:* Nitrochlorobenzene, ortho-
43. *Miscellaneous Water Solutions*
Ammonium Polyphosphate
Ammonium Sulfate Solution (20% or less)
Calcium Bromide Solution
Calcium Chloride Solutions
Diammonium Salt of Zinc Ethylene Diamine Tetraacetic Acid Solution
Dodecyl Diphenyl Oxide Disulfonate Solution
Kaolin Clay Slurry
Lignin Liquor (Calcium Ligno-Sulfonate, Water Solution)
Polyvinylbenzyltrimethyl Ammonium Chloride Solution
Sewage Sludge
Sodium Polyacrylate Solution
Sodium Silicate Solution
Zinc Bromide, Calcium Bromide Solution

FM Broadcast Stations in Farmington, New Mexico; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action assigns a third FM channel to Farmington, New Mexico, in response to a petition filed by San Juan Broadcasting Corp.

DATE: Effective June 6, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634–6530.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Report and Order (Proceeding Terminated)

In the matter of; amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Farmington, New Mexico), BC Docket

No. 82-718, RM-4182.

Adopted: March 23, 1983.

Released: April 6, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers the Notice of Proposed Rule Making, 47 FR 49420, published November 1, 1982, proposing to assign Channel 271 to Farmington, New Mexico, as its third FM assignment. The Notice was issued in response to a petition filed by San Juan Broadcasting Corporation [1] ("petitioner"). Petitioner filed comments in support of the proposal. No oppositions were received.

2. We are satisfied that the public interest would be served by the proposed assignment, which could provide Farmington with its third FM service. The channel can by assigned in compliance with the minimum distance separation requirements.

3. Accordingly, pursuant to the authority contained in §§ 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is ordered, That effective June 6, 1983, the FM Table of Assignments, § 73.202(b) of the Rules, is amended with respect to the following community.

City	Channel No.
Farmington, New Mexico	225, 245, and 271.

4. *It is further ordered,* That this proceeding is *terminated.*

5. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530.

[1] San Juan Broadcasting Corporation is the licensee of Station KKBK(AM), Aztec, New Mexico.

In the Matter of; Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Winters, Texas) BC Docket 82-717, RM-4185.

1. The Commission has under consideration the *Notice of Proposed Rule Making,* 47 FR 49423, published November 1, 1982, proposing the assignment of Channel 240A to Winters, Texas, as its first FM assignment. The *Notice* was issued in response to a petition filed by Soho Broadcasting ("petitioner"). Supporting comments were filed by the petitioner, restating its interest in the channel.

2. In view of the fact that the proposed assignment could provide a first FM station at Winters, Texas, the Commission believes that the public interest would be served by assigning Channel 240A to that community. The channel can be assigned in compliance with the minimum distance separation requirements. Mexican concurrence has been obtained in the assignment of Channel 240A at Winters, Texas.

3. Accordingly, pursuant to the authority contained in §§ 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is ordered,* That effective June 6, 1983, the FM Table of Assignments, § 73.202(b) of the Rules, is amended with respect to the following community:

City	Channel No.
Winters, Texas	240A

4. *It is further ordered,* That this proceeding *is terminated.*

5. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

BILLING CODE 6712-01-M

Proposed Rules

Federal Register
Vol. 48, No. 73
Thursday, April 14, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 81-ANE-16]

Airworthiness Directives; General Electric Company CF6-45 and CF6-50 Series Model Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes a new Airworthiness Directive (AD) which would require the replacement of certain titanium high pressure compressor (HPC) parts found on CF6-45 and CF6-50 series engines. High vibration, mechanical failures of HPC blades, or rotor unbalance, causing severe rubbing of titanium HPC components has resulted in engine fires.

DATES: Comments on the proposed rule must be received on or before May 28, 1983. Proposed effective date July 28, 1983.

ADDRESS: Send comments on the proposed rule in duplicate to the Federal Aviation Administration, Office of the Regional Counsel, New England Region, Attn: Rules Docket No. 81-ANE-16, 12 New England Executive Park, Burlington, Massachusetts 01803.

The applicable service bulletins and Commercial Engine Service Memorandums may be obtained from General Electric Company, Neumann Way, Cincinnati, Ohio 45215.

Copies of the service bulletins and Commercial Engine Service Memorandums are contained in the above Rules Docket.

FOR FURTHER INFORMATION CONTACT: Arthur W. Nelson, Transport Engine Section, ANE-141, Engine Certification Branch, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273-7347.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Information on the economic, environmental, and energy impact that might result because of adoption of the proposed rule is requested. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons and may be examined weekdays, except Federal holidays, between 8:00 a.m. and 4:30 p.m. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Prior Regulatory History

A proposal to amend Part 39 of the Federal Aviation Regulations (14 CFR Part 39) by adding a new AD applicable to General Electric Company CF6-45 and CF6-50 series model turbofan engines was published in the **Federal Register** on October 5, 1981 (46 FR 48941). A minor correction to the proposed AD was published in the **Federal Register** on November 9, 1981 (46 FR 55273). There had been 33 titanium fires in CF6-50 engines. Testing and analysis have shown that the substitution of steel HPC components for titanium in critical areas has eliminated titanium fires. It was the intent of the proposed AD to require the replacement of the titanium forward HPC case, the inlet and first and second stage vanes, and the stages 6-9 blades with steel parts. Configuration changes were also simultaneously required on the titanium 3-9 spool and stages 3-5 blades.

Interested persons were invited to participate in this rulemaking by submitting written comments on the proposal to the FAA. Five comments were received in response to the Notice of Proposed Rulemaking (NPRM). Two commentators noted the error in the initial publication of the NPRM in paragraph (c) where Service Bulletin 72-550 was inadvertently referenced rather than 72-551. This was corrected in the November 9, 1981, publication of the **Federal Register.** One commentator also noted that the General Electric Service Bulletins which were referenced specified revision numbers and corresponding dates. It was indicated that these revisions did not substantially alter the technical content of the bulletins and that engines which were upgraded in accordance with earlier revisions were in agreement with the requirements.

Two commentators also pointed out that the listing of specific part numbers in the AD would be unduly restrictive since all of the alternate part numbers were not included. It was also noted that in some cases part numbers are not tracked, and it would require disassembling an upgraded engine to prove compliance. Control is adequately maintained by recording the accomplishment of the service bulletin.

The FAA has reviewed the service bulletin revisions and agrees that the technical content has not changed to date. It is also agreed that adequate control of compliance is achieved by verifying accomplishment of the bulletins without listing all of the part changes. Accordingly, this NPRM references only the numbers of the approved service bulletins.

One commentator, while disputing the need for an AD, also pointed out that the majority of the titanium fires were caused by component failures within the HPC. This is correct, and that cause has been added to the list in the summary section of this NPRM. As to the requirement for an AD, it has been determined that this is an uncontained failure of the engine, and despite the fact that no secondary nacelle fires have resulted, there is a high risk of one if flammable fluids were present for any reason. Therefore, mandatory compliance with the engine upgrade program is deemed to be necessary.

Three commentators stated that the compliance date of December 31, 1982, would be difficult to achieve for some operators without excessive expense, based on the present plans for kit deliveries and scheduled engine

removals during 1982. A date of December 31, 1983, was recommended. The FAA notes that the airline industry has voluntarily retrofitted more than 97% of the applicable engines to the steel compressor configuration described by the General Electric Service Bulletins. The FAA has determined that AD action is necessary to ensure that the remaining engines are retrofitted. In consideration of the above, the compliance date has been revised to the requested December 31, 1983.

The FAA has given careful consideration to the comments which were received and has determined that sufficient evidence exists in the public interest of aviation safety to continue rulemaking action. Because of the time interval since the issuance of the orginal NPRM and because of the adjusted compliance date proposed, the FAA has decided to again issue an NPRM on the proposed rule.

Approximately 25 engines are affected by this AD, and the cost impact is estimated to be $11,500,000. For this reason, the proposed rule is not considered to be major under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act would be affected, since the rule affects only operators of B747, DC-10, and A300 aircraft in which the CF6-45, -50 engines are installed, none of which are believed to be small entities.

List of Subject in 14 CFR Part 39

Engine, Aircraft, Aviation safety.

The Proposed Amendment

Accordingly, the FAA proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new AD:

General Electric Company: Applies to CF6-45 and CF6-50 series model turbofan engines. Compliance is required prior to December 31, 1983 (unless already accomplished). To prevent the possibility of uncontained titanium fires, accomplish the following:

(a) Replace compressor stator assembly including the compressor case and stage 6 stator vanes in acordance with FAA approved General Electric CF6 and CF6-50 Service Bulletin 72-549.

(b) Replace compressor inlet stator vanes and stage 1 and 2 stator vanes in accordance with FAA approved General Electric CF6-45 and CF6-50 Service Bulletin 72-550.

(c) Replace compressor blades, stages 3 through 9, and the stage 3-9 spool in accordance with FAA approved General Electric CF6-45 and CF6-50 Service Bulletin 72-551.

Note.—The FAA has requested Federal Register approval to incorporate by reference Service Bulletins 72-549, 72-550, and 72-551.

The manufacturer's specifications and procedures identified and described in this notice may be obtained upon request to General Electric Company, Neumann Way, Cincinnati, Ohio 45215. These documents may also be examined at the FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts. A historical file on this AD is maintained by the FAA, New England Region Office, Burlington, Massachusetts.

Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Manager, Aircraft Certification Division, FAA, New England Region, may adjust the compliance date specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C 1655(c)); 14 CFR 11.85)

Note.—Based upon an assessment of the economic impact of this proposed AD, as discussed more fully in the section entitled "**SUPPLEMENTARY INFORMATION**", I certify that this action (1) is not a "Major Rule" under Executive Order 12291; (2) is not a "Significant Rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the evaluation for this action is contained in the Regulatory Docket. A copy of it may be obtained by contacting the person identified under caption "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Burlington, Massachusetts, on March 18, 1983.

Robert E. Whittington,

Director, New England Region.

14 CFR Part 71

[Airspace Docket No. 83-ASO-17]

Proposed Alteration of Transition Area, Beaufort, South Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to increase the size of the Beaufort, South Carolina, transition area to accommodate Instrument Flight Rule (IRF) operations at Beaufort County Airport. This action will lower the base of the additional controlled airspace from 1,200 to 700 feet above the surface. An Instrument approach procedure, based on the Beaufort Airport Surveillance Radar system, is being developed to serve the airport and the additional controlled airspace is required for protection of IFR aeronautical activities.

DATES: Comments must be received on or before: May 15, 1983.

ADDRESSES: Send comments on the proposal in triplicate to:

Federal Aviation Administration, Attn: Manager, Airspace and Procedures Branch, ASO-530, P.O. Box 20636, Atlanta Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parites are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No.——." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal

Aviation Administration, Manager, Airspace and Procedures Branch (ASO–530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Beaufort, South Carolina, transition area. This action will provide controlled airspace for aircraft executing a new instrument approach procedure to Beaufort County Airport. If the proposed alteration of the transition area is found acceptable, the operating status of the airport will be changed from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition area.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Beaufort MCAS, SC—Revised

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Beaufort MCAS (Lat. 32°28'53" N., Long. 80°43'10" W.); within 5 miles each side of Beaufort TACAN 037° radial extending from the 8.5-mile radius area to 9 miles northeast of the TACAN; within a 6-mile radius of Beaufort County Airport (Lat. 32°24'45" N., Long. 80°38'00" W.), excluding that portion that coincides with the Hilton Head transition area.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, March 28, 1983.

George R. LaCaille,

Acting Director, Southern Region.

[Airspace Docket No. 83–ASO–13]

Proposed Alteration of Transition Area, Liberty, North Carolina

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to increase the size of the Liberty, North Carolina, transition area to accommodate Instrument Flight Rule (IFR) operations at May Airport. This action will lower the base of the additional controlled airspace from 1,200 to 700 feet above the surface. An instrument approach procedure, based on the Liberty VORTAC facility, is being developed to serve the airport and additional controlled airspace is required for protection of IFR operations.

DATES: Comments must be received on or before: May 10, 1983.

ADDRESSES: Send comments on the proposal in triplicate to:

Federal Aviation Administration, Attn: Manager, Airspace and Procedures Branch, ASO–530, P.O. Box 20636, Atlanta, Georgia 30320

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763–7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. ——." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO–530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Liberty, North Carolina, transition area. This action will provide controlled airspace for aircraft executing a new instrument approach procedure to May Airport. If the proposed alteration of the transition area is found acceptable, the operating status of the airport will be changed from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition area.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Liberty, NC—Amended

By adding after the words "the VOR" the following: "; within a 6-mile radius of May Airport (Lat. 35°59'55" N., Long. 79°41'20" W.)."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Airspace Docket No. 83-AWA-4]

Correction to VOR Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to Notice of Proposed Rulemaking

SUMMARY: This action corrects the descriptions of V-72 and V-447 as published in the **Federal Register** on March 17, 1983, by terminating Federal Airway V-72 at Lebanon, NH, and realigning V-447 to include Cambridge, NY, in the description.

DATE: Comments must be received on or before May 2, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, New England Region, Attention: Manager, Air Traffic Division, Docket No. 83-AWA-4, Federal Aviation Administration, 12 New England Executive Park, Burlington, MA 01803.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 83-6535 (83-AWA-4), published on March 17, 1983, proposed to realign several airways in the vicinity of Montpelier, VT, because the Montpelier VORTAC will be relocated. However, VOR Federal Airways V-72 and V-447 were not described correctly and this action corrects these mistakes.

Availability Of NPRM's

Any person may obtain a copy of this Correction to Notice of Proposed Rulemaking (NPRM) by submitting a request to the Fedral Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this Correction. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

VOR airways.

Correction to The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, **Federal Register** Document 83-6535, as published in the **Federal Register** on March 17, 1983, (48 FR 11285) is corrected by deleting the paragraphs under V-72 and V-447 and substituting the following:

V-72 [Amended].

By deleting all the words after "Lebanon, NH."

V-447 [Amended].

By deleting the words "From Cambridge, NY, Montpelier, VT; INT Montpelier 020° and Sherbrooke, PQ, Canada. 217° radials; Sherbrooke." and substituting the words "From Cambridge, NY, via INT Cambridge 025°T(039°M) and Montpelier 221°T(236°M) radials; Montpelier; to Sherbrooke, PQ, Canada."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on April 6, 1983.

14 CFR Part 71

[Airspace Docket No. 82-AWP-21]

Proposed Alteration of VOR Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposal would realign VOR Federal Airway V-460 from Poggi, CA, to Julian, CA, via an east dogleg. The realignment would give additional flexibility to controllers for maneuvering traffic proceeding inbound from the north into the San Diego, CA, and Miramar, CA, airport terminal areas. This action would improve traffic flow, reduce delays, and increase safety.

DATE: Comments must be received on or before May 30, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Western-Pacific Region, Attention: Manager, Air Traffic Division, Docket No. 82-AWP-21, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, CA 90009.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is

located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffice Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82-AWP-21." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to realign V-460 from Poggi, CA, to Julian, CA, via an east dogleg. This realignment will allow controllers to route some departure/arrival aircraft via an east bypass route thereby avoiding excessive crossing traffic in the San Diego, CA, and Miramar NAS, CA, terminal areas. This action would improve traffic flow, increase safety, and reduce controller workload. Section 71.123 of part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

VOR Federal airways.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

V-460 [Revised]

From Poggi, CA via Mission Bay, CA; INT Mission Bay 090°T(076°M) and Julian, CA, 184°T(170°M) radials; Julian; to Blythe, CA.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" and DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant perparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgatyed, will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on April 7, 1983.

John W. Baier,

Acting Manager, Airspace—Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 83-ASW-15]

Proposed Alteration of Transition Area and Control Zone: San Angelo, TX.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Aviation Administration proposes to alter the transition area and control zone at San Angelo, TX. The intended effect of the proposed action is to provide adequate controlled airspace for aircraft executing standard instrument approach procedures (SIAP's) to Mathis Field. This action is necessary since a review of the designated controlled airspace revealed that the airspace is not properly described and the extensions southwest of the airport are not required.

DATES: Comments must be received on or before May 16, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8 a.m. and 4:30 p.m. The FAA Rules Docket is located in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch, ASW-535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101; telephone: (817) 877-2630.

SUPPLEMENTARY INFORMATION:

History

Federal Aviation Regulation Part 71, Subpart G § 71.181 and Subpart F § 71.171 as republished in Advisory Circular AC 70-3A dated January 3, 1983, contains the description of transition areas and control zones designated to provide controlled airspace for the benefit of aircraft conducting instrument flight rules (IFR) activity. Alteration of the transition area and control zone at San Angelo, TX, will necessitate an amendment to these subparts. This amendment will be required at San Angelo, TX, since a review of the airspace revealed that some additional airspace is needed to the northeast, and transition area and

control zone extensions southwest of the airport can be eliminated for the protection of aircraft executing SIAP's.

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. (Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals.) Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–ASW–15." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, or by calling (817) 877–2630. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should contact the office listed above.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas, Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend §§ 71.181 and 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Subpart F § 71.171

San Angelo, TX [Revised]

Within a 5.5-mile radius of Mathis Field (latitude 31°21'30" N, longitude 100°29'45" W.) and within 2 miles each side of the San Angelo VORTAC 065° radial extending from the 5.5-mile radius area to 8 miles northeast of the VORTAC; and within 2 miles each side of the San Angelo ILS localizer northeast course extending from the 5.5-mile radius area to 8 miles northeast of the San Angelo VORTAC 314° radial.

Subpart G § 71.181

San Angelo, TX [Revised]

That airspace extending upward from 700 feet above the surface within an 8-mile radius of Mathis Field (latitude 31°21'30" N., longitude 100°29'45" W.), and within 2 miles each side of the San Angelo VORTAC 065° radial extending from the 8-mile radius area to 10.5 miles northeast of the VORTAC; and within 2 miles each side of the San Angelo ILS localizer northeast course extending from the 8-mlie radius area to 10.5 miles northeast of the San Angelo VORTAC 314° radial.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Airspace Docket No. 83–ASW–14]

Alteration of Transition Area and Control Zone: Texarkana, AR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Aviation Administration proposes to alter the transition area and control zone at Texarkana, AR. The intended effect of the proposed action is to provide adequate controlled airspace for aircraft executing standard instrument approach procedures (SIAP's) to the Texarkana Muni-Webb Field. This action is necessary since a review of the designated controlled airspace indicates that the transition area should be increased for large aircraft and the control zone does not require the extension to the VORTAC.

DATES: Comments must be received on or before May 16, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8 a.m. and 4:30 p.m. The FAA Rules Docket is located in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stepenson, Airspace and Procedures Branch, ASW–535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101; telephone: (817) 877–2630.

SUPPLEMENTARY INFORMATION:

History

Federal Aviation Regulation Part 71, Subpart G 71.181 and F 71.171 as republished in Advisory Circular AC 70–3A dated January 3, 1983, contains the description of transition areas and control zones designated to provide controlled airspace for the benefit of aircraft conducting instrument flight rules (IFR) activity. Alteration of the transition area and control zone at Texarkana, AR, will ncessitate an amendment to these subparts. This amendment will be required at Texarkana, AR, since a review of the designated controlled airspace indicates the transition area needs to be enlarged and the control zone does not require the extension to the northwest.

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. (Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals.)

Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their coments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–ASW–14." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedaures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, or by calling (817) 877–2630, Communications must identify the notice number of this NPRM. Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend §§ 71.181 and 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Subpart F 71.171

Texarkana, AR Revised

Within a 5-mile radius of the Texarkana Muni-Webb Field (latitude 33°27'13"N., longitude 93°59'27"W.). This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective dates and times will thereafter be continuously published in the Airport/Facility Directory.

Subpart G 71.181

Texarkana, AR Revised

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of the Texarkana Muni-Webb Field (latitude 33°27'13"N., longitude 93°59'27"W.).

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that wil only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on April 4, 1983.

14 CFR Part 71

[Airspace Docket No. 83–ASW–20]

Designation of Transition Area; El Reno, OK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Aviation Administration proposes to designate a transition area at El Reno, OK. The intended effect of the proposed action is to provide controlled airspace for aircraft executing a new instrument approach procedure to the Mustang Field Airport. This action is necessary since a new NDB and associated instrument approach procedure are being established at El Reno, OK. Coincident with this action, the airport will be changed from visual flight rules (VFR) to instrument flight rules (IFR).

DATES: Comments must be received on or before May 16, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8 a.m. and 4:30 p.m. The FAA Rules Docket is located in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch, ASW–535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101; telephone: (817) 877–2630.

SUPPLEMENTARY INFORMATION:

History

Federal Aviation Regulation Part 71, Subpart G 71.181 as republished in Advisory Circular AC 70–3A dated January 3, 1983, contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting instrument flight rules (IFR) activity. Designation of the Transition area at El Reno, OK, will necessitate an amendment to this subpart. This amendment will be required at El Reno, OK, since there is a proposed new IFR procedure to the Mustang Field Airport.

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. (Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals.) Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–ASW–20." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, or by calling (817) 877-2630. Communications must identify the notice number of this NPRM. Control zones and/or transition areas, Aviation safety.

Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.161 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

El Reno, OK New

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Mustang Field Airport (latitude 35°28'17" N., longitude 98°00'31" W.) and within 3 miles each side of the 169° bearing from the El Reno NDB (latitude 35°28'43" N., longitude 98°00'31" W.) extending from the 6.5-mile radius area to 8.5 miles south of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Exective Order 12291; (2) is not a "significant rule" under DOT Regulatory policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on April 5, 1983.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM82-32-000]

Limitation on Incentive Prices for High-Cost Gas to Commodity Values; Public Hearing

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of Public Hearing.

SUMMARY: On February 10, 1983, the Federal Energy Regulatory Commission issued a Notice of Proposed Rulemaking (48 FR 7469, February 22, 1983) proposing to modify the maximum lawful price of high-cost gas designated by the Commission under section 107(c)(5) of the Natural Gas Policy Act of 1978 (NGPA), to ensure that the ceiling prices do not go above the commodity value of gas. Pursuant to requests from interested persons, a public hearing will be held.

DATE: The public hearing will be held on Monday, May 16, 1983 at 10:00 a.m. Requests to participate and the amount of time requested should be directed to the Secretary no later than May 6, 1983.

ADDRESSES: The hearing will be held at: Hearing Room A, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

Requests to participate and questions regarding participation should be directed to: The Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Fred A Wolgel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, (202) 357-8033.

SUPPLEMENTARY INFORMATION: On February 10, 1983, the Commission issued a Notice of Proposed Rulemaking (48 FR 7,469, February 22, 1983) proposing to modify the maximum lawful price of high-cost gas designated by the commission under section 107(c)(5) of the Natural Gas Policy Act of 1978 (NGPA), to ensure that the ceiling prices do not go above the commodity value of gas.

Specifically, the Commission proposed to establish a ceiling price for this gas at the lesser of (1) an imputed commodity value based on the price of alternative fuels, or (2) the incentive ceiling price which would otherwise apply to that gas. The Commission has received requests for a public hearing wherein interested persons would have the opportunity to make oral presentations of their views on the proposed rule. Pursuant to these requests, the Commission is scheduling a public hearing.

The hearing will be held on Monday, May 16, 1983, at 10:00 a.m. at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, Hearing Room A.

The hearing will not be of a judicial or evidentiary type. There will be no cross-examination of persons presenting statements. However, the panel may question such persons and any interested person may submit questions to the presiding officer to be asked of persons making statements. The presiding officer will determine whether the question is relevant and whether the time limitations permit it to be presented. Any further procedural rules will be announced by the presiding officer at the hearing. Transcripts of the hearing will be available in the public file for this proceeding, Docket No. RM82-32-000, in the Commission's Office of Public Information, and may be ordered from that office.

Requests to participate in the hearings should be submitted by May 6, 1983, to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Requests should indicate who the speaker will be, what organization is represented, and the amount of time required for oral presentation. Persons participating at the hearing should, if possible, bring 50 copies of their testimony to the hearing. A list of the participants in the hearing will be available in the Commission's Office of Public Information and at Hearing Room A on the morning the hearing is convened.

Dated: April 11, 1983.

Kenneth F. Plumb,

Secretary.

Treatment of the Credit for Tax Withheld on Interest, Dividends, and Patronage Dividends Earned by an Estate or Trust

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document provides proposed regulations with respect to the treatment of the credit for tax withheld on interest, dividends, and patronage dividends received by an estate or trust. Changes to the applicable tax law were made by the Tax Equity and Fiscal Responsibility Act of 1982. These regulations affect estates, trusts, and their beneficiaries and provide them with the guidance needed to comply with the law.

DATES: Written comments and requests to speak at the public hearing must be delivered or mailed by June 13, 1983. The amendments are proposed to be effective with respect to interest, dividends, and patronage dividends paid or credited after June 30, 1983.

ADDRESS: Send comments and requests to speak at the public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR–170–82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Cynthia L. Clark of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202–566–3828), not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed regulations relating to the treatment of the credit for tax withheld on interest, dividends, and patronage dividends received by an estate or trust under section 643(d) of the Internal Revenue Code of 1954 (Code), as added by section 302(b)(1) of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248, 96 Stat. 586). These proposed regulations are to be issued under the authority contained in sections 643(d) 7805 of the Internal Revenue Code of 1954 (96 Stat. 586, 26 U.S.C. 643(d); 68 Stat. 917, 26 U.S.C. 7805).

Section 301 of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) requires, in general, that there be deducted and withheld on each payment of interest, dividends, or patronage dividends, a tax equal to 10 percent of the amount of the payment. Section 302(a) of TEFRA amends section 31 of the Code to provide that the amount of tax withheld on interest, dividends, and patronage dividends will be allowed to the recipient of the interest, etc., as a credit against the recipient's income tax.

Section 302(b)(1) of TEFRA amends section 643 by adding a new subsection (d). Section 643(d) provides that the credit for tax withheld on interest, dividends, and patronage dividends received by an estate or trust is allocated between the estate or trust and its beneficiaries on the basis of their respective shares of interest, dividends, and patronage dividends. Section 643(d) also provides that the amount of the credit allocated to the beneficiaries is treated as an amount paid to the beneficiaries and as an amount deductible by the estate or trust.

Defined Income Beneficiary

Under § 1.643(e)–2(a) of the proposed regulations, the credit for tax withheld is allocated to a defined income beneficiary in an amount equal to the additional amount the beneficiary would have received if the income required to be distributed had been distributed and if there had been no withholding. The term "defined income beneficiary" means a beneficiary entitled under the terms of the governing instrument to all or a fractional or percentage share of income currently. Beneficiaries entitled to a fixed dollar amount are not defined income beneficiaries, and no part of the credit for tax withheld is allocated to them. A beneficiary entitled to the greater (or lesser) of a fixed amount or all or a portion of income currently is treated as a defined income beneficiary in those years in which the beneficiary is entitled to a portion (or all) of the current income, and not to the fixed amount.

Discretionary Beneficiaries

In the case of a discretionary beneficiary, the credit for tax withheld is allocated to the beneficiary under § 1.643 (e)-2 (b) in an amount equal to the tax withheld multiplied by a fraction. In general, the numerator of the fraction is the amount of the distribution to the beneficiary, and the denominator of the fraction is a distributable net income minus tax withheld. If the estate or trust has defined income beneficiaries and discretionary beneficiaries, the credit is first allocated to the defined income beneficiaries. To accomplish this, the credit for the tax withheld is reduced by the portion of the credit allocated to the defined income beneficiaries. In addition, the denominator of the fraction is reduced by the amount of the income allocated to the defined income beneficiaries. If the sum of the distributions to discretionary beneficiaries exceeds distributable net income minus the tax withheld (as reduced for distyributions to defined income beneficiaries), the credit for the tax withheld is allocated on the basis of an alternative fraction. The numerator of this alternative fraction is the amount of the distribution to the discretionary beneficiary, and the denominator is the sum of all distributions to discretionary beneficiaries.

Charitable and NRA Beneficiaries

In general, charitable beneficiaries and beneficiaries who are nonresident alien individuals (NRAs) are treated like other beneficiaries. Thus, the credit for tax withheld is allocated to a charitable or NRA beneficiary under § 1.643 (e)–2 (a) or (b), and the beneficiary files a claim for credit or refund of the tax. If, however, the charitable or NRA beneficiary does not wish to file a claim for credit or refund, it may under § 1.643 (e)–4 elect to cede its share of the credit for tax withheld to the estate or trust, which will then file the claim on its own behalf. The charitable or NRA beneficiary may make the election after entering into an agreement with the estate or trust that the estate or trust will distribute to the beneficiary, at a time such that the amount is considered a distribution within the taxable year of the estate or trust that would reduce distributable net income under section 651 or 661, the same amount the estate or trust would have paid had there been no withholding. The charitable or NRA beneficiary makes the election to cede its share of the credit for tax withheld by filing a certificate with an estate on or before the last day of the taxable year of the estate or with a trust on or before the date that is 65 days after the last day of the taxable year of the trust, stating that the beneficiary is ceding its

share of the credit under section 31 (b) to the estate or trust.

Comments Invited on Specific Issues

The Internal Revenue Service invites comments on a number of specific issues raised by the allocation of the credit for tax withheld on interest, dividends, and patronage dividends earned by an estate or trust. Under proposed § 1.643 (e)–4, a charitable or NRA beneficiary may elect to cede its share of the credit to the estate or trust, upon agreement by the estate or trust to pay the beneficiary, at a time such that the amount is considered a distribution within the taxable year of the estate or trust that would reduce distributable net income under section 651 or 661, the amount that would have been paid had there been no withholding. The Service is interested in receiving comments on this procedure and on alternatives such as allowing the estate or trust to defer paying the beneficary an amount equal to the ceded credit until the estate or trust has obtained a refund of the credit ceded to it by the charitable beneficiary, requiring the credit to be allocated to a charitable or NRA beneficiary on the basis of estate or trust income allocated to the beneficiary, and requiring the credit that otherwise would be allocated to the charitable or NRA beneficiary to be allocated to the estate or trust rather than the charitable or NRA beneficiary.

Proposed § 1.643 (e)–2 (a) prescribes a mandatory allocation of the credit to defined income beneficiaries on the basis of their share of the estate's or trust's income, and proposed § 1.643 (e)–2 (b) prescribes a mandatory allocation of the credit to discretionary beneficiaries using certain formulae. The Service is interested in receiving comments on the mandatory allocations required by proposed §§ 1.643 (e)–2 (a) and (b). In addition, the Service would like comments on whether a rule similar to § 1.643 (e)–4, allowing charitable and NRA beneficiaries to cede their share of the credit to the estate or trust, would be appropriate for defined income beneficiaries and discretionary beneficiaries.

Under proposed § 1.643(e)–2(a)(1), none of the credit is allocated to an annuitant. The Service would like comments on proposed § 1.643((e)–2(a)(1) and on whether part of the credit should be allocated to an annuitant based on the annuitant's share of estate or trust income.

Proposed § 1.671–5 provides that in the case of a grantor trust, the credit is to be allocated to the person who would have received the amount of income represented by the credit had there been no withholding. The Service would like comments on proposed § 1.671–5 and on whether the credit should be allocated to the grantor rather than to the beneficiaries, at the election of the grantor.

The Service would like comments on whether the credit should be treated as an item of property, so that the trustee could allocate the credit among the estate or trust and its beneficiaries as provided by the governing instrument. Under this approach, the ceding rules of § 1.643(e)–4 and the allocation rules of § 1.643(e)–2 would be unnecessary.

The Service is particularly interested in any problems under state law that may exist with respect to any of these methods.

Comments; Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably seven copies) to the Commissioner of Internal Revenue. All comments will be available for inspection and copying. A public hearing has been scheduled and will be held on June 21, 1983. Notice of the time and place of the hearing appears in the proposed rules section of this issues of the **Federal Register**.

Special Analyses

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. The Internal Revenue Service has concluded that although this document is a notice of propose rulemaking that solicits public comment, the regulations proposed herein are interpretative and the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, no Regulatory Flexibility Analysis is required for this rule.

Drafting Information

The principal author of this regulation is Cynthia L. Clark of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects in 26 CFR 1.641—1.692–1

Income taxes, Estate, Trusts and trustees, Beneficiaries.

Proposed Amendments to the Regulations

The proposed amendments to 26 CFR Part 1 are as follows.

PART 1—[AMENDED]

Paragraph 1. The following new §§ 1.643(e)–1 through 1.643(e)–4 are added immediately after § 1.643(d)–2.

§ 1.643(e)–1 Coordination with withholding on interest and dividends.

Under section 3451, relating to income tax collected at source, a tax of 10 percent is withheld from certain payments of interest, dividends, and patronage dividends. Under section 31(b), a credit is allowed for the tax withheld. Section 643(b) provides, in general, that subchapter J of the Code is to be applied with respect to payments subject to withholding by—

(a) Allocating between the estate or trust and its beneficiaries any credit allowable under section 31(b), relating to tax withheld on interest, dividends, and patronage dividends, on the basis of their respective shares of interest, dividends, and patronage dividends taken into account under subchapter J.

(b) Treating each beneficiary to whom the credit is allocated as if an amount equal to the allocable portion of the credit had been paid to the beneficiary by the estate or trust, and

(c) Allowing the estate or the trust a deduction in an amount equal to the portion of the credit allocated to the beneficiaries.

§ 1.643 (e)–2 Allocation of the credit under section 31(b).

(a) *Defined income beneficiaries and annuitants*—(1) *In general.* In the case of a defined income beneficiary, the credit under section 31(b) will be allocated to the beneficiary in an amount equal to the additional amount the beneficiary would have received if the income required to be distributed to the beneficiary had been distributed and if there had been no withholding. The term "defined income beneficiary" means a beneficiary entitled under the terms of the governing instrument to a current distribution of all or a fractional or percentage share of the income of the estate or trust for its taxable year, including all or a fractional or percentage share of income in excess of a fixed dollar amount. A beneficiary entitled to a distribution of a fixed dollar amount for a taxable year will be treated as an annuitant and not as a defined income beneficiary, for that year, with respect to amounts paid in satisfaction of the right to receive a fixed amount. No portion of the credit will be allocated to a beneficiary to the extent that the beneficiary is treated as an annuitant. Thus, for example, a beneficiary entitled to a distribution of a fixed amount payable out of income or

corpus will be treated as an annuitant and not as a defined income beneficiary, even if the amount is paid out of income. Similarly, a beneficiary entitled to a bequest of an amount equal to the federal estate tax credit available to a decedent's estate will be treated as an annuitant and not as a defined income beneficiary. Beneficiaries entitled to the greater (or lesser) of a fixed amount or all or a portion of income of the estate or trust for its taxable year will be treated as defined income beneficiaries with respect to amounts paid to them in those years in which the distribution they are entitled to receive is not the fixed amount. A beneficiary entitled to a distribution of an amount equal to a fixed percentage of the value of trust property, determined annually, is annuitant and not a defined income beneficiary, and no portion of the credit is allocated to the beneficiary. A beneficiary possessing the right to withdraw all or a fraction of trust principal is not a defined income beneficiary, even though the beneficiary is taxable on the income of the trust under section 678. As to the allocation of the credit in the case of grantors and others taxed as the owner of a trust, see § 1.671–5.

(2) *Examples.* The provisions of paragraph (a)(1) of this section may be illustrated by the following examples.

Example (1). Under the terms of the governing instrument, trust T is required to distribute all its income currently to A. In 1984, T earns $20,000 of interest, on which tax of $2,000 is withheld under section 3451. T has trust accounting income and distributable net income of $20,000. T distributes $18,000 to A. Because A is entitled, under the terms of the governing instrument, to all the trust income currently, A is a defined income beneficiary. Thus, the credit will be allocated to A in proportion to the income of the trust required to be distributed to A currently. Accordingly, the entire credit ($2,000) is allocated to A.

Example (2). Assume the same facts as in example (1) and in addition that T has $3,000 of expense allocable to income. As a result, T's trust accounting income and distributable net income are both $17,000. T has $15,000 cash remaining from current income available for distribution (interest less expense and tax withheld). T distributes $17,000 to A. The entire credit ($2,000) is allocated to A.

Example (3). Under the terms of the governing instrument, trust T is required to distribute one-fourth of its income currently to A and three-fourths of its income currently to B. In 1984, T earns $20,000 of interest, on which tax of $2,000 is withheld. T's trust accounting income and distributable net income are both $20,000. T distributes $4,500 to A and $13,500 to B. Because A and B are entitled to fractional share of trust income currently, both A and B are definied income beneficiaries. Thus, the credit will be allocated between A and B in proportion to their respective shares of current income. Accordingly, one-fourth of the credit ($500) is allocated to A and three-fourths ($1,500) is allocated to B.

Example (4). Under the terms of the governing instrument, the trustee of Z trust is required to pay a $10,000 per year or all the income of the trust for the year, whichever is greater. In 1984, Z has the following items of income and expense: $15,000 interest, $5,000 rental income, and $3,000 expenses allocable to income. Z has trust accounting income and distributable net income of $17,000 and $15,000 cash remaining from current income available for distribution. The trustee pays A $15,500. In 1984, A is treated as a defined income beneficiary because A is entitled to all the trust income for the year rather than the fixed amount of $10,000. Thus, the entire credit is allocated to A. Had trust accounting income been less than $10,000, A would have been treated as an annuitant; as a result, none of the credit would be allocated to A, and the entire credit would have been allocated to Z under § 1.643(e)–2(b)(3)(iv).

Example (5). Under the terms of the governing instrument, the trustee of Y trust is required to pay A $10,000 per year or all the income of the trust for the year, whichever is less. In 1984, Y has the following items of income and expense: $8,000 interest, $5,000 rental income, and $3,500 expense allocable to income. Y has trust accounting income and distributable net income of $9,500 and $8,700 cash remaining from current income available for distribution. The trustee pays A $8,700. In 1984, A is treated as a defined income beneficiary, and the entire credit is allocated to A. Had trust accounting income for 1984 been more than $10,000, A would have been treated as an annuitant for the year. As a result, none of the credit would be allocated to A, and the entire credit would have been allocated to Y under § 1.643(e)–2)(b)(3)(iv).

(b) *Other beneficiaries*—(1)(i) *In general.* In the case of a discretionary beneficiary (as defined in paragraph (b)(3)(i) of this section), the credit under section 31(b) will be allocated to the beneficiary in an amount equal to the tax withheld (as defined in paragraph (b)(3)(ii) of this section) multiplied by a fraction.

(ii) *Fraction.* Except as provided in (b)(2)(ii) of this section, the numerator of the fraction is the amount of the distribution to the beneficiary (as defined in paragraph (b)(3)(iii) of this section), and the denominator of the fraction is distributable net income for the taxable year minus tax withheld (as defined in paragraph (b)(3)(ii)).

(2) *Adjustments*—(i) *Defined income beneficiaries and discretionary beneficiaries.* If the trust has defined income beneficiaries as well as discretionary beneficiaries, the credit is allocated first to the defined income beneficiaries and the remaining credit is allocated to the discretionary beneficiaries. In that case, the credit shall be allocated to the discretionary beneficiaries by reducing the tax withheld (but not the tax withheld in the denominator of the fraction) by the amount of the credit allocated to the defined income beneficiaries, and the distributable net income taken into account in the denominator of the fraction shall be reduced by the amount of trust income allocable to the defined income beneficiaries.

(ii) *Distributions greater than denominator.* If the sum of the distributions to discretionary beneficiaries exceeds distributable net income minus tax withheld reduced by the income allocable to the defined income beneficiaries, the numerator of the fraction is the amount of the distribution to the discretionary beneficiary, and the denominator of the fraction is the sum of the amounts of all distributions to discretionary beneficiaries. If the trust has defined income beneficiaries as well as discretionary beneficiaries, then the amount of the credit to be allocated shall be determined by reducing the tax withheld by the amount of the credit allocated to the defined income beneficiaries.

(3) *Definitions.* For the purposes of this section—

(i) The term "discretionary beneficiary" means, for any taxable year, a beneficiary to whom an amount is properly paid, credited, or required to be distributed to the extent the distribution to the beneficiary for the taxable year is not described in parapraph (a)(1) of this section.

(ii) The term "tax withheld" means for any taxable year, the tax withheld under section 3451 with respect to interest, dividends, and patronage dividends received by an estate or trust during the year.

(iii) The term distribution to a discretionary beneficiary" means, for any taxable year, the amounts distributed to the beneficiary during the taxable year, including amounts treated as paid during the taxable year under section 663(b), but not including any distributions that are treated as made to a defined income beneficiary or an annuitant.

(4) *Special rules*—(i) In applying paragraph (b) of this section, an amount distributed to an annuitant (as defined in paragraph (a)(1) of this section) in satisfaction of the right to receive a fixed amount will not reduce the denominator of the fraction (distributable net income minus tax withheld).

(ii) The amount of the credit allocable to a beneficiary under paragraph

(b)(2)(ii) of this section shall not exceed an amount equal to one-ninth of the distribution to that beneficiary.

(iii) Any portion of the credit that is not allocated to the beneficiaries under paragraphs (a) and (b) of this section will be allocated to the estate or trust.

(iv) Distributions to a beneficiary shall be taken into account only to the extent that the distribution enters into the allocation of distributable net income.

(5) *Examples.* The provisions of paragraphs (b) (1) through (b) (3) of this section may be illustrated by the following examples:

Example (1). Under the terms of the governing instrument, the income of trust T is to be distributed to A in the trustee's discretion. Any income not distributed is to be accumulated. In 1984, T has the following items of income and expense: $20,000 interest, $3,000 rental income, and $3,000 expense allocable to income. T has trust accounting income and distributable net income of $20,000. T has $18,000 of cash remaining from current income available for distribution ($20,000 trust accounting income minus $2,000 tax withheld). The trustee distributes $10,000 to A in 1984. A is neither a defined income beneficiary nor an annuitant. Therefore, the amount of the credit allocable to A must be determined under the provisions of § 1.643 (e)-2(b)(1). Accordingly, $1,111 of the credit is allocated to A, computed as follows:

$$\frac{\text{\$10,000 distribution to A}}{\text{\$18,000 DNI less tax withheld}} \times \text{\$2,000 tax} = \text{\$1,111 withheld}$$

The balance of the credit ($889) is allocated to T.

Example (2). Under the terms of the governing instrument of X trust, $4,000 is payable to A each year from income of corpus, and any remaining income may be paid to B or accumulated in the trustee's discretion. In 1984, X has the following items of income and expense: $20,000 interest, $3,000 rental income, and $3,000 expense. X's trust accounting income and distributable net income are $20,000. X has $18,000 cash remaining from current income available for distribution ($20,000 trust accounting income less $2,000 tax withheld). In 1984, the trustee distributes $4,000 to A and $6,000 to B. None of the credit is allocable to be A, because A is an annuitant.

B is neither a defined income beneficiary nor an annuitant. Thus, the amount of the credit allocable to B is determined under § 1.643 (e)-2(b)(1). Accordingly, $667 of the credit is allocable to B, determined as follows:

$$\frac{\text{\$6,000 payment to B}}{\text{\$18,000 DNI less tax withheld}} \times \text{\$2,000 tax withheld} = \text{\$667}$$

In determining the amount of the credit allocable to B, the denominator of the fraction is not reduced by the $4,000 annuity paid to A since A is not a defined income beneficiary. The balance of the credit, $1,333, is allocated to X.

Example (3). Under the terms of trust X, the income may be paid to A in the trustee's discretion. Any income not paid to A must be paid to B. In 1984, X earns $20,000 of interest, on which $2,000 of tax is withheld. X has trust accounting income and distributable net income of $20,000. X has $18,000 cash remaining from current income available for distribution (interest less tax withheld). The trustee pays $12,000 to A and $6,000 to B. Neither A nor B is a defined income beneficiary or an annuitant. Thus, the amount of the credit allocable to A and B is determined under § 1.643(e)-2(b). Accordingly, $1,333 is allocated to A, and $667 is allocated to B, determined as follows:

$$\frac{\text{\$12,000 payment to A}}{\text{\$18,000 DNI less tax withheld}} \times \text{\$2,000 tax} = \text{\$1,333 withheld}$$

$$\frac{\text{\$6,000 payment to B}}{\text{\$18,000 DNI less tax withheld}} \times \text{\$2,000 tax} = \text{\$667 withheld}$$

Example (4). Under the terms of trust Y, the trustee may distribute income and principal to A and B in the trustee's discretion. Any income not distributed will be accumulated. In 1984, Y has the following items of income and expense: $20,000 interest, $3,000 rental income, and $3,000 expense. Y has trust accounting income and distributable net income of $20,000. Y has $18,000 cash remaining from current income available for distribution (trust accounting income less tax withheld). In 1984, the trustee distributes $10,000 to A and B 9,000 to B. A and B are neither defined income beneficiaries nor annuitants, and the sum of the amounts distributed to A and B ($19,000) exceeds distributable net income less tax withheld ($18,000). Thus, the amount of the credit allocable to A and B is determined under § 1.643(e)-2(b)(2). Accordingly, $1,053 is allocated to A, and $947 is allocated to B, determined as follows:

Beneficiary A

$$\frac{\text{\$10,000 payment to A}}{\text{\$19,000 total payments}} \times \text{\$2,000 tax withheld} = \text{\$1,053}$$

Beneficiary B

$$\frac{\text{\$9,000 payment to B}}{\text{\$19,000 total payments}} \times \text{\$2,000 tax withheld} = \text{\$947.}$$

Example (5). Under the terms of the governing instrument of Z trust, $5,000 is payable to A annually from income and, to the extent income is insufficient, from principal. Any remaining income is payable to B. In 1984, Z has the following items of income and expense: $5,000 interest, $6,000 rental income, $1,000 trustee's commissions allocable to income, and $5,000 real estate expenses allocable to income. Z's trust accounting income and distributable net income are $5,000. Z has $4,500 cash remaining from current income available for distribution (trust accounting income less tax withheld). The trustee pays A $5,000. After the payment to A, no income remains to be distributed to B. Because A is an annuitant, none of the credit is allocated to A. B is a defined income beneficiary. Thus, the credit is allocated to B in an amount equal to the amount of trust income B would have received had there been no withholding. However, even if no tax had been withheld, B would not have received any income because trust income for 1984 equals the amount of the annuity payable to A. Consequently, none of the credit is allocated to B. Thus, the entire credit is allocated to Z.

Example (6). Assume the same facts as in example (5) except that $300 of the trustee's commission is allocable to principal. Z's trust accounting income is $5,300 and Z's distributable net income is $5,000. Z has $4,800 cash remaining from current income available for distribution (trust accounting income less $500 tax withheld). The trustee pays B nothing. Because A is an annuitant, no portion of the credit is allocable to A. B is a

defined income beneficiary. Had there been no withholding, B would have received $300, the amount of income that would have remained after the distribution to A. Thus, B is entitled to a credit of $300. The balance of the credit ($200) is allocated to Z.

Example (7). Assume the same facts as in example (5) except that $500 of the trustee's commission is allocable to income and $500 is allocable to principal. Z's trust accounting income is $5,500, and Z's distributable net income is $5,000. Z has $5,000 cash remaining from current income available for distribution ($5,500 trust accounting income less $500 tax withheld). The trustee pays $5,000 to A and nothing to B. Because A is an annuitant, no portion of the credit is allocable to A. B is a defined income beneficiary. Had there been no withholding, B would have received $500, the amount of income that would have been left after the distribution to A. Thus, B is entitled to a credit of $500.

Example (8). Assume the same facts as in example (7) except that any remaining income may be paid to B or accumulated in the trustee's discretion. The trustee pays B $300. Because A is an annuitant, none of the credit is allocable to A. B is not a defined income beneficiary or an annuitant. Accordingly, the credit is allocated to B under § 1.643(e)–2(b)(1), as follows:

$$\frac{\text{\$300 payment to B}}{\text{4,500 DNI less tax withheld (See 1.643(e)–2(b)(4)(i))}} \times \text{\$500 tax withheld} = \text{\$33}$$

The balance of the credit ($467) is allocated to Z.

Example (9). Under the terms of the governing instrument, Z trust is required to pay 25 percent of the trust income currently to A. The trustee may pay the remaining income to B or accumulate it in the trustee's discretion. In 1984, Z has the following items of income and expense: $25,000 interest, $10,000 rental income and expense: $25,000 interest, $10,000 rental income, and $5,500 expenses allocable to income. Z has trust accounting income and distributable net income of $29,500. Z has $27,000 case remaining from current income available for distribution ($29,500 trust accounting income less $2,500 tax withheld). The trustee pays $6,750 to A, $5,000 to B, and accumulates the rest of the income. A is a defined income beneficiary entitled to 25 percent of the trust income. Therefore, $625 of the credit is allocated to A (25 percent × $2,500). B is not a defined income beneficiary or an annuitant. Therefore, $463 of the credit is allocated to B under § 1.643(e)–2(b)(1), computed as follows:

$$\frac{\text{\$5,000 payment to B}}{\text{\$20,250 (DNI less tax withheld and amount paid to A)}} \times \text{\$1,875 tax withheld less credit allocated to A}$$

The balance of the credit, $912, is allocated to Z.

Example (10). Under the terms of the governing instrument, 25 percent of the income of T trust is payable to A. The balance of the income may be paid to B and C or accumulated in the trustee's discretion. The instrument also provides that $10,000 is payable to D out of principal when D reaches 25. In 1984, D reaches age 25, and T has the following items of income and expense: $25,000 interest, $10,000 rental income, and $5,500 expense allocable to income. T has trust accounting income and distributable net income of $29,500. In 1984, the trustee distributes $6,750 (25 percent × $27,000, trust accounting income less tax withheld) to A, $10,000 to B, $15,000 to C, and $10,000 to D. The credit for tax withheld ($2,500) is allocated as follows:

Beneficiary A

Beneficiary A is a defined income beneficiary entitled to 25 percent of the trust's income. Accordingly, 25 percent of the credit ($625) is allocated to A.

Beneficiaries B and C

Beneficiaries B and C are not defined income beneficiaries. Because the sum of the payments to discretionary beneficiaries B and C ($25,000) exceeds distributable net income reduced by the sum of tax withheld and the payment to A, a defined income beneficiary, the amount of the credit allocable to B and C is determined under § 1.643(e)–2(b)(2). (Because D is entitled to a fixed amount, $10,000, D is considered an annuitant, and the payment to D is not taken into account.) Thus, $750 is allocated to B, and $1,125 is allocated to C, as follows:

$$\frac{\text{\$10,000 payment to B}}{\text{\$25,000 total payment to B and C}} \times \text{\$1,875 (tax withheld less credit allocated to A}$$

$$\frac{\text{\$15,000 payment to C}}{\text{\$25,000 total payment to B and C}} \times \text{\$1,875 (tax withheld less credit allocated to A}$$

None of the credit is allocated to D because D is an annuitant.

(c) *Taxable year of allocation.* If a beneficiary has a different taxable year from the taxable year of the estate or trust, the year in which the credit is allocated to the beneficiary is the year the income to which the credit is attributable is includable in the beneficiary's income under § 1.652(c)–1, in the case of a beneficiary of a simple trust, or § 1.662(c)–1, in the case of a beneficiary of an estate or complex trust.

§ 1.643 (e)-3 Inclusion and deduction of the allocable portion of the credit under section 31 (b).

The portion of the credit allocated to a beneficiary of an estate or trust under § 1.643 (e)-2 is a deemed distribution to the beneficiary. The deemed distribution to the beneficiary. The deemed distribution will have the same character in the hands of the beneficiary as the income giving rise to the credit. The amount of the deemed distribution included in the beneficiary's income is limited by the amount of the estate's or trust's distributable net income as provided under section 652 (a) and 662 (a). See Subpart D (section 665 and following), part I, subchapter J, chapter 1 of the Code for rules relating to treatment of excess distributions by trusts. An estate or trust is allowed a deduction for the deemed distribution. However, the deduction is limited by the amount of the estate's or trust's distributable net income as provided under sections 651 (b) and 661 (a).

§ 1.643 (e)-4 Special rule for charitable and nonresident alien individual beneficiaries.

(a) *In general.* In general, the credit under section 31 (b) is allocated to a charitable beneficiary or a beneficiary that is a nonresident alien individual (such beneficiaries being called "qualified beneficiaries" for purposes of this section) according to the provisions of paragraph (a) and (b) of § 1.643 (e)-2, and the beneficiary files for a refund or credit of its allocable share of the tax withheld in the same manner as any other beneficiary. However, if a qualified beneficiary elects, it may cede the portion of the credit allocable to it under § 1.643 (e)-2 (a) or (b) to the estate or trust, thereby entitling the estate or trust to file for credit or refund of the tax withheld. A qualified beneficiary must make the election pursuant to an agreement by the estate or trust to distribute to the beneficiary the amount the estate or trust would have distributed in the absence of withholding; the agreement must provide that the distribution will be made at a time such that the amount is considered a distribution within the taxable year of the estate of trust to which the credit relates that will reduce distributable net income under section 651 or 661. A qualified beneficiary makes the election by filing a certificate with an estate or trust on or before the due date (including extensions) of the tax return of the estate or trust for the year to which the election relates. In the case of a charitable beneficiary, the certificate must be signed by an officer, director, employee, member, or other person authorized to sign a return for the charity, and must include the following information: the name of the charity, the taxable year of the estate or trust to which the credit relates, a statement that the beneficiary is an organization meeting the requirements of paragraph (b)(1) of this section, and a statement that the charity is giving up to the estate or trust the charity's allocable share of the credit under section 31(b). In the case of a nonresident alien

individual beneficiary, the certificate must be signed by the beneficiary and must include the following information: the beneficiary's name, the address of the principal residence of the beneficiary, the taxable year of the estate of trust to which the credit relates, a statement that the beneficiary meets the requirements of paragraph (b)(2) of this section, and a statement that the beneficiary is giving up to the estate or trust the beneficiary's allocable share of the credit under section 31(b). The election is binding for the current and all subsequent taxable years until the qualified beneficiary files a certificate revoking the election with the estate or trust at least 30 days before the close of the taxable year of the estate or trust in which the revocation occurs. In general, the election may be revoked only with the consent of the estate or trust. However, an election must be revoked by the beneficiary within 30 days after the beneficiary ceases to satisfy the requirements of paragraph (b)(1) or (b)(2) of this section, as the case may be; in such a case, the consent of the estate or trust to the revocation of the election is not required. The revocation of an election by a beneficiary that has ceased to be a qualified beneficiary shall be effective on the first day of the taxable year of the estate or trust following the year of the estate's or trust's receipt of the revocation of the election. An election is revoked by delivery of a certificate to the trustee stating that the election under this section is revoked. The estate or trust must keep a copy of the certificate making or revoking the election.

(b) *Definitions.* For the purposes of this section—

(1) The terms "charitable beneficiary" and "charity" mean an organization exempt from tax under section 501 (a).

(2) The term "nonresident alien individual" means a nonresident alien individual who at no time during the taxable year is engaged in a trade or business in the United States and who does not have an election under section 6013 (g), relating to election to treat non-resident alien individual as resident of the United States, in effect.

(c) *Examples.* The provisions of paragraph (a) of this section may be illustrated by the following examples:

Example (1). Under the terms of the trust instruments, 50 percent of the income of trust T is required to be distributed currently to Z, a charitable organization described in section 501 (a). In 1984, T earns $10,000 interest, on which tax of $1,000 is withheld. T has trust accounting income and distributable net income of $10,000. T has $9,000 cash remaining from current income available for distribution (trust accounting income less tax withheld). T distributes $4,500 to Z. Under § 1.643 (e)–2 (a), Z is a defined income beneficiary and is entitled to one-half of the credit for tax withheld ($500). Z may file a claim for credit or refund of the tax.

Example (2). Assume the same facts as in example (1) except that Z files a statement with T, electing to cede its share of the credit to T under § 1.643(e)–4(a). In exchange, T agrees to distribute to Z the income that Z would have received had there been no withholding. Thus, T distributes $5,000 to Z in 1984. T is entitled to file a claim for credit or refund to the entire amount of the tax withheld.

Example (3). Under the terms of the trust instrument, the income of trust T may be paid to Y, a charitable organization described in section 501(a) and individual A or accumulated, in the trustee's discretion. In 1984, T earns $20,000 interest, on which tax of $2,000 is withheld. The trusee wants to pay Y $5,000 and A nothing. Y has not filed an election to cede the credit to T under § 1.643(e)–4(a). Recognizing that a distribution of income to Y will result in an allocation of a portion of the trust's credit under section 31(b) to Y, the trustee calculates the amount of the distribution so that the total of the distribution and the credit to Y will equal $5,000. Accordingly, the trustee distributes $4,500 to Y and allocates $500 of the credit to Y.

Example (4). Assume the same facts as in example (3), except that Y elects to cede its share of the credit to T under § 1.643(e)–4(a). Thus, the trustee is able to compute the amount of the distribution to Y without taking into account any allocation of the credit under section 31(b) to Y. Accordingly, the trustee distributes $5,000 to Y, recognizing that none of the credit will be allocated to Y.

Example (5). Under the trust instrument, $5,000 per year is payable to charity Z out of income or corpus of trust T. Z is an annuitant, and no portion of the credit under section 31(b) is allocable to Z. Thus, an election by Z to cede any part of the credit to T under § 1.643(e)–4(a) has no effect.

Example (6). Under the terms of the governing instrument, all the income of estate Z, which reports income using a calendar year, may be paid to A, a nonresident alien individual, or to B. In 1984, Z earns $10,000 of interest, on which tax of $1,000 is withheld. Z distributes $9,000 to A and nothing to B. Under § 1.643(e)–2(b)(1), A is entitled to the entire credit. A may make an election to cede A's share of the credit to Z pursuant to an agreement with Z that Z will make distributions to A in the amount it would have distributed in the absence of withholding. However, in order for the election to be effective for the estate's year ending December 31, 1984, A must make the election pursuant to an agreement that Z will pay to A the amount A would have received in the absence of withholding (an additional $1,000) on or before December 31, 1984. A may not make an election under an agreement that would permit payment of the $1,000 after December 31, 1984, because after that date, the $1,000 Z would have to pay A would not be treated as a distribution made in 1984. If, however, Z were a trust the election could be made under an agreement allowing the payment to be made on or before 65 days after December 31, 1984, because the payment of the $1,000 within 65 days after the close of Z's taxable year would be treated under section 663(b) as an amount distributed in 1984.

Par. 2. The following new § 1.671–5 is added immediately after § 1.671–4.

§ 1.671–5 Coordination with the section 31(b) credit.

In the case of a trust described in subpart E (section 671 through 679, relating to grantors and others treated as substantial owners), the credit under section 31(b) for tax withheld on interest, dividends, and patronage dividends is treated as an item of trust accounting income and is allocated in accordance with the allocation of trust accounting income. Thus, the credit will be allocated to the person who would have received the amount of income represented by the credit had there been no withholding. The portion of the credit under section 31(b) allocated to a beneficiary of a grantor trust is not included in the beneficiary's income to the extent the interest, dividends, and patronage dividends giving rise to the credit are included in the income of the grantor or another person under subpart E. In addition, the trust is not allowed a deduction for the amount of the credit allocated to the beneficiary to the extent the interest, dividends, and patronage dividends giving rise to the credit are included in the income of the grantor or another person under subpart E.

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

[LR–170–82]

Treatment of Credit for Tax Withheld on Interest, Dividends and Patronage Dividends Earned by an Estate or Trust; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to the treatment of credit for tax withheld on interest,

dividends and patronage dividends earned by an estate or trust.

DATES: The public hearing will be held on June 21, 1983, beginning at 10:00 a.m. Outlines or oral comments must be delivered or mailed by June 7, 1983.

ADDRESS: the public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 111 Constitution Avenue, NW., Washington, D.C. the requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-170-82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, NW., Washington, D.C. 20224, 202-566-3935, not a toll free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 643(d) of the Internal Revenue Code of 1954. The proposed regulations appear in the Proposed rules Section of this issue of the **Federal Register** (see FR Doc. 83-9940).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than June 7, 1983, an outline of the oral comments to be delivered at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 164

[CGD 77-196]

Confined or Congested Waters

AGENCY: U.S. Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: The Navigation Safety Regulations prescribe certain operating requirements for vessels navigating in "confined or congested waters". Since "confined or congested waters" have not yet been designated, those rules have not been implemented. A list of proposed confined or congested waters was published in the **Federal Register** on April 16, 1979. As a result of comments on that proposal, and in keeping with the Administration's goal of reducing Federal regulations, the Coast Guard is now proposing to delete the requirements for vessels operating in confined or congested waters.

DATES: Comments must be received on or before May 31, 1983.

ADDRESSES: Comments referencing CGD 77-196 should be submitted to Commandant (G-CMC/44), U.S. Coast Guard, Washington, D.C. 20593. Comments may be delivered to and will be available for inspection or copying from 8:00 a.m. to 4:00 p.m. at the Marine Safety Council (G-CMC/44), Room 4402, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C., (202) 426-1477.

FOR FURTHER INFORMATION CONTACT: Mr. Tom Falvey, U.S. Coast Guard Headquarters, (202) 426-4958.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments. Written comments should include the docket number (CGD 77-196), the name and address of the person submitting the comments, and give the reasons for the comment.

All comments received before expiration of the comment period will be considered before final action is taken on this proposal. No public hearings are contemplated, but one or more may be held, if requested by anyone raising a genuine issue.

Drafting Information

The principal persons involved in drafting this proposal are Mr. Tom Falvey, Project Manager, Office of Marine Environment and Systems, and Michael N. Mervin, Project Counsel, Office of Chief Counsel.

Discussion of Proposed Amendments

Section 164.15, Navigation underway: Confined and congested waters, of Title 33 of the Code of Federal Regulations was published on January 31, 1977, (42 FR 5956-5961). This section requires for self-propelled vessels of 1600 or more gross tons the following:

In the confined and congested waters described in § 164.16, the master or person in charge of each vessel underway shall ensure that—

(a) Propulsion machinery can respond immediately through its full operating range;

(b) The engine room, including the main engine control station even if it is not in the engine room, is manned to operate the propulsion machinery as required by paragraph (a) of this section;

(c) Persons are available to rapidly anchor the vessel in an emergency; and

(d) The automatic pilot device is not in use.

Section 164.16, List of confined or congested waters, was reserved when § 164.15 was published. On April 16, 1979, the initial list of confined or congested waters was published as a notice of proposed rulemaking in the **Federal Register** at 44 FR 22886. An analysis of the comments received in response to the proposed list and a review of the requirements of § 164.15 indicate that the benefits of the regulation would not outweigh the burdens of implementation.

No two areas that were proposed to be classified "confined or congested waters" are alike. The variation between many of the areas is extreme. Not only does the physical layout vary between areas, but the weather, currents, and type and density of vessel traffic varies within a given area.

Section 164.15 does not have the flexibility to deal efficiently with the many different conditions. For example, although § 164.15 requires that persons must be ready to rapidly anchor the vessel in an emergency, the water in some confined or congested areas is too deep to anchor. As time passes, traffic volume in some designated areas may decline, thereby making the area relatively less congested. The § 164.15 requirements would no longer be appropriate for such areas. On the other hand, areas *not* designated may become more congested or relatively more confined, and yet masters, relying on the published list of confined or congested waters, may forego taking needed precautions in those areas. There would be a continuing burden on the Coast Guard to maintain the list current, and a corresponding burden on the mariner to keep informed of the current list. The publications and charts required by existing regulations are considered adequate to draw the master's attention to the hazards in a particular area.

There have been several developments since the regulations were published.

The Coast Guard may establish special operating requirements for local areas. A regulated navigation area (RNA) may be established where it is felt that special regulations reflecting local conditions and tailored to meet a specific need are necessary. RNA's may be proposed by any individual to a Captain of the Port or District Commander.

The Standards of Training, Certification, and Watchkeeping, 1978, are about to be ratified by the international community. This convention, developed by the International Maritime Organization (IMO), provides guidance to Masters in keeping a navigational and engineering watch. It also provides standards for certification of ship's officers by the vessel's flag state.

The first set of amendments to the International Convention of Safety of Life at Sea, 1974, (SOLAS '74) has been completed and is now under consideration by IMO member states. Among other items, these amendments provide for: additional shipboard navigation equipment; restrictions in the use of automatic pilot in certain waters; a requirement for additional steering gear power units to be in operation in restricted waters; and specific steering gear drills and tests (several of these

items are to be the subject of a future rulemaking). Although these amendments would not be implemented before September 1984, mariners are aware of their content and may be following them as guides for prudent seamanship.

The Inland Navigational Rules Act of 1980 became effective in December, 1981. These rules, based on the International Regulations for Preventing Collisions at Sea, 1972, mandate certain behavior in narrow channels, during periods of restricted visibility, and in other high risk situations.

It is up to the master to assimilate all of these inputs and then decide what action is appropriate. If the vessel is operating in an area that could be classified as confined or congested waters, in most cases the actions listed in § 164.15 will be among the precautions taken. The Coast Guard believes that there is no demonstrable need to mandate those precautions by a regulation applicable to an extensive, but limited, list of designated "confined or congested" water.

Evaluation and Certification

This regulation proposes to eliminate a set of requirements that has never been implemented. This regulation has been evaluated under Executive Order 12291 and DOT Order 2100.5 of May 22, 1980, "Policies and Procedures for the Simplification, Analysis and Review of Regulations", and has been determined to be neither major nor significant. The economic inpact of this proposed regulation has been determined to be minimal, therefore, a full regulatory evaluation has been prepared. If the requirements had been implemented, some additional expense, in the form of overtime payments to existing crew members, may have been incurred. These would be insignificant in relation to normal vessel operating expenses, even in an extreme case for an individual vessel. For these reasons, in accordance with section 605(b) of the Regulatory Flexibility Act (94 Stat. 1164), it is certified that this rule would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 164

Navigation (water), Waterways.

PART 164—[AMENDED]

§§164.15 and 164.16 [Removed]

In consideration of the foregoing, it is proposed that Part 164 of title 33 of the Code of Federal Regulations be amended by removing §§164.15 and 164.16.

(Sec. 12, 92 Stat. 1477 (33 U.S.C. 1231); 49 CFR 1.46(n)(4))

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 145

[W-3-FRL 2345-8]

West Virginia Department of Natural Resources; Underground Injection Control; Primacy Application

AGENCY: Environmental Protection Agency.

ACTION: Notice of public comment period and of public hearing.

SUMMARY: The purpose of this notice is to announce that: (1) The Environmental Protection Agency (EPA) has received complete applications from the State of West Virginia requesting primary enforcement responsibility for the Underground Injection Control (UIC) Program; (2) the applications are now available for inspection and copying; (3) public comments are requested; and (4) a public hearing will be held.

The proposed comment period will provide EPA the breadth of information and public opinion necessary to approve, disapprove, or approve in part and disapprove in part the Section 1422 application of the West Virginia Department of Natural Resources (WVDNR) to regulate Classes I, III, IV, and V injection wells and the Section 1425 WVDNR application to regulate Class II injection wells in cooperation with the West Virginia Oil and Gas Conservation Commission.

DATES: Requests to present oral testimony should be filed by May 17, 1983. The Public Hearing will be held on May 24, 1983 at 7:00 p.m. and will continue until 9:00 p.m. or the end of the testimony. Written comments must be received by May 31, 1983. EPA reserves the right to cancel the hearing should there be no significant public interest. Those informing EPA of their intention to testify will be notified of the cancellation.

ADDRESSES: Comments and requests to testify should be mailed to S. Stephen Platt, (3WM42), Environmental Protection Agency, Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106. Copies of the application and pertinent material are available between 9:00 a.m. and 4:00 p.m., Monday through Friday at the following locations:

Environmental Protection Agency, Region III, Water Supply Branch, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, PH: (215) 597-9000

West Virginia Department of Natural Resources, Division of Water Resources, 1201 Greenbrier Street, East, Charleston, West Virginia 25311, PH: (304) 345-5935

Oil and Gas Conservation Commission, 1613 Washington Street, East, Charleston, West Virginia 25311, PH: (304) 345-3092

The hearing will be held in the Division of Water Resources Conference Room at 1201 Greenbrier Street, East, Charleston, West Virginia.

FOR FURTHER INFORMATION CONTACT: S. Stephen Platt, (3WM42), Environmental Protection Agency, Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106. PH: (215) 597-9017. Comments should also be sent to this address.

SUPPLEMENTARY INFORMATION: The Underground Injection Control (UIC) program seeks to protect as "underground sources of drinking water" (USDWs) all aquifers capable of yielding a significant amount of water containing less than 10,000 mg/1 of total dissolved solids. At present, the State of West Virginia has 7 Class I wells, 319 Class II wells, 17 Class III wells, and no known Class IV wells. The latest inventory identified 169 Class V wells. Class V wells will be studied to assess whether further regulatory measures are required. In the meantime, Class V wells will be regulated under existing State procedures. The State of West Virginia does not intend to exempt any aquifers at this time.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 145, which sets forth the requirements for a State requesting the authority to operate its own permit program of which the Underground Injection Control program is a part. These terms may not all apply to this particular notice.

List of Subjects in 40 CFR Part 145

Hazardous materials, Indians—Lands, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Intergovernmental relations, Penalties, Confidential business information.

These applications from the West Virginia Department of Natural Resources are for the regulation of all injection wells in the State. The applications include a description of the

State Underground Injection Control Program, copies of all applicable statutes and rules, a statement of legal authority and a proposed memorandum of agreement between the West Virginia Department of Natural Resources and Region III office of the Environmental Protection Agency.

Dated: April 4, 1983.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

40 CFR Part 469

[W-4—FRL 2346-7]

Electrical and Electronic Components (Phase II)

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; public hearing.

SUMMARY: Notice is hereby given of a hearing open to the public to discuss and receive comments on pretreatment standards recently proposed in the **Federal Register.** This hearing will be to elicit additional comments on the regulations proposed on March 9, 1983 (48 FR 10012). The comments will be used to further assist the Agency in finalizing technically sound and cost effective final regulations.

DATES: The public hearing has been scheduled for May 4, 1983.

ADDRESS: The public hearing will be held at the following address: Skyline Inn, South Capitol and I Streets, S.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Marvin B. Rubin, Project Officer for Public Participation, Effluent Guidelines Division (WH-552), Environmental Protection Agency, 401 M. St., S.W., Washington, D.C. 20460, Telephone 202-382-7113.

SUPPLEMENTARY INFORMATION: This public hearing is being held for the Electrical and Electronic Components (Phase II) point source category in accordance with Section 307(b) of the Clean Water Act, 33 U.S.C. 1317(b). Registration for the hearing will be held from 8:30 to 9:00 a.m. The hearing will start at 9:00 a.m. Following the registration period there will be a brief presentation by an EPA official on the development of these pretreatment standards. Opportunity will also be given throughout each session for the audience to submit written questions to the Presiding Officer. These questions will be addressed during a question and answer session at the conclusion of the oral testimony presentations for each category. Official transcripts will be available upon request.

Dated: April 8, 1983.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6449]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule: Revision.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the unincorporated areas of Plaquemines Parish, Louisiana.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 47 FR 52475 on November 22, 1982 and in the *Plaquemines Gazette* on October 29, and November 5, 1982 and hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for inspection at Commissioner Kirby's Office, Plaquemines Parish Courthouse, Point A La Hache, Louisiana 70083.

Send comments to: Commissioner Michael Kirby, Plaquemines Parish President, Parish Courthouse, Point A La Hache, Louisiana 70083.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472. (202) 287-0230.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in Plaquemines Parish in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR 67.4(A).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The proposed base (100-year) flood elevations are:

State	City/town/county	Source of flooding	Location	(#)Depth in feet above ground. *Elevation in feet (NGVD)
Louisiana	Unincorporated areas of Plaquemines Parish	Runoff Ponding	Approximately 1,000' north of the intersection of State Highway 39 and the Lorez Canal.	*2.0
			Approximately 100' northeast of the Olie Canal Pumping station.	*1.5
			Confluence of Agusta Canal with Barriere Bayou	*−1.0
			Approximately 4,000' west of Sarah along Sarah Canal	*1.5
			About 3,000' northwest of the Belle Chasse State School.	*1.0
			Intersection of State Road 3017 and the New Orleans and Lower Coast Railroad.	*−2.0
		Gulf of Mexico	Along east levee of the Mississippi River and State Highway 39, approximately 1,500 feet east of Woodlawn School.	*3.0
			Along east levee of the Mississippi River and State Highway 39 at Bertrandville Cemetery.	*3.0
			Just south of State Highway 39 at Braithwaite Park Airfield.	*5.5
			Along State Highway 23 at Boothville	*13.0
			Along State Highway 23 at Triumph	*14.0
			Along west levee of the Mississippi River and State Highway 23 at the Sunrise High School.	*14.0
			Just northwest of the bridge over the Doullut Canal at State Highway 23.	*14.0
			At Socola Canal and State Highway 23	*13.0
			At State Highway 23 and the Shell Road that leads to the Ferry Landing at West Point La La Hache.	*7.0
			Just south of the Mississippi west levee at Point Celeste.	*5.0
			Just west of Wilkinson Canal at Timber Canal	*0.0
			Entire Shoreline of Little Lake Batole	*20.0
			Confluence of Bayou Dulac and Pipeline Canal near Bay Sansbois.	*17.0
			Entire Shoreline of Carencro Bay	*19.0
			Along State Highway 23 at Venice	*13.5
			South of Port Sulpher at State Highway 23	*13.5
		Mississippi River	North of Port Sulpher at Mississippi River Mile 42	*14
			South of Ostrica Lock at Mississippi River Mile 25	*14
			North of Venice at Mississippi River Mile 11	*13

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 40014128); Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director)

BILLING CODE 6718-03-M

---

44 CFR Part 67

[Docket No. FEMA-6505]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed modified base (100-year) flood elevations shown on your community's preliminary Revised Flood Insurance Rate Map. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). The proposed base flood elevations modify the base flood elevations shown on your community's presently effective Flood Insurance Rate Map.

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of modified base (100-year) flood elevations, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however,

impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA-5470]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations previously published at 47 CFR 57069 on December 22, 1982. This correction notice provides a more accurate representation of the Flood Insurance Study and Flood Insurance Rate Map for the Borough of Seaside Heights, Ocean County, New Jersey.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Borough of Seaside Heights, Ocean County, New Jersey, previously published at 47 FR 57069 on December 22, 1982, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has not economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The following location descriptions have been amended to read as follows: The remainder of the Notice of Proposed Base Flood Elevations remains unchanged.

Source of flooding	Location	*Elevation in feet, national geodetic vertical datum
Barnegat Bay.	Shoreline north of Sheridan Avenue (extended).	*8
	Shoreline south of Sheridan Avenue (extended).	*7

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 40014128); Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director)

Issued: March 23, 1983.

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 111 and 151

[CGD 82-096]

Unmanned Barges Carrying Certain Bulk Dangerous Cargoes

AGENCY: Coast Guard, DOT

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to revise the rules for unmanned barges carrying certain bulk dangerous cargoes. The proposed rule corrects and adds electrical hazard class and group ratings to the list of cargoes. The proposed rule also corrects certain spelling errors. Finally, the provisions of Subchapter J, Electrical Engineering Regulations, are being modified to include barges carrying inorganic acids.

DATE: Comments must be received on or before May 31, 1983.

ADDRESS: Comments should be submitted to Commandant (G-CMC/44) (CGD 82-096), U.S. Coast Guard, Washington, D.C. 20593. The comments will be available for examination and copying between 8 a.m. and 4 p.m., Monday through Friday, except holidays at the Marine Safety Council (G-CMC/44), Room 4402, Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593. Comments may also be hand delivered to this office.

FOR FURTHER INFORMATION CONTACT: Joseph J. Jakabcin, U.S. Coast Guard Headquarters, Telephone 202-426-6262.

SUPPLEMENTARY INFORMATION: The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Comments should include names and addresses, identify this notice as CGD 82-096 and the specific section of the proposal to which the comments apply, and give reasons for the comments. If the acknowledgement of receipt of a comment is desired, a self-addressed postcard should be enclosed. The proposal may be changed in light of comments received. All comments received will be considered before final action is taken on this proposal. No public hearing is planned, but one will be held if requested by anyone raising a genuine issue.

Drafting Information

The principal persons involved in drafting this document are Mr. Joseph J. Jakabcin, Office of Merchant Marine Safety, and Mr. Michael N. Mervin, Office of the Chief Counsel.

Discussion of the Proposed Regulations: The proposed rule would make changes to Table 151.05, Summary of Minimum Requirements. Specifically, many entries under the columns "Electrical hazard class-group" are now blank, incomplete, or incorrect. The proposed rule would modify these entries by listing the correct class and group, including, where appropriate, "NA" to indicate that the electrical rating is "Not Applicable". These ratings were developed from criteria established by the Coast Guard sponsored Electrical Hazards Panel of the Committee on Hazardous Materials,

Division of Chemistry and Chemical Technology, National Research Council, National Academy of Sciences. These criteria are in the public docket and are available for review by interested parties. The current edition of the National Electrical Code uses the National Academy of Sciences' criteria for establishing ratings and lists some of the same chemicals as in Part 151. To prevent conflict with Subchapter J, Electrical Engineering regulations, 46 CFR 110–113, provisions in Subpart 111.105, which apply to inorganic acid tankships, will be extended to include inorganic acid barges. Finally, the proposed rule corrects the spelling of six cargo names in Table 151.05.

Regulatory Evaluation

The addition of the approximately 61 electrical hazard class and group ratings updates and codifies existing Coast Guard policies. We believe there will be only a minimal economic burden on U.S. flag barges. In fact, since several ratings are to be reduced, there will be savings for new barges in some cases. About 1,080 barges are certified for the carriage of cargoes whose ratings are affected. We estimate that 90 percent of these existing barges carrying hazardous materials have no electrical equipment located in hazardous areas. This change, therefore would have no economic effect on those barges. These regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be a major rule. In addition, these regulations are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification Analysis and Review of Regulations (DOT Order 2100.5 of 5–22–80).

Regulatory Flexibility Evaluation

These regulations primarily involve tankbarge fleets owned and operated by major corporations. Accordingly, it is certified that under the Regulatory Flexibility Act this rule will not, if promulgated, have a substantial economic impact on a significant number of small entities.

Comments on Specific Sections

Section 111.105–9 Explosion-proof equipment. Section 111.105–9(c) refers to tankships. To prevent conflict between provisions in Parts 111 and 151, the words "on a tankship" are deleted. This broadens coverage to include barges carrying inorganic acids.

Section 111.105–31 Flammable or combustible cargo with a flashpoint below 60 degrees C (140 degrees F), liquid sulfur carriers, and inorganic acid tankships. To prevent conflict between provisions in Parts 111 and 151 for barges carrying inorganic acids the title is changed to read "Flammable or combustible cargo with a flashpoint below 60 degrees C (140 degrees F), liquid sulfur, and inorganic acid carriers." Also, for the same reason, Sections 111.105–31 (a) and (1) should be extended to cover barges carrying inorganic acids.

Table 151.05 Summary of Minimum Requirements. Sixty-four electrical hazard class and group ratings in Table 151.05 need updating and correction. The rating for one cargo will be revised to I–A, twelve to I–B, nine to I–C, nineteen cargoes to I–D, and twenty-three cargoes to NA (Not Applicable). The requirements are either more lenient than those in the present Table 151.05 or are being established for the first time where Table 151.05 entries are missing or incomplete. Footnote 1, a reference to Group ratings, is no longer needed, and is to be reserved.

There are currently no electrical hazard ratings for inorganic acids aboard barges. Since inorganic acids often generate hydrogen gas when they attack metals, the Coast Guard assigned the rating of I–B to hydrochloric acid and other inorganic acids as a result of its reevaluation of the potential for hydrogen generation associated with the carriage of inorganic acids. The accumulation of hydrogen gas in deck areas is not considered a major problem due to its high rate of diffusion, low density and relatively slow rate of generation. Of major concern, however, is the possibility of acid leaking into a void or other enclosed space where hydrogen could be generated in hazardous concentrations. To permit electrical equipment in these spaces, it is necessary to require that such electrical equipment be safe in an atmosphere containing hydrogen. Therefore, the Coast Guard is modifying Sections 111 and 151 to permit electrical equipment rated I–B in spaces adjacent to tanks containing inorganic acids.

In Table 151.05, a few chemical names are misspelled. These are being corrected.

List of Subjects

46 CFR Part 111

Vessels.

46 CFR Part 151

Hazardous materials, Barges.

In consideration of the foregoing, it is proposed to amend Chapter I of Title 46, Code of Federal Regulations as follows:

PART 111—ELECTRICAL SYSTEMS—GENERAL REQUIREMENTS

1. By revising § 111.105–9(c) to read as follows:

§ 111.105–9 Explosion-proof equipment.

* * * * *

(c) In a Group B atmosphere, if the cargo is an inorganic acid.

2. By revising the heading and paragraph (1) of § 111.105–31 to read as follows:

§ 111.105–31 Flammable or combustible cargo with a flashpoint below 60 degrees C (140 degrees F), liquid sulfur, and inorganic acid carriers.

* * * * *

(1) Weather locations. A location in the weather, except on an inorganic acid carrier, must have only explosion-proof electrical equipment, purged and pressurized equipment, and through runs of armored or MI type cable if it is—

* * * * *

PART 151—UNMANNED BARGES CARRYING CERTAIN BULK DANGEROUS CARGOES

3. By amending Table 151.05, Summary of Minimum Requirements column entries under "Cargo name", replacing the old cargo names with the new cargo names, to read as follows:

Old	New
N-butyl acrylate	n-Butyl acrylate.
Isobutyl acrylate	iso-Butyl acrylate.
Butyraldehyde, (N)	n-Butyraldehyde.
Isobutyraldehyde	iso-Butyraldehyde.
Carbon bisulfide	Carbon disulfide.
2-Ethyl, 3-Propyl Acrolein	2-Ethyl-3-propyl acrolein.

4. By amending the Table 151.05 column entry under "Electrical hazard" to read "I–A" for "Carbon disulfide."

5. By amending the Table 151.05 column entry under "Electrical hazard" to read "I–B" for the following cargoes:

Chlorosulfonic acid
Hydrochloric acid
Hydrochloric acid, spent (15% or less)
Hydrofluoric acid
Hydrofluorosilicic acid (25% or less)
Hydrogen chloride
Hydrogen fluoride
Nitric acid (70% or less)
Oleum
Phosphoric acid
Sulfuric acid
Sulfuric acid, spent

6. By amending the Table 151.05 column entry under "Electrical hazard" to read "I–C" for the following cargoes:

Allyl alcohol
n-Butyraldehyde
iso-Butyraldehyde
Crotonaldehyde
Epichlorohydrin

2-Ethyl-3-propyl acrolein
Formaldehyde Solution 37–50%
Furfural
Morpholine

7. By amending the Table 151.05 column entry under "Electrical hazard" to read "I–D" for the following cargoes:

Acetic acid
Acetic anhydride
Ammonium hydroxide, not to exceed 28%
n-Butyl acrylate
iso-Butyl acrylate
Camphor oil (light)
Chlorobenzene
Chlorohydrins (crude)
Dichloropropane
Ethyl acrylate
Ethyl chloride
Ethylene diamine
Ethylene dichloride
Formic acid
Isoprene
Methyl acrylate
Motorfuel antiknock compounds
Propionic acid
Vinylidene chloride inhibited

8. By amending the Table 151.05 column entry under "Electrical hazard" to read "NA" for the following cargoes:

Acetone cyanohydrin
Adiponitrile
Aminoethyl ethanolamine
Aniline
Carbolic oil
Carbon tetrachloride
Caustic potash solution
Caustic soda solution
Chlorine
Chloroform
Cresols
Dichlorodifluoromethane
Diethanolamine
Diethylenetriamine
Diisopropanolamine
Ethylene cyanohydrin
Monochlorodifluromethane
Monoethanolamine
Monoisopropanolamine
Phenol
Phosphorous, elemental
Triethanolamine
Triethylene tetramine

9. By removing and reserving Footnote 1 to Table 151.05.

Footnotes:

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 83-356; RM-4373]

FM Broadcast Stations in Minot, North Dakota; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes a fifth FM assignment to Minot, North Dakota, in response to a petition filed by Robert Gallaher.

DATES: Comments must be filed on or before May 23, 1983, and reply comments on or before June 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634–6530.

Radio broadcasting.

Notice of Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, Minot, North Dakota, MM Docket No. 83–356, RM–4373.

Adopted: March 23, 1983.

Released: April 8, 1983.

By the Chief, Policy and Rules Division:

1. The Commission herein considers a petition for rule making filed by Robert Gallaher ("petitioner"), proposing the assignment of Channel 292A to Minot, North Dakota, as its fifth FM assignment. Petitioner stated that he or an entity of which he is a part will apply for the channel, if assigned. The channel can be assigned in full compliance with the minimum spacing requirements of § 73.207 of the Rules.

2. Since Minot, North Dakota, is within 230 kilometers (200 miles) of the U.S. Canadian border, the proposed assignment requires coordination with the Canadian Government.

3. In view of the fact that the proposal could provide a fifth FM service to Minot, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Rules, as follows:

City	Channel No.	
	Present	Proposed
Minot, N. Dak.	229, 246, 260, 287	229, 246, 260, 287, and 292A.

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before May 23, 1983, and reply comments on or before June 7, 1983, and are advised to read the appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making To Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignements. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments official filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule*

Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See Section 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[MM Docket No. 83-357; RM-4379]

Radio Broadcast Services; FM Broadcast Stations in Killington, Vermont

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign Class B FM Channel 287 to Killington, Vermont, as requested by First VT Women's Broadcasters. The proposal could provide a first local broadcast service.

DATES: Comments must be filed on or before May 23, 1983, and reply comments must be filed on or before June 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Notice of Proposed Rule Making.

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Killington, Vermont)

MM Docket No. 83-357, RM-4379

Adopted: March 23, 1983.
Released: April 8, 1983.
By the Chief, Policy and Rules Division:

1. A petition for rule making was filed on February 7, 1983, by First VT Women's Broadcasters ("VT") to assign Class B FM Channel 287 to Killington, Vermont. VT states that it will apply for authorization to operate a station on the channel, if it is assigned.

2. VT seeks a Class B channel assignment. Class B stations are licensed in Zone I of the United States. However, Killington, is located in Zone II which is reserved for Class C assignments. Class C stations are authorized to operate with higher maximum power than Class B stations and have greater mileage separation requirements. Pursuant to § 73.211(c) of our Rules, the Zone in which a station is located is determined by the transmitter site, rather than the community of license. A transmitter site in Zone I which meets all spacing requirements for Channel 287, as a Class B assignment, may be located 11.5 miles south of Killington. However, VT proposes a transmitter site near the radio tower of station WRUT, Rutland, Vermont, in Zone II.

3. VT indicates that it will locate its transmitter in Zone I or seek a waiver of our Rules to operate a Class B station in Zone II. In so doing, it states that it will accept a grant of any construction permit on the condition that it maintains Class B facilities. On the basis that VT will either conform its station to the requirements of § 73.211(c) or seek a waiver thereof, the Commission believes that VT's proposal warrants consideration. Accordingly, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) as follows:

City	Channel No.	
	Present	Proposed
Killington, Vermont		287

Canadian concurrence is required.

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before May 23, 1983, and reply comments on or before June 7, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Philip S. Cross, Mass Media Bureau, (202) 632-5414.

However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(1), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein, If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[MM Docket No. 83-354; RM-4290]

Television Broadcast Stations in San Luis Obispo, California; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the assignment of UHF television Channel 33 to San Luis Obispo, California, in response to a petition filed by William V. Johnson. The proposed assignment would provide for a second commercial television service to San Luis Obispo.

DATES: Comments must be filed on or before May 23, 1983, and reply comments on or before June 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554

Notice of Proposed Rule Making

In the matter of Amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations (San Luis Obispo, California), MM Docket No. 83-354, RM-4290.

Adopted: March 23 1983.

Released: April 8, 1983.

By the Chief, Policy and Rules Division:

1. William V. Johnson ("petitioner") on December 30, 1982, submitted a petition for rule making requesting the assignment of UHF television Channel 33 to San Luis Obispo, California, as a second commercial television assignment. Petitioner stated that he or an entity of which he is a part, will apply for the channel, if assigned.

2. San Luis Obispo (population 34,252),[1] seat of San Luis Obispo County (population 155,345), is located approximately 260 kilometers (160 miles) northwest of Los Angeles. San Luis Obispo is presently assigned commercial Channel 6 and noncommercial educational Channel *15.

3. In support of his request, petitioner submitted 1981 population data. Petitioner also submitted 1981 statistics for San Luis Obispo County regarding total and per household spendable income and retail sales.[2]

4. We believe tht the petitioner's proposal warrants consideration. The proposal meets all spacing requirements and could provide for a second commercial television station at San Luis Obispo. Comments are invited on the proposal to amend the Television Table of Assignments, with regard to the following community:

---

[1] Population figures are from U.S. Census 1900 Advance Report.

[2] Information was extracted from the *Standard Rate and Data Service, Inc.* of Skokie, Illinois.

City	Channel No.	
	Present	Proposed
San Luis Obispo, Calif.	6+, *15+	6+, 15+, 33

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before May 23, 1983, and reply comments on or before June 7, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification That Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making To Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See Section 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

List of Subjects in 47 CFR Part 73

Television broadcasting.

Notice of Proposed Rule Making

In the matter of Amendment of § 73606(b), Table of Assignments, Television Broadcast Stations (Fort Worth, Texas), MM Docket No. 83–355, RM–4305.

Adopted: March 23, 1983.

Released: April 8, 1983.

By the Chief, Policy and Rules Division:

1. A petition for rule making was filed January 6, 1983, by Dennis H. Owen ("Petitioner") seeking the assignment of UHF television Channel 43 to Fort Worth, Texas, as that community's fourth commercial television allocation. Petitioner indicates that he, or an entity

of which he is a part, will apply for the channel, if assigned.

2. Fort Worth (population 385,141),[1] the seat of Tarrant County (population 860,880), is located in northeast Texas approximately 50 kilometers (28 miles) west of Dallas. At the present time, Fort Worth is served by commercial television Stations KXAS (TV) (Channel 5+), KTVT (TV) (Channel 11−), KTXA (TV) (Channel 21−), and noncommercial educational Channel *31, for which applications are pending.

3. According to information supplied by petitioner, Fort Worth's economic base should be sufficient to support the proposed television assignment.

4. A Channel 43 assignment to Fort Worth would be short-spaced to the proposed assignment of Channel 58 to Dallas, Texas, in BC Docket No. 82–834 (RM–4202), since that proposal requires a minimum distance separation of 75 miles between UHF assignments that are 15 channels apart. However, a staff engineering study reveals that Channel 52 can be assigned to Fort Worth with a carrier offset, in lieu of Channel 43. The offset is necessary to comply with the requirements of § 73.610(b) of the Commission's Rules which, in this instance, requires a separation of 175 miles to co-channel Station KSBI (TV) in Oklahoma City, Oklahoma.

5. In view of the foregoing and the fact that the proposed television assignment would provide a fourth commercial television broadcast service to Fort Worth, Texas, the Commission believes it appropriate to propose amending the Television Table of Assignments, § 73.606(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Fort Worth, Texas.	5+, 11−, 21−, and *31+.	5+, 11−, 21−, *31+, and 52+.

6. The Commission's authority to institute rule making proceedings, showing required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before May 23, 1983, and reply comments on or before June 7, 1983, and are advised to read the Appendix for the proper procedures.

[1] Population figures are extracted from the 1980 U.S. Census, Advance Reports.

8. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

9. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expect to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference

Room at its headquarters, 1919 M Street, N.W., Washington, D.C.,

[MM Docket No. 83-350; RM-4354]

FM Broadcast Stations in Port St. Joe, Florida; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action herein proposes the substitution of Class C FM Channel 233 for Channel 228A at Port St. Joe, Florida, and modification of the Class A license for Station WGCV(FM), in response to a petition filed by Brown Broadcasting of Florida, Inc. The assignment could provide Port St. Joe with a first Class C FM station.

DATES: Comments must be filed on or before May 23, 1983, and reply comments on or before June 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634-6530.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Adopted: March 23, 1983.
Released: April 8, 1983.

In the matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Port St. Joe, Florida), MM Docket No. 83-350, RM-4354.

By the Chief, Policy and Rules Division:

1. A petition for rule making was filed January 19, 1983, by Brown Broadcasting of Florida, Inc. ("petitioner"), licensee of FM Station WGCV [1] (Channel 228A) in Port St. Joe, Florida, seeking the substitution of Class C Channel 233 for Channel 228A and modification of its license to specify operation on the Class C channel. The channel can be assigned consistent with the minimum mileage separation requirements of § 73.207(a) of the Commission's Rules.

2. In justification of its proposal, petitioner states that the improved facilities will enable it to substantially expand its service area.

3. In response to petitioner's request, we shall propose the substitution of channels at Port St. Joe and the modification of Station WGCV's license to specify operation on Channel 233 in lieu of Channel 228A. However, in conformity with Commission policy, as expressed in *Cheyenne, Wyoming*, 62 FCC 2d 63 (1976), should another interest in the assignment be expressed, the proposed modification could not be made and the channel, if assigned, would be open to competing applications.

4. An *Order to Show Cause* to the petitioner is not required since consent to the modification of its license is indicated by its request for the Class C channel.

5. In consideration of the above, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Port St. Joe, Fla	228A	233

6. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: a showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before May 23, 1983, and reply comments on or before June 7, 1983, and are advised to read the Appendix for the proper procedures.

8. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making To Amend § § 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

9. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comments which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § § 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See Section 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later

[1] Petitioner advises that it recently became the licensee of Station WGCV (as well as WJOE(AM) in Port St. Joe), by the Commission's approval of an assignment of license therefor (File Nos. BAPL-821028GN and BAPLH-821028GO), and now desires to improve its FM facility.

than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.145 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions § 1.420 of the Commission's Rules and Regulations, and original and four copies of all comments, reply comments, pleading, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 83-351; RM-4361]

FM Broadcast Stations in Albion, Nebraska; Proposed Changes in Table of Assignments.

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes a first FM assignment to Albion, Nebraska, in response to a petition filed by Emanuel W. Skala.

DATES: Comments must be filed on or before May 23, 1983, and reply comments on or before June 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634-6530.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Adopted: March 23, 1983.
Released: April 8, 1983.

In the Matter of; Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Albion, Nebraska) MM Docket No. 83-351, RM-4361.

By the Chief, Policy and Rules Division:

1. Emanuel W. Skala ("petitioner") on January 24, 1983, submitted a petition for rule making which seeks the assignment of Channel 224A to Albion, Nebraska, as its first FM assignment. Petitioner stated that he would apply for the channel, if assigned. The channel can be assigned in compliance with the provisions of § 73.207 of the Rules.

2. The petitioner submitted population, economic and community data in an effort to demonstrate a need for the requested assignment. However, in view of the action taken in *Revision of FM Policies and Procedures*, 90 F.C.C. 2d 88 (1982), these issues are no longer relevant to this type of proceeding.

3. In view of the fact that the proposal could provide a first local broadcast service to Albion, comments are invited on the proposal to amend the FM Table of Assignments, § 73.202(b) of the Rules, as it pertains to the following community:

City	Channel No.	
	Present	Proposed
Albion, Nebraska		224A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before May 23, 1983, and reply comments on or before June 7, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification That Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making To Amend Sections 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend the* FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the

consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW, Washington, D.C.

[MM Docket No. 83-353; RM-4341]

TV Broadcast Stations in Ashland, Ky. Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes a third television assignment to Ashland, Kentucky, in response to a petition filed by Stanley G. Emert.

DATES: Comments must be filed on or before May 23, 1983, and reply comments on or before June 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634-6530.

List of Subjects in 47 CFR Part 73

Television broadcasting.

Adopted: March 23, 1983.

Released: April 8, 1983.

In the matter of: Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Ashland, Kentucky), MM Docket No. 83-353, RM-4342.

By the Chief, Policy and Rules Division:

1. Stanley G. Emert ("petitioner"), submitted a petition for rule making on January 11, 1983, requesting the assignment of UHF Television Channel 50 to Ashland, Kentucky, as a second commercial television channel. Petitioner stated that he, or an entity of which he is a part, will apply for the channel, is assigned.

2. Ashland (population 27,064),[1] in Boyd County (population 55,513), is located in eastern Kentucky, approximately 180 kilometers (112 miles) southeast of Cincinnati, Ohio. Ashland is presently assigned commercial Channel 61 and noncommercial educational Channel *25.

3. We believe that the petitioner's proposal warrants consideration. The proposed assignment meets all spacing requirements and could provide for a second commercial television station at Ashland. Comments are invited on the proposal to amend the Television Table of Assignments, with regard to the following community.

City	Channel No.	
	Present	Proposed
Ashland, Ky	*25 -, 61 +	*25 -, 50 -, 61 +

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by a reference herein.

NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before May 23, 1983, and reply comments on or before June 7, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making To Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration or court review, all *Ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Proposed Rule Making

Adopted: March 23, 1983.
Released: April 8, 1983.

In the matter of; Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Tyler, Texas) MM Docket No. 83-352, RM-4304.

By the Chief, Policy and Rules Division:

1. The Commission herein considers a petition for rule making filed January 6, 1983, by Dennis H. Owen ("petitioner") seeking the assignment of UHF television Channel 57 to Tyler, Texas, as its fourth television assignment.

2. Tyler (population 70,508),[1] seat of Smith County (population 128,366) is located in northeastern Texas, approximately 145 Kilometers (91 miles) southeast of Dallas.

3. Petitioner has submitted information in support of his request and expressed his interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria.

4. In view of the fact that Tyler could receive a fourth local television service, the Commission finds that it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) for the following community:

City	Channel No.	
	Present	Proposed
Tyler, Texas	7,14+, *38	7,14+ *38, and 57.

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before May 23, 1983, and reply comments on or before June 7, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification That Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making To Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW, Washington, D.C.

Order Establishing Standard Foreign Fare Level

The International Air Transportation Competition Act (IATCA), Pub. L. 96-192, requires that the Board establish a Standard Foreign Fare Level (SFFL) by adjusting the SFFL base periodically by percentage changes in actual operating costs per available seat-mile. The SFFL thus computed becomes the benchmark for measuring the statutory nonsuspend zone similar to the zone of reasonableness established by the Airline Deregulation Act and set forth in sec. 1002(d) of the Federal Aviation Act of 1958, as amended. Order 80-2-69 established the first interim SFFL and subsequent Order 83-2-27 established the currently effective two-month SFFL applicable through March 31, 1983.

Since the Board's authority to regulate interstate and overseas fares was sunset effective January 1, 1983, we will no longer publish a Standard Industry Fare Level (SIFL). Thus, the use of a published SIFL for a U.S./Canada/Mexico fare index is no longer an option. We have developed a SFFL index for U.S.-Canada fares based upon the cost experience of the U.S. carriers which provide service in the U.S.-Canada markets. A similar adjustment is not necessary for U.S.-Mexico fares since costs for such service are already reported in the Latin American entity.

In establishing the SFFL for the two-month period starting April 1, 1983 we have projected nonfuel costs based on the year ended September 30, 1982 and have determined fuel prices on the basis of experienced monthly fuel cost levels and reported weekly fuel cost trends.

By Order 83-4-47 fares may be increased by the following adjustment factors over the October 1, 1979, level:

Atlantic	1.1347
Latin America	1.2698
Pacific	1.2354
Canada	1.2999

Copies of the Board's order are available from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request.

For Further Information Contact: Julien R. Schrenk, (202) 673–5298.

By the Civil Aeronautics Board: April 8, 1983.

[Order 83–4–56]

Aeronaves del Peru, S.A.; Order To Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause: Order 83–4–56.

SUMMARY: The Board proposes to renew the foreign air carrier permits of Aeronaves del Peru, S.A. and Compania de Aviacion "Faucett," S.A., but to suspend the exercise of the authority granted by these permits until the Government of Peru fulfills its obligations under the U.S.-Peru Air Transport Services Agreement to permit Challenge Air Transport, Inc. to provide scheduled all-cargo service to Lima, Iquitos, and Talara, Peru.

Objections: All interested persons have objections to the Board's tentative findings and conclusions, as described in the order cited above, shall, no later than April 18, 1983, file a statement of such objections with the Civil Aeronautics Board (20 copies, addressed to Docket 26637, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428) and mail copies to all affected carriers and the Departments of State and Transportation.

A statement of objections must cite the docket number and must include a summary of testimony, statistical data, or other such supporting evidence.

If no objections are filed, the Board will issue an order which will make final the Board's tentative findings and conclusions and renew and suspend the proposed permits.

To get a copy of the complete order, request it from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673–5432. Persons outside the Washington metropolitan area may send a postcard request.

FOR FURTHER INFORMATION CONTACT: Jeffrey B. Gaynes, (202) 673–5035, Bureau of International Aviation, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: April 11, 1983.

DEPARTMENT OF COMMERCE

Bureau of the Census

Estimates of the Voting Age Population for 1982

In accordance with the requirements of the Federal Election Campaign Act Amendments of 1976, 2 U.S.C. 441a(e), notice is hereby given that the estimates of the voting age population for July 1, 1982, for each state, the District of Columbia, the Commonwealth of Puerto Rico, and the Territories of Guam and the Virgin Islands are as shown in the following table.

These estimates have been certified to the Federal Election Commission.

Malcolm Baldrige,

Secretary of Commerce.

ESTIMATES OF THE POPULATION OF VOTING AGE FOR STATES AND SELECTED OUTLYING AREAS: JULY 1, 1982

[In thousands]

Area	Population 18 and over
United States	166,769
Alabama	2,812
Alaska	297
Arizona	2,049
Arkansas	1,642
California	16,239

ESTIMATES OF THE POPULATION OF VOTING AGE FOR STATES AND SELECTED OUTLYING AREAS: JULY 1, 1982—Continued

[In thousands]

Area	Population 18 and over
Colorado	2,219
Connecticut	2,370
Delaware	443
District of Columbia	494
Florida	7,987
Georgia	4,011
Hawaii	716
Idaho	655
Illinois	8,310
Indiana	3,926
Iowa	2,109
Kansas	1,761
Kentucky	2,625
Louisiana	3,020
Maine	824
Maryland	3,154

Correction

In FR Doc. 83-8751 beginning on page 14719 in the issue of Tuesday, April 5, 1983, make the following correction:

On page 14722, middle column, in the table, the time period for Yaskawa and Hitachi now reading "April 1, 1980 to November 30, 1981" should have read "April 1, 1980 to November 30, 1980".

BILLING CODE 1505-01-M

National Bureau of Standards

National Voluntary Laboratory Accreditation Program (NVLAP)

AGENCY: National Bureau of Standards, Commerce.

ACTION: Withdrawal of preliminary finding of need to accredit laboratories that test window and and door products.

SUMMARY: In a notice published in the **Federal Register** on August 24, 1982 (47 FR 36875–36878) the National Bureau of Standards (NBS) requested public comments on its preliminary finding that there is a need to accredit laboratories that test window and door products. The comments received objected to the establishment of that laboratory accreditation program (LAP) which has led NBS to the conclusion that the preliminary finding of need should be withdrawn. Accordingly, NBS hereby announces the withdrawal of the Preliminary Finding of Need to Accredit Laboratories that Test Window and Door Products.

FOR FURTHER INFORMATION CONTACT: John W. Locke, Manager, Laboratory Accreditation, National Bureau of Standards, TECH B141, Washington, D.C. 20234 (301) 921–3431.

SUPPLEMENTARY INFORMATION:

Background

On January 21, 1982, the Department of Commerce published in the **Federal Register** (47 FR 3025–3026) for public comment a request from the Department of Housing and Urban Development (HUD), under the provisions of 15 CFR Part 7b, to establish a Laboratory Accreditation Program (LAP) for laboratories that test window and door products. Public comments received by HUD led it to the conclusion that the request should be withdrawn so that other interested parties could act as proponents of the proposed program. The notice announcing HUD's withdrawal decision was published in the **Federal Register** on May 28, 1982 (47 FR 23509–23510).

Following the decision by HUD to withdraw its request for the Window and Door LAP, The Associated Laboratories, Inc., Dallas, Texas, under the NVLAP procedures 15 CFR Part 7a, requested that NBS make a preliminary finding that there is a need to accredit laboratories that test window and door products.

On August 24, 1982, NBS published an announcement in the **Federal Register** (47 FR 36875–36878) of a preliminary finding of need to accredit laboratories that test window and door products and invited public comments over a 60-day period. That notice also established a 15-day period, to request an informal public hearing. No requests were received for a public hearing. A total of 19 written statements were filed in response to the preliminary finding of need. The written statements are available for inspection and copying in the Department of Commerce (DOC) Central Reference and Records Inspection Facility (CRRIF), Room 6622, Herbert C. Hoover Building (HCHB)(Main Commerce), 14th Street between E Street and Constitution Avenue, N.W., Washington, D.C. 20234. These written comments have been analyzed and considered. The result of this analysis is a document entitled, "Summary and Analysis of Comments on the Preliminary Finding of Need to Accredit Laboratories that Test Window and Door Products." (Summary and Analysis Document). That document, which lists the members of the public who provided written comments, is also available for inspection and copying at HCHB'S CRRIF mentioned above.

A summary of the analysis of the comments and the recommendation is presented below.

Summary of Analysis of Comments

Six respondents indicated support for the LAP, and eleven respondents objected to the establishment of the program.

One of the respondents to the NBS notice is the Architectural Aluminum Manufacturers Association. AAMA is a national trade association which represents approximately 260 firms engaged in the manufacture and sale of architectural aluminum building components and related products. AAMA presently sponsors a product certification program for aluminum prime windows, sliding doors and aluminum combination storm windows and doors. The 1982 AAMA Certification Program Directory lists 4 Administrators/Validators and 17 approved testing laboratories which conduct product testing for the 260 fims.

Under the product certification program the 4 Administrators/Validators are required to conduct periodic in-plant inspections to assure that the testing is performed in accordance with the ANSI/AAMA test procedures.

The ANSI/AAMA test procedures used in the certification program cover the following product categories:

1. Aluminum prime windows, sliding doors and aluminum combination storm windows and doors.

2. Primary windows and sliding glass doors required by the Federal Mobile

Home Construction and Safety Standard.

3. Swinging exterior passage doors required by the Federal Mobile Home Construction and Safety Standard.

AAMA submitted the following comment on the NVLAP proposed LAP: "AAMA, upon review feels that the best interests of the window and door industry and consumers would be best served by an independent, uniform laboratory accreditation system established and run by the private sector. AAMA has the in-house expertise to establish the procedures, criteria and organization to sponsor a laboratory accreditation program for window and door products."

The objectors, while opposed to the establishment of a program under NVLAP for accrediting laboratories that test window and doors did endorse the proposed establishment of a laboratory accreditation program in the private sector operated by AAMA in support of its product certification program for window and door products.

AAMA's representation of a large majority of the manufacturers of aluminum building products which are tested by the AAMA approved testing laboratories would leave little or no testing laboratories to enroll in a NVLAP accreditation program for laboratories that test window and door products. Therefore, initiation of the NVLAP LAP would be impractical and uneconomical.

The comments of all of the respondents are summarized in the "Summary and Analysis Document".

Conclusion

Based upon the decision of AAMA to establish a private industry sponsored laboratory accreditation program for laboratories that test window and door products and the views of the other objectors, NBS hereby announces the withdrawal of the preliminary finding of need to accredit laboratories that test window and door products.

Dated: April 8, 1983.

Ernest Ambler,

Director, National Bureau of Standards.

[FR Doc. 83-9804 Filed 4-13-83; 8:45 am]

BILLING CODE 3510-13-M

[Docket No. 30124-17]

Revision to Federal Information Processing Standard 63, Operational Specifications for Variable Block Rotating Mass Storage Subsystems

Under the provisions of Pub. L. 89-306 (79 Stat. 1127; 40 U.S.C. 759(f)) and Executive Order 11717 (38 FR 12315, dated May 11, 1973), the Secretary of Commerce (Secretary) is authorized to establish uniform Federal automatic data processing standards. On May 28, 1982, notice of a proposed revision to Federal Information Processing Standard (FIPS) 63 was published in the **Federal Register** (47 FR 23510) for public comment and sent to Federal agencies for comment. This notice proposed to remove the three device class specifications contained in FIPS 63 from that standard and to maintain those device class specifications as a separate report which will not be a part of the standard. Interested parties were invited to submit written comments concerning the proposed revised standard to the National Bureau of Standards (NBS).

The written comments submitted by interested parties and other material available to the Department relevant to this proposed revision were reviewed by NBS. On the basis of this review, NBS recommended to the Secretary his approval of the revised standard as a FIPS, and prepared a detailed justification document for the Secretary's review in support of that recommendation. The purpose of this notice is to announce that the Secretary has approved this revised standard as a FIPS, and that the standard shall be published as FIPS publication 63-1. The original version of this standard became effective June 23, 1980, and the provisions from it which this revision retains continue in effect from that date. The changes made by this revision become effective April 14, 1983.

The detailed justification document which was presented to the Secretary, and which includes an analysis of the written comments received, is part of the public record and is available for inspection and copying in the Department's Central Reference and Records Inspection Facility, Room 6622, Main Commerce Building, 14th Street between Constitution Avenue and E Street, NW., Washington, D.C. 20230.

The original standard, FIPS 63, was approved by the Secretary on August 16, 1979 (44 FR 50078-50080) and was the subject of corrections and revisions announced in the **Federal Register** on August 31, 1979 (44 FR 51294), December 3, 1979 (44 FR 69317), and November 26, 1980 (45 FR 78746). This revised standard supersedes FIPS 63 in its entirety, including its subsequent corrections and revisions.

The approved FIPS contains two portions: (1) An announcement portion which provides information concerning the applicability, implementation, and maintenance of the standard and (2) a specifications portion which deals with the technical requirement of the standard. Only the announcement portion of the standard is provided in this notice. Additional operational specifications are available in a separate report entitled, *Additional Operational Specifications for Variable Block Rotating Mass Storage Devices.*

Interested parties may purchase either paper or microfiche copies of this revised standard, including the technical specifications portion, from the National Technical Information Service (NTIS). The additional operational specifications are also available from NTIS. Specific ordering information from NTIS for this revised standard is set out in the Where to Obtain Copies section of the announcement portion of the standard.

Persons desiring further information about this revised standard may contact Mr. William Burr, Center for Computer Systems Engineering, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234, (301) 921-3723.

Dated: April 8, 1983.

Ernest Ambler,

Director.

Federal Information Processing Standards Publication 63-1

(Date)

Announcing the Standard for Operational Specifications for Variable Block Rotating Mass Storage Subsystems

Federal Information Processing Standards Publications are issued by the National Bureau of Standards pursuant to section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended, Public Law 89-306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 Code of Federal Regulations (CFR).

Name of Standard. Operational Specifications for Variable Block Rotating Mass Storage Subsystems (FIPS PUB 63-1).

Category of Standard. Hardware Standard, Interface.

Explanation. This standard defines the peripheral device dependent operational interface specifications for connecting variable block rotating mass storage equipment as a part of automatic data processing (ADP) systems. It is to be used together with FIPS PUB 60,* I/O Channel Interface and FIPS PUB 61,* Channel Level Power Control Interface. This standard, together with these two referenced standards, provides for full plug-to-plug interchangeability of rotating mass storage equipment as a part of ADP systems. Alternatives to this standard are being prepared and will be issued from time to time

* Reference to FIPS PUB 60 and FIPS PUB 61 is intended to indicate the most recent revision of those publications designated respectively as FIPS PUB 60-1, 60-2, * * *, and FIPS PUB 61-1, 61-2, * * *

as FIPS PUBS. Their applicability provisions will indicate that they are alternatives to this standard, and as they are issued any of them may be used in place of this standard in appropriate applications.

The Government's intent in employing this standard prescribing Operational Specifications for Variable Block Rotating Mass Storage Subsystems is to reduce the cost of satisfying its data processing requirements through increasing its available alternative sources of supply for computer systems components at the time of initial system acquisition, as well as in system replacement augmentation and in system component replacement. This standard is also expected to lead to improved reutilization of system components.

When acquiring ADP systems and system components, Federal agencies shall cite this standard in specifying the interface for connecting variable block rotating mass storage peripheral equipment as a part of ADP systems.

Approving Authority. Secretary of Commerce.

Maintenance Agency. Department of Commerce, National Bureau of Standards (Institute for Computer Sciences and Technology).

Cross Index. Operational Specifications for Variable Block Rotating Mass Storage Subsystems. Additional operational specifications are available in a separate report entitled, *Additional Operational Specifications for Variable Block Rotating Mass Storage Devices*, which provides track format definition and specifies the sense information format and content for particular classes of variable block rotating mass storage devices.

Applicability. This standard is applicable to the acquisition of all rotating mass storage equipment whenever the use of Federal Information Processing Standard I/O Channel Interface (FIPS PUB 60) is required unless a FIPS PUB having an applicability provision stating that it is an alternative to this standard is appropriate to the application and the equipment conforms to that FIPS PUB.

Verfication of the correct operation of all interfaces that are required to confrom to this standard shall, through demonstration or other means acceptable to the Government, be provided prior to the acceptance of all applicable ADP equipment.

Specifications. Affixed.

Copies of the technical specifications section of the standard will be available from the National Technical Information Service as described in the Where to Obtain Copies section below.

Implementation. The original version of this standard became effective June 23, 1980, and the provisions from it which this revision retains continue in effect from that date. The changes made by this revision become effective April 14, 1983.

All applicable equipment ordered on or after the effective date, or procurement actions for which solicitation documents have not been issued by that date, must conform to the provisions of this standard unless a waiver has been granted in accordance with the procedure described elsewhere in this publication.

Regulations concerning the specific use of this standard in Federal procurement will be issued by the General Services Administration to be a part of the Federal Property Management Regulations.

This revised standard shall be reviewed by NBS within three years after its date of issue, taking into account technological trends and other factors, to determine whether the standard should be affirmed, revised, or withdrawn.

Waivers. Heads of agencies desiring a waiver from the requirements stated in this publication, so as to acquire ADP equipment that does not conform to this standard, shall submit a request for such a waiver to the Secretary of Commerce for review and approval. Approval will be granted if, in the judgment of the Secretary based on all available information, including that provided in the waiver request, a major adverse economic or operational impact would occur through conformance with this standard.

A request for waiver shall include: (1) A description of the existing or planned ADP system for which the waiver is being requested, (2) a description of the system configuration, identifying those items for which the waiver is being requested, and including a description of planned expansion of the system configuration at any time during its life cycle, and (3) a justification for the waiver, including a description and discussion of the major adverse economic or operational impact that would result through conformance to this standard as compared to the alternative for which the waiver is requested.

The request for waiver shall be submitted to the Secretary of Commerce, Washington, D.C. 20230, and labeled as a Request for Waiver to a Federal Information Processing Standard. Waiver requests will normally be processed within 45 days of receipt by the Secretary. No action shall be taken to issue solicitation documents or to order equipment for which this standard is applicable and which does not conform to this standard prior to receipt of a waiver approval response from the Secretary.

Where to Obtain Copies. Either paper or microfiche copies of this Federal Information Processing Standard, including the technical specifications, may be purchased from the National Technical Information Service (NTIS) by ordering Federal Information Processing Standard Publication 63–1 (FIPS–PUB–63–1), Operational Specifications for Variable Block Rotating Mass Storage Subsystems. The supplement to FIPS PUB 63 entitled *Additional Operational Specifications for Variable Block Rotating Mass Storage Devices* may also be obtained from NTIS. Ordering information, including prices and delivery alternatives, may be obtained by contacting the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA 22161, telephone: (703) 487–4650.

BILLING CODE 3510-CN-M

National Oceanic and Atmospheric Administration

Mid-Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice.

SUMMARY: The Mid-Atlantic Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, as amended), will meet to discuss the Surf Clam/Ocean Quahog Fishery Management Plan (FMP), Atlantic Mackerel, Squid and Butterfish FMP, status of other FMP's, as well as discuss other fishery management and administrative matters.

DATE: The public meetings will convene on Wednesday, May 11, 1983, at approximately noon, and will adjourn at approximately 5 p.m., on Thursday, May 12, 1983.. The meetings may be lengthened or shortened depending upon progress on the agenda.

ADDRESS: The public meetings will take place at the Golden Eagle Inn, Beach Drive, Cape May, New Jersey.

FOR FURTHER INFORMATION CONTACT: Mid-Atlantic Fishery Management Council; Room 2115—Federal Building, 300 South New Street, Dover, Delaware 19901, Telephone: (302) 674–2331.

Dated: April 11, 1983.

BILLING CODE 3510-22-M

Pacific Fishery Management Council's Anchovy Plan Development Team, Anchovy Subpanel and Scientific and Statistical Committee Anchovy Subcommittee; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice.

SUMMARY: The Pacific Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, as amended), has established an Anchovy Plan Development Team, an Anchovy Subpanel, and an Anchovy Subcommittee of its Scientific and Statistical Committee. These three groups will hold separate public meetings to discuss a draft proposed amendment to the Northern Anchovy Fishery Management Plan. The draft proposed agenda would change current methods for annually estimating the

anchovy spawning biomass and deriving optimum yield and harvest quotas based on the biomass estimate. Information developed at these meetings will enable the groups to formulate recommendations to the Council and Scientific and Statistical Committee Anchovy Subcommittee preparatory to releasing the proposal for review. Members of the public will be permitted to submit oral or written statements regarding matters on the agenda.

DATES: The separate public meetings will be held as follows:

1. Anchovy Subpanel—Monday, May 5, 1983, convening at approximately 10 a.m., in the Main Conference Room, Room 2032, Federal Customs Building, 300 South Ferry Street, Terminal Island, California;
2. Anchovy Plan Development Team—Friday, May 6, 1983, Convening at approximately 8 a.m. in the auditiorium of the Southwest Fisheries Center, National Marine Fisheries Service, 8604 La Jolla Shores Drive, La Jolla, California; and,
3. Scientific and Statistical Committee Anchovy Subcommittee—Wednesday, May 4, 1983, Convening at approximately 9 a.m., in the auditorium of the Southwest Fisheries Center, National Marine Fisheries Service, 8604 La Jolla Shores Drive La Jolla, California.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, Oregon 97201, Telephone: (503) 221–6352.

Dated: April 1, 1983.

BILLING CODE 3510-22-M

Pacific Fishery Management Council's Groundfish Management Team; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice.

SUMMARY: The Pacific Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, as amended), has established a Groundfish Management Team. The Team will address a number of groundfish issues which may require amendment to the Pacific Coast Groundfish Plan. These include gear marking and vessel identification requirements, an expanded area for joint venture processing; modification of the requirement to cease directed fishing for sablefish when 95% of the optimum yield is reached; trip limit provisions for Pacific ocean perch; the beginning date for the fishing year for fisheries covered by the plan; the removal of jack mackerel from the multi-species grouping; the addition of other rockfish species to the plan; review of status of stock reports; and other groundfish matters of importance to the Council. Members of the public will be permitted to submit oral or written statements regarding these matters. A public comment period is scheduled for 4 p.m., each day.

DATES: The public meetings will convene on Tuesday, April 26, 1983, and continue through to April 28, 1983, convening at approximately 8 a.m., and adjourning at approximately 5 p.m. each day.

ADDRESS: The public meetings will take place at the National Marine Fisheries Service, Southwest Fisheries Center, Tiburon Laboratory, 3150 Paradise Drive, Tiburon, California.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, Oregon 97201, telephone: (503) 221–6352.

Dated: April 11, 1983.

BILLING CODE 3510-22-M

South Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice.

SUMMARY: The South Atlantic Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, as amended), will meet to report on comments received during the Swordfish Fishery Management Plan (FMP) and Bluefish FMP public hearings; discuss the status of the Billfish FMP, review other FMP activities, as well as discuss other fishery management and administrative matters, as necessary.

DATES: The public meetings will convene on Monday, May 23, 1983, at approximately 1:30 p.m., and will adjourn on Thursday, May 26, 1983, at approximately noon.

ADDRESS: The public meetings will take place at the Holiday Inn, Kill Devil Hills, (Nags Head), North Carolina.

FOR FURTHER INFORMATION CONTACT: South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, South Carolina 29407, telephone: (803) 571–4366.

Dated: April 11, 1983.

Richard B. Stone,

Acting Chief Operations Coordination Group, National Marine Fisheries Service.

BILLING CODE 3510-22-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Fire Support for Amphibious Warfare; Advisory Committee Meeting

The Defense Science Board Task Force of Fire Support for Amphibious Warfare will meet in close session on May 26-27, 1983 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on May 26–27, 1983 the Task Force will consider the basic requirements for fire support during amphibious warfare operations.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

April 11, 1983.

BILLING CODE 3810-01-M

Defense Science Board Task Force on Long Endurance Aircraft; Advisory Committee Meeting

The Defense Science Board Task Force on Long Endurance Aircraft will meet in closed session on May 6, 1983 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on May 6, 1983, the Task Force will consider the current long endurance aircraft programs.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 83-CERT-007]

Stone Container Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Stone Container Corporation (Stone), 50 East Sixth Street, Franklin, Ohio 45005, filed an application on March 7, 1983 with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its paper mill facility in Franklin, Ohio, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Stone indicates that the volume of natural gas for which it request certification is approximately 360,000 Mcf per year. This volume is estimated to displace the use of approximately 2, 470,000 gallons (58,860 barrels) of No. 6 fuel oil (1.0 percent sulfur) per year.

The eligible seller is Ohio Gas Marketing Corporation, 3933 Price Road, Newark, Ohio 43055. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25325; and by Cincinnati Gas and Electric Company, 139 East Fourth Street, Cincinnati, Ohio, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to Stone and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on April 8, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 83-9819 Filed 4-13-83; 8:45 am]

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-006]

United states Steel Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

United States Steel Corporation (USS), 600 Grant Street, Pittsburgh, Pennsylvania 15230, filed an application on March 7, 1983 with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its steel manufacturing facility in Lorain, Ohio, and at its chemical plant in Haverhill, Ohio, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, USS indicates that the volume of natural gas for which it requests certification is approximately 10.285 billion cubic feet (6.807 Bcf at the Lorain facility and 3.478 Bcf the Haverhill plant). This volume is estimated to displace the use of approximately 716,000 barrels of No. 6 fuel oil (1.53 percent sulfur) and approximately 16,979,000 gallons (404,262 barrels) of No. 2 fuel oil (0.50 percent sulfur) at the Lorain plant per year. At the Haverhill facility this volume is estimated to displace the use of approximately 535,000 barrels on No. 6 fuel oil (0.3 percent sulfur) and 797,000 gallons (18,976 barrels) of No. 2 fuel oil (0.5 sulfur) per year.

The eligible seller is Energy Buyers Service Corporation, P.O. Box 19832, Houston, Texas 77224. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25325; Tennessee Gas Transmission, Inc., P.O. Box 254, Houston, Texas 77001; and Panhandle Eastern Pipeline Company, P.O. Box 1642, Houston, Texas 77001. Local distributors will be Columbia Gas of Ohio, 99 North Front Street, Columbus, Ohio 43215, and East Ohio Gas Company, P.O. Box 5759, Cleveland, Ohio 44101.

In order to provide the public with as much opportunity to participate this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D. C. 20585, Attention: Paula A Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to USS and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on April 8, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: Under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Department of Energy (DOE) notices of proposed collections under review will be published in the **Federal Register** on the Thursday of the week following their submission to the Office of Management and Budget (OMB). Following this notice is a list of the DOE proposals sent to OMB for approval since Thursday, March 31, 1983. The listing does not contain information collection requirements contained in regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The form number; (2) Form title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary; or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to fill out the form; and (9) A brief abstract describing the proposed collection.

DATES: Last notice published Thursday, March 31, 1983.

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Forms Clearance and Burden Control Division, Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Ave., NW., Washington, DC 20585, (202) 252-2308

Jefferson B. Hill, Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395-7340

Vartkes Broussalian, Federal Energy Regulatory Commission Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395-3087

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to the OMB reviewer; comments should also be provided Mr. Gross. If you anticipate commenting on a form, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washington, D.C., April 4, 1983.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

DOE FORMS UNDER REVIEW BY OMB

Form No.	Form title	Type of request	Response frequency	Response obligation	Respondent description	Estimated number of respondents	Annual respondent burden	Abstract
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
EIA-14	Refiners' Monthly Cost Report	Revision	Month	Mandatory	Petroleum Refiners.	170	4,836	Data are used by the Energy Information Administration as inputs to various forecasting models. Data are published in the "Short Term Energy Outlook," and the Monthly Energy Review." Aggregated data are used by the Department of Commerce in calculating the real GNP.
FERC-525	Financial Audits	Extension	On Occasion	Mandatory	Electric Utilities, Natural Gas Pipeline companies and Oil pipeline companies.	81	4,860	Audits enable FERC to exercise surveillance over compliance with the Uniform System of Accounts and related regulations. Data are used to ensure and establish actual legitimate original costs and enable FERC to meet its responsibilities in establishing just and reasonable rates. Data are also used in rate proceedings and in formal investigations.

Office of Energy Research

Energy Research Advisory Board; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Energy Research Advisory Board (ERAB).

Date and Time: May 5-6, 1983—9:00 a.m.-5:00 p.m.

Place: U.S. Department of Energy, 1000 Independence Avenue, SW., Room 8E-089, Washington, DC 20585.

Contact: Joan Snodderly, U.S. Department of Energy, Office of Energy Research (ER-6), 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: 202/252-8933.

Purpose of the Board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative Agenda: Briefings and discussions of:

- DOE Budget Update
- Industrial Energy R&D
- Panel Progress Reports
- Magnetic Fusion Energy
- Public Comment (10 minute rule)

Public Participation: The meeting is open to the public. Written statements may be filed with the Board either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Joan Snodderly at the address or telephone number listed above. Requests must be received five days prior to the meeting and

reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Board is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on April 11, 1983.

Howard H. Raiken,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. TA83-2-21-000 (PGA83-3)]

Columbia Gas Transmission Corp.; Proposed Changes In FERC Gas Tariff

April 7, 1983.

Take notice that Columbia Gas Transmission Corporation (Columbia) on April 5, 1983, tendered for filing proposed changes to its FERC Gas Tariff, Original Volume No. 1, as follows:

Eighty-seventh Revised Sheet No. 16
Twenty-ninth Revised Sheet No. 64

The enclosed tariff sheets, reflecting reduced rates applicable to sales rate schedules, bear an issue date of April 5, 1983 and an effective date of April 1, 1983.

Columbia states that the instant special PGA filing reflects a reduction of $83,330,095, or 25.97 cents per Dth, for the period April 1, 1983 through August 31, 1983. This reduction effectively eliminates, as of April 1, 1983, the impact of Columbia's March 1, 1983 PGA increase, and, in fact, results in a commodity rate which is 5.61 cents per Dth below that which was reflected in Columbia's March 1, 1983 PGA filing. These reductions are the result of (1) Reduced purchases from certain Southwest producers as the result of Columbia's declaration of force majeure effective April 1, 1983 under its contracts with such suppliers, (2) revised schedules for anticipated reductions in purchases from certain producers selling gas priced under multiple NGPA categories as the result of Columbia's notification to such producers that they may not reduce their deliveries of less expensive gas by more, on a proportionate basis, than their deliveries of more expensive categories of gas during periods when Columbia is reducing its purchases of gas below full deliverability and (3) a repricing of certain of Columbia's high-cost gas purchases to a lower level which is equivalent on a Btu basis to 110% of the price of No. 2 fuel oil.

Columbia respectfully requests that the Commission grant any waivers as it may deem necessary for the acceptance of this filing.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before April 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of Columbia's filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc 83-9841 Filed 4-13-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP83-13-004]

El Paso Natural Gas Co.; Notice of Tariff Filing

April 7, 1983.

Take notice that on April 4, 1983, El Paso Natural Gas Company ("El Paso") tendered for filing and acceptance, pursuant to Part 154 of the Federal Energy Regulatory Commission ("Commission") Regulations Under the Natural Gas Act, the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Fourth Revised Sheet No. 89
Fourth Revised Sheet No. 90
Third Revised Sheet No. 91
Second Revised Sheet No. 91–A
First Revised Sheet No. 91–B
Second Revised Sheet No. 91–C
Second Revised Sheet No. 91–D
Second Revised Sheet No. 91–E
First Revised Sheet No. 91–F
Second Revised Sheet No. 91–G
First Revised Sheet No. 91–H
First Revised Sheet No. 91–I

On October 27, 1982, El Paso filed revised tariff sheets to its Original Volume No. 1 Tariff which, when accepted and made effective by the Commission, would have replaced the two forms of service agreement (Form A and Form B) presently included therein with a new, single form of service agreement. By order issued November 26, 1982 at Docket No. RP83–13–000, the Commission, among other things, accepted El Paso's filing and suspended its effectiveness until April 15, 1983, subject to alteration or deletion of terms not found to be just and reasonable. Thereafter, by order issued February 18, 1983 at Docket Nos. RP83–13–001 and RP83–13–002, the Commission modified its November 26, 1982 order to further condition acceptance of the new Form upon El Paso's retention of Forms A and B until all executed service agreements patterned after those forms have expired. El Paso states that the tendered revised tariff sheets, which are submitted in substitition for those filed October 27, 1982 in the instant proceeding, reflect new pagination which will serve to include the new Form in its Original Volume No. 1 Tariff while retaining Forms A an B therein, in compliance with the condition set forth in the Commission's February 18, 1983 order.

El Paso requests that the Commission grant any and all waivers which may be necessary to permit the tendered revised tariff sheets to be substituted for those filed on October 27, 1982 and that such tendered tariff sheets be permitted to become effective on April 15, 1983 subject to alteration or deletion, as provided for in the Commission's order issued November 26, 1982, as amended.

El Paso states that copies of the instant filing have been served upon all parties of record in Docket Nos. RP82–33–000, RP83–6–000 and RP83–13–000 and, otherwise, upon all interstate pipeline system customers of El Paso and interested state regulatory commissions.

Any person desiring to be heard or to make a protest with reference to said tariff filing should, on or before April 18, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C., 20426, a motion to intervene or a protest in accordance with the requirements of Rule 214 or Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). Protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a

proceeding must file a motion to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9842 Filed 4-13-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-34-001 (PGA, IP)]

Florida Gas Transmission Co.; Revised Tariff Filing

April 7, 1983.

Take notice that on April 4, 1983, Florida Gas Transmission Company (FGT) filed pursuant to Section 154.38 of the Commission's Regulations (18 CFR 154.38) its biannual purchase gas adjustment (PGA) filing with a proposed effective date of April 1, 1983. By letter order dated March 31, 1983, the Commission conditionally accepted FGT's filing, but directed it to file tariff sheets conforming to the rates in effect, as applicable to FGT, on its supplier, Southern Natural Gas Company's system. The revised tariff filing is composed of:

Original Volume No. 1

Substitute Revised Sheet No. 3-A
Substitute Revised Sheet No. 3-B

Original Volume No. 2

Substitute 20th Revised Sheet No. 128

Listed below is a table summarizing the effect of the Commission's letter order on FGT's jurisdictional rates to be effective April 1, 1983.

FGT JURISDICTIONAL RATES EFFECTIVE APR. 1, 1983

(In cents)

	As adjusted	As originally filed	Difference
Rate Schedule G (/ Therm)	33.204	33.242	(.038)
Rate Schedule I (/Therm)	32.404	32.442	(.038)
Rate Schedule T-3 (/ Therm)	43.68	43.69	(.01)

FGT states that a copy of its filing has been served on all customers receiving gas under its FERC Gas Tariff, Original Volume Nos. 1 and 2 and interested state commissions and is being posted.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, before April 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-435-000]

Central Maine Power Co.; Filing

April 8, 1983.

The filing Company submits the following:

Take notice that Central Maine Power Company (CMP) on March 31, 1983, tendered for filing an initial rate for transmission service to be provided to Commonwealth Electric Company by CMP over its Pool Transmission Facilities system.

CMP states that the rate applicable to the provision of transmission service is $7.83 per kW per year determined pursuant to the formula contained in Attachment 2, filed by CMP and pursuant to the formula in said rate will be updated annually as provided therein.

CMP requests an effective date of April 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon Commonwealth Electric Company, the Maine Public Utilities Commission and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 26, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9829 Filed 4-13-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-437-000]

Commonwealth Edison, Co.; Filing

April 8, 1983.

The filing Company submits the following:

Take notice that on March 31, 1983, Commonwealth Edison Company (Commonwealth) tendered for filing proposed changes in its FERC Electric Service Tariff Rate 78 and Riders 7 and 8. The proposed changes would increase revenues from jurisdictional sales and service by $8,619,900 based on the 12 month period ending December 31, 1983.

Commonwealth requests an efective date of March 31, 1983.

Copies of the filing were served upon the customers affected by the filing and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 26, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9830 Filed 4-13-83; 8:45 am]

[Docket No. ER83-440-000]

Connecticut Light and Power Co.; Filing

April 8, 1983.

The filing Company submits the following:

Take notice that on April 1, 1983, the Connecticut Light and Power Company (CL&P) tendered for filing as an initial rate schedule an agreement (the Agreement) between CL&P, Western Massachusetts Electric Company (WEMCO), and together with CL&P, the

NU Companies) and Niagra Mohawk Power Corporation (Niagra). The Agreement, dated as of July 1, 1982, provides for the NU Companies to sell to Niagra excess energy from the systems of the Northeast Utilities Companies (system enereg) that may be available on a daily basis (a transaction). CL&P states that the timing of transactions cannot be accurately estimated but that the NU Companies would offer to sell such system energy to Niagra only when it was economic to do so. Niagra would only accept such offer it it was economical to do so.

CL&P states that Niagara will pay an energy reserevation charge to the NU Companies for each transaction in an amount equal to the megawatthours of system energy reserved for Niagara by the NU Companies during a transaction multiplied by the energy reservation charge rate negotiated prior to each transaction. Niagara will pay any energy charge to the NU Companies for each transaction in an amount equal to the megawatthours delivered by the NU Companies during such transaction times an energy charge rate. The energy charge rate is based on the heat rate, and the replacement fuel price of the generating unit(s) which the NU Companies determine to be available to provide energy at the time of a transaction.

CL&P requests an effective date of July 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served upon WEMCO and Niagara.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR Sections 385.211, 385.214). All such motions or protests should be filed or or before April 26, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9831 Filed 4-13-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-448-000]

Connecticut Light and Power Co.; Filing

April 8, 1983.

The filing Company submits the following:

Take notice that on April 4, 1983, the Connecticut Light and Power Company (CL&P) tendered for filing as an intitial rate schedule and agreement (the Agreement) between CL&P Western Massachusetts Electric Company (WMECO, and together with CL&P, the NU Companies) and Taunton Municipal Lighting Plant (Taunton). The Agreement, dated as of December 13, 1982 provides for the NU Companies to sell to Taunton excess power from the system of the NU Companies ("system power") that may be available on a daily or weekly basis (a transaction). CL&P states that the timing of transactions cannot be accurately estimated but that the NU Companies would offer to sell such system power to Taunton only when it was economic for them to do so. Taunton would accept such an offer only if it was economic for Taunton to do so.

CL&P states that Taunton will pay a capacity charge to the NU Companies for each transaction in an amount equal to the kilowatthours of system capacity utilized by the NU Companies to supply system power to Taunton during a transaction, times a rate negotiated between the parties prior to each transaction, not to exced $0.0175 per kilowatthour. Taunton will also pay any energy charge to the NU Companies for each transaction in an amount equal to the kilowatthours provided by the NU Companies during such transaction times an energy charge rate. The energy charge rate is based on the heat rate and the replacement fuel price of the generating unit(s) which the NU Companies determine to be available to provide power at the time a transaction is agreed to by the parties.

CL&P requests an effective date of December 13, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been mailed to WMECO and Taunton.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ES83-37-000]

Gulf States Utilities Co.; Application

April 8, 1983.

Take notice that on March 30, 1983, Gulf States Utilities Company filed an application seeking an order disclaiming jurisdiction under Section 204(a) of the Federal Power Act or an order authorizing the Applicant under Section 204(a) of the Federal Power Act to enter into a lease transaction of the River Bend Simulator and Training Center.

Any person desiring to be heard or to make any protest with reference to the said application should on or before April 22, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). The application is on file with the Commission and is available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ES83-38-000]

Idaho Power Co.; Application

April 8, 1983.

Take notice that on April 1, 1983, Idaho Power Company (Applicant) filed an application with the Federal Energy Regulatory Commission, pursuant to Section 204 of the Federal Power Act, seeking an Order authorizing the issuance and sale of up to 1,000,000 shares of Common Stock, par value of $5 per share, pursuant to the Applicant's Employee Stock Ownership Plan.

Any person desiring to be heard or to make any protest with reference to said application, should, on or before April 21, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions or protests in accordance with requirements of Commission's Rules of Practice and

Procedure (18 CFR 385.211 or 385.214). The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9834 Filed 4-13-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-438-000]

Montana Power Co.; Filing

April 8, 1983.

The filing Company submits the following:

Take notice that the Montana Power Company (Montana) on March 31, 1983, tendered for filing its proposed Rate Schedule REC-83 applicable for sales to Big Horn County Electric Cooperative, Inc. (currently served under FERC Rate Schedule No. 40, Supplement No. 5), and Central Montana Generation & Transmission Cooperative, Inc. (currently served under FERC Rate Schedule No. 39, Supplement No. 10).

Montana states that based on the test year ending December 31, 1981, proposed Rate Schedule REC-83 would have provided it with increased revenues of $999,999 from sales to Big Horn and Central Montana. Montana further states that the rate increase has become necessary as a result of increasing cost being incurred in providing service to these customers.

Montana has proposed that rate Schedule REC-83 become effective with meter readings on or after June 1, 1983. However, in accordance with a Settlement Agreement entered in FERC Docket No. ER81-282-000, the Company has requested that the Commission suspend the effectiveness of the proposed rates for one month, effective with meter readings on or after July 1, 1983.

Copies of the filing were served upon Big Horn and Central Montana and upon the Montana Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 26, 1983. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. G-5716-009, et al.]

Northern Natural Gas Producing Company, et al.; Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

April 8, 1983.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before April 22, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiciton conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[1]Lease dated September 20, 1939 (T-37599) between Rose Duncan *et al.*, lessors and Northern Natural Gas Company, lessee, was assigned to Hoyt Hudspith on October 4, 1982, but effective as of July 15, 1982.

[2]On January 26, 1983, but effective as of December 4, 1982, Northern Natural Gas Producing Company assigned this lease (-3214) to Sidwell Oil and Gas Inc.

[3]Filing an Application to Partially Abandon Service for a Limited Period of Time to permit Union to use that portion of residue gas which the buyer has informed Union that it is no longer able to purchase at the present time.

[4]To release gas for irrigation fuel.

[5]At the Demand of the Louisiana State Mineral Board, Shell Offshore Inc. surrendered some 374.84 acres in Block 1666 rather than undertaking additional drilling on that acreage.

[6]Release of Oil, Gas and Mineral Lease dated May 21, 1973 wherein TransOcean Oil, Inc. (predecessor to MOEPSI) relinquished all of its rights, title and interest in State Lease No. 3532 unto the State of Louisiana.

[7]By assignment of Oil and Gas Lease, effective December 3, 1982, Mobil assigned to Crown Central Petroleum Co. all of its right, title and interest in and to that certain producing acreage fully described in said partial assignment of Oil and Gas Lease.

[8]Sun released all rights to economically recoverable reserves had been depleted.

[9]Farmout to Texoma Production Company.

[10]Insufficient reserves for development.

[11]Not used.

[12]Hattbe Price Gas Unit Well #1 was plugged and abandoned December 12, 1973. All the leases within the unit are past primary term and no other production exists on subject unit.

[13]Property sold to Sage Energy Company.

[14]The Wrage-Hendrickson Lease was not assigned to MPTM since the lease was surrendered prior to the TransOcean acquisition. TransOcean's regulatory files indicates no filing was made for abandonment of service in Docket No. G-7389.

[15]Applicant is filing under Gas purchase Contract dated January 1, 1983.

[16]In order to negotiate a sale with another purchaser, and thus provide continuity of recovery, Seller needs to abandon service under the subject contract otherwise, Seller's lease is in jeopardy.

[17]Contract amended to delete gas well and casinghead gas from depths below 15,000 feet underlying Sections 59 and 78 in Block 41, HT&C R.R. Survey, Hemphill County, Texas.

[18]By Assignment dated as of January 18, 1980, TransOcean assigned to Hassie Hunt Exploration Company and William Exploration Company 72% of its right, title and interest in and to that certain producing acreage.

Filing Code: A—Initial Service. B—Abandonment. C—Amendment to add acreage. D—Amendment to delete acreage. E—Total Succession. F—Partial Succession.

BILLING CODE 6717-01-M

[Docket No. ER83-424-000]

Pacific Power & Light Co.; Notice of Filing

April 8, 1983.

The filing Company submits the following:

Take notice that Pacific Power & Light Company (Pacific) on March 30, 1983, tendered for filing an application for an increase in rates for service to:

Proposed supplement No.	Customers	Existing FERC/FPC rate schedules	Proposed tariff service schedule
4	Town of Torrington, Wyo	126	PPL-4.
1	Montana-Dakota Utilities, Co	FERC Docket No. ER83-395-000	PPL-4.
4	City of Powell, Wyo	119	PPL-5.
4	Town of Deaver, Wyo	121	PPL-5.
3	Svilar Light & Power, Inc.	202	PPL-5.
2	Town of Basin, Wyo	222	PPL-5.

The proposed changes would increase revenues from jurisdictional sales and service by $2,246,581 based on the 12-month period ending Dcember 31, 1981.

Pacific states that the proposed changes have been filed to partially recover the cost of Pacific's investment, operating expenses and capital costs. Pacific requests an effective date of June 1, 1983.

Copies of the filing were served upon Public Service Commission, of the State of Wyoming.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 26, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-49-000]

Montana-Dakota Utilities Co.; Purchased Gas Cost Adjustment Filing

April 7, 1983

Take notice that on March 31, 1983, Montana-Dakota Utilities Company (MDU) submitted for filing as part of its FERC Gas Tariff the following tariff sheets:

Original Volume No. 4

Twenty-third Revised Sheet No. 3A
First Revised Sheet No. 3B

First revised Volume No. 2

Eighteenth Revised Sheet No. 10
First Revised Sheet No. 10A

The proposed effective date of MDU's PGA filing is May 1, 1983.

MDU states that this tariff filing is being made pursuant to the Purchased Gas Cost Adjustment Provisions of its FERC Gas Tariff. The proposed changes include a gas cost adjustment increase of 54.397 cents per Mcf to Rate Schedules G–1, PR–1, and I–1, and X–1. In addition, MDU proposes a surcharge adjustment of 23.072 cents per Mcf applicable to Rate Schedules G–1, PR–1, and I–1. MDU is also filing, concurrently herewith, a petition for adjustment under 502(c) of the Natural Gas Policy Act of 1978 for relief from the incremental pricing supplement required to be part of this PGA filing by §§ 282.502 and 282.602(d) of the Commission's regulations.

Rate Schedule X–4 shows an increased gas cost adjustment of 70.626 cents per Mcf and a surcharge adjustment of 77.267 cents per Mcf. The proposed changes are supported by exhibits attached to the filing.

In addition, MDU states that, pursuant to an order issued by the Commission on February 19, 1982, in Docket No. CP81–316–000, MDU was authorized to commence off-system sales to Colorado Interstate Gas Company (CIG) and MIGC, Inc. under MDU's Rate Schedules X–5 and X–6, respectively. Eighteenth Revised Sheet No. 10 reflects a gas cost adjustment of 25.945 cents per Mcf for the sales to CIG under Rate Schedule X–5.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such Petition or protests should be filed on or before April 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-9845 Filed 4-13-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-29-000]

Transcontinental Gas Pipe Line Corp.; Tariff Filing

April 7, 1983.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on March 30, 1983 Twenty-Sixth Revised Sheet No. 12, Twenty-Sixth Revised Sheet No. 15 and Ninth Revised Sheet No. 16 to Second Revised Volume No. 1, and Thirty-Second Revised Sheet No. 121 to Original Volume No. 2 of Transco's FERC Gas Tariff. These tariff sheets, which are proposed to be effective May 1, 1983, reflect a net increase of 21.8¢ per dekatherm (dt) in the commodity or delivery charge of Transco's CD, G, OG, E, PS and S–2 rate schedules, a net increase of 22.0¢ per dt in the commodity charge under the ACQ rate schedule, and a net decrease of 0.2¢ per dt in the delivery charge of the X–20 rate schedule.

Transco states that these changes have been computed in accordance with applicable tracking provisions contained in the General Terms and Conditions of its FERC Gas Tariff, Second Revised Volume No. 1. The tracking rate change under Transco's PGA clause amounts to an increase 22.0¢ per dt in the commodity or delivery charge in its CD, G, OG, E, PS, S–2 and ACQ rate schedules. This increase is comprised of a 4.8¢ per dt decrease in the Deferred Adjustment offset by a 26.8¢ per dt increase in the current gas cost adjustment. The decrease in the Deferred Adjustment represents the difference between the currently effective positive Deferred Adjustment of 19.3¢ per dt and the proposed positive Deferred Adjustment of 14.5¢ per dt required to eliminate, over the six-month period commencing May 1, 1983, the debit balanced of $53,009,565 accumulated in Transco's Unrecovered Purchased Gas Cost Account at February 28, 1983. Transco further states that its tracking rate change to reflect curtailment credits is a decrease of 0.2¢ per dt in the commodity or delivery charge under its CD, G, OG, E, PS, S–2 and X–20 rate schedules. This decrease represents the difference between the currently effecitve positive unit adjustment of 0.1¢ per dt and the proposed negative unit adjustment of 0.1¢ per dt, and is designed to eliminate, over the six-month period beginning May 1, 1983, the estimated credit balance in the Deferred Account as of April 30, 1983 in accordance with Section 20 of the General Terms and Conditions of Second Revised Volume No. 1 of Transco's FERC Gas Tariff.

The Company states that copies of the filing are being mailed to each of its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before April 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA-83-1-50-000]

Valley Gas Transmission, Inc.; Purchased Gas Cost Adjustment Filing

April 7, 1983.

Valley Gas Transmission, Inc. ("Valley"), on March 31, 1983 submitted for filing as part of its FERC Gas Tariff. Original Volume No. 1, its proposed "Twenty-Fourth Revised Sheet No. 2A". The proposed effective date is May 1, 1983.

Valley states that this tariff sheet is filed pursuant to its currently effective Purchased Gas Cost Adjustment Provision. The proposed changes involve Valley's "Current Surcharge Adjustment" and "Current Gas Cost Adjustment." The adjustments are supported by computations attached to the filing.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission,

825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before April 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of the filing are on file with the Commission and available for public inspection.

Office of the Secretary

Voluntary Agreement and Plan of Action To Implement the International Energy Program; Meeting

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation aCt (42 U.S.C. 6272), the following meeting notice is provided:

A meeting of the Industry Working Party (IWP) of the International Energy Agency (IEA) will be held on April 21 and 22, 1983, at the offices of the IEA, 2 Rue Andre Pascal, Paris 16, France, beginning at 9:00 a.m. on April 21. This meeting is being held in order to permit attendance by representatives of the IWP at a meeting of the IEA Standing Group on the Oil Market (SOM) which is being held in Paris on those dates.

The agenda for the meeting is under the control of the SOM. It is expected that the following agenda will be followed:

1. Adoption of provisional agenda.
2. Today's oil market:
   a. End March oil market assessment;
   b. April update; and
   c. Status report on publication of oil market assessment.
3. Review of the Financial Information System:
   a. IWP report; and
   b. Secretariat note.
4. Medium-term issues:
   a. The futures market;
   b. Oil price analysis; and
   c. Structural *vs.* cyclical change and oil demand.
5. Product price controls' effect on oil demand:
   a. Secretariat note.
6. Consultation with oil companies:
   a. Mobil presentation, April 21, 3:00 p.m.; and
   b. Petrofina presentation, April 22, 10:00 a.m.
7. Other business.
8. Date of next meeting.

Representatives of the IWP will be present during discussion of Item 3.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting will not be open to the public.

Issued in Washington, D.C., April 8, 1983.

Craig S. Bamberger

Assistant General Counsel, International Trade and Emergency Preparedness.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. EL82-21-000]

Sacramento Municipal Utility District v. Pacific Gas & Electric Co., et al.; Order Interpreting Contract, Granting Motion for Summary Disposition, and Granting Requests for Declaratory and Other Relief

Issued: April 8, 1983.

On July 30, 1982, the Sacramento Municipal Utility District (SMUD), pursuant to section 306 of the Federal Power Act,[1] submitted a complaint against Pacific Gas and Electric Company (PG&E), Southern California Edison Company (SCE), and San Diego Gas and Electric Company (SDG&E) (collectively referred to as the "Companies") which alleges that the Companies have wrongfully refused to provide SMUD with transmission service over the Pacific Northwest Intertie (Intertie). SMUD requests an order declaring its right to receive up to 200 MW of firm transmission service over the Intertie pursuant to its contract with the Companies, and an order requiring that the Companies provide such service.

I. Background

The instant dispute involves the provisions of SMUD's contract with the Companies for transmission service over the Pacific Northwest Intertie.[2] Some brief background regarding the construction of the Intertie and the execution of SMUD's contract with the Companies may be helpful.

The Intertie is a series of extra-high-voltage (EHV) transmission lines connecting the Pacific Northwest with the Pacific Southwest. At the time the contracts for construction of the Intertie were signed in 1967, the Department of Interior, which supervised much of the planning of the Intertie, described the project as follows:[3]

> The Intertie package is composed of * * * major extra high voltage transmission lines * * * and attendant lines of lesser voltages that will form a huge grid capable of moving * * * power north or south according to seasonal diversities and peak demands.
>
> The Intertie lines will interconnect the predominantly hydropower-based Pacific Northwest, which has a peak load of about 15,000,000 kilowatts, with the predominantly thermal power-based Pacific Southwest, with a peak load of about 20,000,000 kilowatts. The Intertie involves the coordinated planning and operation of more than 50 utilities representing every segment of the electric utility industry.

Throughout years of debate prior to construction of the Intertie, a central question was whether greater benefits would be derived from a federally owned and operated intertie or a system built with significant private sector involvement.[4] Thus, when the Congress appropriated funds to the Bonneville Power Administration in 1963 to initiate federal construction of EHV transmission lines connecting federal hydro-electric projects in the Pacific Northwest and Pacific Southwest, it included the following caveat:[5]

> [c]onstruction shall not begin unless the Secretary of the Interior finds, after good faith negotiations with utilities and other entities interested in constructing any portion of the lines involved, that their proposals will

---

[2] SMUD is a municipal utility district engaged in the generation and distribution of electric power to retail customers within its boundaries, which encompass most of the County of Sacramento, and a small portion of the County of Placer, in California.

The Companies are investor-owned utilities which operate electric generation, transmission, and distribution systems in California. PG&E serves northern and central California, SCE serves central and southern California, and SDG&E serves primarily the City of San Diego and its surrounding area.

not result in benefits to the national interest at least equal to those to be derived from Federal construction * * *.

To implement this Congressional directive, the Department of Interior entered into negotiations with non-federal entities regarding construction of an intertie, and developed a "federal yardstick proposal" by which to judge non-federal proposals.[6] PG&E, SCE, and SDG&E, acting collectively as the California Power Pool, submitted one of ten proposals received by the Department of Interior to construct portions of an intertie.[7] The Companies' original proposal, as well as revised proposals, included a commitment to provide transmission service over the intertie to various state and municipal entities in California, including SMUD.[8]

In June of 1964, the Department of Interior recommended an intertie plan which included the proposal submitted by the Companies,[9] and shortly thereafter Congress appropriated money to initiate the plan.[10] SMUD's contract with the Companies for transmission service over the Intertie was one of a number of contracts signed in 1967 as part of the Intertie package.

Under the contract (Article 9), the Companies agreed to provide SMUD: (1) up to 200 MW of firm transmission service (400 MW for the period April 1, 1971 through March 31, 1976) to transmit power and energy to or from any Pacific Northwest entity; and (2) interruptible transmission service for up to 225 million kWh of Northwest dump energy during any 12-month period. To change reservations of firm transmission service, the contract provides that SMUD must give the Companies five years advance notice (Article 10a), and further provides that SMUD may not request an increase in firm service after any previous decrease in such service (Article 10d).[11] However, the latter restriction, referred to as the "anti-yo-yo clause," provides a specific exception for changes required to accommodate changes in SMUD's allotment of Canadian Entitlement Power (CEP), that is, power from Northwest entities acquired pursuant to various Canadian Entitlement Exchange Agreements. The instant dispute focuses primarily on the operation of the anti-yo-yo clause.

II. The Dispute

In its complaint,[12] SMUD alleges that it has attempted to schedule transmission service over the Intertie in accordance with the terms of the contract, but has been refused service by the Companies. SMUD asserts that the refusal violates the parties' contract, commitments made by the Companies to the federal government as conditions to their ownership of portions of the Intertie, and license conditions imposed on PG&E in connection with the Stanislaus Nuclear Project, Unit 1.

Specifically, SMUD states that in accordance with the contract it gave the Companies initial notice and subsequent notices of transmission service to be used for the importation of CEP. However, in 1970, SMUD states that it was notified by its Northwest suppliers that its share of CEP would be totally withdrawn, and shortly thereafter notified the Companies that it would decrease its service under the contract to zero to accommodate the withdrawal. According to SMUD, in 1973 it attempted to schedule service for 1978 to transmit power purchased from the Bonneville Power Administration (non-CEP), but was advised by the Companies that its requested increase in service after a previous decrease in service violated the anti-yo-yo provision of the contract. Accordingly, SMUD was refused service.

SMUD states that it immediately disputed the Companies' interpretation of the contract contending that its requested increase in service after a previous decrease was specifically excepted from the anti-yo-yo provision because the decrease was made to accommodate a change in SMUD's allocation of CEP. The Companies maintained their position that SMUD is not entitled to the requested transmission service, and thus SMUD has filed its complaint before this Commission.

The Companies individually filed answers to SMUD's complaint which deny that their refusal to provide transmission service to SMUD is in any way wrongful. The Companies' principle argument is that the anti-yo-yo clause of Article 10d prohibits any increase in transmission service after any decrease in service, unless the increase is for the purpose of transmitting CEP. Therefore, the Companies argue that SMUD's requested increase in service (after a previous decrease) for the purpose of transmitting power from the Bonneville Power Administration is prohibited under Article 10d. According to the Companies, SMUD could have retained its reservation of Intertie capacity after its CEP allocation was withdrawn only by continuing to request and pay for such reservations.

A slightly different interpretation of Article 10d, which has been referred to as the "minor variations theory," is advanced by SDG&E and to some extent by PG&E. According to this theory, the CEP exception to the anti-yo-yo clause was intended to provide for minor variations in the approximate range of five to fifteen megawatts in SMUD's CEP allocation, but not to any major drop or subsequent rise in SMUD's Intertie reservation. SDG&E states that the parties' failure to foresee SMUD's eventual circumstances and limit the CEP exception accordingly, was a mutual mistake of fact justifying reformation of the contract.

The Companies also offer an argument unrelated to SMUD's use of CEP. The Companies point out that subsequent to its 1973 request to reserve 100 MW for 1978 to transmit power purchased from Bonneville Power Administration, SMUD, by letter dated September 17, 1975, sought to postpone its 100 MW reservation until 1980. Similar postponements were requested in 1976 and 1977, with the result that SMUD ultimately sought to commence its service on June 1, 1982.[13] The Companies contend that the requested postponements constituted *de facto* decreases in service which were followed by requested increases in service in violation of Article 10d.

Finally, the Companies argue that SMUD has waited too long to bring its complaint and, therefore, is barred from relief under the doctrine of laches. The Companies request that the Commission

[11] The pertinent language of Article 10d is quoted at p. 8 *infra.*

[12] Notice of SMUD's complaint was published in the Federal Register with comments due on or before September 13, 1982. An extension of the time to file comments was later granted until September 30, 1982.

[13] The pleadings indicate that SMUD tendered a check for $28,000 as payment for the June, 1982 reservation. That check was returned to SMUD on the grounds that SMUD had relinquished its right to the requested service.

either: (1) Dismiss the complaint, or (2) issue a declaratory order stating that SMUD is not entitled to any amount of Intertie capacity.

On November 22, 1982, SMUD submitted a motion for summary disposition. In its motion, SMUD reviews each of the arguments advanced by the Companies and concludes that they are refuted by the plain, clear language of the contract, as well as by extrinsic evidence of the parties' intent. Accordingly, SMUD argues that the Commission should rule in its favor as a matter of law.

The Companies jointly filed a response to SMUD's motion on January 21, 1983,[14] identifying three issues which the Companies contend are material issues of fact precluding summary disposition. Specifically, the Companies state that material issues exist with respect to: (1) The effect under the contract of SMUD's reduction of its transmission service to zero in 1975; (2) the effect under the contract of SMUD's postponement of service notices; and (3) whether SMUD had reserved transmission service for *non-CEP* prior to its reduction of service to zero in 1975. In this pleading, the Companies allege for the first time that SMUD, in fact, previously received transmission service over the Intertie for power other than CEP. In addition, the companies state that they have not yet had an opportunity to conduct discovery, and thus summary disposition at this stage of the proceeding would be inappropriate.

On, February 14, 1983, SMUD filed a further response to the Companies which was accompanied by a motion for leave to file such a pleading. SMUD's pleading states that each of the issues raised by the Companies presents a question of law which should be disposed of on the pleadings in SMUD's favor. In addition, the pleading acknowledges that SMUD had taken service for non-CEP prior to reducing its service to zero, but states that under the terms of the contract its prior non-CEP service does not jeopardize its right to future transmission service.

On March 1, 1983, the Companies filed a response opposing acceptance of SMUD's latest pleading. The Companies state that SMUD's pleading is an attempt to alter its position and should be rejected as an unauthorized answer under the Commission's regulations.

[14] In response to a request filed by SCE on behalf of the Companies on December 1, 1982, the time to respond to the motion for summary disposition was extended to January 21, 1983.

III. Discussion

Article 10d of the parties' contract provides in pertinent part that:

> (d) Sacramento shall not, with respect to the amount of transmission service to be made available in any month under Article 9(a) and (b), be entitled to . . . an increase in such amount after any previous decrease in such amount of service. The limitations contained in this paragraph shall not apply to changes required to accommodate changes in amounts of Canadian Entitlement Power assigned by Northwest Entities to Sacramento pursuant to the provisions of the Canadian Assignment Agreement.

Article 10d prohibits a "yo-yoing" up and down of SMUD's transmission reservations, according to the Companies, to assure efficient planning of Intertie capacity. However, Article 10d excepts CEP transactions from this limitation for the purpose, according to SCE, of providing SMUD "flexibility in dealing with the uncertainty of the annual variations in the amounts of CEP to be made available to SMUD." (SCE, Answer to Complaint at 5).

Examining SMUD's conduct under Article 10d, we find that by notice given on March 26, 1971, SMUD reduced its service to zero for 1975 upon the withdrawal of its entire share of CEP, and by notice in 1973, SMUD requested an increase in service to transmit power of the Bonneville Power Administration for 1978. Thus, the pivotal issue in this proceeding is whether SMUD's requested increase in service is prohibitied by the anti-yo-yo clause because it followed a prior decrease in service, or whether SMUD's fluctuation in service is protected by the CEP exception of Article 10d. Assuming for the moment that prior to its reduction of service to zero in 1975 SMUD had reserved service under Article 9(a) and (b) *only* for CEP, we think it clear that SMUD is protected in this matter from operation of the anti-yo-yo clause.

To reach this conclusion, we need only look at SMUD's actions in light of the plain, clear language of the contract. It is evident that SMUD's 1971 notice to reduce its transmission service to zero was made for the reason that its allocation of CEP was withdrawn. Accordingly, so long as no non-CEP transmission had previously been provided to SMUD, its 1971 notice of a decrease in service was a change required exclusively to accommodate a change in SMUD's allotment of CEP and, as such, it falls squarely within the protection of the CEP exception of Article 10d. When SMUD sought to initiate service in 1973 for non-CEP, this action could be construed as an increase after a decrease only because of the prior reduction in CEP service which, as we have noted, is a protected transaction. Therefore, we find the SMUD's conduct would not trigger the anti-yo-yo clause but, rather, would be protected by the CEP exception of Article 10d.

The Companies' interpretations of Article 10d seek to impose restrictions on SMUD which are absent from the contract and which are inconsistent with its express terms. The Companies' principal argument is that under Article 10d, SMUD was not entitled to increase its service to transmit non-CEP after its prior reduction in service. The Companies contend that SMUD's decision to decrease service following the withdrawal of its CEP allotment was totally voluntary, and that SMUD should have continued paying for service, whether it used it or not, in order to maintain its right to future transmission service over the Intertie.

This argument must fail for two reasons. First, it is apparent that Article 10d recognizes the volatile and uncertain nature of SMUD's allocation of CEP by insulating CEP transactions from the prohibition against "yo-yoing" of service. It would be inconsistent with the clear language of Article 10d to suggest, as the Companies do, that SMUD could suffer a complete forfeiture of its right to transmission service over the Intertie as a result of a decrease in service made solely to accommodate a change in its allocation of CEP. This result is exactly what the CEP exception of Article 10d protects against.

Second, the Companies' assertion the SMUD was required to continue paying for service after its CEP allotment was withdrawn (but before any non-CEP reservation was made) in order to maintain any future right to service is simply unsupported in the contract. Although SMUD was obligated under Article 13a to pay for firm service reserved under Article 9(a) and (b), nothing in the contract required SMUD to continue payments after its CEP allotment was withdrawn, in the absence of any firm reservations, simply to maintain its right to make future reservations. Indeed, the Companies do not cite any section of the contract which embodies this requirement. Rather, they state that the parties' intent is reflected in the following passage of an October 7, 1965 letter from SMUD's general counsel to PG&E's counsel (*See* Exhibit H of SMUD's complaint):

> 4. At the time SMUD's allocation of CEP plus Pacific's allocation of CEP is reduced to less than the 200 mw guaranteed SMUD due to reductions made pursuant to the Assignment Agreement, SMUD may choose

to retain the full 200 mw, or any lesser amount, of transmission capacity by continuing payments therefor.

This passage, however, provides no help for the Companies. As explained by SMUD, the passage refers not to SMUD's reservation of capacity for CEP under Article 9,[15] but rather to certain purchases by SMUD of the Companies' allocation of CEP under Article 17 of the contract. Consequently, the limitation of Article 10d, by its own terms,[16] does not apply. Upon analysis, we find SMUD's reading of the quoted passage to be reasonable and consistent with other provisions of the contract, and we find the Companies' interpretation to be unsupported and inconsistent with express terms of the contract.[17]

Likewise, the Companies' "minor variations" theory, *i.e.*, that Article 10d sought to provide for only minor fluctuations in SMUD's allotment of CEP, is unsupported by and inconsistent with the express language of the contract. The Companies acknowledge that the language of the Article 10d exception is not limited to minor variation in SMUD's allotment of CEP, but state that the absence of such a restriction is a mutual mistake of fact justifying reformation of the contract. We disagree. Given its clear, ordinary meaning, Article 10d expressly excepts SMUD's reduction of service to zero upon withdrawal of its allotment of CEP from operation of the anti-yo-yo provision. We find no reason to modify the express language of the contract. Moreover, we note from the Companies' pleadings that at the time they entered into the contract they recognized that SMUD's allotment of CEP would eventually be withdrawn.[18] Thus, the Companies could have specifically provided for this circumstance in the contract had they so desired. For these reasons, we find that the CEP exception of Article 10d should be applied in accordance with its clear, express terms, and that the Companies' "minor variations" theory must be rejected.

We now turn to the Companies' argument, labeled by SMUD the "*de facto* decrease" theory, which suggests that SMUD's 1975, 1976, and 1977 letters requesting postponements in its non-CEP transmission service were *de facto* decreases in service which violate the anti-yo-yo provision of Article 10d. Without reaching the question of whether the requested postponements were *de facto* decreases in service, we find for two reasons that the letters do not preclude SMUD from receiving transmission service over the Intertie.

The first reason that the requested postponements cannot prejudice SMUD is that they were never given effect by the Companies. Indeed, the Companies contend that there was never a reservation of non-CEP in 1973 which SMUD could have sought to postpone. This point was explained by SDG&E in its answer to SMUD's complaint (at 8) as follows:

> SMUD made its first formal written request for the subject intertie capacity in May, 1973. Informal denials by and on behalf of the other parties followed, and a formal written denial was submitted to SMUD in April 1976. (note omitted).

The "formal written denial" cited by SDG&E was a response by PG&G to SMUD's 1975 request for postponement of its non-CEP service. Although the PG&E letter states that SMUD's request "is noted," it does so without prejudice to the Companies' position that SMUD is not entitled to any transmission service in the first instance.

Further evidence of the fact that the Companies declined to give the postponements effect is the simple fact that the Companies refused to provide service on June 1, 1982, the date that it would have been due had the postponements been made effective.[19] It is apparent that SMUD's request for service was not postponed by the Companies but rather, it was totally rejected by the Companies.

The Companies cannot have it both ways. They cannot be heard to say, on the one hand, that SMUD's requests were effective to postpone or reduce its reservations of transmission service, but on the other hand, contend that the requests were ineffective to create such reservations. The Companies rejected SMUD's requests to reserve or change its reservations of transmission service over the Intertie, and will not now be allowed to raise those requests as evidence of a decrease in reservations by SMUD.

The second reason that the requested postponements can not be construed as prejudicing SMUD is that by their own terms the requests were not to be made effective if they would be deemed decreases in service for purposes of Article 10d. Each request stated that:

> This alteration is subject to the condition that this change in dates is not to be deemed a "decrease in [the] amount of service" as that phrase is used in the first sentence of Article 10(d) of the aforesaid contract.

By making the alteration subject to the stated condition, SMUD chose to forego the alteration in the event that it would be deemed to trigger Article 10d and preclude any future transmission service. Give the Companies' stated interpretation of SMUD's action, the alteration, by its own terms, was made ineffective.

The Companies' final argument is that SMUD is barred from a remedy by the doctrine of laches. The Companies contend that SMUD was notified that the Companies would not provide service in 1973, and that SMUD impermissibly waited until July 30, 1982 to commence its action. We do not agree. SMUD has alleged a claim against the Companies in the nature of a continuing violation and has not requested any damages for past wrongdoing. Rather, SMUD has requested a declaration concerning its present rights under the contract and an order granting prospective relief. Furthermore, while SMUD perhaps should have anticipated the events that would follow and could have sought interpretive relief as early as 1973, it experienced no actual harm until the desired service was withheld in 1982. Under these circumstances, whether or not we would otherwise find it appropriate to apply the doctrine of laches, we do not believe that the doctrine is properly invoked in this case.

Having disposed of each of the arguments advanced in the Companies' answers to SMUD's complaint, we shall now consider whether summary disposition is appropriate as requested by SMUD. As we have noted previously, the Companies allege that three material issues of fact preclude summary disposition. However, two of the issues identified by the Companies, *i.e.*, the effect of SMUD's reduction of service to zero in 1975, and the effect of SMUD's postponement of service notices, are not questions of fact, but rather are questions of law which turn on the interpretation of contract terms. Moreover, these two questions have been discussed and disposed of previously in this order and, consequently, they do not stand in the way of summary disposition.

The only salient fact raised by the Companies concerns their contention that in 1971 and 1972 SMUD took

[15] Article 10d specifically states that it applies only to transmission service made available under Article 9 (a) and (b).

[16] *See id.*

[17] *See* Articles 9, 10, and 13.

[18] *See*, SCE, Answer to Complaint at 6; SDG&E, Answer to Complaint at 5; Response to Motion for Summary Disposition at 18.

[19] Letter by H.P. Braun to William C. Walbridge, included in Exhibit J to SMUD's complaint. The letter provides in pertinent part that:

> This is in response to [SMUD's] check for transmission service for June 1982. . . [n]one of the California Companies agrees with Sacramento's claim that Sacramento has the right to such service. Therefore, I am returning Sacramento Municipal Utility District's check * * *.

transmission service under Article 9 (a) and (b) for non-CEP prior to reducing its service to zero in 1975. We note that this contention, which is raised for the first time in the Companies' response to SMUD's motion for summary disposition, directly contradicts the position taken in an earlier Company pleading. In its answer to SMUD's complaint (at 2), SDG&E states that it is an undisputed fact that through March 1975 SMUD used Intertie capacity "solely" to import CEP.

The Companies' latest allegation is relevant in light of our prior analysis of SMUD's rights under the contract. As we note at page 8, *supra*, our conclusion that SMUD is protected from operation of the anti-yo-yo clause is based on the assumption that SMUD did not reserve service for non-CEP entitlements under Article 9 (a) and (b) prior to reducing its service reservation to zero in 1975. If, however, SMUD had previously reserved service under Article 9 (a) and (b) for non-CEP, then its reduction of service to zero might not have been solely the result of its withdrawal of CEP and, consequently, its subsequent request to increase service to transmit power from the Bonneville Power Administration may be prohibited by the anti-yo-yo clause.

In its February 14, 1983 reply to the Companies, SMUD states that it does not dispute the underlying facts regarding its service for non-CEP; however, it does dispute the consequences of such service under the contract. Specifically, SMUD concedes that it took service for non-CEP in 1971 and 1972 and further acknowledges that such service made use of capacity which was reserved under Article 9 (a) and (b). However, SMUD states that the service, which was used to transmit interruptible Northwest dump energy,[30] did not result in an increase or decrease in its reservations under Article 9 (a) and (b), but merely made use of otherwise unutilized CEP capacity reservations which were previously made. Moreover, SMUD states that Article 13 of the contract, a billing provision, contemplates such purchases of Northwest dump energy and reflects the understanding that such transactions do not change the amount of service reserved under Article 9 (a) and (b).

[30] SMUD states that it used excess CEP capacity to transmit Northwest dump energy in 1971 and 1972 as follows:

March, 1971, 11,906,940 kWh
April, 1971, 9,901,440 kWh
May, 1971, 12,010,080 kWh
June, 1971, 630,300 kWh
March, 1972, 8,239,740 kWh
May, 1972, 20,121,850 kWh

Article 13 provides in pertinent part that:

> Sacramento shall compensate the Companies * * * (b) For transmission of Northwest Dump Energy, using service in *in excess* of that made available under Article 9 (a) and (b) and Article 17(b), at a charge of $0.0005 per kilowatt-hour delivered at Tesla Substation. (Emphasis added).

SMUD points out that Article 13b provides for a $0.0005 per kWh charge for the transmission of Northwest dump energy "in excess" of that made available under Article 9 (a) and (b), but contains no charge for such service made pursuant to Article 9 (a) and (b). According to SMUD, this reflects the fact that the transmission of Northwest dump energy pursuant to Article 9 (a) and (b) makes use of surplus capacity previously reserved and paid for. Therefore, SMUD concludes that its use of excess CEP capacity in 1971 and 1972 to transmit Northwest dump energy did not result in an increase or decrease in its reservations under Article 9 (a) and (b), and consequently did not violate the anti-yo-yo provision of Article 10d.

We concur with SMUD's interpretation of the relevant contract provisions and agree that SMUD's service for Northwest dump energy has not prejudiced its right to future transmission service over the Intertie. Reading Articles 9, 10, and 13 together, it appears clear that the use of excess capacity under Article 9 (a) and (b) to transmit interruptible Northwest dump energy is significant primarily for billing purposes, and that the scheduling of such service does not affect the level of SMUD's reservations under Article 9 (a) and (b). Accordingly, we find that SMUD's use of excess CEP capacity in 1971 and 1972 to transmit Northwest dump energy did not result in increases and decreases in service which would violate the anti-yo-yo provision of Article 10d.[31]

Having reached this conclusion, we find that there are no outstanding issues of fact or law which preclude granting SMUD's motion for summary disposition. Moreover, in the absence of any factual questions to be decided there is no need for additional time to conduct discovery as requested by the Companies.

[31] This conclusion is supported by the fact that SMUD's use of excess CEP capacity reserved under Article 9 (a) and (b) to transmit Northwest dump energy included a number of increases in service after previous decreases in service which, apparently, the Companies have never contended violate Article 10d. *See* note 20, *supra*. Moreover, it also appears that the Companies did not deem changes in SMUD's schedule of service for Northwest dump energy to require five years prior notice which is applicable to Article 9 (a) and (b) reservations, pursuant to Article 10a.

Based on the foregoing, we shall deny the Companies' request to dismiss the complaint, and grant SMUD's motion for summary disposition and requests for declaratory and other relief. In addition, SMUD's motion to accept its pleading of February 14, 1983, will be granted. Since we shall grant the requested relief on the basis of SMUD's contract claim, we shall not at this time address, or express any opinion on the questions of whether SMUD's requested relief may be supported by its claim that the Companies have violated commitments made to the federal government as conditions to their ownership of portions of the Intertie, or its claim that PG&E has violated requirements imposed in connection with the Stanislaus Nuclear Project, Unit 1.

The Commission orders:

(A) The Companies' request to dismiss the complaint is hereby denied.

(B) It is hereby declared that pursuant to its contract with the Companies dated August 1, 1967, SMUD is entitled to receive up to 200 MW of transmission service over the Intertie EHV lines at rates specified in the contract, and further, it ordered that the Companies shall provide SMUD such transmission service in accordance with the provisions of the contract as interpreted in the body of this order.

(C) SMUD's motion for summary disposition is hereby granted as provided in the body of this order.

(D) SMUD's motion to accept its pleading of February 14, 1983 is hereby granted.

(E) Docket No. EL82–21–000 is hereby terminated.

(F) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA8-1-6-005]

Sea Robin Pipeline Co.; Revised Tariff Filing

April 8, 1983.

Take notice that on March 31, 1983, Sea Robin Pipeline Company (Sea Robin), pursuant to Paragraph III. B. 18 of the Stipulation and Agreement approved by Commission Order dated January 28, 1983 in *Sea Robin Pipeline Company*, Docket No. TA83-1-6 and *Pennzoil Producing Company, et al.*, Docket Nos. CI77-702-000, *et al.* and pursuant to Paragraph C of that January

28, 1983 Commission Order, submitted for filing Thirty-third Revised Sheet No. 4 to Sea Robin's FFRC Gas Tariff, First Revised Volume No. 1.

The Stipulation and Agreement, among other things, requires Sea Robin to make certain payments to Pennzoil Producing Company (as successor to Pennzoil Louisiana and Texas Offshore, Inc.) and Pennzoil Oil & Gas, Inc. and authorizes Sea Robin to adjust its rates to track such payments.

Sea Robin states that a copy of the transmittal letter, the revised tariff sheets and detailed computations in support of the filing are being mailed to all of United's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211,385.214). All such petitions or protests should be filed on or before April 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. TA83-1-11-002]

United Gas Pipe Line Co.; Revised Tariff Filing

April 8, 1983.

Take notice that on March 31, 1983, United Gas Pipe Line Company (United), pursuant to Paragraph III. B. 18 of the Stipulation and Agreement approved by Commission Order dated January 28, 1983 in *United Gas Pipe Line Company*, Docket No. TA83-1-11 and *Pennzoil Producing Company, et. al.*, Docket Nos. CI77-702-000, *et al.* and pursuant to Paragraph C of that January 28, 1983 Commission Order, submitted for filing Sixty-first Revised Sheet No. 4 to United's FERC Gas Tariff, First Revised Volume No. 1.

The Stipulation and Agreement, among other things, requires United to make certain payments to Pennzoil Producing Company (as successor to Pennzoil Louisiana and Texas Offshore, Inc.) and Pennzoil Oil & Gas, Inc. and authorizes United to adjust its rates to track such payments.

United states that a copy of the transmittal letter, the revised tariff sheets and detailed computations in support of the filing are being mailed to all of United's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before April 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

ENVIRONMENTAL PROTECTION AGENCY

[W-4-FRL 2346-3]

Designation of Volusia-Floridan Aquifer as Sole Source Aquifer

AGENCY: Environmental Protection Agency.

ACTION: Notice of public hearing.

SUMMARY: A petition has been received by the United States Environmental Protection Agency (EPA) requesting determination that the Volusia-Floridan Aquifer System is the sole or principal drinking water source for Volusia County and that contamination of this source would create a significant hazard to public health.

DATE: The public hearing will be held on Wednesday, May 11, 1983 from 9:30 am to 12:00 noon and 7:00 pm to 9:00 pm.

ADDRESS: The public hearing will be held in the City Hall Council Chambers, 301 South Ridgewood Avenue, Daytona Beach, Florida.

FOR FURTHER INFORMATION CONTACT: Curtis F. Fehn, Chief, Groundwater Section, Water Supply Branch, EPA, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30365; 404/881-3866.

SUPPLEMENTARY INFORMATION: Section 1424(e) of the Safe Drinking water Act provides that should EPA determine that the Volusia-Floridan Aquifer is a sole source aquifer, from the date of such determination, no commitment for Federal financial assistance (through grants, contracts, loan guarantees, etc.) may be entered into for any project which EPA determines may contaminate the aquifer through a recharge zone so as to create a significant hazard to public health. To aid in determination, EPA will hold a public hearing as stated above. Persons who intend to make statements at this hearing are urged to give notice of their intent by telephone or letter at least five (5) days before the hearing is scheduled. If possible, a written copy of the statement should be submitted at the time it is presented for inclusion in the record.

Dated: March 31, 1983.

Charles R. Jeter,

Regional Administrator.

Science Advisory Board; Research Outlook Review Subcommittee; Open Meeting

Under Pub. L. 92-463, notice is hereby given that a one-day meeting of the Research Outlook Review Subcommittee will be held on May 2, 1983 in Conference Room 2117, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. The meeting will begin at 9:00 a.m., and the estimated time of adjournment is 4:30 p.m.

The purpose of the meeting is to enable the Subcommittee to provide its advice and comment to the Agency on a number of draft research strategy documents, which will be used in the preparation of the *Research Outlook 1984*, which is EPA's annual update of its five-year research and development plan. The subcommittee will also be briefed on the budget strategy process

and its relationship to the research strategy process.

The meeting is open to the public. Any member of the public wishing to attend or obtain information should contact Dr. Terry F. Yosie, Staff Director, Science Advisory Board, by close of business on April 28, 1983. The telephone number is (202) 382–4126.

Dated: April 11,, 1983.

Harry C. Torno,

Acting Staff Director, Science Advisory Board.

BILLING CODE 6560–50–M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
(1) Henry J. Block's proposed acquisition of all voting securities of Queen City Savings and Loan Association	Oct. 28, 1982.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Medicaid Program; Hearing; Reconsideration of Effective Date of a Maryland State Plan Amendment

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on June 1, 1983 in Philadelphia, Pennsylvania to reconsider the effective date of Maryland State Plan Amendment 83-10.

Closing date: Request to participate in the hearing as a party must be received by 15 days after publication.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, Bureau of Eligibility, Reimbursement and Coverage, 365 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, telephone: (301) 594-8261.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider the effective date of a Maryland State Plan Amendment.

Section 1116 of the Social Security Act and 45 CFR Parts 201 and 213 establish Department procedures that provide an administrative hearing for reconsideration for States dissatisfied with a determination on a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues which will be considered at the hearing, we will also publish that notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with additional requirements contained in 45 CFR 213.15(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins, in accordance with additional requirements contained in 45 CFR 213.15(c)(1).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

The issue in this matter relates to the effective date established on a State plan amendment dealing with the elimination of copayments on prescription drugs. Regulations at 45 CFR 201.3(g) require that the effective date of such a State plan amendment may be no earlier than the first day of the calendar quarter in which an approvable plan amendment is submitted. The Maryland plan amendment was received on January 10, 1983 and thus, an effective date of January 1, 1983 was established. The State, however, requested an effective date of October 1, 1982.

Maryland has requested reconsideration of the January 1, 1983, effective date on the basis that it took the necessary steps to ensure compliance with the changes required by the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), and

made these changes effective with the implementation of the law, i.e., October 1, 1982. It is the State's position that the statutory requirement carries greater weight than the regulatory requirement governing effective dates of plan amendments and therefore requested an effective date of October 1, 1982.

In addition, the State points out that it did not receive until January 13, 1983, the Medicaid Action Transmittal (No. 82–28) which included preprinted State plan pages to update its plan in conformance with the copayment requirements of TEFRA. The State further claims that since these preprinted pages were not required to be submitted to the HCFA Regional Office until March 10, 1983, this indicates that the requirement for timely submission of this State plan amendment was waived.

The notice to Maryland announcing an administrative hearing to reconsider the effective date of its State plan amendment reads as follows:

Ms. Adele Wilzack, Assistant Secretary for Medical Care Programs
Department of Health and Mental Hygiene, 201 West Preston Street, Baltimore, Maryland 21201

Dear Ms. Wilzack: This is in reply to your letter to Mr. Everett Bryant, Regional Administrator, Health Care Financing Administration (HCFA) Region III, requesting reconsideration of the effective date of Maryland State Plan Amendment 83–10. This amendment which pertains to elimination of copayment requirements on prescription drugs for Medicaid recipients was approved on February 16, 1983 with an effective date of January 1, 1983.

You have requested reconsideration of the effective date on the basis that the State took the necessary steps to ensure compliance of its State plan with the changes required by the Tax Equity and Fiscal Responsibility Act of 1982, and made these changes effective with the implementation of the law, i.e., October 1, 1982.

In addition, you have claimed that the State did not receive Medicaid preprinted State plan pages until January 13, 1983. Further, you have stated that these preprint pages were not required to be submitted to HCFA until March 10, 1983, suggesting that the requirement for timely submission of this State plan amendment had been waived.

I am scheduling a hearing on your request to be held on June 1, 1983, at 10:00 a.m. in the Third Floor Conference Room, 3535 Market Street, Philadelphia, Pennsylvania 19104. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties.

I am designating Mr. Lawrence Ageloff as the presiding officer. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached on (301) 594–8261.

Sincerely yours,
Carolyne K. Davis, Ph.D.

(Sec. 1116 of the Social Security Act (42 U.S.C. 1316))

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance Program)

Dated: April 8, 1983.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

National Institutes of Health

Division of Research Grants; Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of the meetings of the following study sections for April through June 1983, and the individuals from whom summaries of meetings and rosters of committee members may be obtained.

These meetings will be open to the public to discuss administrative details relating to study section business for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code and Section 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Grants Inquiries Office, Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Maryland 20205, telephone 301–496–7441 will furnish summaries of the meetings and rosters of committee members. Substantive program information may be obtained from each executive secretary whose name, room number, and telephone number are listed below each study section. Since it is necessary to schedule study section meetings months in advance, it is suggested that anyone planning to attend a meeting contact the executive secretary to confirm the exact date, time and location. All times are A.M. unless otherwise specified.

Division of Research Grants; Safety and Occupational Health Study Section; Meeting

Pursuant to Pub. L. 92–463, a meeting of the Safety and Occupational Health Study Section, National Institute for Occupational Safety and Health, in conjunction with the Division of Research Grants, will be held on April 22–23 and April 25–28, 1983, at the Colonial Manor Motel, 11410 Rockville Pike, Rockville, Maryland 20852. This notice is being published late due to the recent reorganization of NIOSH which included the transfer of their extramural research grant review function to the Division of Research Grants, NIH.

This meeting will be open to the public on April 25 from approximately 9:00 a.m. to noon, to discuss program policies and issues. Attendance by the public is limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code, and Section 10(d) of Pub. L. 92–463, the meeting of the Study Section will be closed to the public all day on April 22 and 23 and from noon on April 25 to adjournment on April 28 for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Grants Inquiries Office, Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Maryland 20205, telephone (301) 496–7441, will furnish summaries of the meetings and rosters of committee members.

Dr. John Beisler, Executive Secretary of the Study Section, Westwood Building, Room 3A10, National Institutes of Health, Bethesda, Maryland 20205, telephone (301) 496–7071, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.262, Occupational Safety and Health Research Grants, National Institutes of Health, HHS)

Dated: April 6, 1983.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Availability of Coal Resource Information on Public Lands in Sweetwater and Uinta Counties, Wyoming

Notice is hereby given that Geological Survey of Wyoming Open-File Report 83–1 entitled "Geophysical logs, lithologic descriptions, and coal analyses from coal test holes drilled in 1982 in the Salt Wells and Kemmerer areas, Sweetwater and Uinta Counties, Wyoming" is now available to the public. The drilling, completed in August, 1982, in support of the Federal Coal Management Program, provides geologic information necessary to evaluate and classify coal resources on lands in the public domain. The program was sponsored by the U.S. Department of Energy, Laramie Energy Technology Center, under Grant Number DE–AS20–81LC10855 in cooperation with the U.S. Department of Interior, Minerals Management Service.

Forty-one coal test holes were drilled in the Salt Wells area, Sweetwater County, Wyoming, and ten coal test holes were drilled in the Kemmerer area, Uinta County, Wyoming. Both areas are located in southwestern Wyoming; the Salt Wells area is located in the Rock Springs Coal Field about 20 miles southeast of the town of Rock Springs on the southeastern flank of the Rock Springs uplift, and the Kemmerer area is located about 13 miles northeast of the town of Evanston in the southern part of the Kemmerer Coal Field.

The Salt Wells area test holes, located in Township 14 North, Ranges 102 and 103 West; Township 15 North, Range 102 West; Township 16 North, Ranges 101 and 102 West; and Township 17 North, Range 101 West, Sixth Principal Meridian, Wyoming, were designed to investigate coal beds in the Paleocene Fort Union Formation and the Upper Cretaceous Almond Formation. The Kemmerer area test holes, located in Township 16 North, Range 118 West, Sixth Principal Meridian, Wyoming, were designed to investigate coal beds in the Upper Cretaceous Adaville Formation.

The 130-page report is available for reproduction from the Bureau of Land Management, 100 East "B" Street, Room B–005, Casper, Wyoming 82601, (307) 261–5421. The report is available for public review at the Geological Survey of Wyoming on the campus of the University of Wyoming in Laramie. (307) 742–2054 or 766–2286.

BILLING CODE 4310–84–M

[CA 13451]

California; Realty Action Non-Competitive Sale of Public Land in El Dorado County

The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value ($20,350):

Mount Diablo Meridian, California

T. 12 N., R. 10 E., Sec. 2,
E½NE¼SE¼SW¼NW¼ & SE¼SE¼ SW¼NW¼.

Containing 3.51 acres more or less.

The above described land, comprising 3.51 acres, is being offered by direct, noncompetitive sale to Gene R. Leader at current fair market value. Leader is the owner of the adjoining tract and improvements on the sale parcel.

Mr. Leader was advised of the potential trespass in 1980 and a recent survey showed his house was partially on public land. Mr. Leader's septic field, an unauthorized dump and access road is also located on public land. Disposal by direct sale to Mr. Leader will legalize his occupancy of the land, protect his equity investment in improvements on the land and resolve a complicated trespass situation.

The lands are classified for multiple use management under the Act of September 19, 1964; however, in light of the above the classification for the sale parcel has been reviewed and lifted. The sale is consistent with the Bureau's planning and disposal would best serve the public interest. The land will not be offered for sale for at least 60 days after the publication of this notice. Upon notification of the sale date, the purchaser will be given 30 days to pay the full appraised market value.

The terms and conditions applicable to the sale are:

1. A right-of-way for ditches and canals will be reserved to the United States (43 U.S.C. 945).

2. All minerals in the land will be reserved to the United States (43 U.S.C. 1719).

3. Federal law required that the purchaser be a U.S. citizen or, in the case of a corporation, subject to the laws of any State of the U.S.

Detailed information concerning the sale, including the land report and environmental assessment report are available for review at the Bakersfield District Office at the above address. For a period of 45 days from the date of publication of this notice, interested parties may submit comments to the State Director, California State Office, Bureau of Land Management, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825. Any adverse comments will be evaluated by the State Director who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become a final determination.

Robert D. Rheiner, Jr.,

District Manager.

BILLING CODE 4310–84–M

[M57659]

Direct Sale of Public Land; Montana

AGENCY: Bureau of Land Management, Butte District Office, Interior.

ACTION: Notice of Realty Action M57659; direct sale of public land in Jefferson County.

SUMMARY: The following described lands have been examined and identified as suitable for disposal by sale pursuant to Section 203 of the Federal Land Policy and Management Act of 1976, 43 U.S.C 1713 (1976), at no less than the fair market value.

Principal Meridian Montana

T9N, R2W, Section 9, E½E½SW¼, NW¼SE¼SE¼
Section 15, Lot 5

The areas described aggregate 26.77 acres. The land will be offered by direct sale to William and Cincoona Foster.

The subject land is located in extreme northern Jefferson County in the foothills at the southern end of the Helena Valley. Lands in this area are primarily agricultural in nature. The subject tracts are isolated tracts of 20 and 6.77 acres completely surrounded by the private land of William and Cincoona Foster. There is no legal public access the either tract.

The 20-acre tract in Section 9 is currently cultivated by the Fosters. The primary purpose of this sale is to authorize the existing use to insure future agricultural production on the tract. The 6.77-acre tract in Section 15 is a small rocky hilltop with little resource value.

There has not been any active management of these tracts by the Bureau in the past and a land report has determined that they are not needed for any future management programs. Disposal of these tracts will not result in the loss of any significant public values but will allow continued agricultural use.

The proposed sale is consistent with the Bureau's planning system, and the Jefferson County Commissioners have been notified on the sale. A statewide press release has been issued describing the sale. This notice of realty action provides additional opportunity for public comment and review.

Terms and conditions

The terms and conditions applicable to this sale are as follows:

1. All minerals will be reserved to the United States together with the right to explore, prospect for, mine, and remove same under applicable law and regulations;

2. A right-of-way for ditches or canals will be reserved to the United States in accordance with 43 U.S.C 945;

3. The sale of these lands will be subject to all valid existing rights and reservations of record.

DATE: For a period of 45 days, from the date of this notice, interested parties may submit comments ot the Butte District Manager, Bureau of Land Management, P.O. Box 3388, Butte, Montana 59702. Any adverse comments will be evaluated by the BLM Montana State Director, who may vacate or modify this realty action and issue a final determination of the Department of Interior. In the absence of any action by the State Director, this realty action will become a final determination of the Department of Interior.

FOR FURTHER INFORMATION CONTACT: Information related to the sale, including planning documents, environmental assessment, and the record of public discussions is available for review at the Butte District Office, 106 North Parkmont, Butte, Montana.

Dated: April 8, 1983.

Jack A. McIntosh,

District Manager.

BILLING CODE 4310-84-M

[N-36653]

Nevada; Issuance of Land Exchange Conveyance; Exchange of Public and Private Lands in Elko County

April 7, 1983.

The United States issued an exchange conveyance document to the City of Elko for the following described lands under Section 206 of the Federal Land Policy and Management Act of 1976:

Mount Diablo Meridian, Nevada

T. 34 N., R. 55 E.,
Sec. 22, SE¼SW¼NE¼, SE¼NE¼.
T. 34 N., R. 55 E.,
Sec. 15, a tract of land in the SW¼SE¼, SE¼SW¼;
Sec. 22, a tract of land in the NW¼NE¼, NE¼NW¼; more particularly described as follows:

"Beginning at a point 85.00 feet left of the centerline of the Railroad Corridor (Project No. RR-130) (1) at City Engineer's station "W" 466+13.70 P.O.C. said point of beginning being further described as bearing S. 81°33'40" W. a distance 3,048.80 feet from the NE corner of said Section 22; Thence N. 37°18'33" W. a distance of 274.49 feet to a point; Thence N. 57°37'27" E. a distance of 187.69 feet to a point; Thence N. 37°18'33" W. a distance of 183.00 feet to a point; Thence N. 57°35'27" E. a distance of 185.25 feet to a point; Thence N. 37°18'33" W. a distance of 100.00 feet to a point; Thence N. 57°35'27" E. a distance of 150.92 feet to a point; Thence S. 37°18'33" E. a distance of 100.00 feet to a point; Thence N. 57°35'27" E. a distance of 50.00 feet to a point; Thence N. 37°18'33" W. a distance of 100 feet to a point; Thence N. 57°34'40" E. a distance of 49.99 feet to a point; Thence S. 37°18'34" E. a distance of 455.86 feet to a point; Thence S. 41°03'26" W. a distance of 443.95 feet to a point; Thence S. 37°59'37" E. a distance of 21.58 feet to a point; Thence S. 37°59'34" E. a distance of 146.01 feet to a point; Thence S. 59°26'27" W. a distance of 190.05 feet to a point; Thence N. 37°18'33" W. a distance of 186.41 feet to a point of beginning."

Comprising 56.64 acres of public land.

In exchange for these lands, the United States acquired the following described lands from the City of Elko:

A parcel of land within the S½NW¼ of Section 1, T. 34 N., R. 55 E., MDM, Elko County, Nevada, and more particularly described as follows: Beginning at the point of intersection of the east-west quarter-section line of said Section 1 and the newly adopted southerly right-of-way line of former U.S. Highway 40 (now 40 feet southeasterly from centerline of said highway), as Corner No. 1, from which point the West quarter-section corner of said Section 1 bears S. 89°08'02" W. 576.09 feet, thence along said new right-of-way, from a tangent bearing N. 38°31'09" E. on a curve to the right, with a radius of 9960 feet, through a central angle of 0°38'59" an arc distance of 112.95 feet, to Corner No. 2, thence continuing along said new right-of-way N. 39°10'08" E. 474.25 feet to Corner No. 3, thence N. 89°08'02" E. 849.20 feet to Corner No. 4, thence S. 0°51'58" E. 450.00 feet to Corner No. 5, a point on the east-west quarter-section line of said Section 1, thence along said line S. 39°08'02" W. 1226.43 feet to Corner No. 1, the point of beginning.

Comprising 10.7 acres of private lands.

The purpose of this exchange was to acquire the non-federal lands for a new BLM office site in an area of the City of Elko acceptable to that municipality and to provide additional lands for the orderly expansion of the City of Elko. The needs of the local people will be met by providing lands for economic and community expansion. The public interest will be served through construction of a new BLM office complex which will consolidate three existing facilities into one single administrative site. The exchange was consistent with the Bureau's planning for the lands involved and is acceptable to local government officials.

The values of the Federal public land and the non-Federal land in the exchange were appraised equally at $214,500.

Wm. J. Malencik,

Deputy State Director, Operations.

[FR Doc. 83-9875 Filed 4-13-83; 8:45 am]

BILLING CODE 4310-84-M

Land Use Analysis and Proposed Realty Action

This notice issued pursuant to 43 CFR Parts 1600 and 2700, invites public review and comment on preliminary issues and planning criteria to be used in evaluating a proposal to offer for public sale certain public lands located in Cheyenne and Yuma Counties, Colorado.

The proposed planning action involves preparation of an environmental assessment utilizing input received from the public. The environmental assessment to be issued on or about May 25, 1983, will be prepared in accordance with 40 CFR Part 1500 and will include a determination of the proposed action's consistancy with the policies and programs of local, state and other federal agencies. A decision statement will then be issued by the District Manager with the concurrence of the State Director allowing a thirty day protest period (43 CFR 1601.6–1).

The public lands being considered for public sale are:

County, township and range	Section	Acres
Cheyenne:		
16S., 47W., 6th PM	2, lot 5	76.70
16S., 45W., 6th PM	4, lot 12	65.23
16S., 45W., 6th PM	22, lots 5 and 6	79.13
16S., 45W., 6th PM	28, lots 5 and 6	78.90
Cheyenne County total	299.96	
Yuma:		
5S., 5W., 6th PM	27, lots 12 and 13	79.74
5S., 5W., 6th PM	31, lot 14	40.00
5S., 5W., 6th PM	32, SW¼NE¼	40.00
5S., 5W., 6th PM	32, SW¼SW¼	40.00
Yuma County total	199.74	

If found suitable, these lands will be offered for public sale at fair market value with all minerals reserved to the United States.

Preliminary issues identified include: economics of continued management as part of the public lands, rights of permittees and leasees, interests of adjoining landowners, and consistancy with the plans and programs of other government entities.

Planning criteria to be used in evaluating the proposal are:

1. Public lands may be offered for public sale when such lands, because of location or other characteristics, are difficult and uneconomic to manage and are not suitable for management by another Federal, state or local public entity.

2. Disposal will serve important public objectives which outweigh public objectives and values which would be served by maintaining such lands in Federal ownership.

The interdisciplinary team performing the land use analysis/environmental assessment represent the following disciplines: Realty, Wildlife, Geology, Hydrology, Cultural Resources, Recreation and Economics.

Public participation will be obtained by a public comment period initiated by this notice. Comments received on or before May 18, 1983 will be considered.

Comments or requests for further information should be addressed to: Frank Young, Area Manager, 10200 W. 44th Avenue, Wheatridge, Colorado 80033; phone (303) 234–4988.

Copies of the environmental assessment will be available for review at the Northeast Resource Area office listed above, and at the Canon City District Office, 3080 East Main Street, Canon City, Colorado 81212.

Supplementary information: This proposed action results from, and is consistant with, issues and criteria developed with public participation for the Northeast Resource Management Plan, initiated in March 1981. The Resource Management Plan is scheduled for completion in 1984. The planning process as it applies to the lands described herein, is being expedited to improve management efficiency and to be responsive to expressions of public interest.

Melvin D. Clausen,

District Manager.

Las Cruces District Advisory Council; Meeting

AGENCY: Bureau of Land Management, Las Cruces District, Interior.

ACTION: Notice of meeting.

SUMMARY: Agenda.

DATE: May 5, 1983, 9:30 am.

ADDRESS: Lordsburg Civic Center, 313 East 4th Street, Lordsburg, New Mexico.

FOR FURTHER INFORMATION CONTACT: Daniel C. B. Rathbun, District Manager Las Cruces District, Bureau of Land Management, P.O. Box 1420, Las Cruces, New Mexico 88004. Phone: (505) 524–8551.

SUPPLEMENTARY INFORMATION:

Agenda

1. Approval of minutes.
2. Comments of Las Cruces/Lordsburg Draft Management Framework Plan Amendment/Environmental Assessment.
3. Comments on nine Wilderness Study Areas in the Las Cruces District.
4. Review and update on Asset Management.
5. Adjourn.

The meeting will be open to the public and interested persons may make oral statements to the Board during an allotted time period beginning at 2 p.m. and lasting for at least one-half hour. The District Manager may establish a time for oral statements depending on the number of persons wishing to make statements. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 317 North Main Street (P.O. Box 1420), Las Cruces, New Mexico 88004 by May 4, 1983.

BILLING CODE 4310–84–M

Montana; Land Resource Management; Filing of Plat of Survey

AGENCY: Bureau of Land Management, Montana State Office, Interior.

ACTION: Notice of filing of plat of survey.

SUMMARY: A plat of survey of the lands described below accepted March 8, 1983, will be officially filed in the Montana State Office effective 8 a.m. on June 1, 1983.

Principal Meridian, Montana

T. 8 N., R. 17 W.
Homestead Entry Survey No. 1240
Tract 37

The plat represents a dependent resurvey of a portion of HES 1240 and the survey of Tract 37 in unsurveyed T. 8 N., R. 17 W., Principal Meridian, Montana. The area described is in Granite County.

This survey was executed at the request of the U.S. Forest Service for the purpose of identifying the selected land in an exchange between the U.S. and private individuals.

Inquiries concerning these lands should be addressed to the Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107.

Effective Date: June 1, 1983.

Dated: April 1, 1983.

BILLING CODE 4310-84-M

[W-84549]

Wyoming; Invitation for Coal Exploration License, Anaconda Minerals Company

Anaconda Minerals Company hereby invites all interested parties to participate on a pro rata cost sharing basis in its coal exploration program concerning federally owned coal underlying the following described land in Campbell County, Wyoming:

T.43 N., R. 70 W., 6th Prin Mer.
Sec. 6: Lots 1, 2, 3, 4, 5, 6, 7 S½NE¼, SE¼NW¼, E½SW¼, SE¼
Sec. 7: E½NE¼, NE¼NW¼, N½NE¼SE¼
T. 43 N., R. 71 W., 6th Prin Mer.
Sec. 1: Lots 1, 2, 3, 4, S½N½, N½S½, SE¼, SE¼

Containing 1,279.32 acreas.

All of the coal in the above lands consists of unleased Federal coal within the Powder River Basin known recoverable coal resource area. The purpose of the exploration program is the determine the quality and quantity of the coal within the boundaries of the above described area.

A detailed description of the proposed drilling program is available for review during normal business hours in the following offices (under serial number W-84549): Bureau of Land Management, 2515 Warren Avenue, P.O. Box 1828, Cheyenne, Wyoming 82001; The Bureau of Land Management, 951 Rancho Road, Casper, Wyoming 82601; and The U.S. Forest Service, Thunder Basin National Grassland, 809 South Ninth Street, Douglas, Wyoming 82633.

This notice of invitation will be published in this newspaper once each week for two consecutive weeks beginning the week of April 25, 1983, and in the **Federal Register**. Any party electing to participate in this exploration program must send written notice to both the Bureau of Land Management and Anaconda Minerals Company no later than 30 days after publication of this invitation in the **Federal Register**. The written notice should be sent to the following addresses: Anaconda Minerals Company, Attention Jane H. Martin, P.O. Box 5300, Denver, Colorado 80217, and The Bureau of Land Management, Wyoming State Office, Branch of Solid Minerals, P.O. Box 1828, Cheyenne, Wyoming 82001.

The foregoing is published in the **Federal Register** pursuant to Title 43 Code of Federal Regulations, § 3410.2-1(c)(1).

J. Stan McKee,

Acting Chief, Branch of Solid Minerals

BILLING CODE 4310-84-M

[OR-29129 (WASH)]

Washington; Lease/Sale of Public Lands in San Juan County

The following described land has been examined and identified as suitable for public recreation and is hereby classified for lease and/or sale under the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869 *et seq.*)

Willamette Meridian

T. 35 N., R. 4 W.,
Sec. 23, Lots 3 & 4 (less approximately 1 acre in Lot 3, as described in Coast Guard map No. 66.7301) containing 38.1 acres, more or less.

The land is chiefly valuable for public recreation purposes, by virtue of its present use as a public park. The land will be leased, with an option to purchase, to the Washington State Parks and Recreation Commission. The lease will serve the important public objective of providing additional land for the State's recreational and public purpose projects. The lease will be issued subject to a 20 foot wide right-of-way reservation (OR 35125) granted to the Coast Guard, which also provides for unobstructed visibility for the Coast Guard, lighthouse. The land is an isolated tract, not essential to any BLM program. The land is not of national significance and this action will have no significant impact on the environment. The action is consistant with BLM policy and with State and local planning and zoning.

Classification of the land under the Recreation and Public Purposes Act (R&PP Act), segregates them from all appropriation, including locations under the mining laws, except as to applications under the mineral leasing laws and applications under the R&PP Act.

For a period of 30 days, interested parties may submit comments to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

Roger W. Burwell,

District Manager.

BILLING CODE 4310-84-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP82-80-008]

Michigan Wisconsin Pipe Line Co.; Notice Of Proposed Change In FERC Gas Tariff

April 7, 1983.

Take notice that on March 31, 1983, Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) tendered for filing Eighteenth Revised Sheet No. 7 to its F.E.R.C. Gas Tariff, Original Volume No. 1, to be effective May 1, 1983.

Michigan Wisconsin states that this filing is being made in accordance with Article IV, paragraph 3e of the Stipulation and Agreement submitted by Michigan Wisconsin on October 25, 1982 in Docket Nos. RP81-61 and RP82-80, which was approved by the Commission on February 10, 1983.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 or the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before April 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any party wishing to become a party to the proceeding must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

San Luis Unit, California; Intent To Prepare a Draft Supplemental Environmental Statement

In compliance with Section 102(2)(C) of the National Environmental Policy

Act of 1969, the Department of the Interior, Bureau of Reclamation, proposes to prepare a draft supplemental environmental statement (ES) on the San Luis Unit of the Central Valley Project, and the Delta-Mendota Canal service area, California. The draft supplemental ES will be integrated with a planning report which will present actions proposed for the unit.

The proposed actions are to: (1) Amend the existing water service contract with Westlands Water District to increase the long-term commitment of water from the San Luis Unit; (2) complete construction of water distribution systems for Westlands Water District; (3) complete the San Luis Drain with sufficient capacity to provide drainage service to all problem areas along the drain alinement, including the entire San Luis Unit and Delta-Mendota Canal service areas (includes construction of interim drainage evaporation ponds, emergency storage, and regulating reservoirs along the drain alinement, and construction of drainage effluent treatment facilities); and (4) complete construction of Westlands Water District drainage collector systems.

For the action on the water service contract, alternatives to be considered are a modified contract, conservation, and no action. The alternative to construction of water distribution systems is no action. Alternatives to completing the San Luis Drain are in-valley evaporation, desalinization, and no action. For both the in-valley evaporation and desalinization alternatives, methods of salt disposal will be developed. A no-action alternative will be considered for completion of construction of Westlands Water District drainage collector systems.

During the last 5 years, considerable input has been received from interested agencies and individuals. Although no scoping sessions are planned at this time, input to the draft supplemental ES will still be accepted. The draft supplemental ES is expected to be completed and available for review and comment by May 1984.

Information on the project may be obtained from the following individual: Roderick M. Hall, Office of Environmental Quality, Bureau of Reclamation, 2800 Cottage Way, Sacramento, CA 95825 telephone: (916) 484–4792.

Dated: April 7, 1983.

R. N. Broadbent,

Commissioner.

[FR Doc. 83–9800 Filed 4–13–83; 8:45 am]

BILLING CODE 4310–09–M

Upper John Day Project, Oregon; Intent To Prepare a Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior intends to prepare a draft environmental statement (ES) on the potential Upper John Day Project in eastern Oregon. The draft ES will be integrated with a planning report which will present the recommended plan as well as alternative plans for the project.

In a study, authorized by Pub. L. 92–199, the Bureau of Reclamation is investigating potential water resource development in the John Day River Basin to augment streamflow. Rehabilitation of the stream system to enhance diminishing runs of salmon and steelhead is a primary objective of the study. Habitat restoration appears to be possible through flow augmentation resulting from water releases from new headwaters storage facilities, restoration of streambank vegation, and streambank protection. Headwater storage also could supply water for irrigation purposes and make additional areas available for water-related recreation.

In the study, water needs have been documented and several headwater storage sites have been identifed. A preliminary planning report in which those findings are discussed was reviewed by the public, and on the basis of that review and study results, a preferred storage site—the Phipps Meadow site on the upper Middle Fork of the John Day River—was selected for detailed evaluation. Detailed engineering, economic, environmental, and social evaluations of storage development at the Phipps Meadow site now are underway.

In the draft planning report/ES, Reclamation will address construction of a dam and reservoir at the Phipps Meadow site, enhancement of streamside vegetation along the Middle Fork of the John Day River from the damsite downstream for about 20 miles, development of recreation facilities at the reservoir, and provision of irrigation water supplies in the vicinity of Monument, Oregon, located about 65 river-miles downstream of the dam. The draft report/ES presently is scheduled to be filed during the fall of 1984.

Several public meetings have been held throughout the Upper John Day River Basin in the past 2 years to discuss study goals and objectives and to solicit public comments and concerns. In view of the opportunity provided by those meetings and participation by the public, no specific scoping meeting is being scheduled for the draft report/ES. However, the proposed project will be the subject of future public meetings. Questions concerning environmental issues and other matters will be invited and encouraged in those sessions.

To further assure that the full range of issues related to this proposal are identified and discussed in the document, comments and suggestions are invited. Anyone with suggestions relating to significant environmental issues in the area under study should contact Robert A. Adair, Environmental Specialist, Bureau of Reclamation, Pacific Northwest Region, Box 043–550, West Fort Street, Boise, Idaho 83724, telephone (208) 334–1209.

Dated: April 8, 1983.

Robert N. Broadbent,

Commissioner.

[FR Doc. 83–9828 Filed 4–13–83; 8:45 am]

BILLING CODE 4310–09–M

Fish and Wildlife Service

Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora; Fourth Regular Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The Service publishes the United States negotiating positions for the fourth regular meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

FOR FURTHER INFORMATION CONTACT: Richard Robinson, Acting Chief, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240. Telephone: 703/235–2418.

SUPPLEMENTARY INFORMATION:

Background

In accordance with § 23.35 of 50 CFR Part 23, Subpart D, the Service's rules providing for public participation in the development of negotiating positions for meetings of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (hereinafter referred to as CITES or the

Convention), the Service publishes the United States negotiating positions for the fourth regular meeting of the Conference of the Parties to the Convention ("the meeting") to be held in Gaborone, Botswana, April 19 through April 30, 1983.

The Service published its proposed negotiating positions for most of the matters to be addressed at the meeting in the **Federal Register** of February 7, 1983 (48 FR 5605). The notice also set forth summaries of six additional issues. No summaries of proposed negotiating positions were published for these six issues because the Service had not received information concerning them in sufficient time to develop them for the notice. However, information and comments were received on these in writing and at a public meeting conducted by the Service (February 15, 1983). Pursuant to § 23.38(a) of the rules, and due to the lack of time necessary to develop proposed negotiating positions on the issues in accordance with the rules, the Director, by this notice suspends the applicability of §§ 23.32, 23.33, 23.34 and 23.36 as they relate to these additional issues and the circumstances associated therewith.

What follows is a summary of the negotiating positions on the items of the provisional agenda and the additional issues, a summary of information and comments received in response to the notice of February 7, 1983, and a summary of the bases for the negotiating positions which include, if necessary, responses to information and comments received. In the interests of time and economy, where there has been no change in the proposed negotiating position for a particular agenda item, it will be so stated meaning that the proposed negotiating position as published in the notice of February 7, 1983, has been adopted. If information and comments for a particular agenda item were received by the Service in accordance with the notice of February 7, 1983, they will be summarized in the "Information and Comments" element associated with the agenda item. If the basis for a proposed negotiating position has changed, while the proposed negotiating position has been adopted without change, the new basis for the negotiating position will be stated. Where no elements of a particular agenda item have changed, the words "No change" will appear after the number and title of the agenda item. Numbers and titles used in this notice correspond to those used in the February 7, 1983, notice. If necessary, one should consult the notices of August 5, 1982, (47 FR 34043) and September 27, 1982, (47 FR 42465) to understand the issues and the notice of February 7, 1983, to understand the proposed negotiating positions and their bases.

Negotiating Positions (Summaries)

I. Opening Ceremony by the Authorities (no change).

II. Welcoming Addresses (no change).

III. Establishment of the Credentials Committee (no change).

Information and Comments: One commenter agreed with the proposed negotiating position for this item.

IV. Adoption of Agenda and Working Programme (no change).

Information and Comments: One commenter agreed.

V. Report of the Credentials Committee (no change).

Information and Comments: One commenter agreed.

VI. Adoption of Rules of Procedure (no change).

Information and Comments: Two commenters agreed. A third recommended that the position should expressly advocate that the chairman of committee sessions and working groups have discretionary authority to permit observer participation.

Basis of Proposed Negotiating Position: No change except that there is not sufficient information to show need for making explicit in the rules of procedure or elsewhere a requirement that only committee and working group chairmen should have sole authority to permit observer participation in committee and working group meetings.

VII. Admission of Observers.

Proposed Negotiating Position: (no change).

Information and Comments: Two commenters agreed. A third agreed, provided the requirements for observer status were expanded to include, in the alternative, persons knowledgeable in trade and customs matters "* * * for it is the legitimate impact on these activities which in large measure implements CITES."

Basis of Proposed Negotiating Position: No change except that Article XI limits observer status to any body or agency technically qualified in protection, conservation, or management of wild fauna and flora. This would not exclude those agencies or bodies also knowledgeable in trade matters. Numerous technically qualified trade associations have obtained observer status for previous meetings of the Conference of the Parties and certainly many persons knowledgeable in customs matters have also attended as delegates or observers.

VIII. Report and Recommendations of the Standing Committee.

1. Report by Chairman (no change).

2. Revision of the Membership of the Standing Committee (no change).

3. Payment of Travel Expenses for Standing Committee Members (no change).

4. Election of New Members of the Standing Committee (no change).

IX. Report of the Secretariat (no change).

Information and Comments: Two commenters agreed.

X. Financing of the Secretariat and of meetings of the Conference of the Parties.

Negotiating Position: The United States supports the small increase in staff proposed in the budget for 1984–85 and can acquiesce in the inflationary increase which the budget also reflects. The United States will attempt to negotiate certain reductions related mainly to exchange rates.

Information and Comments: Two commenters agreed.

Basis of Negotiating Position: The proposed negotiating position was drafted before receipt of the proposed budget. Increase in the Secretariat's workload related to an increase in the number of Parties to CITES (1978–44, 1984–90 projected) and in the formation of the Technical Expert Committee and Identification Manual Committee and other activities, has led to the Secretariat proposal to increase authorized staff by one professional and one secretary, to four professionals and three secretaries.

1. Transfer of responsibilities (for the administration of the Trust Fund for the Convention) (no change).

2. Headquarters Matters (no change).

XI. Relationship with other International Agreements and Organizations (no change).

XII. Committee Reports and Recommendations.

1. Technical Expert Committee.

Negotiating Position (no change).

Information and Comments: One commenter opposed restructuring the Technical Expert Committee because limiting the membership to 6 countries would prevent many Parties from participating and voting in TEC meetings, and because the United States should preserve its ability to attend any CITES meeting.

Basis of Negotiating Position: No change except that the United States ability to attend restructured TEC meetings when not a member would not be lost, since it could attend as an observer. The United States has attended Standing Committee meetings (regionally structured) on the same basis.

2. Identification Manual Committee (no change).

Information and Comments: One commenter agreed.

3. Nomenclature Committee (no change).

Information and Comments: One commenter suggested that the Nomenclature Committee should prepare a list of names and synonyms of species that are traded on the appendices to CITES.

Basis of Negotiating Position: Other organizations are more appropriate to produce a list of species traded. The Nomenclature Commitee lacks trade data and is occupied in the production of complete nomenclatorial references for use of the Parties.

XIII. Interpretation and Implementation of the Convention.

1. Report of the Technical Expert Committee on national reports under Article VIII, paragraph 7, of the Convention.

Negotiating Position: No change except that the TEC should also consider trade volume that appear to be unusually high.

Information and Comments: One commenter indicated that some species may be able to sustain "high volumes of trade" and if this term was improperly defined, Article XIII action could be initiated for emotional rather than scientific considerations. Another commenter suggested consideration of species traded in violation of exporting countries' laws. A third, suggested a new agenda item to consider problems of trade in sea turtles.

Basis of Negotiating Position: The position stated above recognizes that high trade volume *may* indicate that the species is being over exploited.

Trade in violation of exporting countries' laws is an appropriate subject for TEC consideration. It is possible that some of the species whose trade the United States has recommended for TEC examination were traded illegally. Country consultations and Secretariat inquiries also deal with illegal trade quite frequently. The United States believes that species subject to high volumes of trade require priority consideration.

The Service has submitted information on sea turtle trade provided by the commenter to the Chairman of TEC for consideration at the meeting.

2. Review and Harmonization of Annual Reports.

Negotiating Position: None necessary since this item was deleted from the provisional agenda.

3. Effects of Reservations.

Negotiating Position: No change except that the United States supports a recommendation that Parties reserving to an "onlisting" of a species or to a species upon accession should maintain and communicate statistical records on trade in the species concerned as part of their annual reports.

Information and Comments: One commenter agreed with the proposed position and also recommended that the United States actively discourage the taking of reservations which undermine CITES effectiveness in controlling trade.

Another commenter asserted that a species listing based on insufficient information would constitute a conflict with United States law (CITES) and would be sufficient grounds for taking a reservation.

A third commenter urged that the United States support a proposal that would have reserving Parties in all cases consider reservations to Appendix I listings as Appendix II species, because Appendix I items could be illegally exported from a Party to a reserving Party (considering the species as not controlled by CITES) thus totally depriving those specimens of protection.

A fourth commenter urged that the United States seriously consider taking reservations on listings with inadequate data and listings of domestic species over United States objection.

Basis of Proposed Negotiating Position: Trade statistics are important to the effective implementations of CITES. Parties reserving to "onlistings" or to species on accession will still have to issue comparable documentation when trading the reserved species with nonreserving Parties. Processing of data from such documentation could easily fit into their data systems for species for which they have not taken reservations.

It would be inconsistent for the United States to actively discourage reservations while maintaining that it could take reservations for the reasons stated in the proposed negotiating position. The United States position is to urge reserving Parties to consider the underlying reasons for their reservations and to consider withdrawing them.

The United States would consider insufficiency of the basis for an amendment to the CITES species appendices as possible grounds for taking a reservation to that species.

The taking of a reservation is a serious matter. As stated in our proposed negotiating position, generally the United States will not take a reservation as to species listings. One cannot deny that a reservation may have an unfavorable impact on a species. Where the reserving Party is importing specimens illegally exported from a nonreserving Party, the remedy lies by ensuring that the nonreserving Party performs in accordance with its treaty obligations.

The United States would consider taking a reservation if a domestic species was listed over United States objection.

4. Parts and derivatives from nonrecognizing States (no change).

Information and Comments: Two commenters agreed. A third agreed and suggested that acceptance of non-Party documents from nonrecognizing Parties be limited to Appendix II species, because commercial trade in Appendix I species may be detrimental to wild populations.

Basis of Negotiating Position: No change except that the recognizing importing Party would still have to issue an Appendix I import permit. Such permits should not be issued if the specimen to be imported was to be used for primarily commercial purposes.

5. Parts and Derivatives of plants and Appendix III animals (no change).

Information and Comments: One commenter agreed. Another supported full implementation of Conf. 2.18 and agreed with the proposed position so far as it furthers the objectives of Conf. 2.18.

Basis of Negotiating Position: One important distinction between Conf. 2.18 and the United States position is that Conf. 2.18 presumes that readily recognizable parts and derivatives of all Appendices II and III plants and Appendix III animals should be controlled, whereas the United States position would have the Parties examine those species (and other taxa) to determine whether broad coverage of parts and derivatives is necessary.

6. Trade in African Elephant ivory (no change).

Information and Comments: Three commenters agreed with the proposed negotiating position

7. Trade in souvenirs.

Negotiating Position: No change except to urge that exporting Parties examine their souvenir trade and require permits where necessary.

Information and Comments: Two commenters agreed with most of the proposed negotiating position. They recommended that Parties also comply with permit requirements, notify the country of origin when large volumes of Appendix I items are seized, explain import controls to tourists and take stricter domestic measures when the country of origin feels that the souvenir trade in Appendix II species is having detrimental effects on wild populations.

Another commenter supported adoption of the draft TEC resolution incorporating the above commenters' recommendations and another

recommendation that would in effect eliminate the Article VII exemption for personal effects.

A fourth commenter agreed with the proposed negotiating position.

Basis of Negotiating Position: Conf. 2.6 calls on a Party to apply stricter domestic measures where it deems that an Appendix II species is being traded in a manner detrimental to the survival of the species. That part of the TEC resolution which would result in the application of stricter domestic measures to trade whether or not such trade is deemed to be detrimental would result in unnecessary and burdensome regulations.

That portion of the TEC resolution which calls on Parties to comply fully with the requirements of Articles III and IV with respect to souvenirs and in particular vigorously control the export and import of Appendix I specimens is, in effect, a restatement of Conf. 3.9, paragraph (a)(i) which calls on the Parties to "* * * ensure strict compliance and control in respect to all mechanisms and provisions of the Convention relating to the regulation of trade in animal and plant species listed in Appendix II, and of all provisions ensuring protection against illegal traffic. * * *"

If trade of a particular species is detrimental, Conf. 2.6 already calls on the Parties to consult with the appropriate Management Authorities, and use Article XIII to call upon the assistance of the Secretariat. Further, Conf. 2.6, call for Party-to-Party communication if such trade is illegal. In addition, Conf. 3.9 calls on the Parties to "* * * inform each other on all circumstances and facts likely to be relevant as regards illegal traffic and also on control measures with an aim to eradicating such traffic.* * *" The United States negotiating position calls on the proponents of the TEC resolution to provide TEC with trade and biological data for consideration of any souvenir trade problems pursuant to Conf. 2.6 and Conf. 3.5.

8. Return of illegally traded specimens.

Negotiating Position: No change except that the United States supports a recommendation that proceeds from the sale of confiscated Appendix II parts and derivatives be used for enforcement (and administrative) purposes and that knowing violators should not benefit from disposal of the specimen, and should pay the reasonable costs of confiscation, custody and (or) return to the country of export of live specimens (where it would be practical and beneficial to the species to do so).

Information and Comments: One commenter agreed with the proposed negotiating position.

Basis of Negotiating Position: Funding for national and international administration of CITES is inadequate. Where domestic law allows, proceeds from the sale of Appendix II parts and derivatives would be a helpful supplements. Under United States law, proceeds must be used to pay all proper expenses of forfeiture and sale (including confiscation, maintenance of custody and advertising for the sale). Any remainder must go to the Treasury. If violators could benefit from disposal, the deterrent effect of controls on illegal trade would be diminished.

The Endangered Species Act allows the charging of reasonable fees for expenses connected with the transfer, board or handling of fish or wildlife or plants.

The TEC resolution was not received in sufficient time to enable publication of a proposed negotiating position addressing it specifically. Some of the resolution incorporates ideas advanced by the Service in a paper submitted to TEC and such ideas were the subject of the proposed negotiating position. Pursuant to § 23.38(a), and due to lack of time to develop this negotiating position fully in accordance with the rules for public participation, the Director, by this notice, suspends §§ 23.33, 23.34, and 23.36 in relation to this issue and the circumstances associated therewith.

9. Time validity of export permits and re-export certificates (no change).

Information and Comments: One commenter agreed.

10. Exemptions under Article VII of the Convention.

Negotiating Position: No change except that the Parties should consider whether or not continuation of the Secretariat's survey of Article VII problems is worthwhile. TEC should consider this matter at the Botswana meeting.

Problems associated with Article VII are best dealt with as they arise.

The United States opposes consideration of the adoption of the use of phytosanitary certificates by the Conference of the Parties until such time as the Food and Agriculture Organization of the United Nations approves of such use. The United States would support a resolution requesting that the Secretariat consult with FAO in order to obtain such approval.

The United States supports development of an exemption (being proposed by the Chairman of TEC) from the recommendation that parental breeding stock must be "capable of reliably producing second-generation offspring (see Conf. 2.12) for certain species that take many years to mature.

Information and Comments: One commenter agreed with the proposed negotiating position. Another urged that the United States oppose the adoption of the phytosanitary certificate until it includes all necessary CITES information. Another supported use of phytosanitary certificates, but only if they state that certification means that the shipment meets CITES standards for classification as artificially propagated.

One commenter urged that the Conf. 2.12 definition of bred in captivity be adhered to and that standards contained therein not be weakened.

Two commenter opposed that part of the proposed negotiating position which stated that the date to be used for determining when the provisions of the Convention applied to a specimen was the later of two events: entry into force of the first listing of the species in question and entry into force of the Convention for the Party determining whether to grant the "pre-Convention" exemption. The commenter asserted that only the date of entry into force of the first listing of the species in question shold be considered the date the Convention applied to any specimen of the species in question, because the "two events test" would "* * * encourage stockpiling of listed species by non-Party nations in advance of joing CITES. Upon accession to CITES the stockpiled specimens could be traded as "pre-Convention specimens under the exemption * * *."

Basis of Proposed Negotiating Position: Only nine countries have responded to the Secretariat's Article VII survey. The survey was requested by the Conference of the Parties at San Jose (1979). As it stands, it would be of little value in addressing Article VII problems.

Adoption of a resolution by the CITES Conference of the Parties sanctioning the use of the FAO phytosanitary certificate without FAO approval could harm relations between the two organizations and open the way for unauthorized uses of CITES documents.

Operations attempting to breed in captivity species that take many years to mature are encountering economic difficulties due to the long time needed to reliably produce second generation offspring. The proposed long maturing species exception would allow temporary relief for these operations from the Conf. 2.12 definition of bred in captivity. It has criteria which would provide for the protection of wild populations.

Stockpiling of specimens is a possible unfavorable consequence of that part of the negotiating position concerning when provisions of the Convention "applied to that specimen." Greater incentive for countries to join CITES and denial of the use of the pre-Convention exemption by non-Parties are possible favorable consequences.

The Service did not receive sufficient information from which to develop proposed negotiating positions for the proposals on use of the phytosanitary certificate for artificially propagated plants and on the long maturing species exception until after publication of the February 7, 1983, notice. Therefore, in accordance with § 23.38(a) of the rules for public participation, etc., and due to the lack of time that would be necessary to develop this negotiating position with public participation in accordance with such rules, the Director, by this notice, suspends the applicability of §§ 23.32, 23.33, 23.34 and 23.36 as they relate to this issue and the circumstances associated therewith.

11. Specimens in transit.

Negotiating Position: No change except that the resolution should recognize other reasons for interruption of transit in addition to other than those associated with arrangements between consignor and consignee.

Information and Comments: One commenter agreed.

Basis of Proposed Negotiating Position: Interruptions of transit may occur for such valid reasons as transportation delays, health of the specimen, compliance with local laws protecting agriculture, human health, etc.

12. Guidelines for transport (no change).

Information and Comments: One commenter agreed. Another agreed while restating a preference for adoption of certain proposed amendments summarized in the February 7, 1983, notice.

13. Animals stressed during transport (no change).

Information and Comments: One commenter agreed.

14. Control of captive breeding and artificially propagating operations in Appendix I species.

Negotiating Position: The United States supports adoption of a proposed resolution drafted by the Secretariat recommending that the Parties provide information on commercial captive breeding and artificial propagation operations, that the Secretariat compile a registry of such operations based on information provided by Parties and on information obtained from an IUCN/Wildlife Trade Monitoring Unit survey, and that Parties reject documentation covering specimens from unregistered operations (if such documentation relies upon the exemption provided by Article VII, paragraph 4). The United States supports this proposal for a register, provided it does not diminish the authority of each Party to determine eligibility for the exemption.

Information and Comments: Two commenters agreed with the proposed negotiating position. A third cautioned that great care should be exercised in the preparation of a register, presumably because operations trading wild animals and plants as artificially produced could more easily avoid CITES controls by being registered.

Basis of Negotiating Position: No proposed negotiating position was set forth in the February 7, 1983, notice because the Secretariat's proposal had not then been received. The proposal could be interpreted to give the Secretariat authority to determine which operations in Party countries are eligible for registration. The Secretariat in conversation with a Service representative agreed that such was not the case. (However, such authority would be the case for operations in non-Party countries. This would be similar to the Secretariat's authority to register non-Party scientific institutions for the Article VII, paragraph 6 exemption (see Conf. 2.14).)

XIV. Consideration of proposals relating to the appendices.

1. Ten Year Review of Appendices (no change).

Information and Comments: One commenter agreed.

2. Reverse listing concept for the appendices (no change).

Information and Comments: Two commenters agreed.

XV. Consideration of Proposals for Amendment of Appendices I and II.

This item was not a substantive subject of the February 7, 1983, notice. Separate notices concerning this item were published in the **Federal Register.**

XVI. Conclusion of the Meeting.

1. Determination of the time and venue of the next regular meeting of the Conference of the Parties (no change).

2. Closing remarks (no change).

Additional Issues

1. Regulation of trade in Appendix II wildlife.

Negotiating Position: The United States prefers the use of TEC to remedy excessive trade in Appendix II wildlife (see Conf. 3.5). The United States has submitted a paper to TEC for circulation at the Botswana meeting requesting that TEC consider high volumes of trade in certain species (see negotiating position for item XIII.1, above).

Information and Comments: One commenter agreed with the Australian proposal. Another agreed with the Australian proposal and in addition suggested that TEC publish a list of projects relating to the status of species so that they could be considered for external funding.

Basis of Negotiating Position: The United States believes that exporting countries should have an opportunity to consider the data indicating high volumes of trade, and to any guidance TEC may provide and to respond to them before the Parties consider adopting a procedure like the Australian proposal. The Australian proposal would subject exporting countries to management programs recommended by a committee composed of Party and nongovernmental organizations.

2. Interpretation of "prepared and shipped," "living specimen," and "cruel treatment."

Negotiating Position: The United States, while sharing the concern that animals should be treated humanely, believes that the method of capture and subsequent killing of a controlled animal is not within the scope of the Parties' duty to so prepare and ship for export or re-export any living specimen as to minimize risk of injury, etc.

Information and Comments: One commenter agreed with the Gambian proposal.

Basis of Negotiating Position: Capture of an animal is related to the Management Authority determination of whether or not the animal was obtained in contravention of the laws of the State of export for the protection of fauna and flora and not to a Management Authority and finding concerning humane transport. Intentional killing of an animal associated with the commercial process is not relevant to the finding concerning humane preparation and shipment of living animals.

3. Regulation of zoos and similar institutions.

Negotiating Position: The Parties should only consider the most serious problems associated with zoos and similar institutions instead of setting standards and ranking zoos and public and private animal parks on a worldwide basis.

Information and Comments: Five commenters concurred with the negotiating position stated above. One favored the proposal but recognized that compiling of a ranked list would be a "massive undertaking." This commenter suggested that the Secretariat could

consult with competent national organizations expert in evaluating zoological institutions.

Basis of Negotiating Position: The proposal itself states that the problems it addresses are not major ones. Given the limited resources of the Secretariat and of the Parties, it seems that the Parties should only address the most serious problems. TEC should consider this issue in Botswana.

4. Identification of mammals hairs.

Negotiating Position: Support development of any techniques to identify mammal hairs.

Information and Comments: One commenter stated concurrence with Additional Issue Number 4.

Basis of Negotiating Position: Lack of capability to identify species of wildlife reduces enforcement capabilities.

5. Procedure for proposal of amendments.

Negotiating Position: The United States supports adoption of a resolution recommending that if a Party wishes to be assured that an appendix amendment will be considered by the Conference of the Parties it should make its own proposal rather than risk having the proposing Party withdraw the amendment.

Information and Comments: Two commenters agreed with the position stated above. One of them suggested that information provided in the withdrawn proposal should be combined with the data in the proposal that was not withdrawn so that the Parties could have more data on which to base their decision.

Basis of Negotiating Position: It is believed that implicit in the right to propose amendments to the appendices is the right to withdraw them.

Information accompanying a proposed amendment to Appendix I or II is not a part of the proposal and, like any other information, may be considered by the Parties even if the proposal it is associated with is withdrawn. Conf. 2.17 states that proposals "* * * must be accompanied by a memorandum [containing the information] written by the proponent with a view to its submission to the Parties at the same time as the proposal * * *."

6. Proposed amendment to allow accession of regional economic integration organizations. (Position still being developed.)

Information and Comments: One commenter favored accession of the European Community to CITES.

This notice was prepared by Arthur Lazarowitz, Federal Wildlife Permit Office.

Dated: April 11, 1983.

Robert A. Jantzen,

Director, U.S. Fish and Wildlife Service.

BILLING CODE 4310-55-M

Marine Mammals; Receipt of Application for Permit

Notice is hereby given that an applicant has applied in due form for a permit to take sea otters as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the regulations governing the taking and importing of Marine Mammals (50 CFR Part 18).

1. Applicant: Carle Foundation, 611 West Park Street, Urbana, IL 61801.

2. Type of permit: Marine Mammal-Scientific Research.

3. Name and number of animals: Polar bear (*Ursus maritimus*), approximately 300 blood samples/year.

4. Type of Activity: Import blood samples.

5. Location of Activity: Canada.

6. Period of Activity: until January 30, 1985.

The purpose of this application is to allow the import of blood samples to be analyzed for urea, creatinine, carnitine and other substances felt to be essential for survival under the extreme conditions imposed upon the polar bears.

Concurrent with the publication of this notice in the **Federal Register** the Federal Wildlife Permit Office is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

The application as been assigned file number PRT 2-9221. Written data or views, requests for copies of the complete application, or requests for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service (WPO), P.O. Box 3654, Arlington, VA 22203, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Director.

All statements contained in his notice are summaries of those of the applicant and do not necessarily reflect the views of the United States Fish and Wildlife Service.

Documents submitted in connection with the above application are available for review during normal business hours in Room 601, 1000 North Glebe Road, Arlington, Virginia.

Dated: April 8, 1983.

Larry LaRochelle,

Acting Chief, Branch of Permits, Federal Wildlife Permit Office.

BILLING CODE 4310-55-M

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf; Conoco, Inc.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Conoco Inc. has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS-G 4894, Block 67, West Delta Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837-4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: April 6, 1983.

John L. Rankin,

Acting Regional Manager, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

Office of the Secretary

Nevada; Amendment of Wilderness Inventory Decisions

AGENCY: Office of the Secretary, Interior.

ACTION: Amendment of wilderness inventory decisions.

SUMMARY: This notice amends previous wilderness inventory decisions by the Bureau of Land Management for lands administered by the Nevada State Office of the Bureau of Land Management, eliminating all or part of 14 wilderness study areas (WSA). The total area eliminated from WSA status under Section 603 of the Federal Land Policy and Management Act of 1976 (FLPMA) is 160,142 acres.

EFFECTIVE DATE: April 14, 1983.

FOR FURTHER INFORMATION CONTACT: Nevada State Director, Bureau of Land Management, 300 Booth Street, Post Office Box 12000, Reno, Nevada 89520, telephone (702) 784–5748.

SUPPLEMENTARY INFORMATION:

Amendment of Wilderness Inventory Decisions

This notice completes the action necessary with respect to Bureau of Land Management (BLM) wilderness study areas administered by the BLM Nevada State Office to bring the BLM wilderness review into compliance with recent decisions of the Interior Board of Land Appeals. Previous action on this subject was published in the **Federal Register** on December 30, 1982 (47 FR 58372).

Section 1. Areas Under 5,000 Acres. The following area is deleted from wilderness study area status, effective upon publication of this decision in the **Federal Register**; it was improperly identified as a wilderness study area under Section 603 of FLPMA:

WSA Name: Carson-Iceberg
Number: NV–030–532
Acreage: 550
County: Mono (California)

Section 2. Split-Estate Lands. A. The lands listed as "split-estate" in Table 1 are deleted from wilderness study area status, effective upon publication of this decision in the **Federal Register**. These are lands that were improperly identified for wilderness study under Section 603 of FLPMA. They consist of scattered tracts where the Federal Government owns the surface but where the subsurface mineral estate is nonfederally owned (referred to hereafter as split estate). In the wilderness study areas listed in Table 1, only the indicated acreage of split-estate lands is eliminated from wilderness study; the remainder of the WSA remains under wilderness study, and the boundary of the WSA has not been changed. The deletions do not affect the BLM's previously adopted conclusions as to the presence of wilderness characteristics.

B. The boundary of the wilderness study area listed in Table 2 is modified, effective upon publication of this decision in the **Federal Register**, to delete split-estate lands. Only the indicated acreage is eliminated from wilderness study. The remainder of the WSA remains under wilderness study, and the boundary change does not affect the BLM's previously adopted conclusions as to the presence of wilderness characteristics in the remaining WSA.

Section 3. Contiguous Areas. The areas listed in Table 3 are deleted from the status of wilderness study areas, effective upon publication of this decision in the **Federal Register**. These are lands that were improperly identified for wilderness study under Section 603 of FLPMA. These areas were found not to have wilderness characteristics by themselves.

Section 4. Management of Deleted Lands. All lands administered by the Nevada State Office of the BLM which are deleted from wilderness study status by this decision in Section 1 and in Tables 1, 2 and 3, and by the decision issued on December 30, 1982 (47 FR 58372), are hereby released from management restrictions to protect their wilderness suitability. These lands, totaling 172,505 acres, will be managed for the full range of multiple uses other than wilderness and in conformance with existing land use plans and regulations for those areas.

This is a final decision of the Department of the Interior and is not subject to appeal under 43 CFR Part 4.

Garrey E. Carruthers,
Assistant Secretary.
April 11, 1983.

TABLE 1.—MODIFIED WILDERNESS STUDY AREAS—SPLIT ESTATE DELETED

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 1, (202) 275-7992.

Volume No. OP1-FC-130

By the Commission, Review Board No. 1 Members Parker, Chandler, and Fortier (Member Fortier not participating.)

MC-FC-81248. By decision of April 6, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board 1 approved the transfer to LOBO, INC., Albuquerque, NM, of Certificate No. MC-147551 (Sub-No. 2), issued February 10, 1981, and Permit No. MC-147551 (Sub-No. 3), issued June 30, 1982, to EL SYD, INC., Albuquerque, NM, authorizing the transportation over irregular routes of such commodities as are dealt in or used by distributors of beer, wine and alcholic beverages, between points in the U.S., under continuing contract(s) with New Mexico Beverage Company, and Richard Distributing Company, both of Albuquerque, NM, and corn starch (except in bulk), from Minnitt, TX, to points in CA. Transferee is a carrier holding authority under No. MC-153551. Representative: James C. Ash, 2524 Vermont NE, Albuquerque, NM 87110.

MC-FC-81288. By decision of April 7, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 1 approved the transfer to WADE TRANSIT CORPORATION, Spartanburg, SC, of Certificate No. MC-155140, issued December 21, 1981, to PIEDMONT CARTAGE, INC., of Greenville, SC, authorizing the transportation of commodities in bulk, between points in SC, NC, GA, TN and AL. An application for temporary authority has been filed. Representative: David L. Dorrity, P.O. Box 8717, Greenville, SC 29604 (803) 268-4557.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly.

Please direct status inquiries to Team One at (202) 275–7992.

[FR Doc. 83-9859 Filed 4-13-83; 8:45 am]
BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitnessonly); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings.

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new

entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Please direct status inquires to Team Three at (202) 275–5223.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Volume No. OP3–149

Decided: April 7, 1983.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

[Ex Parte No. MC–43]

Motor Carriers; Lease and Interchange of Vehicles by Motor Carriers

Decided: April 6, 1983.

American Pacific Express, Inc. (Certificate No. MC–155070), Schneider Transport, Inc. (Certificate No. MC–51146 and Permit No. MC–151110), Schneider Tank Lines, Inc. (Certificate No. 110988), Distribution Service Systems, Inc. (Certificate No. MC–118159), WNI, Inc. (Certificate No. 141871), Trans-National Truck, Inc. (Certificate No. MC–133655), Contract Distribution Systems, Inc. (Certificate No. MC–151138, and Permit No. MC–144232), National Bulk Transport, Inc. (Certificate No. 143594) and National Transportation Systems, Inc. (Certificate No. MC–149145) petition for waiver of Subpart B (except for Paragraph (b) of Section 1057.11) of the *Lease and Interchange of Vehicles* regulations (49 CFR Part 1057).

We find:

Petitioners are commonly controlled and administer a common safety program.

Granting the Petition will permit more efficient and economical operations.

There is no public policy consideration or goal which overrides petitioners' goal of reducing energy consumption and other costs.

A denial of the Petition offers no protection to the public and would prevent greater efficiency, fuel economy, and costs savings.

It is ordered:

American Pacific Express, Inc. (Certificate No. MC–155070), Schneider Transport, Inc. (Certificate No. MC–51146 and Permit No. MC–155070), Schneider Tank Lines, Inc. (Certificate No. 110988), Distribution Service Systems, Inc. (Certificate No. MC–118159), WNI, Inc. (Certificate No. 141871), Trans-National Truck, Inc. (Certificate No. MC–133655), Contract Distribution Systems, Inc. (Certificate No. MC–151138, and Permit No. MC–144232), National Bulk Transport, Inc. (Certificate No. 143594) and National Transportation Systems, Inc. (Certificate No. MC–149145), for waiver of Subpart B except Paragraph (b) of § 1057.11 is granted solely with respect to equipment leased among the petitioners, provided petitioners or their authorized representatives agree in writing that control and responsibility for the operation of the equipment shall be that of the lessee from time possession is taken by lessee and the receipt required under § 1057.11(b) is given to the lessor until possession is returned to the lessor and the receipt given to the lessee or given to another authorized carrier in an interchange of equipment.

The waiver granted in this decision does not affect the application of the leasing regulations to a lease between an owner-operator and the lessor carrier.

By the Motor Carrier Leasing Board, Board Members J. Warren McFarland, Bernard Gaillard, and John H. O'Brien.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carriers; Proposed Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of proposed exemptions.

SUMMARY: The motor carriers shown below seek exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11443*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: Comments must be received within 30 days after the date of publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contracting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

Volume No. OP1–125

Decided: April 6, 1983.

Ryder Transportation, Inc.—Continuance-in-Control-Exemption—Ranger Transfleet, Inc.

MC–F–15217, Ryder Transportation, Inc. (RTI) seeks an exemption from the requirement under section 11343 of prior regulatory approval for continuance in control of Ranger Transfleet, Inc. RTI, a non-Carrier holding company is controlled by IU Transportation Services, Inc. (IUTS), and in turn by IU International Corp. (IU). IU controls Ligon Specialized Hauler, Inc. (MC–167225). IU Controls through Special Carriers, Inc., (a holding company), Gemini Trucking, Inc. (MC–150939), Pioneer Trucking, Inc. (MC–1517070), and Customized Transportation, Inc. (MC–152620). IU also controls through IUTS, Ryder Truck Lines, Inc. (RYDER) (MC–2900), Independent Freightway, Inc. (MC–161864), and Pacific Intermountain Express Co. (PIE) (MC–730). PIE also controls Vanguard Contract Carriers, Inc. (MC–157596). RYDER also controls Ryder Truck Lines, Ltd. (MC–154915), RTL Holdings, Inc. (MC–130636), and holds a voting trust certificate for the shares of Ryder Forwarding, Inc. (FF–341). Ranger Transfleet, Inc. has filed a directly related application docketed MC–16690, published in this same **Federal Register** issue.

Send comments to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423
and
(2) Petitioner's representative: John C. Bradley, Suite 1301, 1600 Wilson Blvd., Arlington, VA 22209.

Comments should refer to No. MC–F–15217.

Volume No. OP1–127

Decided: April 7, 1983.

IVL Corporation, Continuance, in Control Exemption, A World Wide Moving, Inc., Interstate Van Lines, Inc., and Ace Van & Storage, Inc.

MC–F–15198. IVL Corporation seeks an exemption from the requirement under section 11343 of prior regulatory approval for its continuance in control of A World Wide Moving, Inc., Interstate Van Lines, Inc., and Ace Van & Storage, Inc. Applicant (a non-carrier holding company) also controls Interstate International, Inc. (a regulated freight forwarder) which results in an unlawful common control, in violation of 49 U.S.C. 11323(a).

Applicant's representative has submitted a plan whereby he proposes to transfer ownership of Interstate International from itself to Interstate Van Lines, Inc. so that Interstate Van Lines, Inc. will control Interstate International. This would not avoid the violation of 49 U.S.C. 11323(a) because IVL would still be in a position to control Interstate International through its control of Interstate Van Lines, Inc.

Applicant must submit in writing within 30 days of this publication a plan of action to avoid unlawful control under 49 U.S.C. 11212(a), or the petition for exemption will be dismissed.

Send comments to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423, and

(2) Petitioner's representative: Marshall Kragen, 1919 Pennsylvania Ave., N.W., Suite 300, Washington, DC 20006.

Comments should refer to No. MC–F–15198.

Volume No. OP1–129

Decided: April 8, 1983.

Robert H. Shepard and John A. Pellman—Continuance in Control Exemption—Military Pack and Crate, Inc., Bob Shepard Enterprises, Inc., d.b.a. Ace Van & Storage Company, Escondido Storage Co., and Mission Van & Storage Company, Inc.

MC–F–15211. Robert H. Shepard and John A. Pellman, who jointly control MPCI, seek an exemption from the requirement under section 11343 of prior regulatory approval for their continuance in control of Military Pack and Crate, Inc. (No. MC–163141), Bob Shepard Enterprises, Inc. doing business

as Ace Van & Storage Company (No. MC–138200), Escondido Storage Co. (No. MC–135211), and Mission Van & Storage Company, Inc. (No. MC–126340).

Send comments to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and

(2) Petitioner's representative: Hayden J. Trubitt, 701 B Street, Suite 2100, San Diego, CA 92101–8197.

Comments should refer to No. MC–F–15211.

Volume No. OP2–165

Decided: April 8, 1983.

Armored Transport, Inc.—Continuance in Control Exemption—Continental Security Guards, Inc. and Armored Transport of Nevada, Inc.

MC–F–15170. Armored Transport, Inc. (ATI) (MC–11702), and in turn its sole stockholder, Robert G. Irvin, seek an exemption from the requirement of prior regulatory approval for their continuance in control of ATI's subsidiaries, Armored Transport of Nevada, Inc. (MC–139096 and MC–142621) and Continental Security Guards, Inc. (MC–164107) when the latter institutes operations as an interstate carrier.

Send comments to:

BILLING CODE 7035–01–M

[No. 39136 et al.[1]]

Motor Carriers; State Freight, Inc.—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Two motor contract carriers have each requested exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted for future as well as existing contracts.

DATES: Comments are due on April 29, 1983. The sought relief will become final on May 16, 1983, unless in response to timely-filed adverse comments, the Commission issues a further decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: Room 2139, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Robin Williams, (202) 275–7697

or

Howell I. Sporn, (202) 275–7691

SUPPLEMENTARY INFORMATION: Section 10702(b) of the Interstate Commerce Act requires contract carriers to file with the Commission actual and minimum rates for the transportation they provide. Section 10761 prohibits transportation without a tariff on file with the Commission, and section 10762 sets forth general tariff requirements including authority to file only minimum rates. Each of these sections authorizes the Commission to grant exemptions to contract carriers when relief is consistent with the public interest and the transportation policy of section 10101. 49 U.S.C. 10702(b), 10761(b), and 10762(f).

The two motor contract carriers identified in the footnote filed petitions requesting exemptions under the three exemption provisions mentioned above. As the issues presented and the relief sought by these petitioners are substantially similar, we are consolidating them for notice purposes.

The petitioners hold, collectively, contract carrier permits MC–110525 (Sub-Nos. 1324 and 1324) and MC–121288 (Sub-No. 3) authorizing transportation of general commodities and malt beverages for several shippers. The petitioners argue, generally, that the tariff filing requirement is costly and represents an undue burden on their ability to meet continually changing market demands and diverse requirements of the shipping public. They assert that they are interested in avoiding unnecessary expenses, delays and burdens which hamper their efforts to provide economical and efficient service. They also argue that the Motor Carrier Act of 1980 encourages the Commission to remove obstacles which

[1] This proceeding embraces two separate petitions for exemption filed by State Freight, Inc., No. 39136, and Chemical Leaman Tank Lines, Inc, No. 38987 (Sub-No. 1).

keep contract carriers from realizing their full potential.

One petitioner, Chemical Leaman Tank Lines, Inc., requests that the exemptions sought apply to both existing and future contracts, and states that it will provide interested parties, upon a written request, with copies of its rates. It also holds contract authority under Sub-No. 1323, for which it already has obtained an exemmption from tariff filing in No. 38967.

We see no reason to deny these carriers the savings to be realized from a tariff filing exemption.[2] It appears that exemptions of these carriers from the requirements that they file tariffs covering their contract operations is consistent with the public interest and the transportation policy of 49 U.S.C. 10101.

We further conclude that an exemption is justified for future contracts and services. Previously we consistently denied exemptions for future contracts and services. We found that because the terms and scope of those contracts are unknown, any exemption of future contracts could only be based on general findings about the continuing need for contract filing requirements for any contract carrier. However, after weighing the advantages and disadvantages to the parties involved and to the public, we conclude that the exemption of these carriers from the requirement that they file tariffs governing their future contract operations, is warranted.[3] The requirement that a contract carrier file a separate exemption request for each new contract is unduly burdensome and time-consuming for both the carrier and the Commission. We also recognize that, for these carriers and their contract shippers, the savings to be realized from a tariff filing exemption for future contracts will be just as real and just as important as those realized from an exemption for existing contracts. Moreover, allowing these contract carriers to participate more freely in the marketplace is in the public interest and is consistent with the national transportation policy.

We provisionally grant petitioners exemption from the contract carrier tariff filing requirements for future as well as existing contracts. If we receive timely filed adverse comments, we will issue a further decision addressing them and deciding whether this provisional approval ought to be withdrawn or permitted to become final.

This action does not significantly affect either the quality of the human environment or conservation of energy resources. However, comments may be submitted on these issues.

(49 U.S.C. 10702(b), 10761(b), and 10762(f))

Decided: April 4, 1983.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor concurred in part and dissented in part. He would have granted the exemptions only for present contracts.

Agatha L. Mergenovich,

Secretary.

Manufacturer of Controlled Substances, Registration; Arenol Chemical Corp.

By Notice dated October 21, 1982, and published in the **Federal Register** on October 28, 1982, (47 FR 47948), Arenol Chemical Corporation, 40-33 23rd Street, Long Island City, New York 11101, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Amphetamine (1100)	II.
Methamphetamine (1105)	II.

No comments or objections have been received. Therefore, pursuant to Section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, § 1301.54(e), the Deputy Assistant Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic classes of controlled substances listed above is granted.

Dated: April 6, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 83-9886 Filed 4-13-83; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 83-4]

Cobblestone Pharmacy; Clinton, Mississippi; Hearing

Notice is hereby given that on December 15, 1982, the Drug Enforcement Administration, Department of Justice, issued to Cobblestone Pharmacy an Order To Show Cause as to why the Drug Enforcement Administration should not deny its application, executed on March 22, 1982 for registration as a retail pharmacy under 21 U.S.C. 823(f).

Thirty days having elapsed since the said Order To Show Cause was received by Respondent and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held commencing at 9:30 a.m. on Tuesday, April 26, 1983 in Courtroom No. 2, Hinds County Courthouse, Pascagoula Street, Jackson, Mississippi.

Dated: April 6, 1983.

Francis M. Mullen, Jr.,

Acting Administrator, Drug Enforcement Administration.

[FR Doc. 83-9883 Filed 4-13-83; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances, Registration; Johnson Matthey, Inc.

By Notice dated November 4, 1982, and published in the **Federal Register** on November 12, 1982, (47 FR 51242), Johnson Matthey, Inc., 1401 King Road, West Chester, Pennsylvania 19380, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of Fentanyl Citrate (9811), a basic class of controlled substance listed in Schedule II.

No comments or objections have been received. Therefore, pursuant to Section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, § 1301.54(e), the Deputy Assistant Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic class of controlled substance listed above is granted.

Dated: April 6, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 83-9887 Filed 4-13-83; 8:45 am]

BILLING CODE 4410-09-M

Revocations of Registrations; Lawson & Sons Pharmacy and Fenwick Pharmacy

On January 7, 1983, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, (DEA) directed Orders to Show Cause to revoke DEA Certificate of Registration AL1440798, issued to Lawson & Sons Pharmacy, 3415 Hamilton Street, Hyattsville, Maryland 20782; and Certificates of Registration AF5542712 and AF1440774 issued to Fenwick Pharmacy, 14310 Coastal Highway, Ocean City, Maryland 21842. The statutory predicate under 21 U.S.C. 824(a) for the proposed revocation was the conviction on March 26, 1982, in the United States District Court for the District of Maryland, of Alfred M. Lawson, the former owner of the Respondent pharmacies of felony convictions relating to controlled substances. Respondents, through counsel, waived their opportunity for a hearing in this matter and submitted written statements regarding their position on the matters of fact and law involved pursuant to 21 CFR 1304.54(c). The Acting Administrator has considered this well written statement in determining the course of action to follow in this matter.

The Acting Administrator finds that Alfred M. Lawson was convicted of one count of conspiracy in violation of 21 U.S.C. 846, and 18 counts of distribution of controlled substances and in aiding and abetting their distribution, in violation of 21 U.S.C. 841(a)(1) and 18 U.S.C. 2. The Acting Administrator further finds that the United States Court of Appeals for the Fourth Circuit affirmed Lawson's conviction in *United States* v. *Lawson*, 682 F.2d 480 (4th Cir. 1982) and the Supreme Court denied certiorari on November 8, 1982.

Based upon an examination of portions of the trial transcript and facts set out in the opinion of the Circuit Court, the Acting Administrator finds that as early as 1973 one Ronald Vance Smith brought large numbers of Preludin prescriptions written by a Washington, D.C. physician for persons other than Smith to the Hyattsville store. These prescriptions were filled primarily by Thomas Lane, the managing pharmacist at the Hyattsville store. Smith stopped bringing the Preludin prescriptions there after drug wholesalers agreed to a moratorium of distribution of Preludin in the Washington, D.C. area. In 1976, Smith began to bring Preludin and Tuinal prescriptions to Fenwick Pharmacy in Ocean City, a resort community on Maryland's eastern shore. All of these prescriptions were written by Dr. Lynn Possinger, a Philadelphia osteopath. Possinger testified that Smith, using the name "Richard Vance", first visited him in late 1974 or early 1975. Possinger wrote prescriptions in fictitious names for Smith, selecting names at random from the Philadelphia telephone directory. Possinger sold Smith prescriptions for $10 to $15 each and wrote Smith 10 to 15 prescriptions a day. In late 1976, Smith began to submit his bogus prescriptions at Fenwick Pharmacy. In a five month period Smith bought 495 fictitious Preludin and 250 fictitious Tuinal prescriptions written by Dr. Possinger to Fenwick Pharmacy. Lawson telephoned Possinger a few times to verify the prescriptions. He also telephoned the Federal Task Force in Philadelphia to see if Possinger was a legitimate physician. Lawson was informed that Dr. Possinger had a poor reputation and that Lawson should be guided by his conscience in deciding whether or not to fill the prescriptions.

The Acting Administrator finds that Smith would drop off the prescriptions of Lawson to fill. Since Fenwick Pharmacy did not stock sufficient quantities of these controlled substances to fill the prescriptions immediately, Lawson would order Tuinal and Preludin from wholesalers and fill the prescriptions when the drugs arrived. During this time the Drug Enforcement Administration began an investigation of Fenwick Pharmacy due to the large quantities of controlled substances the pharmacy was purchasing. Lawson indicated to DEA Diversion Investigators that all of Possinger's patients were coming Ocean City, several hours from Philadelphia, to get their Preludin. He did not mention that Possinger was running a "diet clinic" in Philadelphia. Nor did he mention Ronald Smith. He also told DEA Investigators that he verified each new patient with Possinger, when in fact Lawson only telephoned Philadelphia four times during this time period, and one of those telephone calls following his conversation with DEA investigators. After receiving two grand jury subpoenas for Dr. Possinger's prescriptions, Lawson stopped filling them at Fenwick Pharmacy.

The Acting Administrator finds that in late 1977, Smith began to bring prescriptions for Dilaudid, a Schedule II narcotic, to the Lawson & Sons Pharmacy in Hyattsville, Maryland, a suburb of Washington, D.C. These prescriptions were written by Marshall D. Nickerson, Jr., M.D., a Washington, D.C. physician. The Acting Administrator recently denied Dr. Nickerson's application for a DEA

Certificate of Registration; see 48 FR 3893 (January 27, 1983). The Administrator of DEA also revoked a DEA Certificate of Registration issued earlier to Dr. Nickerson, based on his controlled substance related felony convictions in the District of Columbia. See 45 FR 72310 (October 31, 1980). The Acting Administrator finds that while Thomas Lane filled the vast majority of the prescriptions written by Dr. Nickerson at Lawson's Pharmacy, Alfred Lawson also filled some of them. The same procedure applied as with the Tuinal and Preludin prescriptions in Ocean City. Smith would drop off the prescriptions, the Dilaudid would be ordered from the wholesaler, and Smith would return to pick up the controlled substances when they arrived.

The Acting Administrator finds, as did the jury and the Court of Appeals, that on one occasion Lawson was in the Hyattsville store when Smith came in and they greeted one another. Smith left without presenting any prescriptions or picking up any controlled substances and Lawson did not caution Lane about him. On another occasion, Lawson came into the Hyattsville store and handed Lane a bulging envelope like the ones he normally delivered prescriptions in, saying he had had a visit from "Ron". Lawson also filled a number of Nickerson's Dilaudid prescriptions in the Ocean City store. In the fall of 1978, Lane contacted the Metropolitan Police Department and learned that Dr. Nickerson was under investigation, yet he still filled the Nickerson Dilaudid prescriptions.

The Maryland State Police conducted an investigation of the Hyattsville store. On one occasion the police observed Ronald Smith enter the store and leave with a brown paper bag which the troopers later observed to contain pharmaceutical stock bottles of Dilaudid. On another occasion troopers observed Smith enter the store and obtain a brown paper bag from Lane. The troopers arrested Smith and found 1,000 Dilaudid tablets in four stock bottles in the bag. Lane was arrested later that evening. Eventually, the state charges were dropped in deference to the Federal prosecution.

At trial, a professor of pharmacy testified as an expert for the Government. He concluded that each of the Dilaudid prescriptions written by Dr. Nickerson and each of the Tuinal and Preludin prescriptions written by Dr. Possinger were bogus. Following trial, Lawson was convicted of one count of conspiracy, seven counts of distributing Preludin and Tuinal out of Fenwick Pharmacy and eleven counts of distributing Dilaudid out of Lawson & Sons Pharmacy. Shortly after the jury's verdict, Thomas Lane, who was also convicted, committed suicide.

The Acting Administrator has considered Respondent's submission in this matter. Respondents admit that Thomas Lane was obviously engaged in knowing criminal activity; they contend here, as they have throughout, that Lawson exercised proper pharmacy practice but that his judgment eventually proved wrong. The submission includes an affidavit from Helen Lawson, the wife of Alfred Lawson, who is now the full owner of Fenwick Pharmacy and fifty percent owner of Lawson & Sons Pharmacy. She states that she is an active and knowledgeable officer of each of the corporations and has come to understand the operation of the pharmacies. She states that she has great trust in the two pharmacists she has hired to run these pharmacies and that her husband has withdrawn from involvement in the pharmacies and that only in the Hyattsville store is he "aware of the amount of narcotics orders and nature of prescriptions being filled." She states that he has also worked part time in the Ocean City store, An affidavit from Bennett A. Friedman, the managing pharmacist at the Hyattsville store, also states that before he was incarcerated Mr. Lawson "check[ed] through our class II files." The affidavit of Robert J. Roissier, managing pharmacist at Fenwick Pharmacy, states that he understands that Mrs. Lawson will discourage Mr. Lawson from entering the store when he returns to Ocean City.

Despite the affidavits of Mr. Friedman and Mr. Roissier, the Acting Administrator cannot conclude that the public interest would be served by the continued registration of these pharmacies. The Acting Administrator is disturbed that Mr. Lawson was permitted access to the Schedule II files at the Hyattsville store. Similarly, the Acting Administrator is disturbed to find that Alfred Lawson executed seven DEA official order forms for Schedule II substances at the Ocean City location from May 22, 1982 to July 25, 1982, including one order form with no date. According to his affidavit, Mr. Roissier is the only person at Fenwick Pharmacy authorized to order narcotic drugs and he and Mrs. Lawson have decided to stock only a very minimal supply of Schedule II drugs. The Acting Administrator questions how long that policy would continue when Mr. Lawson returns from incarceration. While Mrs. Lawson has always had some administrative duties in the store, she is not a trained pharmacist and relies on the advice of the managing pharmacists at both stores. In light of Mr. Lawson's past activities, the Acting Administrator cannot conclude that he will not attempt to exert some form of control over one or both of the pharmacies.

DEA has consistently maintained that the registration of a corporate registrant may be revoked upon a finding that a natural person who was an owner, officer or key employee, who had some responsibility for the operation of the registrant's business, has been convicted of a felony offense relating to controlled substances. See *Arenstein v. California State Board of Pharmacy*, 265 Cal. App. 179, 71 Cal. Rptr. 357 (1968). DEA has consistently followed this principle, see: *Leonard S. Cohen t/a Senate Drug Store*, Dk. 72–5, 38 FR 9522 (1973); *River Forest Pharmacy*, Dk. 73–6, 38 FR 27417 (1973); *Afro-American Pharmacy, Inc.*, Dk. 73–10, 38 FR 27534 (1973); *Norman Bridge Drug Company, Inc.*, Dk. 74–22, 41 FR 3108 (1976); *Lynnfield Drug, Inc.*, Dk. 76–6, 42 FR 8435 (1977); *A. G. Pharmacy, Inc., d/b/a Berson Pharmacy*, Dk. 79–12, 45 FR 6868 (1980); *S&S Pharmacy, Inc.*, [no docket number], 46 FR 13052 (1981); *Big–T Pharmacy, Inc.*, Dk. 80–34, 47 FR 51830 (1980). Respondents admit in their submission that there was obvious intentional abuse of the DEA registration at Lawson & Sons Pharmacy. The Acting Administrator concludes that there was similar intentional abuse of the DEA registration at Fenwick Pharmacy.

Upon consideration of the record in this matter, including Respondent's submission, it is the decision of the Acting Administrator to revoke the Certificates of Registration issued to Lawson & Sons Pharmacy and Fenwick Pharmacy and deny any pending applications for renewal of those registrations. Accordingly, under the authority vested in the Attorney General by Section 304 of the Controlled Substances Act, as redelegated to the Acting Administrator of the Drug Enforecment Administration, the Acting Administrator hereby orders that DEA Certificate of Registration AL1440798, previously issued to Lawson & Sons Pharmacy, and Certificates of Registration AF5542712 and AF1440774 issued to Fenwick Pharmacy, are hereby revoked effective May 16, 1983.

Dated April 6, 1983.

John C. Lawn,

Acting Administrotor.

[FR Doc 83-9868 Filed 4-13-83; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances; Registration; Mallinckrodt, Inc.

By Notice dated October 5, 1982, and published in the **Federal Register** on October 14, 1982, [47 FR 45999], Mallinckrodt, Inc., Department CB, Mallinckrodt and Second Streets, St. Louis, Missouri 63147, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Codeine (9050)	II
Diprenorphine (9058)	II
Etorphine Hydrochlonde (9059)	II
Dihydrocodeine (9120)	II
Oxycodone (9143)	II
Diphenoxylate (9170)	II
Hydrocodone (9193)	II
Methadone (9250)	II
Methadone-Intermediate (9254)	II
Morphine (9300)	II
Thebaine (9333)	II
Opium Extracts (9610)	II
Opium Fluid Extracts (9620)	II
Tincture of Opium (9630)	II
Powdered Opium (9639)	II
Granulated Opium (9640)	II
Oxymorphone (9652)	II
Noroxymorphone (9668)	II

No comments or objections have been received. Therefore, pursuant to Section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, § 1301.54(e), the Deputy Assistant Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic classes of controlled substances listed above is granted.

Dated: April 1, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 83-9867 Filed 4-13-83; 8:45 am]

BILLING CODE 4410-09-M

Revocation of Registrations; Matacumbe Pharmacy; Bell Wholesale Drugs, Inc.

On February 7, 1983, the Acting Administrator of the Drug Enforcement Administration [DEA] directed to Bell Wholesale Drugs, Inc., 883 West 27th Street, Hialeah, Florida 33010, and Matacumbe Pharmacy, 2960 N.W. 17th Avenue, Miami, Florida 33125 [Respondents], Orders to Show Cause proposing to revoke the Respondents' DEA registrations. Matacumbe Pharmacy is registered under the Controlled Substances Act as a retail pharmacy and is the holder of DEA Certificate of Registration AM1478266. Bell Wholesale Drugs, Inc., is registered as a distributor of controlled substances and is the holder of DEA Certificate of Registration PB0197889.

Simultaneously, citing his preliminary finding of imminent danger to the public health and safety, the Acting Administrator ordered the immediate suspension of the Respondents' registrations pending a final determination in these proceedings. The Orders to Show Cause were served upon the Respondents on February 9, 1983. On that date, the immediate suspensions were also executed. Pursuant to Title 21, United States Code, 824(f), all controlled substances possessed by the Respondents pursuant to their suspended registrations were placed under seal and were removed for safekeeping.

The Respondents were given thirty days to request a hearing or to otherwise respond to the issues raised by the Orders to Show Cause. More than thirty days have passed since those orders were served and the Drug Enforcement Administration has received no communication whatever from either of the two Respondents. Accordingly, pursuant to the provisions of Title 21, Code of Federal Regulations §§ 1301.54(d) and 1301.54(e), the Respondents have waived their opportunity for a hearing in this matter and the Acting Administrator hereby issues his Final Order, based upon the following findings of fact and conclusions of law.

The Acting Administrator finds that on January 7, 1983, in the United States District Court for the Central District of Illinois, Carlos Gonzales, President and owner of the two Respondents, was convicted of conspiracy to import marihuana in violation of Title 21, United States Code, 846. This is a felony offense relating to a controlled substance within the meaning and intent of Title 21, United States Code, 824(a)(2). Accordingly, the Acting Administrator concludes that there is a statutory basis for the revocation of the Respondents' DEA registrations.

Additionally, the Acting Administrator finds that during the period from January 1, 1981 through January 27, 1983, Matacumbe Pharmacy purchased at least 902,000 dosage units of Empirim Compound No. 4 and at least 899,000 dosage units of Doriden tablets, both Schedule III controlled substances, and could not account for the distribution of such as required by law and DEA regulations. During the period from January 1, 1982 through January 27, 1983, Bell Wholesale Drugs, Inc., purchased approximately 423,000 dosage units of Empirim Compound No. 4 and approximately 424,000 dosage units of Doriden, and could not account for the distribution of such as required by law and DEA regulations. These drugs are heavily abused in combination and are in great demand in the illicit traffic. The Doriden tablets contain glutethimide, a hypnotic, and the Empirim Compound tablets contain codeine, a narcotic analgesic. The combination is known variously by abusers as "loads," "hits" or "Fours and Dors." Fatalities among abusers of this combination are not uncommon. Since the Respondents have apparently chosen to waive their opportunity for a hearing in which they might have been able to provide some explanation for these incredibly large shortages, the Acting Administrator must conclude that the Respondents' registrations were used to acquire large quantities of controlled substances which were subsequently diverted into the illicit traffic.

Having concluded that there is a statutory basis for the revocation of the Respondents' DEA registrations and having further found that the Respondents' registrations were used to facilitate diversion on a large scale, the Acting Administrator concludes that these registrations must be revoked. Accordingly, pursuant to the authority vested in the Attorney General by Title 21, United States Code, 824, and redelegated to the Acting Administrator of the Drug Enforcement Administration, the Acting Administrator hereby orders that DEA Certificates of Registration AM1478266 and PB0197889 be, and they hereby are, revoked.

In light of the immense quantities and the extremely dangerous nature of the drugs diverted through the subject registrants and taking into consideration all of the facts and circumstances herein, the revocation of these registrations shall be effective immediately.

Dated: April 14, 1983.

Francis M. Mullen, Jr.,

Acting Administrator.

[FR Doc. 83-9869 Filed 4-13-83; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 83-6]

Michael M. Motamed, M.D.; Rubidoux, California; Hearing

Notice is hereby given that on January 28, 1983, the Drug Enforcement Administration, Department of Justice, issued to Michael M. Motamed, M.D., an Order To Show Cause as to why the Drug Enforcement Administration should not revoke his DEA Certificate of Registration, AM1607437.

Thirty days having elapsed since the said Order To Show Cause was received by Respondent and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held commencing at 9:30 a.m. on Thursday, April 28, 1983 in the U.S. Customs Courtroom, 8th Floor, 300 N. Los Angeles Street, Los Angeles, California.

Dated: April 6, 1983.

Francis M. Mullen, Jr.,

Acting Administrator, Drug Enforcement Administration.

BILLING CODE 4410-09-M

NATIONAL TRANSPORTATION SAFETY BOARD

Accident Reports; Safety Recommendations and Responses; Availability

Recommendations to:

Federal Aviation Administration: Mar. 31: A-83-12: Review the design criteria for the aluminum hydraulic lines in Cessna Model 404 airplanes to determine that the fatigue limit of the tubing, the prescribed installation bend radii, and the cyclic loads do not result in an unacceptable margin of safety as to fatigue and failure of the hydraulic lines; if the margin of safety is not adequate, require that the hydraulic lines: (1) Be inspected at appropriate intervals by a method that will reveal cracks in the lines, or (2) be replaced at a specified service life or time that will forestall fatigue failure of the lines. *Apr. 5: A-83-31:* Issue an Airworthiness Directive requiring an immediate inspection of the tailpipe muffler/diffuser assemblies which are incorporated on certain models of Piper Seneca PA-34-200 airplanes for evidence of deterioration. If warping, buckling, burning, or cracks exist, the affected assembly should be replaced. *A-83-32:* Conduct an engineering evaluation of the Piper Seneca Model PA-34-200 tailpipe muffler/diffuser assembly to determine whether accelerated inspection intervals, muffler life limits, or related design improvements are warranted.

Note.—Single copies of these recommendation letters are available on written request to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594. Please include the recommendation number(s) in your request. Copies of recent recommendation letters are free of charge while supplies last. Recommendations that must be photocopied will be billed at a cost of 20 cents per page ($2 minimum charge).

Recommendation Responses from:

Aviation.—*Federal Aviation Administration: Mar. 21: A-82-150:* The Reeve Aleutian Airways, Inc., YS-11 checklist and operations manual have been changed to include added emphasis on the in-flight use of fuel heat during approach and landings. Changes to the operations manual now provide the flight crew with sufficent information to decide when the fuel heat should be used in flight. *A-82-151:* Requested on Jan. 17, 1983, that the Japan Aviation Bureau confirm that the markings on the catch and exit handles of the Nihon YS-11 were in accordance with applicable airworthiness regulations. *Mar. 21: A-81-36:* Airworthiness Directive (AD) 80-22-15 has been superseded by AD 81-25-05 regarding lift strut forks on certain Piper aircraft. Believes that an adequate safety level can be achieved with AD 82-25-05 without requiring the replacement of all forks in service. *A-81-37:* Piper is now identifying the forks it manufactures with the Piper logo stamped at the fork end of the part to indicate the new parts. These forks also carry a new part number. *A-81-38,* which recommended specifying that required inspections of lift strut forks on certain Piper aircraft be performed only by manufacturers authorized to fabricate these forks or by other designated central inspection facilities having the requisite facilities and expertise: Believes that the inspections required by AD 81-25-05 are not complex and are not beyond the capability of the authorized inspection agencies. *Mar. 21: CY-70-42, Part 4:* Any attempt to initiate regulatory action concerning aircraft crashworthiness without the proper substantive technical data base would be unsuccessful. Completion of research activities concerning crash pulse definition and computer-generated modeling techniques are imminent. These programs can provide necessary and sufficient data to formulate design standards and initiate rulemaking action as appropriate. *A-77-70,* which recommended amending 14 CFR 23.785 to require installation of approved shoulder harnesses at all seat locations as outlined in NPRM 73-1: Data from an FAA benefit-cost analysis regarding general aviation shoulder harnesses will be evaluated in concert with applicable forthcoming General Aviation Manufacturers Association recommendations resulting from their shoulder harness installation program, the Transportation Systems Center "Small Airplane Stall Speed Study" committee recommendations, and the safety recommendations under discussion. *A-80-125:* A similar scheme to that proposed for retrofitting certain aircraft with shoulder harnesses has been addressed in the FAA's benefit-cost analysis. This recommendation will be evaluated in concert with recommendation A-77-70. *A-80-126,* which recommended that the FAA develop, in coordination with airframe manufacturers, detailed, approved installation instructions for installing shoulder harnesses at each seat location in current models and types of general aviation aircraft in which shoulder harness attachment points were not provided as standard equipment: These retrofit schemes are also addressed in the benefit-cost analysis in order to quantify their merits. Design functions are the responsibility of the aircraft type-certificate holder or owner.

A-80-127: A similar scheme to that proposed for retrofitting certain aircraft with shoulder harnesses has been addressed in the FAA's benefit-cost analysis. This recommendation will be evaluated in concert with recommendation A-77-70. *A-80-128,* which recommended the extension of all newly established occupant protection provisions of 14 CFR Part 23 to all newly manufacturered general aviation aircraft: Does not believe that in the absence of a clearly defined unsafe condition that arbitrary retroactive application of newly defined occupant protection or other regulatory provisions is appropriate or in compliance with Executive Order 12291. Retrofit schemes are typically very costly, with little identifiable benefit. *A-80-129,* which recommended revising 14 CFR 23.785(j) to incorporate performance standards and test criteria to insure that an acceptable level of occupant safety is achieved through cabin "delethalization": The general scope of the recommendation is too broad. Envisions that advisory material such as that suggested normally would be developed in the FAA's general aviation on crash dynamics program to supplement any defined regulatory actions. *A-80-130,* which recommended revising current standards for seat and restraint systems to incorporate needed crashworthiness improvements identified in FAA Research Project reports: Concurs with the intent of recommendation, but, without specific information concerning the needed crashworthiness improvements and desired regulatory changes, can take no definitive actions. *A-80-131,* which recommended establishing standards for the dynamic testing of occupant protection devices required in general aviation aircraft: It appears as if the Safety Board is recommending dynamic testing of all the immediate components in the cockpit/cabin environment without sufficient rationale and/or justification to support such a position. Compliance with such a recommendation would be an enormous undertaking well beyond the scope of any envisoned engineering and development programs and contrary to the philosophies of FAA's recent Regulation by Objectives initiatives.

Highway—*Governor of Texas: Mar. 25: H-82-18:* Would support a bill raising the minimum legal drinking age in Texas.

Governor of Minnesota: Mar. 11: H-82-18: Acknowledging receipt of information concerning raising the minimum legal drinking age in Minnesota.

Governor of New York: Mar. 21: H-82-18: New York State recently raised the purchase age for alcoholic beverages to 19. Until the impact of this new law on highway safety is determined, the governor will not be in a position to recommend any further increase in the age limit.

American Association of State Colleges and Universities: Mar. 14: H–83–5 and –6: Printed an article on the accident involving University of Virginia students in Lynchburg, Virginia, on Oct. 6, 1982, and the recommendations mady by the Board. Agrees that the recommendations concerning student transportation should be put into force on every campus.

Railroad—*Association of American Railroads: Mar. 11: R–83–28 and –29:* Senior officers of the carriers and the employee unions have met to discuss alcohol abuse on the railroads. While it was not possible to reach agreement on the use of specific testing devices, a certification procedure modeled on the Southern Pacific program has been submitted to the Federal Railroad Administration for consideration. *Mar. 21: R–83–27:* Has informed members of the circumstances of the accident in Emerson, Iowa, on Jun. 15, 1982, and informed them of the Board's recommendation that railroads adopt a system of professionally gathered and evaluated meteorological information to better assure timely knowledge of climatic conditions that may affect the safe operation of train movements. *Mar. 29: R–83–7:* Informed its members of the circumstances of the accident in Thermal, California, on Jan. 7, 1982. Will be able to set the frequency of rail inspection more appropriately after completion of a cooperative study of performance standards, which include rail fatigue defects, being made by the Federal Railroad Administration, the American Railway Engineering Association, the AAR Engineering Division, and the AAR Research and Test Department. *R–83–8:* Will request companies to evaluate their programs concerning the documentation of hazardous materials carried on freight trains and emergency response information for those commodities, and to strengthen their programs as necessary. *R–83–9:* The AAR's Bureau of Explosives, Intermodal Committee, Station and Terminal Steering Committee, and Research and Test Department are working on assignments related to the problem of accurate information on waybills for trailer-on-flat-car and container-on-flat-car shipments containing hazardous materials.

Burlington Northern Railroads: Mar. 17: R–83–19: Expanded method of collecting meteorological data to include utilizing the services of the National Oceanic and Atmospheric Administration. Has started a program of strategically locating weather monitors. *R–83–20,* which recommended a review of the training provided to employees to enable them to better assess climatic threats to safe train movements: All BN rules provide adequate action or procedures to be followed during severe weather conditions. Appropriate rules have been and will continue to be reviewed with each craft to ensure a greater level of awareness and compliance.

Marine—*U.S. Coast Guard: Mar. 14: M–82–20,* which recommended the institution of Vessel Traffic Service (VTS) flow control of ferry and large vessel traffic crossing the Seattle Harbor, pier 52 ferry lanes during periods of restricted visibility: Does not concur with recommendation. The Puget Sound VTS provides information on vessel movements within Seattle Harbor at all times. With this information available, in addition to the master's own observations, vessels would normally be able to arrange passing agreements with no further aid from the VTS. *M–82–21:* Will work with the Washington State Ferries and the National Oceanic and Atmospheric Administration to delineate the standard ferry routes and have them published on Puget Sound charts. For temporary routes, a Notice to Mariners will be published to inform the users of Puget Sound of any changes to these routes. *M–82–22:* Initiated a district by district evaluation of the manner in which the Navigation Safety Regulations have been applied to ferries. *M–82–23,* which recommended revising the Navigation Safety Regulations, 33 CFR Part 164, relative to gyrocompasses, vessel maneuvering characteristic data, chart use, and radar contact plotting, so that ferry passengers are afforded an equivalent amount of safety regardless of the ferries' gross tonnage: Does not concur with recommendation. The application of the regulations to the Washington State Ferries is appropriate to the type and limited scope of the operation. Revising the navigation equipment requirements, which are based on internationally developed standards which have been supported by the United States, is not justified based on two isolated casualties.

Governor of the Virgin Islands: Mar. 13: M–80–115: Virgin Islands Fire Service has adopted a contingency plan for all types of emergency operations, including fires on ships that are docked. Hopefully, the plan will be expanded to include vessels at anchor in the harbor when a fire/rescue boat is acquired. *M–80–116:* Two officers of "Chief" rank have attended the Marine Firefighting and Emergency Training Course of Texas A&M University, and other supervisors will be attending the same course.

American Bureau of Shipping: Mar. 16: M–83–36: Some of the comments raised in the recommendation concerning revising stability criteria contained in the Rules for Building and Classing Mobile Offshore Drilling Units are presently under review by ABS's Special Committee—Mobile Offshore Drilling Units.

Ocean Drilling & Exploration Company: Mar. 10: M–83–24 through –33. Acknowledging receipt of recommendations resulting from the Board's investigation of the capsizing and sinking of the U.S. mobile offshore drilling unit OCEAN RANGER in the Atlantic Ocean on Feb. 15, 1982.

Federal Emergency Management Agency Mar. 22: M–80–117: Provided training through its National Fire Academy to the Chief of the Virgin Islands Fire Department in emergency planning. Is considering the short-term assignment of one of its training staff experienced in harbor fire prevention and control to the Virgin Islands. Has received no communication from the U.S. Coast Guard concerning any joint effort in the revision of the Virgin Islands contingency plan.

Pipeline—*Wisconsin Natural Gas: Mar. 4: P–76–85:* Has revised Construction Standards to require that underground facilities be located and marked prior to construction.

National LP-Gas Association: Mar. 24. P–82–45 and –46: Advised its members of the accident that occurred in Dublin, Georgia, on Sept. 7, 1982, and reemphasized the importance of using proper procedures for cutting into gas mains under pressure.

Intermodal—*National Association of Regulatory Utility Commissioners: Mar. 16: I–82–5:* Surveyed its members to determine the status of current State policies regarding regulations concerning the storage of hazardous materials on or near railroad rights-of-way.

Note.—Single copies of these response letters are available on written request to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594. Please include respondent's name, date of letter, and recommendation number(s) in your request. The photocopies will be billed at a cost of 20 cents per page ($2 minimum charge).

H. Ray Smith, Jr.,

BILLING CODE 4910–58–M

NUCLEAR REGULATORY COMMISSION

[Dockets Nos. 50–313 and 50–368]

Arkansas Power & Light Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 75 and 42 to Facility Operating License Nos. DPR–51 and NPF–6, issued to Arkansas Power & Light Company (the licensee), which revised the Technical Specifications for operation of Arkansas Nuclear One, Units Nos. 1 and 2 (the facilities), located in Pope County, Arkansas. The amendments are effective as of the date of issuance.

The amendments modify the Technical Specifications to clarify the operability status of equipment with the timely completion of the surveillance requirements for that equipment.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendments will not result in any significant environmental impact and that pursuant to 10 CFR

51.5(d)(4), and environmental impact statement or negative declaration and environmental impact apprasial need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for amendments dated May 28, 1982, as modified January 14, 1983, (2) Amendments Nos. 75 and 42 to Facility Operating License Nos. DPR–51 and NPF–6, and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555 and at the Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of April 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 83–9912 Filed 4–13–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–289]

Metropolitan Edison Co. et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 84 to Facility Operating License No. DPR–50, issued to Metropolitan Edison Company, Jersey Central Power and Light Company, Pennsylvania Electric Company, and GPU Nuclear Corporation (the licensees), which revised the Technical Specifications (TSs) for operation of the Three Mile Island Nuclear Station, Unit No. 1 (the facility) located in Dauphin County, Pennsylvania. The amendment is effective as of its date of issuance.

The amendment revises Emergency Plan and Security Plan TS audit frequencies to coincide with the Code of Federal Regulations, and invokes a requirement for plant staff overtime procedures.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated January 31, 1983, (2) Amendment No. 84 to License No. DPR–50, and (3) the Commission's letter to GPU Nuclear Corporation dated April 4, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 4th day of April 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch No. 4, Division of Licensing.

[FR Doc. 83–9914 Filed 4–13–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–282 and 50–306]

Northern States Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 64 and 58 to Facility Operating License Nos. DPR–42 and DPR–60 issued to Northern States Power Company (the licensee), which revised Technical Specifications for operation of Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2 (the facilities) located in Goodhue County, Minnesota. The amendments are effective as of the date of issuance.

The amendments revise the Administrative Control section of the Technical Specifications (TS) 6.1 concerned with procedural requirements for limited overtime that reflects the NCR guidance in Generic Letter 82–12 (June 5, 1982) and the revised NUREG–0737 Item I.A.1.3.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) The application for amendments dated January 14, 1983, (2) Amendment Nos. 64 and 58 to License Nos. DPR–42 and DPR–60, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Environmental Conservation Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Divison of Licensing.

Dated at Bethesda, Md., this 6th day of April 1983.

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 83–9915 Filed 4–13–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–285]

Omaha Public Power District; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 71 to Facility Operating License No. DPR–40 issued to Omaha Public Power District (the licensee), which revised the Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Nebraska.

The amendment is effective as of its date of issuance.The amendment permanently revises the minimum

temperature requirement for secondary system pressure testing.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated January 3, 1983, (2) Amendment No. 71 to License No. DPR-40 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-389]

St. Lucie Plant, Unit 2; Florida Power & Light Co., et al.; Issuance of Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission), has issued Facility Operating License No. NPF-16, (License) to Forida Power & Light Company, Orlando Utilities Commission of the City of Orlando and Florida Municipal Power Agency (licensees). This License authorizes operation of the St. Lucie Plant, Unit 2 (facility) at reactor core power levels not in excess of 2560 megawatts thermal in accordance with the provisions of the License, the Technical Specifications and the Environmental Protection Plan. However, the License contains a condition currently limiting operation to five percent of full power (128 megawatts thermal). Authorization to operate at greater than five percent power will require specific Commission approval.

St. Lucie Plant, Unit 2 is a pressurized water reactor located at the licensees' site on Hutchinson Island in St. Lucie County, Florida approximately 34 miles north-northeast of the city of West Palm Beach. The License is effective as of the date of issuance and shall expire at midnight on April 6, 2023.

The application for the license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the License. Prior public notice of the overall action involving the proposed issuance of an operating license was published in the **Federal Register** on March 9, 1981 (46 FR 15831).

The Commission has determined that the issuance of this license will not result in any environmental impacts other than those evaluated in the Final Environmental Statement since the activity authorized by the license is encompassed by the overall action evaluated in the Final Environmental Statement.

For further details with respect to this action, see (1) Facility Operating License No. NPF-16, with Technical Specifications (NUREG-0949) and Environmental Protection Plan; (2) the report of the Advisory Committee on Reactor Safeguards dated November 17, 1981; (3) the Commission's Safety Evaluation Report dated October 1981; Supplement No. 1 dated December 1981; Supplement No. 2 dated September 1982; Supplement No. 3 dated April 1983; (4) the Final Safety Analysis Report and amendments thereto; (5) the Environmental Report and supplements thereto; (6) the Draft Environmental Statement dated October 1981; (7) the Final Environmental Statement dated April 1982; and (8) the assessment of the effect of license duration on matters discussed in the Final Environmental Statement for St. Lucie Plant, Unit 2.

These documents are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and the Indian River Community College Library, 3209 Virginia Avenue, Ft. Pierce, Florida 33450. A copy of Facility Operating License No. NPF-16 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing. Copies of the Safety Evaluation Report and its Supplements 1 through 3 (NUREG-0843) and the Final Environmental Statement (NUREG-0842) may be purchased at current rates from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, and through the NRC GPO sales program by writing the U.S. Nuclear Regulatory Commission, Attention: Sales Manager, Washington, D.C. 20555. GPO deposit holders can call 301-492-9530.

Dated at Bethesda, Md., the 6th day of April 1983.

For the Nuclear Regulatory Commission.

George W. Knighton,

Chief, Licensing Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-259]

Tennessee Valley Authority (Browns Ferry Nuclear Plant, Unit 1); Order Confirming Licensee Commitments on Post-TMI Related Issues

I

The Tennessee Valley Authority (the licensee) is the holder of Facility Operating License No. DPR-33 which authorizes the operation of the Browns Ferry Nuclear Plant, Unit 1 (the facility) at steady-state power levels not in excess of 3293 megawatts thermal. The facility is a boiling water reactor (BWR) located at the licensee's site in Limestone County, Alabama.

II

Following the accident at Three Mile Island Unit No. 2 (TMI-2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities based on the experience from the accident at TMI-2 and the official studies and investigations of the accident. The staff's proposed requirements and schedule for implementation are set

forth in NUREG–0737, "Clarification of TMI Action Plan Requirements." Among these requirements are a number of items, consisting of hardware modifications, administrative procedure implementation and specific information to be submitted by the licensee, scheduled to be completed on or after July 1, 1981. On March 17, 1982, a letter (Generic Letter 82–05) was sent to all licensees of operating power reactors for those items that were scheduled to be implemented from July 1, 1981 through March 1, 1982. Subsequently, on May 5, 1982, a letter (Generic Letter 82–10) was also sent to all licensees of operating power reactors for those items that were scheduled for implementation after March 1, 1982. These letters are hereby incorporated by reference. In these letters each licensee was requested to furnish within 30 days pursuant to 10 CFR 50.54(f) the following information for items which the staff had proposed for completion on or after July 1, 1981:

(1) For applicable items that have been completed, confirmation of completion and the date of completion. (2) For items that have not been completed, a specific schedule for implementation, which the licensee committed to meet, and (3) Justification for delay, demonstration of need for the proposed schedule, and a description of the interim compensatory measures being taken.

III

The licensee responded to Generic Letter 82–05 by letter dated April 14, 1982. By letters dated May 13, 1982 and February 1, 1983, we requested additional information on TVA's responses. TVA submitted revised responses to Generic Letter 82–05 by letters dated June 17, June 28 and July 15, 1982 and January 14 and February 28, 1983. The licensee responded to Generic Letter 82–10 by letter dated June 24, 1982. In these submittals, the licensee confirmed that some of the items identified in the Generic Letters had been completed, took technical exception to one item, and made firm commitments to complete the remainder. The attached Tables summarizing the licensee's schedular commitments or status were developed by the staff from the Generic Letters and the licensee-provided information.

Generic Letters 82–05 and 82–10 applied to 16 and 10 items, respectively, for BWRs with jet pumps. Of the 10 items listed in Generic Letter 82–10, six items are not included in this Order. Item I.A.1.3.2 is part of a separate rulemaking; Items I.C.1, III.A.1.2 (2 items), and III.A.2.2 will be handled separately following Commission actions that would proceed as a result of its consideration of SECY 82–111, as amended; and Item II.K.3.30 and II.K.3.31 (1 item) is not required until one year after staff approval of the generic model and staff review of these models has not been completed.

Thirteen of the 20 items addressed in this Order are considered by the licensee to be completed or to require no modifications. The licensee is taking technical exception to one item, II.K.3.22, that will be addressed in a separate action. On item II.B.3, TVA has completed the post-accident sampling facility. However, the tie-in of the sample lines inside the reactor vessel and the waste/flush lines to the torus are scheduled for future refueling outages. Since the staff is still evaluating TVA's design and program, this item will also be addressed in a separate action. These two items—II.B.3 and II.K.3.22—are therefore not included in this Order.

The staff's evaluation of the licensee's delays for the remaining five items is provided herein:

II.F.1 Post-Accident Monitoring (5 items)

Three items, II.F.1.3, II.F.1.4 and II.F.1.5 are scheduled to be installed during the next refueling outage on each unit. For Unit 1, the next refueling is scheduled to start March 18, 1983 and be completed by July 18, 1983. The delay in installation has been the result of late delivery schedules in materials and vendor-supplied equipment. Two items, II.F.1.1 and II.F.1.2, will be completed (including readout in the control room) prior to startup in Cycle 7 (about February 1985). The delay is primarily the result of the long time spent by TVA in designing a customized monitoring system. This approach was abandoned in June 1982 and purchase of commercially available equipment initiated. Based on scheduled delivery of materials and components, installation will begin in June 1984 and be completed by December 31, 1984. The effluent monitors currently installed at Browns Ferry perform the functions required by II.F.1.1 and II.F.1.2, but with a smaller range than required by NUREG–0737. Also, TVA has the capability for monitoring through use of grab samples.

We find, based on the above evaluation, that: (1) the licensee has taken corrective actions regarding the delays and has made a responsible effort to implement the NUREG–0737 requirements noted; (2) there is good cause for the delays; and (3) as noted above, interim compensatory measures have been provided.

In view of the foregoing, I have determined that these modifications and actions are required in the interest of public health and safety and, therefore, the licensee's commitment should be confirmed by Order.

IV

Accordingly, pursuant to Sections 103, 161i, and 161o of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, *it is hereby ordered effective immediately that the licensee shall:*

Implement and maintain the specific items described in the Attachments to this Order in the manner described in the licensee's submittals noted in Section III herein no later than the dates in the Attachments.

V

The licensee may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. A request for a hearing shall be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

A copy shall also be sent to the Executive Legal Director at the same address. *A request for hearing shall not stay the immediate effectiveness of this order.*

If a hearing is requested by the licensee, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section IV of this Order. This Order is effective upon issuance.

Dated at Bethesda, Md., this 25th day of March 1983.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation.

ATTACHMENT 1.—LICENSEE'S COMMITMENTS ON APPLICABLE NUREG-0737 ITEMS FROM GENERIC LETTER 82-05

Item	Title	NUREG-0737 schedule	Requirement	Licensee's completion schedule (or status)
I.A.3.1	Simulator Exams	Oct. 1,1981	Include simulator exams in licensing examinations	Complete.
II.B.2	Plant Shielding	Jan. 1, 1982	Modify facility to provide access to vital areas under accident conditions.	Do.
II.B.3	Post-Accident [1] Sampling	do	Install upgraded post-accident sampling capability	To be addressed inseparate action.
II.B.4	Training for Mitigating Core Damage.	Oct. 1, 1981	Complete training program	Complete.
II.E.4.2	Containment Isolation Dependability.	July 1, 1981	Part 5—lower containment pressure setpoint to level compatible w/normal operation.	Do.
		do	Part 7—isolate purge & vent valves on radiation signal	Do
II.F.1	Accident Monitoring	Jan. 1, 1982	(1) Install noble gas effluent monitors with control room instrumentation.	Prior to start-up in Cycle 7 (2/85).
		do	(2) Provide capability for effluent monitoring of iodine with control room instrumentation.	Do.
		do	(3) Install incontainment radiation-levels monitors	Prior to start-up in Cycle 6 (7/83).
II.F.1		Jan. 1, 1982	(4) Provide continuous indication of containment pressure.	Do.
		do	(5) Provide continuous indication of containment water level.	Do.
		do	(6) Provide continuous indication oh hydrogen concentration in containment.	Complete.
II.K.3.15	Isolation of HPCI & RCIC Modification.	July 1, 1981	Modify pipe break detection logic to prevent inadvertent isolation.	Do.
II.K.3.22	RCIC Suction [1]	Jan. 1, 1982	Modify design of RCIC suction to provide automatic transfer to torus.	Technical Exception.
II.K.3.24	Space Cooling for HPCI/RCIC	do	Confirm the adequacy of space cooling for HPCI/RCIC	Complete
II.K.3.27	Common reference level	July 1, 1981	Provide common reference level for vessel level instrumentation.	Do.

[1] Not Part of Confirmatory Order.

ATTACHMENT 2.—LICENSEE'S COMMITMENTS ON APPLICABLE NUREG-0737 ITEMS FROM GENERIC LETTER 82-10

Item	Title	NUREG-0737	Requirement	Licensee's completion schedule (or status)
I.A.1.3.1	Limit Overtime	Oct. 1, 1982 per Gen. Ltr. 82-12 dtd June 15, 1982.	Revise adminstrative procedures to limit overtime in accordance w/NRC Policy Statement issued by Generic Ltr. No. 82-12, dtd June 15, 1982.	Complete.
I.A.1.3.2	Minimum Shift [1] Crew	To be superseded by Proposed Rule.	To be addressed in the Final Rule on Licensed Operator Staffing at Nuclear Power Units.	To be addressed when Final Rule is issued.
I.C.1	Revise Emergency [1] Procedures	Superseded by SECY 82-111	Reference SECY 82-111, Requirements for Emergency Response Capability.	To be determined.
II.D.1.2	RV and SV Test Programs	July 1, 1982	Submit plant specific reports on relief and safety valve program.	Complete.
II.K.3.18	ADS Actuation	Sept. 30, 1982	Submit revised position on need for modifications	Do.
II.K.3.30 & 31	SBLOCA Analysis [1]	1 yr. after staff approval of model.	Submit plant specific analyses	To be determined following staff approval of model.

BILLING CODE 7590-01-M

[Docket No. 50-260]

Tennessee Valley Authority, (Browns Ferry Nuclear Plant, Unit 2); Order Confirming Licensee Commitments On Post-TMI Related Issues

I

The Tennessee Valley Authority (the licensee) is the holder of facility Operating License No. DPR-52 which authorizes the operation of the Browns Ferry Nuclear Plant, Unit 2 (the facility) at steady-state power levels not in excess of 3293 megawatts thermal. The facility is a boiling water reactor (BWR) located at the licensee's site in Limestone County, Alabama.

II

Following the accident at Three Mile Island Unit No. 2 (TMI-2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities based on the experience from the accident at TMI-2 and the official studies and investigations of the accident. The staff's proposed requirements and schedule for implementation are set forth in NUREG-0737, "Clarification of TMI Action Plan Requirements." Among these requirements are a number of items, consisting of hardware modifications, administrative procedure implementation and specific information to be submitted by the licensee, scheduled to be completed on or after July 1, 1981. On March 17, 1982, a letter (Generic Letter 82-05) was sent to all licensees of operating power reactors for those items that were scheduled to be implemented from July 1, 1981 through March 1, 1982. Subsequently, on May 5, 1982, a letter (Generic Letter 82-10) was also sent to all licensees of operating power reactors for those items that were scheduled for implementation after March 1, 1982. These letters are hereby

incorporated by reference. In these letters each licensee was requested to furnish within 30 days pursuant to 10 CFR 50.54(f) the following information for items which the staff had proposed for completion on or after July 1, 1981:

(1) For applicable items that have been completed, confirmation of completion and the date of completion, (2) For items that have not been completed, a specific schedule for implementation, which the licensee committed to meet, and (3) justification for delay, demonstration of need for the proposed schedule, and a description of the interim compensatory measures being taken.

III

The licensee responded to Generic Letter 82–05 by letter dated April 14, 1982. By letters dated May 13, 1982 and February 1, 1983 we requested additional information on TVA's responses. TVA submitted revised responses to Generic Letter 82–05 by letters dated June 17, June 28 and July 15, 1982 and January 14 and February 28, 1983. The licensee responded to Generic Letter 82–10 by letter dated June 24, 1982. In these submittals, the licensee confirmed that some of the items identified in the Generic Letters had been completed, took technical exception to one item, and made firm commitments to complete the remainder. The attached Tables summarizing the licensee's schedular commitments or status were developed by the staff from the Generic Letters and the licensee-provided information.

Generic Letters 82–05 and 82–10 applied to 16 and 10 items, respectively, for BWRs with jet pumps. Of the 10 items listed in Generic Letter 82–10, six items are not included in this Order. Item I.A.1.3.2 is part of a separate rulemaking; Items I.C.1, III.A.1.2 (2 items), and III.A.2.2 will be handled separately following Commission actions that would proceed as a result of its consideration of SECY 82–111, as amended; and Item II.K.3.30 and II.K.3.31 (one item) is not required until one year after staff approval of the generic model and staff review of these models has not been completed.

Thirteen of the 20 items addressed in this Order are considered by the licensee to be completed or to require no modifications. The licensee is taking technical exception to one item, II.K.3.22, that will be addressed in a separate action.

On item II.B.3, TVA has completed the post-accident sampling facility. However, the tie-in of the sample lines inside the reactor vessel and the waste/flush lines to the torus are scheduled for future refueling outages. Since the staff is still evaluating TVA's design and program, this item will also be addressed in a separate action. These two items—II.B.3 and II.K.3.22—are therefore not included in this Order.

The staff's evaluation of the licensee's delays for the remaining five items is provided herein:

II.F.1 Post-Accident Monitoring (5 items)

Three items, II.F.1.3, II.F.1.4 and II.F.1.5 are scheduled to be installed during the next refueling outage on each unit. For Unit 2, the next refueling is scheduled to start in April 1984 and be completed by September 1984. The delay in installation has been the result of late delivery schedules in materials and vendor-supplied equipment. For two items, II.F.1.1 and II.F.1.2, installation of the monitoring instrumentation and associated equipment will be completed by December 1984. This instrumentation will have local readout capability. Providing readout in the control room can only be accomplished during an outage. TVA will be providing control room readout for these two monitors during the Unit 2 outage scheduled to start in February 1986; the control room instrumentation will be installed prior to startup in Cycle 7 (about July 1986). The delay is primarily the result of the long time spent by TVA in designing a customized monitoring system. This approach was abandoned in June 1982 and purchase of commercially available equipment initiated. Based on scheduled delivery of materials and components, installation will begin in June 1984 and be completed by December 31, 1984. The effluent monitors currently installed at Browns Ferry perform the functions required by II.F.1.1 and II.F.1.2, but with a smaller range than required by NUREG–0737. Also, TVA has the capability for monitoring through use of grab samples.

We find, based on the above evaluation, that: (1) the licensee has taken corrective actions regarding the delays and has made a responsible effort to implement the NUREG–0737 requirements noted; (2) there is good cause for the delays; and (3) as noted above, interim compensatory measures have been provided.

In view of the foregoing, I have determined that these modifications and actions are required in the interest of public health and safety and, therefore, the licensee's commitment should be confirmed by Order.

IV

Accordingly, pursuant to Sections 103, 161i, and 161o of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, *it is hereby ordered effective immediately that the licensee shall:*

Implement and maintain the specific items described in the Attachments to this Order in the manner described in the licensee's submittals noted in Section III herein no later than the dates in the Attachments.

V

The licensee may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. A request for a hearing shall be addressed to the Director, Office of Nuclear Regulations, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

A copy shall be sent to the Executive Legal Director at the same address. *A request for hearing shall not stay the immediate effectiveness of this order.*

If a hearing is requested by the licensee, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section IV of this Order. This Order is effective upon issuance.

Dated at Bethesda, Maryland, this 25th day of March 1983.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation.

ATTACHMENT 1.—LICENSEE'S COMMITMENTS ON APPLICABLE NUREG–0737 ITEMS FROM GENERIC LETTER 82–05

Item	Title	NUREG–0737 schedule	Requirement	Licensee's completion schedule (or status)
I.A.3.1	Simulator Exams	Oct. 1, 1981	Include simulator exams in licensing examinations	Complete.
II.B.2	Plant Shielding	Jan. 1, 1982	Modify facility to provide access to vital areas under accident conditions.	Do.

ATTACHMENT 1.—LICENSEE'S COMMITMENTS ON APPLICABLE NUREG-0737 ITEMS FROM GENERIC LETTER 82-05—Continued

Item	Title	NUREG-0737 schedule	Requirement	Licensee's completion schedule (or status)
II B.3	Post-Accident Sampling [1]	do	Install upgraded post-accident sampling capability	To be addressed in separate action.
II B.4	Training for Mitigating Core Damage.	Oct. 1, 1981	Complete training program	Complete.
II E.4.2	Containment Isolation Dependability	July 1, 1981	Part 5—lower containment pressure setpoint to level compatible w/normal operation.	Do.
		do	Part 7—isolate purge and vent valves on radiation signal.	Do.
II F.1	Accident Monitoring	Jan. 1, 1982	(1) Install noble gas effluent monitors with local readout capability	Dec. 31, 1984.
			Install control room instrumentation	Prior to start-up in Cycle 7 (July 1986).
		do	(2) Provide capability for effluent monitoring of iodine with local readout capability	Dec. 31, 1984.
			Install control room instrumentation	Prior to start-up in Cycle 7 (July 1986).
		do	(3) Install incontainment radiation-level monitors	Prior to start-up in Cycle 6 (Sept 1984).
		do	(4) Provide continuous indication of containment pressure.	Do.
		do	(5) Provide continuous indication of containment water level.	Do.
		do	(6) Provide continuous indication of hydrogen concentration in containment.	Complete.
II K.3.15	Isolation of HPCI and RCIC Modification.	July 1, 1981	Modify pipe break detection logic to prevent inadvertent isolation.	Do.
II K.3.22	RCIC Suction [1]	Jan. 1, 1982	Modify design of RCIC suction to provide automatic transfer to torus	Technical exception.
II K.3.24	Space Cooling for HPCI/RCIC	do	Confirm the adequacy of space cooling for HPCI/RCIC	Complete.
II K.3.27	Common reference level	July 1, 1981	Provide common reference level for vessel level instrumentation	Do.

[1] Not part of confirmatory order

ATTACHMENT 2 —LICENSEE'S COMMITMENTS ON APPLICABLE NUREG-0737 ITEMS FROM GENERIC LETTER 82-10

Item	Title	NUREG-0737	Requirement	Licensee's completion schedule (or status)
I.A.1.3.1	Limit Overtime	Oct. 1, 1982 per Gen. Ltr. 82-12 dtd June 15, 1982	Revise administrative procedures to limit overtime in accordance w/NRC policy statement issued by Generic Ltr. No. 82-12, dtd June 15, 1982.	Complete.
I.A.1.3.2	Minimum Shift Crew	To be superseded by proposed rule	To be addressed in the final rule on licensed operator staffing at nuclear power units.	To be addressed when final rule is issued.
I.C.1	Revise Emergency [1] Procedures	Superseded by SECY 82-111	Reference SECY 82-111, requirements for emergency response capability.	To be determined
II.D.1.2	RV and SV Test Programs	July 1, 1982	Submit plant specific reports on relief and safety valve program	Complete.
II.K.3.18	ADS Actuation	Sept. 30, 1982	Submit revised position on need for modifications	Do
II.K.3.30	SBLOCA Analysis [1] and 31	1 yr. after staff approval of model.	Submit plant specific analyses	To be determined following staff approval of model.
III.A.1.2	Staffing Levels [1] for Emergency Situations	Superseded by SECY 82-111	Reference SECY 82-111, requirements for emergency response capability.	To be determined.
III.A.1.2	Upgrade Emergency [1] Support Facilities	Superseded by SECY 82-111	Reference SECY 82-111, requirements for emergency response capability.	Do.
III.A.2.2	Meteorological [1] Data	Superseded by SECY 82-111	Reference SECY 82-111, requirements for emergency response capability.	Do.
III.D.3.4	Control Room Habitability	To be determined by licensee	Modify facility as identified by licensee study	Complete

BILLING CODE 7590-01-M

Docket No. 50-296]

Tennessee Valley Authority (Browns Ferry Nuclear Plant, Unit 3); Order Confirming Licensee Commitments On Post-TMI Related Issues

I

The Tennessee Valley Authority (the Licensee) is the holder of Facility Operating License No. DPR-68 which authorizes the operation of the Browns Ferry Nuclear Plant, Unit 3 (the facility) at steady-state power levels not in excess of 3293 megawatts thermal. The facility is a boiling water reactor (BWR) located at the licensee's site in Limestone County, Alabama.

II

Following the accident at Three Mile Island Unit No. 2 (TMI-2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities based on the experience from the accident at TMI-2 and the official studies and investigations of the accident. The staff's proposed requirements and schedule for implementation are set forth in NUREG-0737, "Clarification of TMI Action Plan Requirements." Among these requirements are a number of items, consisting of hardware modifications, administrative procedure implementation and specific information to be submitted by the licensee, scheduled to be completed on or after July 1, 1981. On March 17, 1982, a letter (Generic Letter 82-05) was sent to all licensees of operating power reactors for those items that were scheduled to be implemented from July 1, 1981 through March 1, 1982. Subsequently, on May 5, 1982, a letter (Generic Letter 82-10) was also sent to all licensees of operating power reactors for those items that were

scheduled for implementation after March 1, 1982. These letters are hereby incorporated by reference. In these letters each licensee was requested to furnish within 30 days pursuant to 10 CFR 50.54(f) the following information for items which the staff had proposed for completion on or after July 1, 1981:

(1) For applicable items that have been completed, confirmation of completion and the date of completion, (2) For items that have not been completed, a specific schedule for implementation, which the licensee committed to meet, and (3) Justification for delay, demonstration of need for the proposed schedule, and a description of the interim compensatory measures being taken.

III

The licensee responded to Generic Letter 82–05 by letter dated April 14, 1982. By letters dated May 13, 1982 and February 1, 1983, we requested additional information on TVA's responses. TVA submitted revised responses to Generic Letter 82–05 by letters dated June 17, June 28 and July 15, 1982 and January 14 and February 28, 1983. The licensee responded to Generic Letter 82–10 by letter dated June 24, 1982. In these submittals, the licensee confirmed that some of the items identified in the Generic Letters had been completed, took technical exception to one item, and made firm commitments to complete the remainder. The attached Tables summarizing the licensee's schedular commitments or status were developed by the staff from the Generic Letters and the licensee-provided information.

Generic Letters 82–05 and 82–10 applied to 16 and 10 items, respectively, for BWRs with jet pumps. Of the 10 items listed in Generic Letter 82–10, six items are not included in this Order. Item I.A.1.3.2 is part of a separate rulemaking; Items I.C.1, III.A.1.2 (2 items), and III.A.2.2 will be handled separately following Commission actions that would proceed as a result of its consideration of SECY 82–111, as amended; and Item II.K.3.30 and II.K.3.31 (one item) is not required until one year after staff approval of the generic model and staff review of these models has not been completed.

Thirteen of the 20 items addressed in this Order are considered by the licensee to be completed or to require no modifications. The licensee is taking technical exception to one item, II.K.3.22, that will be addressed in a separate action.

On item II.B.3, TVA has completed the post-accident sampling facility. However, the tie-in of the sample lines inside the reactor vessel and the waste/flush lines to the torus are scheduled for future refueling outages. Since the staff is still evaluating TVA's design and program, this item will also be addressed in a separate action. These two items—II.B.3 and II.K.3.22—are therefore not included in this Order.

The staff's evaluation of the licensee's delays for the remaining five items is provided herein:

II.F.1 Post-Accident Monitoring (5 items)

Three items, II.F.1.3 II.F.1.4 II.F.1.5 are scheduled to be installed during the next refueling outage on each unit. For Unit 3, the next refueling is scheduled to start August 1, 1983 and be completed by November 28, 1983. The delay in installation has been the result of late delivery schedules in materials and vendor-supplied equipment. For two items, II.F.1.1 and II.F.1.2, installation of the monitoring instrumentation and associated equipment will be complete by December 1984. This instrumentation will have local readout capability. Providing readout in the control room can only be accomplished during an outage. TVA will be providing control room readout for these two monitors during the Unit 3 outage scheduled to Start in March 1985; the control room instrumentation will be installed prior to startup in Cycle 7 (about August 1985). The delay in primarily the result of the long time spent by TVA in designing a customized monitoring system. This approach was abandoned in June 1982 and purchase of commercially available equipment initiated. Based on scheduled delivery of materials and components, installation will begin in June 1984 and be completed by December 31, 1984. The effluent monitors currently installed at Browns Ferry perform the functions required by II.F.1.1 and II.F.1.2, but with a smaller range than required by NUREG–0737. Also, TVA has the capability for monitoring through use of grab samples.

We find, based on the above evaluation, that: (1) the licensee has taken corrective actions regarding the delays and has made a responsible effort to implement the NUREG–0737 requirements noted; (2) there is good cause for the delays; and (3) as noted above, interim compensatory measures have been provided.

In view of the foregoing, I have determined that these modifications and actions are required in the interest of public health and safety and, therefore, the licensee's commitment should be confirmed by Order.

IV

Accordingly, pursuant to Sections 103, 161i, and 161o of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, *it is hereby ordered effective immediately that the licensee shall:*

Implement and maintain the specific items described in the Attachments to this Order in the manner described in the licensee's submittals noted in Section III herein no later than the dates in the Attachments.

V

The licensee may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. A request for a hearing shall be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

A copy shall also be sent to the Executive Legal Director at the same address. *A request for hearing shall not stay the immediate effectiveness of this order.*

If a hearing is requested by the licensee, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section IV of this Order. This Order is effective upon issuance.

Dated at Bethesda, Md., this 25th day of March 1983.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation.

ATTACHMENT 1.—LICENSEE'S COMMITMENTS ON APPLICABLE NUREG–0737ITEMS FROM GENERIC LETTER 82–05

Item	Title	NUREG–0737 schedule	Requirement	Licensee's completion schedule (or status)
I.A.3.1	Simulator Exams	Oct. 1, 1981	Include simulator exams in licensing examinations	Complete.
II.B.2	Plant Shielding	Jan. 1, 1982	Modify facility to provide access to vital areas under accident conditions.	Do.

ATTACHMENT 1.—LICENSEE'S COMMITMENTS ON APPLICABLE NUREG-0737ITEMS FROM GENERIC LETTER 82-05—Continued

Item	Title	NUREG-0737 schedule	Requirement	Licensee's completion schedule (or status)
II.B.3	Post-Accident Sampling	do	Install upgraded post-accident sampling capability	To be addressed in separate action.
II.B.4	Training for Mitigating Core Damage	Oct. 1, 1981	Complete training program	Complete.
II.E.4.2	Containment Isolation, Dependability	July 1, 1981	Part 5—lower containment pressure setpoint to level compatible w/normal operation	Do.
		do	Part 7—isolate purge and vent valves on radiation signal.	Do
II.F.1	Accident Monitoring	Jan. 1, 1982	(1) Install noble gas effluent monitors with local readout capability	Dec. 31, 1984
			Install control room instrumentation	Prior to start-up in Cycle 7 (8/85).
		do	(2) Provide capability for effluent monitoring of iodine with local readout capability	Dec. 31, 1984.
			Install control room instrumentation	Prior to start-up in Cycle 7 (8/85).
		do	(3) Install incontainment radiation level monitors	Prior to start-up in Cycle 6 (12/83).
		do	(4) Provide continuous indication of containment pressure.	Prior to start-up in Cycle 6 (12/83)
		do	(5) Provide continuous indication of containment water level.	Prior to start-up in Cycle 6 (12/83)
		do	(6) Provide continuous indication of hydrogen concentration in containment.	Complete.
II.K.3.15	Isolation of HPCI & RCIC Modification	July 1, 1981	Modify pipe break detection logic to prevent inadvertent isolation	Do.
II.K.3.22	RCIC Suction	Jan. 1, 1982	Modify design of RCIC suction to provide automatic transfer to torus.	Technical Exception
II.K.3.24	Space Cooling for HPCI/RCIC	do	Confirm the adequacy of space cooling for HPCI/RCIC	Complete.
II.K.3.27	Common reference level	July 1, 1981	Provide common reference level for vessel level instrumentation	Do

Not Part of Confirmatory Order

ATTACHMENT 2.—LICENSEE'S COMMITMENTS ON APPLICABLE NUREG-0737 ITEMS FROM GENERIC LETTER 82-10

Item	Title	NUREG-0737	Requirement	Licensee's completion schedule (or status)
I.A.1.3.1	Limit Overtime	Oct. 1, 1982, per Gen. Ltr. 82-12 dated June 15, 1982	Revise administrative procedures to limit overtime in accordance w/NRC Policy Statement issued by Generic Ltr. No. 82-12, dated June 15, 1982	Complete
I.A.1.3.2	Minimum Shift Crew	To be superseded by Proposed Rule.	To be addressed in the Final Rule on Licensed Operator Staffing at Nuclear Power Units.	To be addressed when Final Rule is issued
I.C.1	Revise Emergency Procedures	Superseded by SECY 82-111	Reference SECY 82-111, Requirements for Emergency Response Capability	To be determined
II.D.1.2	RV and SV Test Programs	July 1, 1982	Submit plant specific reports on relief and safety valve program	Complete
II.K.3.18	ADS Actuation	Aug. 30, 1982	Submit revised position on need for modifications	Do
II.K.3.30 and 31	SBLOCA Analysis	1 yr after staff approval of model	Submit plant specific analyses	To be determined following staff approval of model

BILLING CODE 7590-01-M

[Docket Nos. 50-266 and 50-301]

Wisconsin Electric Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 70 and 75 to Facility Operating License Nos. DPR-24 and DPR-27 issued to Wisconsin Electric Power Co. (the licensee), which revised Technical Specifications for operation of Point Beach Nuclear Plant. Unit Nos. 1 and 2 (the facilities) located in the Town of Two Creeks, Manitowoc County, Wisconsin. The amendments are effective as of the date of issuance.

The amendments modify the requirements for periodic leakage rate testing of the containment air lock doors.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact

appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated October 21, 1982, (2) Amendment Nos. 70 and 75 to License Nos. DPR–24 and DPR–27, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Joseph Mann Library, 1516 16th Street, Two Rivers, Wisconsin 54241. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 1st day of April, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Brance #3, Division of Licensing.

[FR Doc. 83–9920 Filed 4–13–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–266 and 50–301]

Wisconsin Electric Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has, pursuant to the Initial Decision of its Atomic Safety and Licensing Board (ASLB) dated February 4, 1983 (ASLBP No. 81–464–05 LA), issued Amendment Nos. 71 and 76 to Facility Operating License Nos. DPR–24, and DPR–27 issued to Wisconsin Electric Power Company (the licensee), which revised Technical Specifications (TS) for operation of Point Beach Nuclear Plant Unit Nos. 1 and 2 (the facilities) located in the Town of Two Creeks, Manitowoc County, Wisconsin. The amendments are effective as of the date of issuance.

The amendments to the TS allow repair of degraded steam generator tubes by sleeving which would otherwise be required to be plugged and removed from service; establish limits for primary coolant iodine concentration and surveillance frequency; and establish a plugging limit for sleeved tubes of 40% nominal sleeve wall thickness.

The Initial Decision is subject to review by an Atomic Safety and Licensing Appeal Board prior to its becoming final. Any decision or action taken by an Atomic Safety and Licensing Appeal Board in connection with the Initial Decision may be reviewed by the Commission.

The amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with this action was published in the Federal Register on August 7, 1981 (46 FR 40359). A Petition to Intervene was filed on July 20, 1981 as amended by letter dated August 31, 1981 by Wisconsin's Environmental Decade. Hearings were held in Milwaukee, Wisconsin on November 17 and 18, 1982 with limited appearances held in the town of Two Rivers, Wisconsin on the evening of November 17, 1982. The Board issued its Initial Decision on February 4, 1983 and ruled that the NRC staff was authorized to issue the amendments.

The Commission has determined that the issuance of the amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For futher details with respect to this action, see (1) The application for amendments dated July 2, 1981 as amended March 9, 1983, (2) the Initial Decision of the Atomic Safety and Licensing Board dated February 4, 1983, (3) Amendment Nos. 71 and 76 to Facility Operating Licenses No. DPR–24 and DPR–27, and (4) the Commission's letter to the licensee dated April 4, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Joseph Mann Library, 1516 16th Street, Two Rivers, Wisconsin 54241. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of April, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch #3, Division of Licensing.

[FR Doc. 83–9921 Filed 4–13–83; 8:45 am]

BILLING CODE 7590–01–M

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, IC 127–5 (which should be mentioned in all correspondence concerning this draft guide), is entitled "Criteria for Programmable Digital Computer Systems Software in Safety Systems of Nuclear Power Generating Stations" and is intended for Division 1, "Power Reactors." It is being developed to describe a method acceptable to the NRC staff for complying with the Commission's regulations for promoting high functional reliability for safety systems using programmable digital computer systems in nuclear power generating stations. This method is applicable to designing software, implementing software, and validating computer systems. This guide, with certain modifications, endorses ANSI/IEEE-ANS-7–4.3.2–1982, "Application Criteria for Programmable Digital Computer Systems in Safety Systems of Nuclear Power Generating Stations."

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

As in the case of all draft regulatory guides, public comments are being solicited on both the guide itself and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. In addition, the NRC staff is seeking specific comments on alternative quality assurance program proposals presented in a letter that accompanies this draft guide. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Attention: Docketing and Service Branch, by June 10, 1983.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone request cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland this 7th day of April 1983.

For the Nuclear Regulatory Commission.

Karl R. Goller,

Director, Division of Facility Operations, Office of Nuclear Regulatory Research.

[Project WM-10]

Basalt Waste Isolation Project; Availability; Draft Site Characterization Analysis

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: The Nuclear Regulatory Commission (NRC) has published a Draft Site Characterization Analysis (DSCA) of the U.S. Department of Energy's Site Characterization Report for the Basalt Waste Isolation Project, a potential high-level waste repository site on the Hanford Reservation in the State of Washington.

ADDRESSES: A single copy of the DSCA (NUREG-0960) is available free upon written request to the extent of supply from the GPO Sales Program, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, DC 20555, (301) 492-9530. The DSCA is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and the Local Public Document Room, Richland Public Library, Swift and Northgate Streets, Richland, Washington 99352.

FOR FURTHER INFORMATION CONTACT: Mr. Robert E. Browning, Acting Director, Division of Waste Management, Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 427-4200.

SUPPLEMENTARY INFORMATION: On November 12, 1982, the U.S. Department of Energy (DOE) submitted to the Nuclear Regulatory Commission (NRC) the DOE's Site Characterization Report (SCR) for the Basalt Waste Isolation Project (BWIP), designated as NRC Project WM-10. The BWIP SCR was submitted under the provisions of NRC's procedural rule, 10 CFR Part 60, Section 60.11.

While NRC staff was analyzing the BWIP SCR, the Nuclear Waste Policy Act (NWPA) of 1982, Pub. L. 97-425, was enacted into law. Under Section 113(b)(1) of that Act, DOE is required to submit to NRC, the host state, and any affected Indian tribe on whose reservation a candidate site is located for review and comment: (1) A general plan for site characterization activities to be conducted at such candidate site; (2) a description of the possible waste form or package; and (3) a conceptual repository design that takes into account likely site-specific requirements. The site characterization plan (SCP) required by the Act is similar, but not identical, to the SCR described in NRC's procedural rule, 10 CFR Part 60, § 60.11.

We understand that DOE intends to submit to NRC later this year an SCP and related documents specified in the Act for BWIP. We also understand that these documents will supersede the November 1982 BWIP SCR and will provide information not included in the November 1982 BWIP SCR.

Upon receipt later this year, NRC will review the BWIP SCP. The NRC is also looking at the impact of the NWPA on NRC's procedural rule. However, pending any change to NRC's procedural rule, we intend to provide NRC staff's draft analysis of the BWIP SCP for public review and comment prior to publication of a final analysis by NRC staff. Since the NRC staff has completed its review of the November 1982 BWIP SCR, we are publishing our draft analysis of that document now in order to provide DOE and all other interested parties with our views on the proposed site characterization program identified in the BWIP SCR.

Dated at Silver Spring, Maryland, this 31st day of March 1983.

For the Nuclear Regulatory Commission.

Robert E. Browning,

Acting Director, Division of Waste Management.

BILLING CODE 7590-01-M

Ad Hoc Committee for Review of Nuclear Reactor Licensing Reform Proposals; Renewal and Meeting Notice

The Nuclear Regulatory Commission announces the renewal of the Ad Hoc Committee for Review of Nuclear Reactor Licensing Reform Proposals. It has been determined that renewal of this advisory committee is necessary and in the public interest in connection with the performance of duties relating to the domestic nuclear reactor licensing process. The purpose of the extension is to provide the Committee additional time for submission of advice and recommendations on specific rulemaking and administrative proposals generated by the NRC staff, including the NRC's Regulatory Reform Task Force, on methods to overhaul the licensing process. The charter which continues the Ad Hoc Committee through December 31, 1983 has been filed with the appropriate Congressional committee and the Library of Congress.

The next meeting of the Committee will take place at 9:30 a.m. on May 5, 1983 at the office of Shaw, Pittman, Potts and Trowbridge, South Building, 9th Floor Lobby, 1800 M Street, NW., Washington, D.C. The meeting will be open for public observation. A transcript of the meeting will be made available for public inspection and copying at NRC's Public Document Room, 1717 H St., NW., Washington, D.C.

Further information on the Committee may be obtained from Mr. Rothschild, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. (Telephone: 202/634-1465).

Dated at Washington, D.C., this 11th day of April 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 22904; (70-6854)]

American Electric Power Service Corp. and American Electric Power Company, Inc., Proposed Issuance of Fixed Rate Notes by Service Company; Guaranty by Holding Company

April 7, 1983.

American Electric Power Company, Inc. ("American"), a registered holding company, and its service company subsidiary, American Electric Power Service Corporation ("Services"), 180 East Broad Street, Columbus, Ohio 43215, has filed with this Commission an application-declaration and an amendment thereto pursuant to Sections 6(a), 7, and 12 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42(b)(2) and 50(a)(2) promulgated thereunder.

In accordance with a Commission order dated December 3, 1982 (HCAR No. 22756), Services has issued $15 million of unsecured notes to Chase Manhattan Bank, N.A. ("Chase"). Such notes either (1) mature May 1, 1985 and bear interest at the prime rate or (2) mature one, two, three or six months after issuance and bear interest at ½ of 1% above the applicable London Interbank Offering ("LIBO") Rate. Currently, all such borrowings by Services are evidenced by a LIBO Rate note dated March 10, 1983, that matures April 11, 1983, and bears interest to maturity at 9.5625%. On March 17, 1983, the announced Prime Rate at Chase was 10½%.

In order to refinance those borrowings, Services seeks authorization to issue up to $15 million principal amount of unsecured, fixed rate notes to banks from time to time through March 31, 1984. The notes will mature on a date not less than two nor more than ten years from date of issuance. No compensating balances or commitment fees will be required. Each such note will bear interest not greater than 200 basis points over the then applicable prime rate payable by Services to Chase under the existing loan agreement as of the date upon which a definite agreement is executed, but in no event greater than 14% per annum.

The proposed agreement will provide that in the event a note is paid prior to maturity, Services will be required to pay a fee to the lending bank calculated to reimburse the bank for interest lost, if any, as a result of the prepayment. All proceeds from these borrowings will be applied to retire the outstanding notes issued to Chase.

Services states that it believes that funds at a fixed rate at or near the applicable prime rate are currently available on loans having maturities of up to but not exceeding, two years. Rates quoted to Services on loans having longer maturities have generally been in the range of up to 200 basis points higher than the prime rate. Services believes that it will be of long-term benefit to the company and its customers to refund its outstanding variable rate notes, in whole or in part, with the proceeds of fixed rate notes having longer maturities, even though such long-term notes may bear a fixed rate of interest higher than current short-term rates at the time of such borrowings.

In order to induce banks to enter into an agreement for such borrowings, American proposes to unconditionally guarantee the principal and interest on such notes issued by Services.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by April 29, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

[FR Doc. 83-9863 Filed 4-13-83; 8:45 am]
BILLING CODE 8010-01-M

[Release No. 19664; (SR-NYSE-83-7)]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Approving Proposed Rule Change

April 8, 1983.

The New York Stock Exchange, Inc. ("NYSE") 11 Wall Street, New York, NY 10005, submitted on February 15, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, containing the changes made in March 1982 to the NYSE Specialist Performance Evaluation Questionnaire ("SPEQ"). The SPEQ is distributed quarterly to NYSE floor brokers who are asked to rate and provide comments on the performance of specialist units with whom they deal most frequently. A specialist unit's scores on the SPEQ are used by the Exchange both for the allocation of stocks to specialist units and in reallocation proceedings pursuant to NYSE Rule 103A.[1]

The principal changes to the SPEQ consist of: (1) Reducing the number of questions from 8 to 5, and eliminating a separate question pertaining to the specialist's negative obligation;[2] (2) rewording the questions; (3) giving equal weight to the 5 new questions;[3] (4) expanding the five-point rating scale to seven points;[4] and (5) adding an additional blank page to the questionnaire to allow brokers to provide additional comments on individual stocks and specialists.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19532, February 23, 1983) and by

[1] For a more complete discussion of the Exchange's allocation procedures, see File No. SR-NYSE-83-10, noticed in Securities Exchange Act Release No. 19626, March 23, 1983; 48 FR 14103, April 1, 1983 (the "March Release"). For a more complete discussion of the Exchange's pilot reallocation procedures under Rule 103A, see Securities Exchange Act Release No. 19436, January 17, 1983; 48 FR 3063, January 24, 1983 (order approving extension of Rule 103 through June 30, 1983) (the "June Release").

[2] The present SPEQ includes five separate questions relating, respectively, to the specialist's dealer function, agency function, ability in maintaining the auction market, communication function and administrative function. The previous eight-question SPEQ included separate questions relating to continuity, depth, the specialist's affirmative and negative obligations, crowd leadership, performance of administrative duties, and staffing.

[3] The questions on the previous SPEQ were not equally weighted, so that the questions concerning the specialist unit's performance as dealer accounted for 51% of the unit's overall grade, and questions relating to administrative duties and staffing accounted for a total of 10% of the overall grade. In contrast, on the revised SPEQ only one question concerns the unit's performance as dealer and accounts for ony 20% of the specialist unit's overall grade, the same as each of the questions relating to administrative duties and staffing.

[4] Prior to March 1982, specialists were rated on a five-point scale, with Rule 103A establishing a 3.0 overall grade standard for minimum acceptable specialist performance. The changeover to a seven-point scale resulted in an effective lowering of the standard for minimum acceptable performance, and necessitated the change to a 4.50 standard approved by the Commission on March 1, 1983 (Securities Exchange Act Release No. 19558, March 1, 1983; 48 FR 9721, March 8, 1983).

publication in the **Federal Register** (48 FR 8879, March 2, 1983). No Comments were received with respect to the proposed rule change.

The Commission recognizes that the revised SPEQ, in adding more space for specific broker comment, attempts to place greater emphasis on performance by individual specialists in individual stocks, and the Commission encourages the Exchange to continue its efforts in this direction. [5] The Commission is concerned, however, that the elimination of a separate question pertaining to the specialist's negative obligaton, the reduction in the weight accorded the specialist's performance as dealer, and the concomitant increased emphasis given to a specialist's administrative tasks may reduce the utility of the SPEQ in evaluating the most critical elements of specialist performance. In that connection, the Commission must assure itself that the SPEQ is adequate to evaluate the specialist's performance of his essential functions in order for the Commission to approve Exchange procedures under Rule 103A on a permanent basis.

The NYSE has previously announced it has embarked upon a major study of its specialist system; this study will include, among other things, review of the Exchange's methods of specialist performance evaluation. Accordingly, while the Commission requests comments concerning the adequacy of the SPEQ as the basis for a permanent reallocation system it believes that it is appropriate for the Exchange to retain the revised SPEQ on an interim basis in the context of Exchange allocation and Rule 103A reallocation procedures pending completion of the portions of the Exchange's study dealing with these aspects of the NYSE specialist system. [6]

[5] The Commission has previously recommended to the Exchange that the SPEQ should be revised to provide for ratings and comments with respect to specialist performance in individual securities. See letter from Douglas Scarff, Director Division of Market Regulation, to John J. Phelan, Jr., President, NYSE, dated November 11, 1981. At present, the NYSE has procedures under Rule 103A by which a supplemental questionnaire may be issued with respect to a specialist unit in the context of a reallocation proceeding, following a specified period of substandard performance on the SPEQ. The Commission has requested the Exchange to use the regular, quarterly SPEQ, and not the supplemental questionnaire, to gather information necessary to identify specific stocks in which specialist performance is substandard in order to expedite proceedings under Rule 103A. While the NYSE has not agreed to elimination of supplemental questionnaire procudures under Rule 103A, the Commission believes that the addition to the SPEQ form of space to comment on individual specialist performance in individual stocks is a useful initiative.

[6] The Commission has previously indicated that it expects completion of these portions of the NYSE specialist study sometime prior to June 30, 1983, the current expiration date of NYSE's Rule 103A. See the January and March Releases.

On this basis, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6, and the rules and the regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission by the Division of Market Regulation pursuant to delegated authority

George A. Fitzsimmons,

Secretary

[FR Doc. 83-9935 Filed 4-13-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-19658; File No. SR-PHLX 83-4]

Self-Regulatory Organizations; Proposed Rule Change By Philadelphia Stock Exchange, Inc.; Increase of Position and Exercise Limits

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), Notice is hereby given that on April 4, 1983, the Philadelphia Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Philadelphia Stock Exchange, Inc. ("PHLX" or "the Exchange") proposes to amend Exchange Rules 1000 and 1001 regarding position and exercise limits, as set forth below.

Italics indicates material proposed to be added. Brackets [ ] indicate material proposed to be deleted.

Rule 1001. Position Limits.

Except with the prior written approval of the Exchange in each instance, no member or member organization shall effect, for any account in which such member or member organization has an interest or for the account of any partner, officer, director or employee thereof or for the account of any customer, an opening transaction (whether on the Exchange or on another Participating Exchange) in an option contract of any class of options dealt in on the Exchange if the member or member organization has reason to believe that, as a result of such transaction, the member or member organization or partner, officer, director or employee thereof or customer would, acting alone or in concert with others, directly or indirectly, hold or control or be obligated with respect to an aggregate position of more than [2,000] *2,500 or 4,000* put or call options on the same side of the market relating to the same underlying security, *which limit is determined in accordance with commentary .05,* in the case of options on a stock, or more than 10,000 put or call option contracts on the same side of the market relating to the same underlying foreign currency, in the case of options on a foreign currency, or such other number of option contracts as may be fixed from time to time by the Exchange as the position limit for one or more classes or series.

* * * Commentary

.01 through .04—no change.

.05 The position limit shall be 4,000 contracts for options:

(i) on an underlying stock which had trading volume of at least 20,000,000 shares during the most recent six-month trading period; or

(ii) on an underlying stock which had trading volume of at least 15,000,000 shares during the most recent six-month trading period and has at least 60,000,000 shares currently outstanding.

The position limit shall be 2,500 contracts for all other options.

The Exchange will review the volume and outstanding share information of all underlying stocks every six months to determine which limit shall apply. The 4,000 limit will be effective on the date set by the Exchange, while any change from a 4,000 to 2,500 limit will take effect after the last expiration then trading, unless the requirement for a 4,000 limit is met at the time of an intervening six-month review.

Rule 1002. Exercise Limits.

Except with the prior approval of the Exchange in each instance, no member or member organization shall exercise, for any account in which such member or member organization has an interest or for the account of any partner, officer, director or employee thereof or for the account of any customer, a long position in any option contract of a class of options dealt in on the Exchange if as a result thereof such member or member organization, or partner, officer, director or employee thereof or customer, acting alone or in concert with others, directly or indirectly, has or will have exercised within any five (5) consecutive business days aggregate long positions in that

particular class of options in excess of [2,000] *the number of* options covering the same options class (put or call) *as set forth as in the position limit in Rule 1000,* in the case of options on a stock, or in excess of 10,000 options covering the same option class (put or call), in the case of options on a foreign currency, without regard to the exchange on which the options were purchased.

* * * Commentary

.01 through .03—no change.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

The purpose of the proposed rule change is to increase position and exercise limits for stock options in order to add to market depth and liquidity.

Position and exercise limit rules were originally adopted by option exchanges in order to minimize the manipultive potential which could result from the accumulation of large options positions. In 1978, the Special Study of the Options Market ("Study") recognized a number of significant problems which resulted from the position limit rule restrictions, including the inability of large portfolio managers to utilize options as a vehicle to properly balance a portfolio's risk and potential reward. The Study recommended that existing Exchange rules, which limited the size of options positions held by market participants, be reviewed and that their relaxation or elimination be considered. As a result of re-examination of position limits, as suggested in that Study, the Exchange proposed rule changes which were adopted in October 1980 to raise position and exercise limits from 1,000 to 2,000 contracts. In view of the increased use of the options markets and the experience gained during the two years since the position limits were increased in 1980, the Exchange believes that it is appropriate at this time to again increase position and exercise limits.

In its 1980 release approving position and exercise limit increases, the Commission made the following statements (Release No. 34–17237) that the Exchange believes also apply to the current proposal to increase limits:

* * * there is substantial reason to believe that the current ceiling serves to constrict significantly the options activities of certain market professionals and institutions, possibly to the detriment of market depth and liquidity. In addition, the Commission believes that the surveillance capabilities of the options exchanges with respect to large options positions should minimize the possibility of manipulation. Finally, the Commission believes that the information and experience gained from approval of the proposed modification will enhance the ability of the options exchanges and the Commission to responsibly propose and effectively evaluate possible further modification * * *

It should be noted that position limits cannot be justified as a protection against financial exposure. While unhedged larger positions do entail larger financial risks, position limits are cumbersome and ineffective mechanisms for limiting those risks. Rather, those rules which have been designed specifically to limit risk exposure should be used for this purpose, namely, suitability, margin and net capital rules.

The change from 2,000 to 2,500 option contracts is minimal, especially in view of the Exchange's experience to date with the 2,000-contract limit. The change from 2,000 to 4,000 option contracts involves standards that are a protection against possible manipulation. These standards insure that only option contracts having an underlying stock that has either very high trading volume or high trading volume and a high number of shares outstanding will receive the higher limit. The standards means that the options and stocks involved are ignificantly less susceptible to manipulation. To be eligible for the 4,000-contract limit, either the most recent six-month trading volume of the underlying stock must have totalled at least 20,000,000 shares; or the most recent six-month trading volume of the underlying stock must have totalled at least 15,000,000 shares and the underlying stock must have at least 60,000,000 shares currently outstanding.

Every six months, the Exchange will review the status of underlying stocks to determine which limit should apply. Two new lists shall be published and distributed to all members, member firms and Registered Options Principals. The 4,000 limit will be effective on the date set by the Exchange, which date will allow time for appropriate notice to be given. Any change from a 4,000 to 2,500 limit will take effect after the last expiration then trading, unless the requirement for a 4,000 limit is met at the time of the intervening six-month review.

The basis for this proposed rule change is Section 6(b)(5) of the Securities Exchange Act of 1934 ("Act") in that the proposed change would increase market depth and liquidity, which is in the public interest, while continuing to protect investors from manipulative activity.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change will not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or others

No written comments were solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5

U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section. copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 7, 1983.

George A. Fitzsimmons,

Secretary.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 83-024]

Acceptance of Plan Review, Inspections and Examinations by the American Bureau of Shipping (ABS)

AGENCY: Coast Guard, DOT.

ACTION: Notice of public comment period.

SUMMARY: The Coast Guard is requesting comments from the marine industry concerning the implementation of plan review, inspection and examination procedures that have been recently delegated by the Coast Guard to the American Bureau of Shipping.

DATE: Comments must be submitted prior to 1 June 1983.

ADDRESS: Comments may be mailed to Commandant (G-CMC/44), U.S. Coast Guard Heardquarters, Washington, D.C. 20593.

FOR FURTHER INFORMATION CONTACT: Commander John DeLeonardis (202-426-2190).

Discussion: During the last two years the Coast Guard and the American Bureau of Shipping (ABS) have reached agreement in several areas where there was preceived duplication of effort particularly with regard to plan review and inspection of classed vessels. Two Memoranda of Understanting (MOU's) have been finalized by both organizations which outline Coast Guard acceptance of ABS performance of certain functions on behalf of the Coast Guard.

One MOU, approved on April 27, 1982, and published at 47 FR 25235 pertains to ABS plan review and inspection during construction of new U.S. flag vessels which are to be certificated by the Coast Guard and classed by ABS. Navigation and Vessel Inspection Circular (NVC) 10-82 implements this MOU and provides guidance and technical details necessary to efficiently make the transition under terms of the MOU.

The other MOU, approved on February 1, 1982 and published at 47 FR 13947 allows ABS to perform certain admeasurement services which were formerly provided exclusively by the Coast Guard. Navigation and Vessel Inspection Circular (NVC) 1-82 implements this MOU and provides for Coast Guard acceptance of ABS admeasurement certificates based upon the admeasurement regulations in Title 46 CFR and Title 35 CFR (Panama Canal Tonnage Certificates).

The goals of these agreements and implementing instructions generally are to:

- Reduce confusion within industry
- Reduce needless duplication of effort and time associated with plan approval
- Reduce industry costs and time associated with new vessel inspections
- Reduce Coast Guard costs and provide better utilization of limited inspection resources

In order to assess the relative merit of the new procedures and to report to Congress concerning the implementation of both MOU's the Coast Guard needs information from those in industry directly impacted. Industry's views and response based upon experience with the new procedures are solicited.

Dated: April 6, 1983.

Clyde T. Lusk, Jr.,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

BILLING CODE 4910-14-M

[CGD83-022]

Lower Mississippi River Waterway Safety Advisory Committee; Establishment

Summary: The Secretary of Transportation has approved the establishment of the Lower Mississippi River Waterway Safety Advisory Committee. The Secretary has also approved the charter for this committee. The purpose of this committee is to furnish consultation, local expertise, and advice on a wide range of matters regarding all facets of navigation safety. It will assist in the evaluation, and where appropriate, the implementation of the recommendations of the Lower Mississippi River Safety Study. It will address such issues as anchorages, communications, traffic control, barge fleeting and other topics on navigation safety in the Lower Mississippi River area as required by the Coast Guard.

For further information contact: Captain D. L. Smith, Executive Director, Lower Mississippi River Waterway Safety Advisory Committee, Marine Safety Division, Eighth Coast Guard District, Room 1341, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130. Phone (504) 589-6901.

This notice is issued under authority of the Federal Advisory Committee Act, Pub. L. 92-463, 5 U.S.C. App. 1.

Dated: April 7, 1983.

V. W. Driggers,

Captain, U.S. Coast Guard, Acting Chief, Office of Boating, Public and Consumer Affairs.

BILLING CODE 4910-14-M

Federal Aviation Administration

Airframe Policy and Program Review for Small Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Draft airframe policy and program review and request for comments.

SUMMARY: The draft Airframe Policy and Program Review Agenda Items Document identifies those policies and Advisory Circulars which have been affected by rule changes or modifications and identifies areas in which new policy and Advisory Circulars need to be developed. Rule changes will not be addressed in this review. A public meeting is to be held in Wichita, Kansas, on June 8–9, 1983, to allow all interested parties to verbally present their written comments regarding the draft Airframe Policy and Program Review Agenda Items Document.

DATE: Commenters must identify file subject: "Airframe Policy and Program Review" and written comments must be received on or before June 8, 1983.

ADDRESS: Send all comments on the draft Airframe Policy and Program Review to: Federal Aviation Administration, ATTN: Regulations and Policy Office (ACE–110), 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph W. Burress, Aerospace Engineer Regulations and Policy Office ACE–110), Aircraft Certification Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. Commercial telephone (816) 374–6941 or FTS 758–6941.

SUPPLEMENTARY INFORMATION: Any person may obtain a copy of this draft Airframe Policy and Program Review Agenda Items Document by writing to: Federal Aviation Administration, Aircraft Certification Division, Regulations and Policy Office (ACE–110), 601 East 12th Street, Kansas City, Missouri 64106.

Comments Invited: Interested parties are invited to submit comments on the draft Airframe Policy and Program Review Agenda Items Document regarding Federal Aviation Administration's recommendations or submit alternate proposals. A public meeting will be held by the Federal Aviation Administration at the Holiday Inn Plaza Downtown, 250 West Douglas, Wichita, Kansas on June 8 and 9, 1983, starting at 8:30 a.m., for the purpose of allowing interested parties to verbally deliver their written comments. The draft Airframe Policy and Program Review Agenda Items Document and comments received may be inspected at the offices of the Regulations and Policy Office (ACE–110), Room 1656, Federal Office Building, 601 East 12th Street, Kansas City, Missouri, between the hours of 7:30 a.m. and 4:00 p.m. on weekdays, except Federal holidays.

Issued in Kansas City, Missouri, April 4, 1983.

Murray E. Smith,

Director, Central Region.

BILLING CODE 4910–13–M

Radio Technical Commission for Aeronautics (RTCA) Special Committee 149—Airborne Distance Measuring Equipment (DME); Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of a meeting RTCA Special Committee 149 on Airborne Distance Measuring Equipment (DME) to be held on May 4–6, 1983 in the RTCA Conference Room, One McPherson Square, 1425 K Street, Suite 500, N.W., Washington, D.C. commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of Minutes of the Third Meeting Held on February 16–18, 1983; (3) Report on Coordination with the European Organization for Civil Aviation Electronics (EUROCAE) Working Group 25; (4) Report on Coordination with RTCA Special Committee 151 (Airborne MLS Area Navigation Equipment); (5) Discussion on the Effects of Scanning on DME Ground Station Loading; (6) Review Task Assignments From Second Meeting; (7) Review Fourth Draft of Committee Report on Minimum Operational Performance Standards for Airborne Distance Measuring Equipment; and (8) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, N.W., Suite 500, Washington, D.C. 20005; (202) 682–0266. Any member of the public may present a written statement of the committee at any time.

Issued in Washington, D.C., on April 4, 1983.

Karl F. Bierach,

Designated Officer.

BILLING CODE 4910–13–M

Federal Highway Administration

Environmental Impact Statement; Santa Clara County, California

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed transportation project in Santa Clara County, California.

FOR FURTHER INFORMATION CONTACT: D. L. Eyres, District Engineer, Federal Highway Administration, P.O. Box 1915, Sacramento, California, 95809, telephone (916) 440–3541, or R. C. Chioino, Study Manager, State of California, Department of Transportation, P.O. Box 7310, San Francisco, California, 94120, telephone (415) 557–1318.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the California Department of Transportation, will prepare a draft environmental impact statement covering alternative transportation development proposals in the corridor of adopted State Highway Route 85 in Santa Clara County between Route 87 in San Jose and Stevens Creek Boulevard in Cupertino, a length of 14 miles. Transportation improvement is needed in this area to relieve existing and anticipated traffic congestion on highways and streets in the corridor.

Alternatives to be considered, in addition to doing nothing, include construction of a freeway, expressway, bus and carpool facility light rail transit, and combinations thereof. Use of a parallel branch rail line for passenger service will be considered.

The Urban Mass Transit Administration has been requested to participate in this study as a co-lead or responsible agency, but has made no decision regarding its participation at this time.

Public information open houses to gather scoping information were held April 6, 1983, at Rolling Hills Jr. High School, 1585 More Avenue, Campbell, and April 12, 1983, at Branham High School, 1570 Branham Lane, San Jose. Additional meetings for scoping purposes will be scheduled with interested agencies and parties as early as appropriate or as requested; interested agencies and parties who are not already participating in this study are urged to advise the contact persons listed above of their interest.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of OMB Circular No. A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects apply to this program)

Issued on: April 6, 1983.

D. L. Eyres,

District Engineer Sacramento, California.

BILLING CODE 4910-22-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Number: 150-39]

Creation of the Sacramento, the San Jose, and the Laguna Niguel, California Internal Revenue District

March 28, 1983.

Under the authority given to the President to establish Internal Revenue Districts by Section 7621 of the Internal Revenue Code, as amended, and vested in me a Secretary of the Treasury by Executive Order 10289, approved September 17, 1951, as made applicable to the Internal Revenue Code of 1954 by Executive Order 10574, approved November 5, 1954, and persuant to the authority vested in me by 31 U.S.C. 321, 96 Stat. 877 at 880, September 13, 1982 (formerly Reorganization Plan No. 26 of 1950), and Reorganization Plan No. 1 of 1952 as made applicable to the Internal Revenue Code of 1954 by Section 7804(a) of such code and Executive Order 10574, it is ordered that:

The Los Angeles and San Francisco Internal Revenue Districts be modified as specified below; and

There be established the Sacramento Internal Revenue District, the San Jose Internal Revenue District, and the Laguna Niguel Internal Revenue District with the jurisdictions described below.

1. *Los Angeles District.* Shall include the County of Los Angeles, except for that portion serviced by the Carson post of duty, in the State of California, with the headquarters office located in Los Angeles, California. (The Carson post of duty services the area of Los Angeles County which is generally bordered by the Artesia Freeway on the north, the Pacific Ocean on the west and south, and the Orange County line on the east, and includes in total the following 1982 zip code areas: 90254, 90274, 90277, 90278, 90501, 90502, 90503, 90504, 90505, 90701, 90706, 90710, 90712, 90713, 90715, 90716, 90717, 90731, 90732, 90744, 90745, 90746, 90747, 90802, 90803, 90804, 90805, 90806, 90807, 90808, 90810, 90813, 90814, 90815, and 90840.)

2. *Laguna Niguel District.* Shall include the Counties of Imperial, Orange, Riverside, San Bernardino, San Diego, and that portion of Los Angeles County serviced by the Carson post of duty, in the State of California, with the headquarters office located in Laguna Niguel, California. (The Carson post of duty services the area of Los Angeles County which is generally bordered by the Artesia Freeway on the north, the Pacific Ocean on the west and south, and the Orange County line on the east, and includes in total the following 1982 zip code areas: 90254, 90274, 90277, 90278, 90501, 90502, 90503, 90504, 90505, 90701, 90706, 90710, 90712, 90713, 90715, 90716, 90717, 90731, 90732, 90744, 90745, 90746, 90747, 90802, 90803, 90804, 90805, 90806, 90807, 90808, 90810, 90813, 90814, 90815, and 90840.)

3. *San Jose District.* Shall include the Counties of Fresno, Inyo, Kern, Kings, Madera, Mariposa, Merced, Mono, Monterey, San Benito, San Luis Obispo, Santa Barbara, Santa Clara, Santa Cruz, Stanislaus, Tulare, Tuolumne, and Ventura, in the State of California, with the headquarters office located in San Jose, California.

4. *Sacramento District.* Shall include the Counties of Alpine, Amador, Butte, Calaveras, Colusa, Contra Costa, Del Norte, El Dorado, Glenn, Humboldt, Lake, Lassen, Marin, Mendocino, Modoc, Napa, Nevada, Placer, Plumas, Sacramento, San Joaquin, Shasta, Sierra, Siskiyou, Solano, Sonoma, Sutter, Tehama, Trinity, Yolo, and Yuba in the State of California, with the headquarters office located in Sacramento, California.

5. *San Francisco District.* Shall include the counties of Alameda, San Francisco and San Meteo, in the State of California, with the headquarters office located in San Francisco, California.

6. *Internal Revenue Districts.* Each District established by this Order pursuant to Section 7621 of the Internal Revenue Code of 1954, as amended, shall be known as an Internal Revenue District and shall be identified by the name of the city or subdivision thereof, in which the headquarters office is located.

7. *District Director of Internal Revenue.* The title of each District Office shall bear the title "District Director of Internal Revenue" identified by the name of the city or subdivision thereof, in which the headquarters office is located.

8. *Effect on Prior Treasury Department Orders.* Treasury Department Order 150-39, dated June 22, 1955, is superseded and in Treasury Department Order No. 150-20, dated November 21, 1952, paragraphs 4(a) and 4(b) are superseded.

9. *Implementation.* The provisions of paragraphs numbered 1-4 of this Order shall be implemented upon such date as the Commissioner of Internal Revenue may determine. Effective immediately, the Commissioner of Internal Revenue is authorized to effect, at appropriate times and in an orderly manner, such transfers of functions, personnel, positions, equipment, and funds as may be necessary to implement the provisions of this Order.

Donald T. Regan,

Secretary.

1

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 6:40 p.m. on Friday, April 8, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to: (1) Receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in The Ina State Bank, Ina, Illinois, which was closed by the Illinois Commissioner of Banks and Trust Companies on April 8, 1983; (2) accept the bid for the transaction submitted by First Bank and Trust Co., Mount Vernon, Mount Vernon, Illinois; (3) approve the application of First Bank and Trust Co., Mount Vernon, Mount Vernon, Illinois, for consent to purchase certain assets of and to assume the liability to pay deposits made in The Ina State Bank, Ina, Illinois, and to establish the offices of The Ina State Bank as facilities of the resultant bank; and (4) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

At the same meeting, the Board of Directors considered certain personnel matters.

At the same meeting, the Board of Directors: (1) Received bids for the purchase of certain assets of an the assumption of the liability to pay deposits made in Bank of San Marino, San Marino, California, which was closed by the Acting Superintendent of Banks for the State of California on April 8, 1983; (2) accepted the bid for the transaction submitted by Trans American National Bank, Monterey Park, California; and (3) provided such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to effect the purchase and assumption transaction.

In calling the Meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: April 11, 1983.

Federal Deposit Insurance Corporation

Hoyle L. Robinson,

Executive Secretary.

FEDERAL ELECTION COMMISSION

"Federal Register" No. 481

DATE AND TIME: Tuesday, April 12, 1983, 10 a.m.

CHANGE IN MEETING: This meeting will be continued on *Wednesday, April 13, 1983 at 2 p.m. and Thursday, April 14, 1983 following the open meeting,* if necessary, to conclude the agenda of April 12, 1983.

* * * * *

DATE AND TIME: Tuesday, April 19, 1983, 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Compliance. Personnel. Litigation. Audits.

* * * * *

DATE AND TIME: Thursday, April 21, 1983, 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C. (fifth floor).

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Setting of dates for future meetings
Correction and approval of minutes
Eligibility reports for candidates to receive Presidential primary matching payments:
Draft AO 1983–8: Jan W. Baran, on behalf of the National Republican Senatorial Committee
Candidate's use of property in which spouse has an interest (18 CFR Parts 100, 110, and 9003)
Finance Committee report
Revised non-filer procedures: Directive 1
Routine Administrative matters

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, telephone: 202–523–4065.

FEDERAL MARITIME COMMISSION

TIME AND DATE: 9 a.m., April 20, 1983.

PLACE: Hearing Room One, 1100 L Street NW., Washington, D.C. 20573.

STATUS: Parts of the meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Portions open to the public:

1. Agreement No. 9474–8: Modification of the Thailand/Pacific Freight Conference Agreement to add interior United States point intermodal authority.
2. Classification of Controlled Carriers Pursuant to the Shipping Act, 1916—Pharaonic Shipping Co., SAE.
3. Docket No. 76–63: Filing of Agreements by Common Carriers and Other Persons Subject to the Shipping Act, 1916—Petitions for Reconsideration.

Portions closed to the public:

1. Dart Containerline Co., Ltd. v. Federal Maritime Commission, No. 82–1403, U.S. Court of Appeals for the District of Columbia Circuit.
2. U.K./U.S.A. Gulf Westbound Rate Agreement and Continental/U.S. Gulf Freight Association v. Federal Maritime Commission D.C. Cir. No. 81–1604—Order on Remand
3. Docket No. 81–64, Midland Pacific Shipping Co., Inc.—I.O.F.F. Lic. No. 1229. Leyden Shipping Corp.—I.O.F.F. Lic. No. 829 Person & Weidhorn, Inc.—I.O.F.F. Lic. No. 122—Discussion of the record.

CONTACT PERSON FOR MORE INFORMATION: Francis C. Hurney, Secretary (202) 523–5725.

PAROLE COMMISSION

TIME AND DATES: 10:30 a.m.–5:30 p.m., Thursday, April 21, 1983 and 9 a.m.–5:30 p.m., Friday, April 22, 1983.

PLACE: Room 420–F, One North Park Building, 5550 Friendship Boulevard, Chevy Chase, Maryland 20815.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Approval of minutes of open meeting of January 26 through January 28, 1983.
2. Reports from the Chairman, Vice Chairman, Commissioners, General Counsel, Director of Research, Case Operations, and Administrative Section.

Presentation: *The Dangerous Offender* by Mr. John Conrad, Visiting Fellow at the National Institute of Justice.

4. Prison Population Trends.
5. Referral of Cases to the Pardon Attorney.
6. Pre-Review Procedure.
7. Proposed Parole Commission implementation of the Victim and Witness Protection and Assistance Act of 1982 (Pub. L. 97–291).
8. Rewarding prisoners for Cooperation with law enforcement authorities.
9. Proposed revision of the rescission guidelines.
10. Counting prior convictions for minor offenses.
11. Proposed new or amended Severity Ratings.
12. Expediting Revocation procedures through use of a combined preliminary interview/revocation hearing.
13. Training Aid for rating offense Severity.
14. State Cases with Superior Program Achievement.
15. Simplification of certain rules:
(a) Refusal to Sign parole Certificate;
(b) Narcotic Addict Rehabilitation Act Recertification;
(c) Elimination of repetitive or obsolete Language.
16. Supplemental Warrant Applications after the full-term date.

CONSENT AGENDA: The following consent agenda items, only if previously requested to be opened for discussion at the meeting on or before April 15, 1983:

17. Procedures Manual Revisions effected by Rules and Procedures Memorandum 83/1.
18. Procedures Manual Revisions effected by Rules and Procedures Memorandum 83/2.
19. Training Aid 83–001.
20. Training Aid 83–002.

CONTACT PERSON FOR MORE INFORMATION: Mr. Peter B. Hoffman, Director of Research, United States Parole Commission, (301) 492–5980.

Part II

Department of Transportation

Federal Aviation Administration

Designated Airworthiness Representatives and Advisory Circular

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 183

[Docket No. 23140; Amdt. No. 183-8]

Designated Airworthiness Representatives

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Final rule.

SUMMARY: This amendment to Part 183 of the Federal Aviation Regulations (FAR) establishes the Designated Airworthiness Representative (DAR) as a new category of person appointed, under Section 314 of the Federal Aviation Act of 1958 (FA Act), to act as a representative of the Administrator in performing certain certification functions under Title VI of the FA Act. The amendment expands the FAA designee program into new areas of delegation not previously provided in Part 183. The expanded delegations are necessary to deal with the proliferation of requests for FAA examination, inspection, and testing services necessary to the issuance of certificates, and the issuance of certificates, under Title VI of the FA Act. This amendment will enable the FAA to use its fiscal and human resources in a more effective manner to meet safety objectives. In addition, the amendment will ease the burden of regulation on the public by expediting accomplishment of required demonstrations of compliance with applicable airworthiness standards and will reduce or eliminate delays in obtaining required certifications.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Sandy DeLucia, Aircraft Manufacturing Division (AWS-200), Office of Airworthiness, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-8361.

SUPPLEMENTARY INFORMATION:

Background

Section 314 of the FA Act permits the Secretary of Transportation to delegate to any properly qualified private person any work, business, or function respecting: (1) The examination, inspection, and testing necessary to issue certificates under Title VI of the FA Act, and (2) the issuance of such certificates under Title VI of the FA Act, subject to regulations, supervision, and review as he may prescribe. These certificates include but are not limited to: type certificates; supplemental type certificates; production certificates; airworthiness certificates; export approvals and certificates; components certifications; airman certificates; air carrier/operator's certificates; and air agency certificates. Approved production inspection system authorizations and technical standard order authorizations also come within the purview of Title VI of the Act.

Private persons selected to act as designees are Representatives of the Administrator as described in Part 183 of the Federal Aviation Regulations. This "designee system" has been used extensively within the FAA for over 20 years and has been highly successful. For example, there are now approximately 850 private persons with delegated authority to function as Designated Manufacturing Inspection Representatives (DMIR's) of the Administrator, augmenting a workforce of approximately 140 FAA manufacturing inspectors. DMIR's conduct numerous inspections and certifications on behalf of the FAA, enabling the FAA to meet its safety objectives with a minimal number of FAA manufacturing inspectors. A DMIR authorization, however, is limited to the facilities of the manufacturer by whom the DMIR is employed. Part 183 also provides for the appointment of Designated Aircraft Maintenance Inspectors (DAMI's) with a delegation of authority limited to only one function. The FAA, therefore, finds it necessary to expand the designee program to respond to the many requests for FAA examination, inspection, and testing services relating to certification functions that were not within the very limited scope of designations previously authorized by Part 183. Viewed in the context of increased foreign and domestic demand for FAA inspection and certification services, Part 183 did not provide the FAA with sufficient flexibility to fully utilize its statutory authority to delegate examination, inspection, and testing functions regarding issuing Title VI certificates.

On May 27, 1982, the FAA issued Notice of Proposed Rulemaking (NPRM) No. 82-9 (47 FR 27472; June 24, 1982). The notice proposed to establish DAR's as a new category of persons appointed under Section 314 of the FA Act to serve as Representatives of the Administrator in performing certain certification functions.

Information collection requirements contained in this regulation (§ 183.11) have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB control number 2120-0035.

Discussion

Although no present need has been established to expand delegations in the area of engineering, as opposed to maintenance and manufacturing, this amendment provides for such expansion should the need arise. The expanded delegations go beyond those previously contained in Part 183, yet remain within those authorized by Section 314 of the FA Act, an approach which is consistent with the goal of reducing costs by streamlining the operations of the Government. This amendment also eases the burden of regulation on the aviation community by expediting the accomplishment of demonstrations of compliance required before the issuance of requested certifications. It will reduce delays commonly experienced by modifiers during supplemental type certification programs due to unavailability of FAA personnel, and thus expedite introducing new products. Delays encountered by persons attempting to return aircraft to service following maintenance/alterations also will be minimized.

By providing for the appointment of qualified persons as DAR's to perform functions not previously authorized in Part 183, the FAA can safely and efficiently increase the productivity of its staff in areas most affecting safety. Those areas in which DAR's may be utilized in the immediate future include: issuing export approvals and export certificates of airworthiness; conducting conformity inspections for modification programs; issuing airworthiness certificates for aircraft; and certifying components produced under bilateral airworthiness agreements.

Delegation of specific functions may be authorized for limited periods of time in accordance with national policy developed by the Director of Airworthiness and may be withdrawn by the appointing authority at any time and for any reason deemed appropriate.

Since every examination, inspection, and testing function delegated to DAR's under the amendment cannot presently be envisioned, it is not possible to specify by regulation all areas in which a DAR may serve consistent with the stated objectives of the amendment. Accordingly, those functions which may be delegated by the Director of Airworthiness are described in an advisory circular (AC) which is being published concurrently with this amendment and which will be available from the U.S. Department of Transportation, Publication Section (M-

442.32) Washington, D.C. 20590. The FAA intends to revise and republish the advisory circular to seek public comment each time it is proposed to add or delete an authorized function. Additional areas of delegation will be selected and authorized by the Director of Airworthiness based on recommendations from other FAA elements and the aviation community.

Consistent with other delegations already provided for in Part 183, this amendment does not mandate the use of DAR's. The election to use such representatives is left entirely to the discretion of the certificate applicant. Also, as with other designees, DAR's may charge the applicant a fee for their services, and DAR's will be subject to FAA surveillance with regard to monitoring and supervising their delegated tasks. It should be noted that the FAA will not reimburse any designee appointed under Part 183 for any expense incurred by the designee in performing authorized functions.

Discussion of Comments

A total of 28 individuals and associations submitted comments on the proposal. Fourteen commenters concur with the proposal as written. Twelve commenters concur but include comments. Two commenters support the DAR program concept and intent but indicate that certain areas should be further defined or clarified. Most commenters fully support the proposed DAR amendment, indicating that it will fill a vital need and have positive economic advantages for both the public and the FAA, with no adverse impact on safety. Many of the comments submitted in response to the NPRM also contain recommendations or take issue with certain aspects of the proposed DAR advisory circular (AC). Accordingly, comments relating to both the NPRM and the proposed AC are discussed in the following paragraphs.

Qualification Criteria

Several commenters indicate a need to publish the qualification criteria to be employed by the FAA for selecting and appointing DAR's. Accordingly, these criteria have been incorporated in an Appendix of the DAR AC. This information will also be made readily available for review at FAA offices identified in the AC.

Several commenters submitted recommendations relative to basic qualification criteria for use in the DAR selection process. These recommendations have been taken into consideration in formulating the criteria.

Expansion or Clarification of Functions

A number of commenters request that the FAA consider further expansion of delegated functions beyond those addressed by the proposed AC. Several commenters also request clarification relative to those functions for which designations may be authorized.

The additional functions requested include: Issuance or amendment of air agency, repairman, and school certificates; issuance of experimental certificates for amateur-built aircraft; revision of maintenance/operations specifications; field approval and return to service via FAA Form 337; determination of compliance with quality control systems; and issuance of special flight permits, provisional airworthiness certificates, and special flight authorizations.

After a thorough evaluation, it has been determined that authorized functions can be expanded to include the issuance of certain special flight permits and experimental certificates for amateur-built aircraft. However, a rapid expansion of delegated functions might severely curtail the FAA's ability to adequately monitor and control this program. Therefore, other than the two aforementioned functions, the FAA does not plan to expand DAR authorization to include any other functions until sufficient experience is gained to ensure safety will not be derogated.

With respect to clarifying delegated functions authorized by the Director of Airworthiness, the AC is revised to identify more explicitly those functions, including the specific types of airworthiness certificates and export approvals which may be issued in the areas of maintenance and manufacturing.

Training Requirements

Several commenters state a need to establish training criteria for newly appointed DAR's. The FAA agrees that this is necessary and will provide certain training for all DAR's. This training will normally be accomplished by the FAA office which has responsibility for monitoring and supervising a DAR's activity. Training will be provided upon appointment and on an ongoing basis, as necessary.

The FAA also has initiated action to develop an optional training course to be given at the FAA Academy at Oklahoma City. The cost of this course will be borne by the FAA on behalf of DAR's electing to participate. Each DAR desiring to take the course will be expected to pay for his/her expenses and transportation.

It should be noted that DAR training will be limited to familiarization with FAA administrative procedures (for example, processing forms, etc.). Training in technical areas will not be provided since the FAA will require that a DAR applicant have the necessary technical expertise as a prerequisite to appointment.

Monitoring and Supervision

Three commenters ask how DAR activities will be monitored and supervised. Consistent with other designee categories, all DAR's will be monitored and supervised as appropriate for the particular authorized functions. This would include: Review of all official forms initiated by a DAR; random post-audit inspections of products which have been certificated by DAR; accompanying a DAR during the inspection of a product to ensure that satisfactory techniques, methods, and procedures are being used; etc. This normally will be accomplished in accordance with FAA internal directives by the FAA office that issues the designation.

Procedural Aspects

Several commenters indicate a need to publish certain procedural aspects, including: scope of authority; training methods; FAA methods of auditing DAR activities; extent of DAR utilization; manner in which DAR's will coordinate with FAA; various FAA forms to be used; and DAR supervision criteria.

Consistent with other categories of designees, DAR procedural matters will be distributed through FAA directives and provided to DAR's as appropriate, and also will be available for review by interested persons at any FAA Aircraft Certification or Flight Standards office.

Miscellaneous Comments

One commenter indicates that the proposed AC could by interpreted as requiring an applicant for DAR appointment to possess credentials in all three disciplines; that is, manufacturing, maintenance, and engineering. It is the FAA's intent that an applicant for DAR appointment would only be expected to have the experience and qualifications appropriate to the particular function for which authorization is sought. For example, if a person is seeking appointment as a DAR only for the purpose of conducting conformity inspections, that person's qualifications could be limited to those necessary to perform that particular task.

A commenter expresses concern that eligibility requirements may be such that only former FAA employees would be

appointed as DAR's. The commenter believes it is imperative to have a proper mix of former FAA employees and industry persons selected as DAR's. The FAA expects a number of former FAA employees to apply for, and be issued, DAR authorizations. However, experience with other categories of designees, such as Designated Engineering Representatives (DER's), has shown that the majority of appointees are from industry. Many DMIR's and persons having FAA Inspection Authorizations are qualified to perform certain of the authorized DAR functions.

One commenter believes that a dual DMIR/DAR appointment would be advantageous since the DMIR authorization could be used for production purposes and the DAR authorization could be used for conformity certifications on components being produced under bilateral airworthiness agreements (a function which cannot be authorized for a DMIR under current regulations). The commenter, however, believes that such a dual appointment might create certain procedural problems. The FAA does, in fact, envision dual appointments such as DMIR/DAR, and DER/DAR, and does not anticipate procedural problems.

One commenter asks whether DAR's will be appointed to meet FAA or industry needs or desires. While there will be no requirement to substantiate the need for DAR appointment as a prerequisite for appointment, the FAA fully expects that those persons appointed as DAR's will be reasonably active in performing authorized functions. Lack of activity for an extended period of time would be cause for terminating a DAR appointment, since administrative costs associated with continuing an inactive appointment could not be justified, and continued currency of experience and familiarity with FAA regulations and government/industry practices and policies could no longer be assured.

Two commenters express concern that the acronym "DAR" may be confused with the DAR (Design Approval Representative) used by the Canadian civil air authorities. The FAA does not believe this will present a problem, except perhaps in those areas which involve Canadian products. In these and other instances where the acronym could be confused, the FAA would suggest using "FAA" as a prefix; that is, "FAA–DAR."

One commenter questions how DAR fees are to be determined. Fees should be negotiated between the DAR and the user of the DAR's services. Although the FAA has statutory authority to prescribe maximum fees which may be charged by designees, the FAA has not found it necessary to do so with other designee programs.

One commenter questions whether or not the FAA will provide liability insurance for DAR's while acting on the FAA's behalf. As with other categories of designees, the FAA will not provide such insurance coverage.

Another commenter questions whether the DAR, the DAR's employer, or the FAA could be held liable for a DAR's actions. Like any other person, a DAR can be held legally accountable and liable for negligent conduct. Similarly, if a DAR has been negligent in his/her capacity as an employee, the employer may also be held accountable and potentially liable. The United States has consistently taken the position that Representatives of the Administrator are not employees of the FAA. Therefore, the FAA neither provides for their legal defense nor considers itself to be liable for a designee's negligent conduct.

Several comments were received concerning the limitations of authority for a DAR. The FAA will issue a certificate of authority to each DAR which will limit the DAR's authority to those functions for which the DAR has been determined qualified. Limitations also may be prescribed within each authorized function, where deemed appropriate. For example, a DAR may be authorized to issue standard airworthiness certificates limited to small aircraft only. Another example would be authority to issue export approvals limited to small rotorcraft only. Such limitations would be based the qualifications and expertise of the particular DAR.

One commenter suggests that the proposal places heavy emphasis on manufacturing, but does not extend into the area of maintenance. Although the proposal may have been perceived in this manner, there was no intent to place greater emphasis on manufacturing over maintenance. In the interest of clarification, the AC will categorize the maintenance and manufacturing functions. The commenter also questions if the FAA plans to convert other FAA designee categories to DAR's. The FAA has no such plan at this time.

One commenter recommends that no geographical limitations be placed on a DAR's activity. Generally, the FAA will limit a DAR to functions within the geographical area of the appointing FAA office to ensure monitoring and supervising capability. However, DAR may perform those functions outside of this area when authorized by the appointing FAA office. If a DAR elects to relocate to another geographical area, the FAA monitoring and supervisory task will be transferred to the appropriate FAA office in that area.

Two commenters suggest that it would be in their own interest and that of the FAA to appoint DAR's for service in Europe, Africa, and the Middle East. They argue that this would result in savings to the FAA, which is often pressed to carry out its overseas mission with limited manpower, and would preclude costly delays in obtaining required FAA certifications and approvals. The FAA does not object to appointing DAR's in foreign countries, although the FAA might not have the necessary resources to monitor and supervise their activities. Accordingly, the FAA will consider appointing DAR's in a foreign country only when it is determined that there would be no undue burden on the FAA in administering the particular program. This would not prevent appointing DAR's to travel to foreign countries to issue airworthiness certificates/tags and export approvals on aircraft and related products.

A commenter questions whether a DAR employed by a particular individual would be on call to FAA to respond to requests for services from other persons, facilities, or locations. The FAA does not require any DAR to be on call to provide services to any person or organization. The use of such representatives is at the discretion of the applicant seeking required certification or approval. One commenter asks whether a DAR's authority would be confined to activity on behalf of his/her employer, unless self-employed. Unlike a DMIR designation, the FAA would not confine a DAR's activity to the DAR's employer.

One commenter recommends that the FAA ensure that safety will not be compromised by inadequate monitoring of the DAR program. The commenter suggests that the FAA establish controls to ensure accountability and to detect and correct instances in which safety considerations may tend to be affected by inherent conflict of interest pressures under which a DAR might be forced to operate. The FAA recognizes the need to provide for adequate controls in monitoring this program. Accordingly, consistent with other designee categories, the FAA will establish internal procedures to ensure that the DAR program will be properly directed toward the FAA's safety objectives.

One commenter asks whether DAR appointments will be of individual persons or of organizations. The FAA

envisions the majority of DAR appointees will be individuals. Since the term "person" is defined in Federal Aviation Regulations, Part 1, to include an individual, firm, partnership, corporation, company, association and joint-stock association, such organizations may be considered for appointment as DAR's. In these instances, the organization would be required to submit, along with its application for DAR authorization, the names, signatures, titles, and qualifications of those persons who would actually perform the authorized functions. Addtionally, such an organization must also submit a procedure, acceptable to the FAA, which positively ensures that only such appropriately qualified persons perform authorized functions. It should be noted that the FAA will hold the organization responsible for complying with the conditions of the DAR appointment, with any necessary corrective actions to be directed at the organization.

Economic Evaluation

Benefits

Economic benefits of the DAR program will be derived from cost savings or improved efficiency. Applicants for certification services will benefit primarily through reductions in costly delays in obtaining certifications required to conduct aviation-oriented enterprises. FAA monitoring and supervision of the DAR program will ensure that the present level of aviation safety will not be diminished. In fact, safety will be enhanced because FAA personnel relieved from tasks accomplished by DAR's will be able to redirect their efforts to other areas affecting safety.

Comments relating to economic benefits indicate that there would be industry cost savings from improved efficiency and reduction of delays in obtaining certifications. One commenter relates that he had to ferry a B–707 to the United States from Singapore to obtain an airworthiness certificate, an example of an expense which could be eliminated by this amendment. Other commenters cite difficulty in arranging FAA aircraft inspections in a timely manner, and expect that the rule will alleviate this problem. After the close of the comment period, the FAA received a letter from a U.S. aircraft modifier indicating that delays in delivering an aircraft located in West Germany, because of the FAA's inability to support a proposed modification program schedule, will create a financial burden of approximately $2,500 per day to the aircraft owner. Such problems could also be alleviated by the rule.

Clearly the DAR program will be of benefit in reducing government costs by permitting certain FAA functions to be undertaken by qualified private persons or organizations.

Based on the high degree of interest and the urgent need for DAR's as expressed by commenters and the numerous inquiries received concerning DAR appointments, the FAA anticipates that the DAR program will be as well received by the aviation public and industry as have been other categories of designees.

Costs

No costs need be incurred by any applicant requiring FAA certification services since the use of a DAR to obtain FAA certification is optional. The FAA will continue to issue required certifications, in accordance with existing practice and policy. Therefore, an applicant determines, at his/her option, when the use of a DAR would prove economically advantageous. None of the comments from industry indicate that this rule will impose additional costs. Those that do address the economic factors indicate that cost savings will result.

There is no cost to the applicant for DAR authorization approval.

The cost of the DAR program to the FAA will be negligible. Although there are selection, training, and orientation costs associated with initiating the program, these are more than offset since DAR's will perform tasks that would otherwise be performed by the FAA.

Regulatory Flexibility Determination

The FAA has determined this rule will not have a significant economic impact on a substantial number of small entities, even though it authorizes fees to be charged for certification services.

This determination is based on the FAA's experience with other designees permitted to charge for their services. Generally, fees have been such that any business or person could afford the services of a designee without being placed at a competitive disadvantage. Additionally, small entities requiring certification services need not engage DAR's, but may continue to request the services of FAA personnel, which will be provided consistent with existing practice and policy.

List of Subjects in 14 CFR Part 183

Airmen, Air safety, Safety, Aviation safety, Air transportation, Aircraft.

The Amendment

Accordingly, Part 183 of the Federal Aviation Regulations (14 CFR Part 183) is amended as follows, effective May 16, 1983.

PART 183—REPRESENTATIVES OF THE ADMINISTRATOR

1. By amending § 183.11 by adding a new paragraph (e) to read as follows:

§ 183.11 Selection.

* * * * *

(e) The Director of Airworthiness, or the Director's designee, may select Designated Airworthiness Representatives from qualified persons who apply by a letter accompanied by a "Statement of Qualifications of Designated Airworthiness Representative."

(Approved by the Office of Management and Budget under OMB control number 2120–0035)

2. By amending § 183.13 by adding a new paragraph (c) to read as follows:

§ 183.13 Certification.

* * * * *

(c) A "Certificate of Authority," stating the specific functions which the person concerned is authorized to perform and stating an expiration date, is issued to each Designated Airworthiness Representative, along with a "Certificate of Designation" for display purposes.

3. By amending § 183.15 by amending paragraphs (a) and (b) by removing the words "under paragraph (c)" and by inserting, in their place, the words "under paragraph (d)"; by redesignating paragraph (c) as (d); and by adding a new paragraph (c) to read as follows:

§ 183.15 Duration of certificates.

* * * * *

(c) Unless sooner terminated under paragraph (d) of this section, a designation as a Designated Airworthiness Representative is effective until the expiration date shown on the Certificate of Authority.

* * * * *

4. By adding a new § 183.33 to read as follows:

§ 183.33 Designated Airworthiness Representative.

A Designated Airworthiness Representative (DAR) may, within limits prescribed by and under the general supervision of the Administrator, do the following:

(a) Perform examination, inspection, and testing services necessary to the issuance of certificates, including

VOL
48
ISS
73
AP
14
1983
UMI

issuing certificates, in the areas of maintenance, manufacturing, and engineering as may be authorized by the Director of Airworthiness.

(b) Charge a fee for his or her services.

(c) Perform authorized functions at any authorized location.

(Secs. 313(a), 314, 601, 603, 605, and 1102, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1355, 1421, 1423, 1425, and 1502); Sec.6(c) Department of Transportation Act (49 U.S.C. 1655(c)))

Note.—This rule establishes a procedure for designating persons to perform certain certification functions previously conducted only by FAA employees, thereby reducing or eliminating certain delays in obtaining required certifications. Further, this document involves a rulemaking action which: (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparing a regulatory evaluation because the costly changes associated with the designation procedures are minimal. In addition, I certify that, under the criteria of the Regulatory Flexibility Act, the amendments will not have a significant economic impact on a substantial number of small entities since it will minimally ease the burden of regulatory compliance by reducing certain delays on obtaining required certifications.

Issued in Washington, D.C., on February 14, 1983.

J. Lynn Helms,

Administrator.

Federal Aviation Administration

[AC 183-33]

Advisory Circular for Designated Airworthiness Respresentatives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final.

SUMMARY: This advisory circular (AC) will be used as the vehicle to identify examination, inspection, and testing services related to certification functions in the areas of maintenance, manufacturing, and engineering, which may be delegated to Designated Airworthiness Representatives (DAR's), as may be authorized by the Director of Airworthiness.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Sandy DeLucia, Aircraft Manufacturing Division (AWS-200), Office of Airworthiness, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone (202) 426-8361.

SUPPLEMENTARY INFORMATION:

Discussion of the Advisory Circular

The FAA has amended Part 183 of the Federal Aviation Regulations (published elsewhere in this issue). This amendment provides for the establishment of Designated Airworthiness Representatives (DAR's) as a new category of persons appointed, under Section 314 of the Federal Aviation Act (FA Act) of 1958, to act as representatives of the Administrator in performing certain certification functions under Title VI of the FA Act. This amendment to Part 183 enables the FAA to expand its designee program into new areas of delegation not previously provided for in Part 183. The expanded delegations are necessary since the delegations previously authorized by Part 183 constrained the FAA's ability to deal with the proliferation of requests for FAA examination, inspection, and testing services incident to the issuance of certificates under Title VI of the FA Act. This amendment now enables FAA to use its fiscal and human resources in a more effective manner to meet safety objectives. In addition, the amendment will ease the burden of regulation on the public by expediting accomplishment of required demonstrations of compliance with applicable airworthiness standards and will, therefore, reduce or eliminate certain delays in obtaining required certifications.

As provided, delegation of specific functions may be authorized for limited periods of time in accordance with national policy developed by the Director of Airworthiness, and may be withdrawn by the appointing authority at any time, and for any reason deemed appropriate.

Since each examination, inspection, and testing function which may be delegated to DAR's under the amendment cannot be envisioned, it was not possible to specify, by regulation, all areas where a DAR's services may be used consistent with the stated objectives of the amendments. Accordingly, this AC contains those specific functions which may be delegated in the immediate future. The FAA intends to revise and republish this AC to seek public comment each time revisions are proposed to add or delete any authorized function. Proposed new areas of delegation will be selected and authorized by the Director of Airworthiness based on recommendations from other FAA elements and the aviation community. This procedure will expedite the notification process each time a designated function is to be added or deleted. Consistent with the President's goal of streamlining the regulatory process to eliminate unnecessary requirements, the use of this AC to list specific functions appropriate for delegation to DAR's will provide the FAA with the regulatory flexibility to utilize the DAR program in the most effective and innovative manner.

Discussion of Comments

A total of six individuals and association submitted comments on the proposed AC (47 FR 27475, June 24, 1982). Two commenters concur with the proposal as written. Three commenters concur but also included comments. One commenter supports the DAR program concept but indicates that certain areas should be further defined or clarified. The comments submitted in response to the proposed AC closely parallel those submitted in response to the proposed amendment to Part 183. Accordingly, the FAA discussion of comments relating to both the Notice of Proposed Rulemaking and the proposed AC is contained in the preamble to the amendment to Part 183 (published elsewhere in this issue). Based on the public comments relating to the AC, the AC has been revised to clarify the following areas:

1. Qualification criteria.
2. Training.
3. Specific functions within maintenance, manufacturing, and engineering which may be delegated by the Director of Airworthiness.
4. Monitoring and Supervision.
5. Limits of Authority.
6. Appointing Authority.

The Advisory Circular

In accordance with the above, the FAA publishes AC 183-33, Designated Airworthiness Representatives, as follows.

M. C. Beard,

Director of Airworthiness.

Issued in Washington, D.C., on February 14, 1983.

Advisory Circular

Subject:

Date: February 14, 1983. AC No: 183-33.

Initiated by: AWS-200. Change:

Designated Airworthiness Representatives

1. *Purpose.* This advisory circular (AC) contains information and guidance concerning the selection and appointment of Designated Airworthiness Representatives (DAR's) and identifies the specific functions which may be delegated to DAR's as authorized by the Director of Airworthiness. This AC is effective on the day the amendment to FAR 183 to include DAR's becomes effective.

2. *Related Federal Aviation Regulations (FAR).* FAR's Part 21, Part 43, and Part 183.

3. *Background.*

a. The Federal Aviation Administration (FAA) has amended Part 183 of the FAR to provide for the establishment of DAR's as a new category of person appointed, under Section 314 of the Federal Aviation Act (FA Act) of 1958, to act as a representative of the Adminstrator in performing certain certification functions in the areas of maintenance, manufacturing, and engineering. This was deemed necessary due to the proliferation of requests for FAA examination, inspection, and testing services necessary to the issuance of certificates, including the issuance of certificates under Title VI of the FA Act.

b. Since each examination, inspection, and testing function which may be authorized by the Director of Airworthiness could not be envisioned, it was not possible to specify, in amended Part 183, all areas where a DAR's services may be used consistent with the objectives of the amended rule. Therefore, this AC will be used as a vehicle to identify and describe the specific functions which may be authorized. The FAA will republish this AC for notice and comment each time revisions are proposed to add or delete any authorized functions.

4. *Eligibility.* Any qualified person may be authorized to represent the FAA as a DAR for the purpose of performing certain examination, inspection and testing services relative to certification functions, in the areas of maintenance, manufacturing, and engineering as may be authorized by the

Director of Airworthiness, and published in this AC.

5. *Qualification Criteria.* The qualification criteria to be used to determine eligibility for appointment as a DAR is contained in Appendix 1. Essentially, the same basic qualifications that are used by the FAA for appointing FAA engineers and inspectors, Designated Manufacturing Inspection Representatives (DMIR's) and Designated Engineering Representatives (DER's), etc., as appropriate, for the particular function for which DAR authorization is being sought, will be employed in the selection and appointment of DAR's.

6. *Application.*

a. Any qualified person may apply for appointment as a DAR. Applications for appointment must be initiated by a letter to the Aircraft Certification Division (for manufacturing and engineering functions), or to the Flight Standards Division (for maintenance functions), located in the geographical area in which the applicant resides or has his/her primary place of business (Addresses of appointing offices are identified in Appendix 2). The application letter must be accompanied by a Statement of Qualifications (for Designated Airworthiness Representative), FAA Form 8110-14 completed in duplicate by the applicant.

b. Applications submitted by individual applicants must be accompanied by three letters attesting to the applicants, integrity and technical qualifications IN PERFORMING SIMILAR FUNCTIONS ON PRODUCTS OF SIMILAR TYPE AND COMPLEXITY TO THOSE FOR WHICH AUTHORIZATION IS BEING SOUGHT. At least one or more of the letters must be from an FAA office, with whom the applicant has had a working relationship. The other letters should be from aviation industry organizations such as a repair station, manufacturer, or air carrier.

c. Applications submitted by an organization must include the names, signatures, titles, and qualifications of those persons who will perform the authorized functions along with a procedure, acceptable to the FAA, which positively ensures that only such appropriately qualified persons will perform the authorized functions.

d. All applicants for DAR appointment will be subjected to a personal interview by the Aircraft Certification Division or Flight Standards Division, as appropriate, prior to appointment.

e. Additional information concerning DAR selection, appointment and qualification criteria may be obtained from any FAA office identified in Appendix 2.

7. *Selection and Appointment.*

a. The appointing office will evaluate the applicant's qualifications, conduct a personal interview, and check personal references as appropriate, prior to appointment.

b. Upon a satisfactory determination, the appointing office will prepare a Certificate of Authority, FAA Form 8430-9. Authorized functions will be stated on the front of this certificate. However, when space limitations preclude the listing of all authorized functions, the Certificate of Authority may reference a letter that identifies the DAR's limits of authority in more detail. The reverse side of the certificate will be endorsed by personnel from the assigned managing office who will personally present the certificate to the DAR. In most cases, it will be necessary to limit the delegated authority of the DAR to specific functions commensurate with the applicant's knowledge and experience. For example:

(1) In the case of individuals, the authorization will be limited to products or similar type and complexity for which the applicant has been determined qualified; or,

(2) In the case of an organization:

(a) Repair stations will be limited to products for which they hold appropriate ratings;

(b) Air carriers will be limited to aircraft covered by their operating certificate;

(c) Manufacturers will be limited (except in the case of components, reference paragraph 14a(9)) to products under the provisions of their particular FAA production approval.

c. The applicant's letter will be acknowledged by the appointing office. This acknowledgement will advise the applicant as to whether or not he/she has been appointed, or the reasons why the delegation of authority has been denied.

d. A Certificate of Designation, FAA Form 8000-5, suitable for framing and display, will be prepared by the appointing FAA Office and presented to the new designee by personnel from the assigned managing office.

8. *Duration of Certificates.* Unless otherwise terminated, appointments will be effective for a period not to exceed one (1) year and may be renewed annually at the discretion of the appointing office. It should be noted that a DAR appointment may be terminated for any reason, INCLUDING A LACK OF SUFFICIENT ACTIVITY TO WARRANT CONTINUANCE OF THE DESIGNATION.

9. *Training.*

a. The FAA will provide training for all DAR's upon appointment and on an ongoing basis, as necessary. This training will normally be accomplished by the FAA managing office. A DAR may, at his/her option, also attend a course to be given at the FAA Academy at Oklahoma City, Oklahoma, when available. Each DAR desiring to take the course will be expected to pay for his/her expenses and transportation.

b. DAR training will be limited to familiarization with FAA administrative procedures. Training in technical areas will not be provided, since the FAA will require that a DAR applicant have the necessary technical expertise and knowledge of the FAR's as prerequisites to appointment.

10. *Monitoring and Supervision.* All DAR's will be subjected to monitoring and supervision as appropriate for the particular authorized functions. This will normally be accomplished by the managing office in accordance with FAA internal directives.

11. *Limits of Authority.* The Certificate of Authority, and supplemental documents, presented to each DAR will identify all authorized functions. These functions will be limited to those for which the DAR has been determined qualified.

12. *Appointing Office.* The Director of Airworthiness has delegated the authority to select and appoint DAR's to: the Managers of Aircraft Certification Divisions regarding authorization to perform engineering or manufacturing functions, and to the Managers of Flight Standards Divisions regarding authorization to perform maintenance functions.

13. *Managing Office.* The managing office is the FAA Field Office assigned responsibility by the appointing office for managing a particular DAR's activity. All DAR authorized functions must be accomplished within the geographical boundaries of the managing office unless otherwise authorized by that office. In those instances where a DAR obtains authorization to perform authorized functions in another geographical area, the managing office will retain the responsibility for monitoring and supervising the DAR's activity.

14. *Authorized Functions.* The Director of Airworthiness hereby determines that the following functions may be delegated to a DAR (following a determination by the Director, or the Director's designee, that the DAR is qualified to perform the particular function).

a. *Manufacturing Functions.* In the area of manufacturing, a DAR may, within limits prescribed by, and under the general supervision of the Administrator, be authorized to perform the following functions in accordance with existing FAA procedures, policies, practices, and pertinent FAR's:

(1) Issue original standard airworthiness certificates for U.S.-registered aircraft;

(2) Issue experimental certificates, for the purpose of showing compliance with regulations, for U.S.-registered aircraft which have undergone changes to the type design and require flight test, prior to the issuance/reissuance of a standard airworthiness certificate;

(3) Issue original restricted airworthiness certificates for U.S.-registered restricted category aircraft, located in the U.S. only;

(4) Issue original experimental certificates for U.S.-registered amateur-built aircraft, located in the U.S. only;

(5) Issue special flight permits for U.S.-registered aircraft for the purposes outlined in FAR 21.197(a)(1) through (5);

(6) Issue original export airworthiness approvals for Class I products (i.e., aircraft, aircraft engines, or propellers), in accordance with the provisions of Part 21, Subpart L, of the FAR's;

(7) Issue original export airworthiness approvals for Class II products (i.e., major components of a Class I product), that are manufactured and located in the United States, in accordance with the provisions of Part 21, Subpart L, of the FAR's;

(8) Conduct conformity inspections and certify that prototype or test articles, parts, or installations, including complete aircraft, to be used for FAA design evaluation purposes, (e.g., type certification or supplemental type certification programs), conform to the design being evaluated; or

(9) Conduct conformity inspections and certify that components manufactured in the U.S. for foreign product manufacturers conform to the design, test, and quality requirements notified to the FAA by the civil

air authority of the country in which the product manufacturer is located.

b. *Maintenance Functions.* In the area of maintenance, a DAR may, within limits prescribed by, and under the general supervision of the Administrator, be authorized to perform the following functions in accordance with existing FAA procedures, policies, practices, and pertinent FAR's:

(1) Issue recurrent standard airworthiness certificates for U.S.-registered aircraft;

(2) Issue recurrent restricted airworthiness certificates for U.S.-registered restricted category aircraft, located in the U.S. only;

(3) Issue recurrent experimental certificates for U.S.-registered amateur-built aircraft, located in the U.S. only;

(4) Issue special flight permits for U.S.-registered aircraft for the purposes outlined in FAR 21.197(a)(1), and (2);

(5) Issue recurrent export airworthiness approvals for Class I products (i.e., aircraft, aircraft engines, or propellers), in accordance with the provisions of Part 21, Subpart L, of the FAR's;

(6) Issue recurrent export airworthiness approvals for Class II products (i.e., major components of a Class I product), that are manufactured and located in the United States, in accordance with the provisions of Part 21, Subpart L, of the FAR's; or,

(7) Issue airworthiness approval tags for U.S.-manufactured spare parts for aircraft, aircraft engines, propellers, materials, parts, or appliances upon a determination that such products have remained in, or have been returned to, their FAA approved design configuration, and are in a condition for safe operation.

c. *Engineering Functions.* (Reserved. No present need has been established to authorize delegations in the area of engineering beyond those presently authorized under the Designated Engineering Representative (DER) program.)

M. C. Beard,

Director of Airworthiness.

Appendix 1. Qualification Criteria

1. *General Qualifications.* In view of the diverse certification functions (i.e., areas of maintenance, manufacturing, and engineering) which may be delegated under FAR 183.33, the FAA must ensure that DAR applicants are appropriately qualified for each requested function. Accordingly, to qualify for an appointment as a DAR, all applicants must meet the general qualifications listed below in addition to having the specialized experience specified in paragraphs 2 and 3, as appropriate, for the particular function for which authorization is being sought:

a. Current and through working knowledge of the FAR's and related material;

b. Current technical knowledge and experience commensurate with that required for the particular function;

c. Unquestionable integrity, cooperative attitude, and the ability to exercise sound judgment;

d. The ability to maintain the highest degree of objectivity while performing authorized functions on behalf of the FAA, consistent with FAA regulations, statutes, and safety goals, notwithstanding any influence to the contrary; and

e. At least two (2) years of satisfactory experience in working with the FAA in connection with the type of work to be covered in the designation.

2. *Specialized Experience Required for Manufacturing Functions.* In the area of manufacturing, FAA Manufacturing Inspectors are responsible for making original (i.e., the first issuance of an airworthiness certificate/approval or export airworthiness approval) determinations that an aircraft or related product conforms to its FAA approved type design configuration and is in a condition for safe operation; or, as appropriate, the original determination that an aircraft or related product meets pertinent FAR requirements (e.g. amateur-built aircraft). Accordingly, in the area of manufacturing, in addition to the general qualifications specified in paragraph 1, a DAR applicant must have the following specialized experience for each particular function for which authorization is being sought:

a. *Issuance of Original Airworthiness Certificates on U.S.-Registered Aircraft.* (Reference Advisory Circular 183–33, paragraph 14a(1) through (5)). To qualify for authorization to perform this particular function, a DAR applicant must have the following experience:

(1) Five years of experinece as an FAA Manufacturing Inspector or Designated Manufacturing Inspection Representative (DMIR) involved in the actual issuance of original airworthiness certificates on AIRCRAFT OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought; or

(2) In the case of an organization, as the holder of an FAA Production Certificate (PC), or Approved Production Inspection System (APIS) having a person(s) in its employ with five years of experience similar to that specified in paragraph 2a(1).

b. *Issuance of Original Export Airworthiness Approvals for Class I Products (i.e., Aircraft, Aircraft Engines, or Propellers).* (Reference Advisory Circular 183–33, paragraph 14a(6)). To qualify for authorization to perform this particular function, an DAR applicant must have the following experience.

(1) Five years of experience as an FAA Manufacturing Inspector or DMIR involved in the actual issuance of original export airworthiness approvals on Class I Products OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought; or

(2) In the case of an organization, as the holder of an FAA PC, or APIS having a person(s) in its employ with five years of experience similar to that specified in paragraph 2b(1).

c. *Issuance of Original Export Airworthiness Approvals for Class II Products (i.e., Major Components of a Class I Product), that are Manufactured and Located in the United States.* (Reference Advisory Circular 183–33, paragraph 14a(7)). To qualify for authorization to perform this particular function, a DAR applicant must have the following experience:

(1) Three years of experience as an FAA Manufacturing Inspector or DMIR involved in the actual issuance of original export airworthiness approvals on Class II Products OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought; or

(2) Show evidence of three years of experience with quality control methods and techniques which demostrates the applicant's ability to determine that Class II Products (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought) submitted for original export airworthiness approval meet FAR 21, Subpart L, and any other applicable FAR's; and meet the special/additional requirements of the importing country. This experience should include:

(a) First article, in process, and final assembly inspection;

(b) Quality assurance provisions of special processes, e.g., heat treating, brazing, welding, carburizing, plating, etc.;

(c) Destructive and nondestructive inspection;

(d) Manufacturing processes;

(e) Airworthiness assurance (Reference Order 8120.2A, paragraph 183);

(f) Developing/implementing quality control systems/procedures;

(g) Testing procedures; and

(h) Use of FAA approved design data.

(3) In the case of an organization, as the holder of an FAA production approval (i.e., PC, APIS Technical Standard Order Authorization (TSOA), or FAA-Parts Manufacturer Approval (FAA–PMA)) having a person(s) in its employ with three years experience similar to that specified in paragraph 2c(1) or (2).

d. *Conduct Conformity Inspections and Certify Conformity of Prototype or Test Articles, Parts, or Installations, Including Completed Aircraft.* (Reference Advisory Circular 183–33, paragraph 14a(8)). To qualify for authorization to perform this particular function, DAR applicant must have the following experience:

(1) Five years of experience as an FAA Manufacturing Inspector or DMIR involved in making actual determinations that prototype or test articles, parts, or installations, including completed aircraft (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought) were in conformity to the design being evaluated by the FAA; or

(2) Show evidence of five years experience with quality control methods and techniques which demonstrates the applicant's ability to determine that prototype or test articles, parts, or installations, including completed aircraft (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought), to be used for FAA design evaluation, conform to the design being evaluated. This experience should include:

(a) First article, in process, and final assembly inspection;

(b) Quality assurance provisions of special processes, e.g., heat treating, brazing, welding, carburizing, plating, etc.;

(c) Destructive and nondestructive inspection;

(d) Manufacturing processes;

(e) Airworthiness assurance (Reference Order 8120.2A, paragraph 183);

(f) Developing/implementing quality control systems/procedures;

(g) Testing procedures; and

(h) Use of FAA approved design data.

(3) In the case of an organization, as the holder of an FAA production approval (i.e., PC, APIS, TSOA, or FAA–PMA) having a person(s) in its employ with five years experience similar to that specified in paragraph 2d(1) or (2).

e. *Conduct Conformity Inspections and Certify Conformity of Components Manufactured in the United States for Foreign Product Manufacturers.* (Reference Advisory Circular 183–33, paragraph 14a(9)). To qualify for authorization to perform this particular function, a DAR applicant must have the following experience:

(1) Three years of experience as an FAA Manufacturing Inspector involved in making actual determinations that components (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought) manufactured in the U.S. for foreign product manufacturers were in confirmity with the design, test, and quality requirements notified to the FAA by the civil air authority of the country in which the product manufacturer is located; or

(2) Show evidence of three years experience with quality control methods and techniques on components (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought) which demonstrates the applicant's ability to determine conformance to the pertinent design, test, and quality requirements. This experience should include:

(a) First article, in process, and final assembly inspection;

(b) Quality assurance provisions of special processes, e.g., heat treating, brazing, welding, carburizing, plating, etc.;

(c) Destructive and nondestructive inspection;

(d) Manufacturing processes;

(e) Airworthiness assurance (Reference Order 8120.2A, paragraph 183);

(f) Developing/implementing quality control systems/procedures;

(g) Testing procedures; and

(h) Use of FAA approved design data.

(3) In the case of an organization, as the holder of an FAA production approval (i.e., PC, APIS, TSOA, or FAA–PMA) having a person(s) in its employ with three years experience similar to that specified in paragraph 2e(1) or (2).

3. *Specialized Experience Required for Maintenance Functions.* In the area of maintenance, FAA Airworthness Inspectors are responsible for making recurrent (i.e., the issuance, subsequent to the original, of an airworthiness certificate/approval or export airworthiness approval) determinations that an aircraft or related product has remained in or has been returned to its FAA approved type design configuration and is in a condition for safe operation; or, as appropriate, the recurrent determination that an aircraft or related product continues to meet pertinent FAR requirements (e.g. amateur-built aircraft). Accordingly, in the area of maintenance, in addition to the general qualifications specified in paragraph 1, a DAR applicant must have the following specialized experience for each particular function for which authorization is being sought:

a. *Issuance or Recurrent Airworthiness Certificates on U.S.-Registered Aircraft.* (Reference Advisory Circular 183–33, paragraph 14b(1) through (4)). To qualify for authorization to perform this particular function, a DAR applicant must have the following experience:

(1) five years of experience as:

(a) An FAA Airworthiness Inspector involved in the actual issuance of recurrent airworthiness certificates on AIRCRAFT OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought; or

(b) A person having responsibility for managing airworthiness certification programs leading to the issuance of airworthiness certificates and/or the release of aircraft to service (e.g. Chief Inspector or Director of Maintenance at an FAA approved repair station, or at the facility of the holder of an air carrier or commercial operators certificate). This person must demonstrate the ability to determine that aircraft (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought) submitted for recurrent certification have remained in or have been returned to their FAA approved design configuration; or, as appropriate, the recurrent determination that an aircraft meets pertinent FAR requirements; or

(c) The experience as outlined in paragraph 2a(1).

(2) In the case of an organization:

(a) As the holder of a repair station certificate, under FAR 145, with appropriate ratings, having a person(s) in its employ with five years experience similar to that specified in paragraph 3a(1) (a) through (c); or

(b) Any air carrier operating certificate holder with an FAA approved Continuous Airworthiness Maintenance Program (CAMP), having a person(s) in its employ with five years experience similar to that specified in paragraph 3a(1) (a) through (c); or

(c) A manufacturer as defined in paragraph 2a(2).

b. *Issuance of Recurrent Export Airworthiness Approvals for Class I Products (i.e., Aircraft, Aircraft Engines, or Propellers).* (Reference Advisory Circular 183–33, paragraph 14b(5)). To qualify for authorization to perform this particular function, a DAR applicant must have the following experience:

(1) Five years of experience as:

(a) An FAA Airworthiness Inspector involved in the actual issuance of recurrent export airworthiness approvals for Class I Products OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought; or

(b) A person having responsibility for managing export airworthiness approval programs leading to the issuance of export airworthiness approvals for Class I Products (e.g., Chief Inspector or Director of Maintenance at an FAA approved repair station, or at the facility of the holder of an air carrier or commercial operators certificate). This person must demonstrate the ability to determine that Class I Products (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought) submitted for recurrent export airworthiness approval meet FAR 21, Subpart L, and any other applicable FAR's; and meet the special/additional requirements of the importing country; or

(c) The experience outlined in paragaraph 2b(1).

(2) In the case of an organization:

(a) As the holder of a repair station certificate, under FAR 145, with appropriate ratings, having a person(s) in its employ with five years experience similar to that specified in paragraph 3b(1) (a) through (c); or

(b) Any air carrier operating certificate holder with an FAA approved CAMP, having a person(s) in its employ with five years experience similar to that specified in paragraph 3b(1) (a) through (c); or

(c) A manufacturer as defined in paragraph 2b(2).

c. *Issuance of Recurrent Export Airworthiness Approvals for Class II Products (i.e., Major Components of a Class I Product), that are Manufactured and Located in the United States.* (Reference Advisory Circular 183–33, paragraph 14b(6)). To qualify for authorization to perform this particular function, a DAR applicant must have the following experience:

(1) Three years of experience as:

(a) An FAA Airworthiness Inspector involved in the actual issuance of recurrent export airworthiness approvals on Class II Products OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought; or

(b) The holder of an IA, Mechanic Certificate with airframe and powerplant ratings, or a repairman's certificate (e.g. avionics, instruments, etc.) who can demonstrate the ability to determine that Class II Products (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought) submitted for recurrent export airworthiness approval meet FAR 21, Subpart L, and other applicable FAR's; and meet the special/additional requirements of the importing country; or

(c) The experience as outlined in paragraph 2c(1) or (2).

(2) In the case of an organization:

(a) As the holder of a repair station certificate, under FAR 145, with appropriate ratings, having a person(s) in its employ with three years of experience similar to that specified in paragraph 3c(1) (a) through (c); or

(b) Any air carrier operating certificate holder with an FAA approved CAMP, having a person(s) in its employ with three years of experience similar to that specified in paragraph 3c(1) (a) through (c); or

(c) A manufacturer as defined in paragraph 2c(3).

d. *Issuance of Airworthiness Approval Tags for U.S.-Manufactured Spare Parts for Aircraft, Aircraft Engines, Propellers, or Appliances.* (Reference Advisory Circular 183–33, paragraph 14b(7). To qualify for authorization to perform this particular function, a DAR applicant must have the following experience:

(1) Five years of experience as:

(a) An FAA Airworthiness Inspector involved in the actual issuance of airworthiness approval tags for spare parts for aircraft, aircraft engines, propellers, or appliances (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought); or

(b) The holder of an IA, Mechanic Certificate with airframe and powerplant ratings, or a repairman's certificate (e.g. avionics, instruments, etc.) who can demonstrate the ability to determine that U.S.-manufactured spare parts for aircraft, including aircraft engines, propellers, materials, parts, or appliances, (OF SIMILAR TYPE AND COMPLEXITY to those for which authorization is being sought) submitted for airworthiness approval tags have remained in or have been returned to their FAA approved design configuration; are in a condition for safe operation; and meet any other applicable FAR's; or

(c) The experience as outlined in paragraph 2b(1); or

(2) In the case of an organization:

(a) As the holder of a repair station certificate, under FAR 145, with appropriate ratings, having a person(s) in its employ with five years of experience as specified in paragraph 3d(1) (a) through (c); or

(b) Any air carrier operating certificate holder with an FAA approved CAMP, having a person(s) in its employ with five years of experience similar to that specified in paragraph 3d(1) (a) through (c); or

(c) A manufacturer as defined in paragraph 2b(2).

4. *Specialized Experience Required for Engineering Functions.* No present need has been established to authorize delegations in the area of engineering beyond those presently authorized under the Designated Engineering Representative (DER) program. Therefore, specialized experience requirements for this discipline will not be developed until such need has been established.

Appendix 2. Selecting and Appointing Offices

The FAA offices responsible for selecting and appointing DAR's are as listed below. Information concerning DAR selection, appointment and qualification criteria may be obtained from the offices listed below or from any FAA Aircraft Certification Office (ACO), Manufacturing Inspection District Office (MIDO), Manufacturing Inspection Satellite Office (MISO), Flight Standards District Offices (FSDO), General Aviation District Office (GADO) or Air Carrier District, Office (ACDO).

a. *Manufacturing and Engineering Functions.* Applications for DAR appointment in the areas of manufacturing and engineering must be submitted to the Aircraft Certification Division listed below that is located in the geographical area in which the applicant resides or has his/her primary place of business.

(1) Aircraft Certification Division, ANE-100, 12 New England Executive Park, Burlington, Massachusetts 01803, (617) 273-7328.

(2) Aircraft Certification Division, ACE-100, 601 East 12th Street, Kansas City, Missouri 64106, (816) 374-6937.

(3) Aircraft Certification Division, ASW-100, 4400 Blue Mound Road, P.O. Box 1689, Fort Worth, Texas 76101, (817) 624-4512.

(4) Aircraft Certification Division, ANM-100, 17900 Pacific Highway South, Seattle, Washington 98168, (206) 764-7047.

b. *Maintenance Functions.* Applications for DAR appointment in the area of maintenance must be submitted to the Flights Standards Division listed below that is located in the geographical area in which the applicant resides or has his/her primary place of business.

(1) Flight Standards Division, AAL-200, Anchorage Federal Office Building and Courthouse, 701 C Street, Box 14, Anchorage, Alaska 99513, (907) 271-5514.

(2) Flight Standards Division, ACE-200, 601 East 12th Street, Kansas City, Missouri 64106, (816) 374-5003.

(3) Flight Standards Division, AEA-200, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, (213) 917-1124.

(4) Flight Standards Staff, AEU-200, 15 Rue de la Loi, 1040 Brussels, Belgium, 513.38.30 Extension 2225, Autovo 793-2720.

(5) Flight Standards Division, AGL-200, 2300 East Devon Avenue, Des Plains, Illinois 60018, (312) 694-7252.

(6) Flight Standards Division, ANE-200, 12 New England Executive Park, P.O. Box 510, Burlington, Massachusetts 01803, (617) 273-7341.

(7) Flight Standards Division, ANM-200, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168, (206) 264-7040.

(8) Flight Standards Division, ASO-200, 3400 Norman Berry Drive, East Point, Georgia 30344, P.O. Box 20636, Atlanta, Georgia 30320, (404) 763-7401.

(9) Flight Standards Division, AWP-200, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009, (213) 536-6251.

(10) Flight Standards Division, ASW-200, 4400 Blue Mound Road, P.O. Box 1689, Fort Worth, Texas 76101, (817) 624-4911, Extension 500.

Research and Special Programs Administration

Specifications for Railroad Tank Cars Used To Transport Hazardous Materials; Notice of Proposed Rulemaking

DEPARTMENT OF TRANSPORTATION
Research and Special Programs Administration

49 CFR Part 173 and 179

[Docket No. HM-175; Notice No. 83-1]

Specifications for Railroad Tank Cars Used To Transport Hazardous Materials

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes changes in the construction and maintenance standards for railroad tank cars used to transport hazardous materials. References to various specification tank cars are to DOT specifications. The proposed changes are as follows:

(1) After December 31, 1986, specification 105 tank cars built before September 1, 1981, that have a capacity exceeding 18,500 U.S. gallons and are carrying a flammable gas, anhydrous ammonia or ethylene oxide would have to be equipped with lower half tank head protection (such as a head shield);

(2) After December 31, 1986, specification 105 tank cars built before September 1, 1981 that have a capacity exceeding 18,500 U.S. gallons and are carrying a flammable gas or ethylene oxide would have to be equipped with: (a) High temperature thermal insulation; and (b) safety relief valves sized according to the requirements for specification 112 and 114 tank cars; and

(3) After December 31, 1986, specification 111 tank cars that have a capacity exceeding 18,500 U.S. gallons and are carrying flammable gas or ethylene oxide would have to be equipped with: (a) Lower half tank head protection; (b) high temperature thermal insulation; and (c) safety relief valves sized according to the requirements for specification 112 and 114 tank cars.

In brief, the proposed rule would require that specifically identified hazardous materials being transported in existing large capacity specification 105 and 111 tank cars have the same added tank head and thermal safety systems that are now required on newly built specification 105 tank cars (HM-174) and on all specification 112 and 114 tank cars (HM-144) when carrying those same commodities.

DATE: Comments must be received on or before June 7, 1983.

ADDRESS: Comments should be addressed to the Dockets Branch, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590. Comments should identify the docket number and notice number and be submitted, if possible, in five copies. The Dockets Branch is located in Room 8426 of the Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590. Public dockets may be reviewed between the hours of 8:30 a.m. and 5:00 p.m., Monday through Friday, except public holidays.

FOR FURTHER INFORMATION CONTACT: Philip Olekszyk, Office of Safety, Federal Railroad Administration, Washington, D.C. 20590, (202) 426-0897.

SUPPLEMENTARY INFORMATION: At the time DOT commenced its review of specifications for pressure tank cars in the early 1970's, there had been a number of serious railroad accidents involving rail transportation of flammable compressed gases, toxic compressed gases and other hazardous materials. Most of these accidents involved uninsulated pressure tank cars of large capacity (over 18,500 U.S. gallons) built to specification 112 and 114.

Since the specification 112 and 114 tank car shipments of hazardous material were determined to present a more serious threat to public safety, MTB and the Federal Railroad Administration (FRA) assigned first priority to improving the construction and maintenance standards applicable to those cars. It was further decided that after these specification 112 and 114 tank cars had been structurally upgraded, the MTB and FRA would then consider a revision of the standards applicable to the specification 105 tank cars.

Accordingly, on September 15, 1977, MTB published a final rule in Docket HM-144 (42 FR 46306). In summary, the rule requires that:

1. Existing and newly built specification 112 and 114 tank cars used to transport flammable gases such as propane, vinyl chloride and butane have both thermal protection (large capacity safety relief valves and high temperature thermal insulation) and tank head protection (such as a head shield);

2. Existing and newly built specification 112 and 114 tank cars used to transport anhydrous ammonia have tank head protection; and

3. All specification 112 and 114 tank cars be equipped with special couplers designed to resist coupler vertical disengagements (self couplers).

After the upgrading of specification 112 and 114 tank cars was substantially completed, MTB initiated rulemaking for specification 105 tank cars. On January 26, 1981, MTB published a final rule in Docket HM-174 (46 FR 8005) affecting new construction of specification 105 tank cars. That final rule also includes a shelf coupler requirement applicable to all specification tank cars. The rule requires that:

(1) Specification 105 tank cars built before March 1, 1981, be retrofitted over a one-year period ending on February 28, 1982, with a coupler vertical restraint system equivalent to that required on specification 112 and 114 tank cars;

(2) All other specification tank cars built before March 1, 1981, be equipped with a coupler vertical restraint system equivalent to that required on specification 112 and 114 tank cars over a four-year period ending on February 28, 1985;

(3) After February 28, 1981, newly built specification 105 tank cars be equipped with a coupler vertical restraint system equivalent to that required on specification 112 and 114 tank cars;

(4) After August 31, 1981, newly built specification 105 tank cars transporting flammable gases, anhydrous ammonia and ethylene oxide be equipped with a tank head puncture resistance system equivalent to that required on certain specification 112 and 114 tank cars (S, T, and J cars);

(5) After August 31, 1981, newly built specification 105 tank cars transporting flammable gases and ethylene oxide be equipped with high temperature thermal insulation equivalent to that required on certain specification 112 and 114 tank cars (T and J cars); and

(6) After August 31, 1981, newly built specification 105 tank cars transporting flammable gases and ethylene oxide be equipped with safety relief valves sized according to the requirements for specification 112 and 114 tank cars.

On July 21, 1980, the same day the notice of proposed rulemaking in Docket HM-174 was issued, MTB also issued an advance notice of proposed rulemaking (ANPRM) in Docket HM-175 (45 FR 48668). That notice sought additional information to allow an evaluation of the need, means, and cost to extend the specified puncture and thermal protection levels of specification 112 and 114 tank cars to:

1. Existing specification 105 tank cars used to transport the same hazardous materials permitted in specification 112 and 114 tank cars;

2. Existing specification 105 tank cars used to transport other hazardous materials such as ethylene oxide, butadiene, poisons, and combustible and flammable liquids or solids; and

3. All other new and existing specification tank cars used to transport the same hazardous materials permitted

in specification 105 tank cars, *e.g.*, specification 111 tank cars.

Comments received in response to the ANPRM and the substantial body of information developed in Dockets HM–144 and HM–174 have been considered in developing the rule proposed in this notice. In all, thirty-eight comments to the ANPRM were submitted to MTB. The depth of coverage in response to the eighteen questions posed by MTB ranged from one or two-page documents limited to a single concern, general observations, or a blanket endorsement of some other commenter's submittal, to documents of more than forty pages covering each of the major issue areas.

Question #1: Accident Data

In the ANPRM, MTB requested details of accidents involving a broad range of hazardous materials according to specification tank car and designated subgroup tank car design characteristics. The tank car subgroup designs were specified in the ANPRM.

Ten responses contained some accident data. Most of the comments were directed at individual commodities or limited movements. One commenter supplied detailed accident data on all major hazardous material rail accidents since 1958. Other commenters supplied accident data on particular hazardous materials or tank car fleet basis. Although the great majority of tank cars included in these data carried flammable gases or anhydrous ammonia, other hazardous materials also were mentioned. These other hazardous materials included ethylene oxide, chlorine, motor fuel anti-knock compound, nitrogen fertilizer solution, refrigerants/dispersants/fluorocarbons, carbon dioxide, sulfur dioxide, ethyl ether, metallic sodium, anhydrous hydrofluoric acid, benzene, acrolein, hydrogen sulfide, vinyl acetate, flammable liquids, propylene oxide, and anhydrous hydrochloric acid. The comments received in this area did not contradict or significantly add to MTB's own data base.

Question #2: Existing Protection Levels

The MTB requested comments on how the levels of head and thermal protection should be ascertained for the various subgroups of existing specification 105 tank cars. Specifically, MTB asked if a point value system reflecting each type and thickness of material should be established.

Most commenters either directly stated or inferred that the levels of needed protection cannot be established for other hazardous materials in the same way as for flammable gases. They contend that safety requirements should be based on the characteristics of the hazardous material being transported and the risks inherent in its transportation by rail. Some commenters noted that the Railway Progress Institute (RPI), the Association of American Railroads (AAR), and FRA were conducting scale model testing and that specific methodologies should await final test results. Several commenters stated that full scale testing was needed to determine the degree of protection provided to such hazardous materials by various specification tank car designs. One commenter recommended that objective engineering formulas from FRA test data be developed to relate the physical and thermal characteristics of the head/tank material, insulation material, jacket material, and tank design.

Overall, MTB did not receive any analyses or approaches to evaluate the levels of puncture and termal protection that the various specification 105 tank cars now possess. The commenters tended to avoid this question on the grounds that it was not feasible, without additional testing, to determine the levels of protection now provided by the various specification 105 tank car designs.

Question #3: Identification and Marking

The MTB requested information on the processes that might be employed to identify and mark each car in the fleet according to the level of head and thermal protection if possesses.

Most commenters answered this question in the same way as for Question #16 on stenciling. They recommend that the current stenciling methods and the alphanumeric system to identify particular car/commodity/protection for specification 112/114 and new specification 105 tank cars be extended to all specification 105 tank cars.

Question #4: Commodity Specific Protection

The MTB solicited comments on whether a different level of thermal and head protection is needed for hazardous materials other than those carried in specification 112 and 114 tank cars. For those hazardous materials which may need different levels of protection, MTB also requested information on what the levels should be and the reasons for the protection level selected. In addition, MTB asked for suggestions on how cars carrying these hazardous materials should be identified and marked.

The commenters who responded to this question believed that hazardous materials should be evaluated individually, with many requiring different or lesser levels of protection than required for the hazardous materials addressed in HM–144. Several commenters offered specific examples of hazardous materials that warrant special protection consideration. Several commenters felt that the existing requirements are already in proportion to protection needs; *e.g.*, the authorized tank car is often required to be constructed to a higher strength specification than the vapor pressure of the hazardous material at ambient temperature warrants.

Commenters generally restricted their opinions to products and car types with which they were directly associated. A variety of reasons were offered in support of various positions.

Two commenters noted that there has never been an incident involving loss of product from a tank car transporting metallic sodium and the metallic sodium is shipped at low vapor pressure. Therefore, they conclude that there is no need for head and thermal protection of tank cars used to transport metallic sodium.

One commenter felt that there might be a justification for a heavier head jacket for cars carrying pyrophorics. The same commenter claimed that there was no justification for retrofit of motor fuel anti-knock compound cars because the disaster potential was much less than for some of the other hazardous materials transported in specification 105 tank cars.

Several commenters identified flammable gases, ethylene oxide, chlorine, and certain poisons as commodities that may be candidates for additional protection. One commenter believed that flammable liquids and combustible liquids have characteristics that do not require the same protection level as do flammable or poisonous gases.

Another commenter cited ethylene oxide, chlorine, and acrolein as hazardous materials that may need additional protection. This commenter believed that the HM–144 thermal protection requirement would not be appropriate for chlorine and acrolein. It was noted that the HM–144 requirement is designed to prevent tank steel from exceeding 800°F for a specific time during exposure to torch or pool fires, whereas chlorine reacts with steel at about 500°F and acrolein polymerizes at about 400°F. Another commenter noted the steel-chlorine reaction problems and suggested that future testing should be directed at producing high temperature insulating systems to improve the thermal resistant performance of chlorine cars. This commenter noted

that, for chlorine cars, there have been more shell punctures than head punctures. Therefore, the commenter concluded that if a thicker tank head or jacket is necessary, then consideration should be given to requiring thicker material for the entire tank. One commenter identified chlorine, vinyl chloride, and isobutylene as the most viable hazardous materials for tank car retrofitting. Another commenter pointed to ethylene oxide cars as the cars most needing retrofit.

No consistent or rigorous criteria for ranking hazardous material in order of the need for additional protection levels evolved from the comments submitted.

Question #5: Accuracy of MTB Estimates

The MTB included in the ANPRM a table of car groupings and estimated protection levels to stimulate comments. It is entitled, "Summary of Estimated Protection Provided by Broad 105 Car Classification Sub-Groupings." Comments on the applicability and accuracy of the table were solicited.

No in-depth analyses or detailed comments pertaining to the table were supplied by the commenters. Several commenters felt that the table represented a reasonable breakdown of the specification 105 tank car fleet. Some suggested that the breakdown of the specification 105 tank car fleet in the table be compared with the results of a study being done by Dynatrend for FRA and/or with the results of Phase 17 of the RPI/AAR Tank Car Project. A more detailed breakdown of the specification 105 car fleet (*e.g.*, hazardous material, by car size, and by car accident history) was recommended by others. Most commenters, however, only addressed the number of cars in each subgroup, not the estimated protection levels of the subgroups.

The commenters generally felt that the two columns offered by the MTB on the estimated status of the tank head and thermal protection of the subgroups were subjective. Many stated that additional testing was needed to quantify the existing levels of head and thermal protection by car design. One commenter felt that the table was misleading for anhydrous ammonia since the table indicates that specification 105 anhydrous ammonia cars have significantly less thermal protection than HM–144 requirements, even though high temperature thermal protection is not required in HM–144 for specification 112 and 114 tank cars used to carry anhydrous ammonia.

Question #6: Fleet Characteristics

The MTB asked that tank car owners and users provide breakdowns of specification 105 tank cars owned or used according to appropriate sub-groupings and characteristics in the table published in the ANPRM.

The limited data submitted did not permit MTB to compile a more accurate or comprehensive characterization of the specification 105 tank car fleet.

Question #7: Retirement, Displacement, Retrofit Considerations

The MTB requested that tank car owners estimate how many specification 105 tank cars would be retired, displaced, or retrofitted if HM–144 performance levels were mandated for the entire specification 105 tank car fleet.

Generally, it appears that the responses to this question were made from varying assumptions as to what the final rule requirements would be. Hence, it is impossible to draw any firm conclusions on the number of cars that would be displaced, retired, or retrofitted if a retrofit requirement for the entire 105 tank car fleet was established.

Question #8: Reasons and Consequences of Retirement or Displacement of Tank Cars

Comments were requested about the reasons for and economic consequences of the retirement of certain cars in lieu of retrofitting. Comments were also requested about the reasons for and the economic consequences of changing car usage rather than retrofitting. The MTB further requested that commenters provide specific information on the age and size of cars which would be considered as strong candidates for retirement or for a change in usage.

Most commenters answered this question in a way which suggested that actual "real world" decisions would have to await a clearer expression of regulatory intent. Various rather general individual opinions were advanced. One commenter stated that cars 28 years or older would be retired because the retrofit cost could not be fuly depreciated over the remaining life of those cars. Another commenter stated that cars listed in the ANPRM Table as subgroup C (LPG) would either be scrapped, or converted to a non-pressure class if a demand for other use could be found for those cars. Another commenter identified small tank cars (approximately 11,000 gallon size) as being strong candidates for a change in usage or retirement.

Question #9: New Car Procurements

Comments were requested on the effect that tank car retirement or usage changes would have on new car procurements.

Most comments were not detailed or specific. It was difficult to determine a consistent or overall direction of the replies. Some commenters stated that all of the retired/dispalced cars would be replaced, while one said that none of the retired/displaced cars would be replaced.

The MTB did not obtain new information from the comments which significantly aided in estimating the impact that the regulatory changes would have on new car procurements.

Question #10: Technical Feasibility of Retrofitting

Assessments of the technical feasibility of retrofitting specification 105 cars were solicited by MTB.

Most of the commenters who responded to this question did not advance technical doubts as to the feasibility of accomplishing the potential retrofit. There were strong opinions that it was not economically practical (because of high costs) to retrofit tank cars by replacing existing valves with larger safety valves. There were also general objections to a retrofit based on the belief that an unretrofitted specification 105 tank car is safer than the unretrofitted specification 112 and 114 tank cars built prior to HM–144.

Even though no significant retrofit obstacles were identified, several commenters observed that because of the growth in diameter of tanks, insulation thickness was restricted by clearance dimensions along railroad rights-of-way. Other commenters considered retrofitting as feasible from a purely technical aspect, but thought that additional testing would be necessary to resolve certain design questions. Several commenters expressed uncertainties concerning the length of time that external coatings applied to specification 105 car jackets could be expected to meet high temperature thermal protection requirements without losing mechanical integrity in severe raiload operational environments.

Question #11: Retrofit Cost Estimates

The MTB requested estimates of the prospective costs of retrofitting given types of specification 105 tank cars. The MTB asked that commenters specify the subgroup and relevant car characteristics (*e.g.*, capacity) upon which their estimates were based; that the specific cost elements be isolated; and that the type of protection system

be identified. In addition, cost estimates for out-of-service time and other cost factors were requested.

The nature and the amount of the estimates supplied by the commenters varied over a wide range. In some cases, it was not clear what cost elements were embraced by the totals.

Question #12: Retrofit Priorities and Timeframes

The ANPRM solicited comments concerning what retrofit priorities and timeframes might be reasonable, and the basis for the priorities and timeframes advocated.

Several of the commenters, while registering doubts about the justification of a retrofit, stated that any retrofit priority should be based on the characteristics of the hazardous materials, with the timeframe related to the need for retrofit, the number of cars affected, and the availability of shop space. One commenter recommended that the retrofit priorities should be based upon the Environmental Protection Agency's Hazardous Substances Categories, and that the number of cars known to be in each of these priority categories would then provide a basis for arriving at reasonable retrofit timeframes. Several commenters believed that retrofit priorities should be based on the characteristics of the hazardous material and car size while one commenter believed that retrofit priorities should be based upon a reconciliation of the level of hazard inherent in the hazardous material and the degree of protection already existing in the cars used. Several commenters suggested priority be given to the HM–144 commodities (flammable gases and anhydrous ammonia).

Question #13: Safety Relief Valves

The MTB asked for comments on the adequacy of current safety relief valves and the extent to which relief valves or discs can be modified on existing cars.

The large majority of commenters felt that a requirement should not be imposed that would mandate replacement of existing valves with larger ones. Although one commenter believed that larger safety valves are of benefit and recommended continued use wherever feasible, many other commenters expressed the opinion that the relief valves currently used on specification 105 tank cars are adequate. The only commenter who discussed directly the feasibility of modifying relief valves or discs stated that existing relief valves on specification 105 tank cars cannot be modified to obtain a larger capacity.

The primary concern of the commenters is the large cost that would be involved if installation of a large capacity safety valve requires cutting a larger hole in the tank. However, the commenters did not indicate the number of cars which would require the cutting of a larger hole.

Question #14: Peculiar Problems or Impacts

The MTB requested information on problems or impacts unique to a commenter's situation, including whether the owner or shipper was a small business.

The general flavor of the comments was that those small businesses owning or operating only a few cars would tend to suffer the most if a comprehensive retrofit were to be required. As in answers to several other questions, commenters seemed to be concerned that an arbitrary requirement might be imposed which would be expensive to comply with and provide little real direct benefits in return.

Question #15: Proof of Performance Levels

The MTB requested opinions on the methods or processes that should be utilized to determine the degree to which given tank head or thermal protection systems meet or exceed a specified performance level.

Several commenters favored complete full-scale testing to prove the effectiveness of proposals in new areas. One commenter suggested that both full-scale puncture and drop hammer tests be performed for systems not previously tested. Several commenters endorsed the FRA thermal test program which was then underway as a step in the right direction.

Question #16: Stenciling

The MTB asked for comments on the requirements, procedures and methods that might be utilized in stenciling or labeling the tank cars.

Most commenters felt that current methods for tank car stenciling could be easily augmented to advise the shippers of the degree of protection provided by specific car types.

Question #17: Reporting Needs

The MTB asked for comments on the reporting requirements for monitoring the progress of any mandated retrofit program.

Most commenters stated that if a reporting requirement is considered necessary then a system similar to that used for HM–144 should be adopted. Several commenters recommended a quarterly reporting schedule, while others recommended a semi-annual report schedule. One commenter suggested that industry should submit to DOT a timetable to monitor progress on a quarterly basis and that DOT should require reports by exception, *i.e.*, from only those who are not meeting the submitted schedule.

Question #18: Operational Substitutes

The MTB asked for comments on operational changes that might be instituted in lieu of retrofitting and still provide acceptable protection levels.

Several commenters suggested that DOT should await recommendations of the Systems Safety Analysis Group of the Inter-industry Task Group. Other commenters suggested that a rule, similar to FRA Emergency Order No. 5, should be adopted. Several commenters believed that operational changes are a more costly solution, especially since they are recurring costs, and should not be required.

Discussion

The MTB and FRA have examined the comments received in respect to actual accident trends, previous regulatory actions, testing results, technical evaluations, traffic statistics and other pertinent information in the possession of MTB and FRA. As a part of this examination, several options were developed and evaluated. A comprehensive benefit-cost analysis was employed to assess the relative merits of each major option.

The provisions of this NPRM are discussed in relationship to each of the three areas of consideration listed in the ANPRM.

The first area addressed in the ANPRM was the issue of extending the specified puncture and thermal protection levels of specification 112 and 114 tank cars (HM–144) to existing specification 105 tank cars that transport the same commodities as specification 112 and 114 tank cars.

In assessing the advisability of regulatory action in this area, the MTB and FRA note that:

(a) Any specification 112 tank car, 114 tank car, or 105 tank car built after August 31, 1981 must have a specified puncture protection level, thermal protection level and safety valve sizing as appropriate, when used to transport flammable gases and the toxic non-flammable gas, anhydrous ammonia.

(b) The safety improvement effectiveness of these protection requirements has been established through operating experience;

(c) Almost all of the flammable gas and anhydrous ammonia rail movement

volume in specification 105 tank cars is carried in newer cars having capacities in excess of 18,500 gallons;

(d) Other than having jacketed ambient temperature insulation, the basic design of the large capacity specification 105 tank cars is essentially similar to the specification 112 and 114 tank cars prior to being retrofitted in accordance with HM–144;

(e) Requiring retrofit of the safety valves on existing large capacity (over 18,500 U.S. gallons) specification 105 tank cars will not require cutting a larger hole in the tank since these cars have a manway cover with an 18 inch diameter; and

(f) The benefit-cost ratio for the retrofit of these large specification 105 tank cars (numbering about 3,000) is positive.

The FRA has determined that the retrofit of specification 105 tank cars would be cost beneficial, provided that the retrofit requirement is limited to those cars having capacities exceeding 18,500 U.S. gallons and used to transport those hazardous materials that historically have an unfavorable accident history and disaster potential (*i.e.*, LPG, ethylene oxide, and anhydrous ammonia). The retrofit proposed in this NPRM requires protection systems that are identical or substantially similar to those that have been extremely successful when applied to other tank cars transporting these commodities. The selection of large capacity specification 105 tank cars for retrofitting is consistent with the previous tank car retrofit rulemaking (HM–144) since the specification 112 and 114 tank cars previously required to be retrofitted were large capacity cars.

A large capacity safety valve is proposed because the combination of thermal insulation and larger safety valve provides the best level of safety. The large safety valve minimizes the product left in the tank at the point of tank failure and provides additional benefits in the case where the car is overturned and must vent liquid as well as vapor.

The cost involved in requiring a large capacity safety valve, as was required in HM–144 and HM–174, is not excessive since MTB and FRA are proposing a rule limited to tank cars with a volume over 18,500 gallons. The MTB and FRA believe that most, if not all, of these cars already have a manway of at least 18 inches in diameter, *i.e.*, large enough to be equipped with the large capacity valve. Thus, no changes in the tank structure, would be necessary. At most, a new manway cover plate will be necessary.

For those tank cars with a manway cover having a major dimension or diameter of less than 18 inches, MTB and FRA have proposed an alternative system that would allow the use of additional thermal protection in conjunction with existing safety valves. With this system, there should be no liquid remaining in the tank car at the moment of failure in those incidents in which the tank car remains upright. Under this option, there could be situations where the tank car pressures slightly exceed the pressures prescribed in § 179.100–15 and § 179.102–11; however, the pressures would not exceed the tank test pressure. A technical analysis explaining the safety validity of this option, and the consistency of the option with safety criteria established in HM–144, is in the docket.

The MTB and FRA are interested in determining the number of tank cars, if any, that have a manway cover with a major dimension or diameter of less than 18 inches. Therefore, it is requested that tank car owners who have cars with a manway cover having a major dimension or diameter of less than 18 inches provide the following information in their comments to the docket:

(a) The reporting marks(s) of the car(s);

(b) the manway cover diameter or major dimension, layout, and arrangement, including the location of all valves and fittings;

(c) a description of the existing insulation system on the tank car; and

(d) a list of all hazardous materials that are transported in the particular car(s).

At the present time and with the information available, MTB and FRA do not believe a rule requiring a retrofit of existing specification 105 tank cars having capacities less than 18,500 gallons carrying the identified hazardous materials is warranted on a cost/benefit basis. Many of these cars are nearing the end of their service life. Hence, the cost of retrofit might not be recovered in the remaining tank car life. More importantly, these smaller capacity cars have a lower utilization rate, reducing their exposure to potential accident situations. Finally, their smaller capacity presents a smaller safety risk should they be involved in an accident.

The second area of consideration for potential rulemaking listed in the ANPRM was to extend the specified puncture and thermal protection levels of specification 112 and 114 tank cars (HM–144) to existing specification 105 tank cars that transport other hazardous materials such as ethylene oxide, butadiene, poisons, and combustible and flammable liquids or solids.

Beyond some general mention of certain hazardous materials, the commenters did not support the extension of thermal and puncture requirements as applied to flammable and toxic poisons to "other" hazardous materials carried in existing specification 105 tank cars. The MTB and FRA have reviewed the safety record and the threats posed by all of the hazardous materials carried in specification 105 tank cars. Using the same rationale as was used in the final rule in HM–174, the MTB and FRA believe that the characteristics and threats posed by ethylene oxide are so close to materials classes as flammable gas that the same retrofit requirements should be adopted for tank cars used to transport this material. The expected benefits are the same as those identified for flammable gases.

The FRA is unable to justify similar retrofit requirements for specification 105 tank cars carrying other hazardous materials. This is true even though hazardous materials such as chlorine, acrolein, and motor fuel anti-knock compounds have properties that pose a high risk in accidents. However, these hazardous materials differ from flammable gases in that the identical level of thermal protection may not provide the same duration to failure or alleviate the potential catastrophic consequences to the same degree. Moreover, these hazardous materials are often carried in cars with different and better relative protection levels than tank cars authorized for flammable gases.

In regard to thermal protection, the more dangerous of the other hazardous materials undergo rapid decomposition or polymerization at elevated temperature, but neither the failure mechanisms nor countermeasures are as yet adequately tested or understood. For example, in the case of chlorine, it has not been determined that there have been any accident consequences that would definitely have been avoided if high temperature thermal protection identical to that required for flammable gases had been in place. Moreover, unlike flammable gases, a thermally induced rupture of a chlorine car would not increase the fire or continue a chain reaction spread of fire engulfment.

The MTB and FRA also considered increased puncture resistance for existing cars carrying hazardous materials such as chlorine, motor fuel anti-knock compound, and sulfur dioxide. The MTB and FRA are not convinced that an increased puncture

resistance requirement is justified based on accident experience and the current protection levels built into the cars authorized to transport these materials. The primary basis for this view is the fact that these hazardous materials are required to be shipped in tank cars with pressure ratings in excess of that needed to contain these products. Therefore, these cars already have some increased degree of built-in puncture resistance. Although this tank head puncture resistance may not be equivalent to HM–144/HM–174 performance levels, the safety record of these cars is such that MTB and FRA cannot now justify their retrofit or redesign to achieve an incremental amount of additional protection. It should also be noted that all specification 105 tank cars carrying hazardous materials are now required to have shelf couplers (per HM–174), which diminishes the probability of coupler-inflicted tank punctures.

With the exception of ethylene oxide, MTB did not find sufficient threats to safety, nor cost-benefit justification, for proposing an extension of thermal and head protection for tank cars to materials other than those addressed in dockets HM–144 and HM–174.

The final area of consideration identified in the ANPRM suggested that there may be safety benefits in regulatory action to extend the specified puncture and thermal protection levels of the specification 112 and 114 tank cars (HM–144) to other new and existing specification tank cars that carry the same hazardous materials as specification 105 tank cars, *e.g.*, certain specification 111 tank cars.

The MTB and FRA have examined the hazardous materials transported in both specification 105 tank cars and specification 111 tank cars. There are approximately 300 specification 111A100W4 tank cars that are authorized to move flammable gases and ethylene oxide, the hazardous materials determined by MTB and FRA to warrant additional protection. The size of this fleet will not increase, because on October 9, 1981 the Association of American Railroads (AAR) specified that:

(a) After October 1, 1981, no specification 111A100W4 tank cars may be newly built for or converted to ethylene oxide service. Existing specification 111A100W4 tank cars in ethylene oxide service must comply with the coupler restraint requirements of 49 CFR § 179.105–6 by March 31, 1982; and

(b) After October 1, 1981, each class 105 tank car converted to ethylene oxide service must comply with Class 105J coupler restraint, head shield and thermal protection requirements for new construction.

However, for the same reasons as previously stated with respect to the large (over 18,500 U.S. gallons) specification 105 tank cars, MTB and FRA believe that the retrofit of the large specification 111 tank cars carrying ethylene oxide and flammable gases is cost beneficial.

In order to be consistent with the AAR actions and avoid unnecessary complexity, the proposed rule does not authorize any newly constructed specification 111 tank cars for ethylene oxide or flammable gas service. New construction of specification 111 tank cars is not needed since specification 105 tank cars may be constructed to carry these commodities.

Section-By-Section Analysis

Section 173.124 Ethylene oxide.

It is proposed to amend paragraph (a)(5) of § 173.124 to require that each specification 105 tank car built before September 1, 1981, with a capacity in excess of 18,500 U.S. gallons, shall conform to specification 105J when transporting ethylene oxide after December 31, 1986. (Specification 105 tank cars built after August 31, 1981 are currently required to conform to specification 105J when transporting ethylene oxide.) Requiring a specification 105J tank car would mean that existing specification 105 tank cars would have to be retrofitted with high temperature thermal protection, tank head protection, and large safety valves by December 31, 1986 if they are to continue in ethylene oxide service.

It is also proposed to amend paragraph (a)(5) to require that each specification 111 tank car, with a capacity in excess of 18,500 U.S. gallons, conform to specification 111J when transporting ethylene oxide after December 31, 1986. Thus, each existing specification 111 tank car would have to be retrofitted with high temperature thermal protection, tank head protection, and large safety valves by December 31, 1986 in order to continue to carry ethylene oxide.

Section 173.314 Requirements for compressed gases in tank cars.

It is proposed to amend this section to require that existing DOT specification 105 tank cars (those built prior to September 1, 1981) used to transport anhydrous ammonia, and with a capacity exceeding 18,500 U.S. gallons capacity, be retrofitted by December 31, 1986 with lower tank head protection, *i.e.*, conform to specification 105S. It is further proposed that existing specification 105 tank cars with a capacity exceeding 18,500 U.S. gallons, used to transport flammable gases, be retrofitted with thermal protection, head protection, and large safety valves by December 31, 1986, *i.e.*, conform to specification 105J. It is also proposed to require that each specification 111 tank car with a capacity exceeding 18,500 U.S. gallons, used to transport flammable gases, shall conform to specification 111J.

Section 179.102–12 Ethylene oxide.

It is proposed to amend this section to require that existing specification 105 tank cars (built prior to September 1, 1981 and with a capacity exceeding 18,500 gallons) used to transport ethylene oxide be retrofitted with high temperature thermal protection, tank head protection, and large safety valves by December 31, 1986 if they are to continue in ethylene oxide service.

Section 179.105–7 Safety relief valves.

It is proposed to add a new paragraph (c) which would allow the use of smaller safety valves if the thermal protection exceeds the minimum thermal protection required in § 179.105–4.

Section 179.106–1 General.

It is proposed to amend this section by requiring that existing specification 105 tank cars manufactured to the specifications of the Canadian Transport Commission conform to the same standards prescribed for DOT specification 105 tank cars.

Section 179.106–3 Previously built cars.

It is proposed to amend this section by establishing performance requirements for specification 105S and 105J tank cars build before September 1, 1981. The proposed requirements for the 105S and the 105J tank cars in this section are identical to the requirements in § 179.106–2 for new cars.

Section 179.200–27 Alternative requirements for tank head puncture resistance systems.

It is proposed to add this section to clarify that specification 111 tank cars may utilize a head shield as prescribed in § 179.100–23 instead of meeting the puncture resistance requirements in § 179.105–5.

Section 179.202–18 Ethylene oxide.

It is proposed to add a new paragraph (a) (10) in § 179.202–18 to require that each specification 111 tank car used after Decembeer 31, 1986 for the

transportation of ethylene oxide, with a capacity exceeding 18,500 U.S. gallons, conform to class 111J.

Section 179.203 Special requirements for specification 111 tank cars.

It is proposed to add a new section setting out special requirements for specification 111 tank cars that is parallel to § 179.106 for specification 105 tank cars.

Economic Impact

MTB has determined this proposed rule is not a "major rule" under the terms of Executive Order 12291, but it is "significant" under DOT procedures (44 FR 11034). A regulatory evaluation and environmental assessment is available in the Docket at the address shown above. Based on the comments received in response to the ANPRM and the information contained in the regulatory evaluation, I certify that this proposal will not have a significant economic impact on a substantial number of small entities under the provisions of the Regulatory Flexibility Act.

List of Subjects in 49 CFR Parts 173 and 179

Railroad safety, Hazardous materials transportation.

In consideration of the foregoing proposed rule, Parts 173 and 179 of Title 49 Code of Federal Regulations would be amended as follows:

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

1. In § 173.124, paragraph (a) (5) would be amended by adding paragraph (iii) and (iv) to read as follows:

§ 173.124 Ethylene oxide.

(a) * * *

(5) * * *

(iii) After December 31, 1986, each specification 105 tank car built before September 1, 1981, and with a water capacity (shell full volume, including manways) exceeding 18,500 U.S. gallons, used for the transportation of ethylene oxide, shall conform to specification 105J.

(iv) After December 31, 1986, each specification 111 tank car with a water capacity (shell full volume, including manways) exceeding 18,500 U.S. gallons, used for the transportation of ethylene oxide, shall conform to DOT specification 111J.

* * * * *

2. In § 173.314, notes 23 and 24 to the table in paragraph (c) would be revised to read as follows:

§ 173.314 Requirements for compressed gases in tank cars.

* * * * *

(c) * * *

Note 23.—Each specification 105 tank car built after August 31, 1981, shall conform to class DOT–105J. After December 31, 1986, each specification 105 tank car build before September 1, 1981, and with a water capacity (shell full volume, including manways) exceeding 18,500 U.S. gallons shall conform to class DOT–105J. After December 31, 1986, each specification 111 tank car with a water capacity (shell full volume, including manways) exceeding 18,500 U.S. gallons shall conform to class DOT–111J.

Note 24.—Each specification 105 tank car build after August 31, 1981, shall conform to class DOT–105S. After December 31, 1986, each specification 105 tank car build before September 1, 1981, and with a water capacity (shell full volume including manways) exceeding 18,500 U.S gallons, shall conform to class DOT–105S

* * * * *

PART 179—SPECIFICATIONS FOR TANK CARS

3. In § 179.102–12, paragraph (a) (10) would be added to read as follows:

§ 179.102–12 Ethylene oxide.

(a) * * *

(10) After December 31, 1986, each tank built before September 1, 1981, and with a water capacity (shell full volume, including manways) exceeding 18,500 U.S. gallons, used for the transportation of ethylene oxide, shall conform to class DOT–105J.

4. In § 179.105–7, paragraph (c) would be added to read as follows:

§ 179.105–7 Safety relief valves.

* * * * *

(c) Notwithstanding paragraph (a) of this section, § 179.100–15, and § 179.102–11, the relieving or discharge capacity of a specification 105 or 111 tank car built before (the effective date of the final rule) and with a manway cover having a dimension or diameter of less than 18 inches may be calculated in accordance with the formula prescribed in AAR Specifications for Tank Cars, Section A 8.02, of Appendix A applicable to compressed gases in insulated tanks, if—

(1) The tank car is equipped with a thermal protection system in accordance with § 179.105–4; and

(2) in all of the three consecutive simulation pool fire tests required by paragraph (d) of § 179.105–4, none of the thermocouples on the uninsulated side of the steel plate indicates a plate temperature in excess of 540°F.

5. In § 179.106–1, paragraph (e) would be added to read as follows:

§ 179.106–1 General.

* * * * *

(e) Notwithstanding the provisions of § 173.8 of this subchapter, no specification 105 tank car manufactured before September 1, 1981 to specifications promulgated by the Canadian Transport Commission and with a water capacity (shell full volume, including manways) exceeding 18,500 U.S. gallons, may be used after December 31, 1986 to transport hazardous materials unless it is equipped in accordance with § 179.106–3.

6. Section 179.106–3 would be revised to read as follows:

§ 179.106–3 Previously built cars.

(a) Each specification 105A tank car built before March 1, 1981, shall be equipped with a coupler restraint system that meets the requirements of § 179.105–6.

(b) Each specification 105S tank car built before September 1, 1981, shall be equipped with:

(1) A coupler restraint system that meets the requirements of § 179.105–6; and

(2) A tank head puncture resistance system that meets the requirements of § 179.105–5.

(c) Each specification 105J tank car built before September 1, 1981, shall be equipped with:

(1) A coupler restraint system that meets the requirements of § 179.105–6;

(2) A thermal protection stystem that meets the requirements of § 179.105–4;

(3) A safety relief valve that meets the requirements of § 179.105–7; and

(4) A tank head puncture resistance system that meets the requirements of § 179.105–5.

7. Section § 179.200–27 would be added to read as follows:

§ 179.200–27 Alternative requirements for tank head puncture resistance systems.

Tank cars required to have puncture resistance systems in accordance with § 179.105–5 may, as an alternative, be equipped with a head shield, at the end of each car in accordance with a head shield at the end of each car in accordance with the requirements of § 179.100–23.

8. In § 179.202–18, paragraph (a)(10) would be added to read as follows:

§ 179.202–18 Ethylene oxide.

(a) * * *

(10) After December 31, 1986, each tank built with a water capacity (shell full volume, including manways) exceeding 18,500 U.S. gallons shall conform to class DOT–111J.

9. Section 179.203 would be added to read as follows:

§ 179.203 Special requirements for specification 111 tank cars.

§ 179.203–1 General.

(a) In addition to the requirements of this section, each tank car built under specification 111 shall meet the applicable requirements of §§179.200, 179.201, and 179.202.

(b) Notwithstanding the provisions of §§ 179.3, 179.4, and 179.6, AAR approval is not required for changes in or additions to specification 111 tank cars in order to comply with this section.

(c) Notwithstanding the provisions of § 173.8 of this subchapter, no specification 111 tank car manufactured to specifications promulgated by the Canadian Transport Commission may be used after February 28, 1985, to transport hazardous materials in the United States unless it is equipped with a coupler vertical restraint system that meets the requirements of § 179.105–6.

(d) Notwithstanding the provisions of § 173.8 of this subchapter, no specification 111 tank car manufactured before October 1, 1981 to specifications promulgated by the Canadian Transport Commission and with a water capacity (shell full volume, including manways) exceeding 18,500 U.S. gallons, may be used after December 31, 1986 to transport flammable gases or ethylene oxide unless it is equipped in accordance with § 179.203–2.

§ 179.203–2 Previously built cars.

(a) Each specification 111J tank car built before (the effective date of the final rule) shall be equipped with:

(1) A coupler vertical restraint system that meets the requirements of §179.105–6;

(2) A thermal protection system that meets the requirements of § 179.105–4;

(3) A safety relief valve that meets the requirements of § 179.105–7; and

(4) A tank head puncture resistance system that meets the requirements of § 179.105–5.

§ 179.203–3 Stenciling.

Each specification 111 tank car built before (the effective date of the final rule) that is equipped as prescribed in § 179.203–2(a) shall be stenciled by having the letter "J" substituted for the letter "A" in the specification marking.

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53, Appendix A to Part 1 and paragraph (a)(4) of Appendix A to Part 106)

Issued in Washington, D.C. on March 30, 1983.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.

Part IV

Department of Transportation

Office of the Secretary

Acquisition for Federal and Federally-Assisted Programs

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 25

[OST Docket No. 79; Notice No. 83-11]

Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970; Acquisition for Federal and Federally-Assisted Programs

AGENCY: Department of Transportation, Office of the Secretary.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed regulation would establish uniform cost-effective policies and procedures governing the implementation of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act (42 U.S.C. 4601) for all programs within the Department of Transportation (DOT). The DOT is publishing this proposed regulation at the request of the Office of Management and Budget (OMB). Upon issuance, these regulations will serve as the basis for a uniform regulation issued by each Federal agency covered by the Act.

DATES: Comments must be received by the Department on or before May 31, 1983.

ADDRESSES: Comments should be submitted to Docket Clerk, OST Docket No. 79, Department of Transportation, 400 7th Street, SW., Room 10241, Washington, D.C., 20590. Commentors wishing to have their submissions acknowledged should include a stamped, self-addressed postcard with their comments. Comments will be available for review at the above address from 9:00 a.m. to 3:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne Kennedy, Director, Office of Right-of-Way (202-426-0342); Mr. Reid Alsop, Office of the Chief Counsel (202-426-0800); Ms. Martha Schwendeman Curin, Office of Economics, OST, (202-426-4492); or Ms. Lynne Adams-Whitaker, Office of General Counsel (202-426-4723); Federal Highway Administration, 400 7th Street, SW., Washington, D.C. 20590. Office hours Monday through Friday from 7:45 a.m. to 4:15 p.m., ET.

SUPPLEMENTARY INFORMATION: To promote the uniform and effective administration of Federal and Federally-assisted relocation assistance and real property acquisition, the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 authorizes and directs the heads of Federal agencies to consult together on the establishment of regulations and procedures for the administration of such programs.

In May 1982, the office of Management and Budget formed a Uniform Act Interagency Regulatory Review Working Group to review existing Federal agency regulations which implement the Uniform Act, and to develop recommendations for uniform regulations to be issued by each covered agency to implement the Act. This was done in response to concerns expressed by States and local governments through the President's Task Force on Regulatory Relief. This effort was also influenced by a report from the Comptorller General to the Congress dated March 6, 1978, entitled *Changes Needed in the Relocation Act to Achieve More Uniform Treatment of Persons Displaced by Federal Programs.*

In this report, the Comptroller General indicated that "* * * GAO found an inconsistent, inequitable, and confusing array of differing formats, terminologies, and guidelines in 13 Federal agencies' regulations resulting in people being treated differently when displaced by these agencies." Among the several recommendations made is one for a single set of Federal regulations to implement the Uniform Act.

Legislative proposals subsequently introduced in the Congress have called for a single Government-Wide Uniform Act regulation to improve consistency of treatment of affected property owners and displaced persons, and to ease existing administrative burdens. The most recent is S. 2363 which passed the Senate during the 97th Session of Congress (see Senate Report 97-487). None of the proposals, however, has been enacted into law.

In addition to the Working Group, the OMB also established a policy-level Interagency Regulatory Review Steering Group. The Steering Group and the Working Group, both chaired by OMB, included representatives from the Department of Housing and Urban Development, Department of Transportation, Department of Interior, and Department of the Army (Corps of Engineers), and the Environmental Protection Agency served on the Working Group.

The Working Group found that there are 21 separate Federal regulations (including those of the Postal Service, and the Navajo and Hopi Indian Relocation Commission) implementing the Uniform Act currently in the Code of Federal Regulations. The differences in these regulations have resulted in inconsistencies and inequities in the treatment of affected property owners and displaced persons, as well as costly and unnecessary administrative burdens on States and local governments.

Following its review of the Working Group's recommendations, the policy-level Steering Group recommended that this proposed regulation be published for public comment by a single agency, the Department of Transportation is doing so at the request of the Office of Management and Budget. The final regulation will serve as the DOT regulation implementing the Uniform Act. Following issuance of the final DOT regulation, all other Federal agencies charged with implementing the Act (identified later in this discussion) will be requested to review and analyze their own regulations based on the DOT regulation and make appropriate changes through notice and comment rulemaking.

At the present time, the responsibility to coordinate the implementation of the Uniform Act, and to chair the Relocation Assistance Implementation Committee (RAIC) established in 1971 is vested in the General Services Administration by the President's memorandum of September 6, 1973. Government-wide regulations to implement the Uniform Act, were issued by the General Services Administration, at 41 CFR 101-6.1. However, the RAIC has not been active in recent years, and OMB is providing the leadership for this current effort in connection with the President's Task Force and Regulatory Relief.

A description of significant features of the proposed regulation follows. As previously stated, it is intended that this regulation will first be promulgated as a DOT regulation, and eventually serve as a model for all other affected agencies. Comments submitted will be reviewed by the Interagency Working Group under the leadership of OMB. The ultimate goal is to eliminate the present inconsistencies in the treatment of persons whose property is acquired for a Federal or a Federally-assisted project and persons displaced for such a project and treat all such persons equally. This proposed regulation would be applicable to both direct Federal programs and projects and to Federally-assisted programs and projects undertaken by State and local government. The proposed regulation would also simplify existing policies and procedures, and reduce costs, and the administrative burdens presently imposed on State and local government agencies which must now carry out the Uniform Act requirements under the 21 separate regulations of different Federal agencies. Furthermore, this proposed rule would increase the latitude of State and local

government agencies in carrying out the policies set forth in the Uniform Act.

Scope of Acquisition Regulations

Sections 25.101(a) and (b) indicate the scope of the real property acquisition policies and procedures at Subpart B. The Uniform Act and the regulations at Subpart B apply to the acquisition of real property by a State, city, or other State agency for a Federally-assisted program or project. In such cases, it does not matter whether the Federal financial assistance was used to fund the acquisition of the property. The acquisition of real property includes the acquisition of a life estate, a long-term lease, as easement, or other less-than-fee interest in real property. However, this Subpart does not apply to voluntary acquisition not under the threat of eminent domain, where the owner is informed in advance that the property would not be acquired if an amicable agreement is not reached.

Section 25.101(c) provides that, for projects carried out by States and State agencies with Federal financial assistance, §§ 1125.102, 25.103, 25.104, and 25.105 of the regulations would apply to the extent practicable under the laws of the applicable State. Exceptions to compliance would be addressed in the agency's assurances of compliance made pursuant to Section 305 of the Uniform Act and §§25.3(a) of this proposed rule.

Offer of Just Compensation

Section 25.102(d) would require an agency to establish and promptly offer the full amount it believes to be just compensation for property. The offer must be in writing and may not be less than the amount of the agency's approved appraisal. The offer may exceed the amount of the approved appraisal if, in the judgment of agency officials, the higher offer reflects just compensation for the property.

Administrative Settlements

Section 25.102(i) addresses those situations where an agency should consider a compromise settlement with the owner as an alternative to instituting condemnation action. Judicial resolution of a value question is time-consuming and expensive for both the property owner and the agency. It should be reserved for matters of substance and importance, such as when the dollar differences are substantial or an important principle or precedent is involved in order to minimize litigation costs and to limit court caseloads. Nonjudicial settlements are advocated when it is reasonable, prudent, and in the public interest to do so. Administrative settlements require a written justification.

It is intended that administrative settlements be negotiated, reviewed, and approved by program officials. Appraisers, including review appraisers, must not be requested to adjust their fair market value estimates for the purpose of justifying a settlement. Such a change by an appraiser would invalidate the appraisal process.

Uneconomic Remnants

Section 25.102(k) would govern the acquisition of uneconomic remnants. An uneconomic remnant is "a remaining part of property in which the owner is left with an interest that the agency determines has little or no utility or value to the owner." If a remainder has either little utility *or* little value to an owner, it must be considered an uneconomic remnant and the agency must offer to purchase it. Thus, the agency would assume the risk of financial loss from a sale of a remnant to a third party.

Rent to Former Occupant After Acquisition

Under § 25.102(m), the rental rate charged to a former owner or tenant for the use of property between the date of acquisition and the date of displacement would not exceed either the fair rental value to a short-term occupier, or the market rent, whichever is less. Short-term rental rates are often higher than longer term rates. It is the intent of the Congress that former tenants and owners be protected from excessive and possibly coercive rental rates.

Appraisal Standards

Section 25.103(b) sets forth certain nationally recognized standards for the appraisal of complex or high value properties to be acquired for a project subject to the Uniform Act. However, since it is intended that the content of an appraisal be commensurate with the complexity of the appraisal assignment, agencies would be permitted to follow lesser standards in the appraisal of low value properties which do not involve complex valuation requirements. This flexible standard is expected to reduce appraisal costs for agencies while ensuring that the rights of property owners to receive just compensation are fully protected. Since most acquisitions are rather straight forward appraisal problems, this approach would provide flexibility to the acquiring agencies to use less detailed appraisals on the bulk of their acquisitions, and assure a consistently high standard for the expensive and difficult cases.

Section 25.103(b)(3) would permit an agency to base its determinations of just compensation on appraisals which do not include value estimates through the "cost approach" or "income approach" if sufficient comparable sales are available to justify a valuation estimate solely on the basis of the "market data approach." This provision should also produce measurable cost savings for agencies.

Section 25.103(f) would prohibit anyone from serving as the agency's appraiser of a property in which the person has a direct or indirect interest that would in any way conflict with his or her performance of the appraisal. No agency appraiser may represent the agency or the owner in the negotiation of the acquisition price to be paid for the property.

Donations

Section 25.103 permits an agency to accept a donation of real property after informing the owner of his or her right to receive just compensation. If the owner wished to be informed of the value of the property, based on an appraisal, the agency would be required to comply before it could proceed with the acquisition.

Comparable Replacement Dwelling

Section 25.10(c) would require that a comparable replacement dwelling be "functionally equivalent" to the displacement dwelling. This means that, while the replacement dwelling need not be identical to the displacement dwelling in terms of the amenities it provides, it should be generally the same in order to be comparable.

Financial Means Test

Section 205(c)(3) of the Uniform Act precludes the displacement of any person from a dwelling until at least one comparable replacement dwelling has been made available to the person. In order to assure successful relocation, Section 205(c)(3) of the Act also requires that a comparable replacement dwelling must be within a person's financial means.

Section 25.10(c)(6) sets forth a proposed test for determining whether a replacement dwelling is within a person's financial means. Since this test is one of the most significant policy issues to be resolved in establishing a model regulation, special attention is invited to this proposal.

The financial means test proposed at § 25.10(c)(6) reflects a view that the monthly housing cost of a person after displacement should not exceed the amount the person paid prior to

displacement. This view is sometimes referred to as the "make whole" standard.

Under this proposal, a replacement dwelling purchased by a 180-day homeowner would be considered to be within the homeowner's financial means if he or she was reimbursed for: (1) The entire increase, if any, between the price paid for the displacement dwelling and the purchase price of a replacement dwelling (as described at § 25.401(c)), (2) the present worth of any increased mortgage interest costs (as described at § 25.401(d)), and (3) any incidental expenses incurred in purchasing a replacement dwelling (as described at § 25.401(e)).

A replacement dwelling for a person who rents shall be considered to be within his or her financial means if the monthly rent at the replacement dwelling does not exceed the monthly rent at the displacement dwelling. Of course, if the cost of any utility services is included in either rent, an appropriate adjustment must be made to ensure that like circumstances are compared.

As described earlier, if available replacement dwellings are too costly to be within a person's financial means, the displacing agency may not require the person to move unless it provides additional assistance that will bring the cost of appropriate replacement housing within the person's financial means. Such additional assistance may be provided through implementation of the last resort housing provisions at Subpart G of this rule.

Initiation of Negotiations

Unless otherwise specified by regulation, the term "initiation of negotiations" (defined at § 25.10(j)) means the delivery of the initial written offer by the agency to the owner of real property to purchase the property for the amount determined to be just compensation. The "initiation of negotiations" is a very significant action because it triggers relocation eligibility for the occupants of the property. Therefore, to ensure fair treatment of those affected, the "initiation of negotiations" for a person who moves after the agency issues its notice of intent to acquire the real property, but before it delivers the initial purchase offer, has been defined to be the person's actual move from the property.

Relocation Analysis

Section 25.202 requires the agency to develop a "relocation analysis." Relocation analysis refers to the process by which the displacing agency identifies a project's anticipated relocation needs (for replacement housing, relocation payments, assistance to displaced persons) and develops a program to satisfy those needs. This process is not intended to be an additional requirement for displacing agencies, but it is viewed as a necessary part of an effective system of good project management. Federal funding agencies will not review an agency's relocation analysis as a prerequisite to approving a project. However, the relocation analysis should be in sufficient depth to assure that comparable replacement dwellings will be available to all displaced persons. This analysis would provide the data on which the displacing agency's assurances of compliance are based.

Notice of Relocation Eligibility

The notice of relocation eligibility described at § 25.203 serves two distinct functions. First, it informs particular persons that they will be displaced by a Federal or Federally-assisted project. Second, it provides those persons with information about their rights and the assistance available to them in connection with their displacement as well as about the conditions they must satisfy in order to receive that assistance. This notice is not a notice to vacate by a designated date, however, after the initiation of negotiations, persons who have received a notice of relocation eligibility are eligible for relocation assistance as specified under this Part.

Availability of Comparable Replacement Dwellings Before Displacement

Section 25.204 of the proposed rule implements the requirement at section 205(c)(3) of the Uniform Act that no person shall be required to move permanently from his or her dwelling, unless at least one comparable replacement dwelling has been made available to the person. Whenever possible, a reasonable choice of comparable replacement dwellings shall be offered to the person.

This requirement implements the most basic principle of the Uniform Act. It can be waived only under certain emergency conditions. Reasonable safeguards to ensure appropriate assistance to any person required to make an emergency move are set forth at §25.204(c).

Relocation Assistance Advisory Services

Section 25.205 explains the services a displacing agency must make available to assist persons displaced by a Federal or Federally-assisted project. Relocation assistance advisory services are often crucial to a successful move. Displacing agencies are expected to provide those services which are necessary to accomplish that end. This includes services directly related to the move (e.g., housing referrals or transportation assistance) and less directly related services such as social service referrals.

One of the services a displacing agency must provide is inspection of the replacement dwelling. It is perferable that the inspection be done before the displaced person visits the dwelling, especially when the agency has referred the displaced person to the dwelling. However, this sometimes is not possible. In those instances, a displaced person might choose a replacement dwelling which was not decent, safe, and sanitary and, therefore, inadvertently lose his eligibility for a replacement housing payment. To avoid this outcome, a displacing agency must remain in close contact with persons it expects to displace and must inform those persons that they cannot receive a replacement housing payment unless their replacement dwelling is decent, safe, and sanitary.

Ninety-Day Notice

The requirement for a 90-day notice (see § 25.206) is frequently misunderstood. Even though this notice often is combined with a notice to vacate, a 90-day notice is not itself a notice to vacate. On the contrary, it protects persons who are expected to be displaced by assuring them that the earliest date by which they might have to move is at least 90 days away.

Section 25.206 provides additional protections to persons to be displaced. For example, the 90-day notice may not be issued by the agency until these persons have received a notice of relocation eligibility providing information about their rights, benefits, and responsibilities under this Part. Most importantly, the 90-day notice may not be issued until the displacing agency has made available to each person expected to be displaced at least one comparable replacement dwelling. Thus, no one will receive a 90-day notice unless a comparable replacement dwelling is available to the person and he or she has 90 days to find an alternate replacement dwelling.

Relocation Payments Not Considered as Income

Relocation payments under the Act either provide compensation for costs imposed on persons by a Federal or Federally-assisted project or assist such persons to relocate to decent, safe, and sanitary housing. For this reason, as described at § 25.209, relocation

payments shall not be considered as income for the purpose of other Federal law. Thus, Federal, State, or local governments may not count such payments when making eligibility determinations concerning Social Security, welfare payments, food stamps, or any other Federal law. Similarly, relocation payments are not considered as income under the Internal Revenue Code.

Moving and Related Expenses

Sections 25.301 and 25.303 describe the moving and related expenses for which a person is entitled to reimbursement if the person elects to submit a claim for the actual cost of his or her move. As an alternative certain persons may choose to submit a claim for a fixed payment under § 25.302 and § 25.304 rather than a claim for actual reasonable expenses.

Attention is invited to two policies which have in the past been a source of Federal agency differences in the interpretation of the Uniform Act. One of these policies is set forth at § 25.303(a)(11) and is sometimes referred to as the "substitute equipment" rule. Under this policy a person owning a business may choose not to relocate an item of personal property, but rather replace it at the replacement site with a substitute item that performs a comparable function, and be compensated accordingly. In such a case, compensation will be based on the cost of the substitute item, minus any proceeds from the sale of the replaced item. However, in no case may the person be paid an amount greater than it would have cost to move and reinstall the replaced item.

The second moving expense policy to which attention is invited has often been referred to as the "physical change" rule. Under that policy a displacing agency was sometimes required to reimburse a business for the cost of adding space or restructuring available space at the replacement location of the business in order to accommodate machinery and equipment to be moved from the displacement location. Under the proposed rule, a business would not be eligible for reimbursement of such expenses.

Section 25.303(a)(12) describes those expenses incurred by a businessperson in searching for a replacement location which may be reimbursed by the agency. Federal agencies currently limit these payments to $500. The proposed rule would raise this limit to $1,000 per displacement in order to reflect the increased cost of hotel/motel accommodations, transportation, food, and other items.

Section 25.304 contains requirements for fixed moving expense payments for businesses and farm operations. These payments may be made in place of payments for actual expenses, but they involve special requirements. One of these requirements is that a business or nonprofit organization must suffer a substantial loss of its existing patronage. The term "existing patronage" often is a source of confusion. For purposes of these regulations, it means the actual, specific clientele of a business or a nonprofit organization. If a substantial number of the clientele is unlikely to patronize the business or nonprofit organization at the new location, the requirement is met—without regard to whether new clients will replace them. Businesses and nonprofit organizations are assumed to meet this requirement unless the agency demonstrates otherwise.

Replacement Housing Payments for 180-day Homeowners

Section 25.401(a) clarifies he occupancy requirement for 180-day homeowners. In order to be eligible for a replacement housing payment for 180-day homeowner-occupants, a displaced person must have occupied a displacement dwelling for the 180 days immediately before the initiation of negotiations. While most Federal displacing agencies have followed this policy, their regulations often did not explicitly state that the occupancy period had to be the 180 days immediately preceding the initiation of negotiations.

If a displaced person does not meet the occupancy requirement explained above solely due to circumstances such as a hospital stay, military reserve duty, or other temporary absence from his dwelling, he shall be considered to be in "constructive occupancy" of his dwelling and, therefore, to meet the 180-day requirement.

Rental Assistance Payments

Section 25.402(b) describes the method for computing rental assistance payments under Section 204(1) of the Uniform Act. The formula is designed to provide a person with the cash assistance that will enable him or her to afford to pay the rent and utility costs at a replacement dwelling for a 4-year period. The level of cash assistance needed each month would be the greater of the following amounts:

(1) The amount obtained by substracting the monthly housing cost at the displacement dwelling from the monthly housing cost at a replacement dwelling.

(2) The amount obtained by subtracting 30 percent of the person's income from the monthly housing cost at a replacement dwelling.

Thus, a tenant who is paying less than 30 percent of his or her gross income for rent and utilities at the displacement dwelling would receive a payment based on the difference between the monthly cost for rent and utilities at the displacement dwelling and the monthly cost for rent and estimated utility charges at a replacement dwelling.

For a tenant who is paying more than 30 percent of his or her gross income for rent and utilities at the displacement dwelling, the payment would be based on the difference between 30 percent of his or her gross monthly income and the monthly cost for rent and estimated utility charges at a replacement dwelling. This aspect of the formula assures a reasonable level of assistance to low and moderate income persons who have been paying a disproportionately large share of their income for rent and utilities at their displacement dwellings.

Under the formula, the person's monthly level of need is multiplied by 48 and that amount, or $4,000, whichever is less, is paid to the person in a lump sum, unless the agency determines that the payment should be made in installments. (A determination to make a payment in installments may only be made on a case-by-case basis for good cause.)

The formula for computing rental assistance payments is a very significant feature of the proposed rule. At present most rental assistance payments are computed under a formula similar to the one at § 25.402(b) of the proposed rule (although monthly housing cost is now compared with 25 percent of the displaced person's income, rather than 30 percent). It has been suggested, however, that the payment formula should be simplified by excluding any consideration of the person's income (i.e., basing payments solely on the "make whole" standard). Another proposal would retain the basic formula at § 25.402(b) but exclude consideration of utility costs. Since either of these alternatives would be a significant change, reader comments as to the most appropriate payment formula is encouraged.

Additional Rules Governing Replacement Housing Payments

Section 25.403(a)(1) indicates that a displacing agency may adjust the asking price of a comparable replacement dwelling for purposes of determining the probable selling price, to be used in

determining the amount of a replacement housing payment. In many cases, the asking price does not reflect the market value of a dwelling, but rather represents the seller's bargaining position for purposes of negotiation. When this is the case, the agency may make an adjustment if it determines that such action is appropriate. The agency shall document the basis for these determinations.

Section 25.403(a)(2) states "If the site of the comparable replacement dwelling lacks a major attribute of the displacement dwelling site * * * the value of such attribute shall be subtracted from the purchase price of the displacement dwelling for purposes of computing the payment." Since the major component of the replacement housing payment is determined by the difference between the prices of a replacement dwelling and the displacement dwelling, it is important that the agency compare like dwellings. Subtracting the value of major displacement dwelling attributes which a comparable replacement dwelling lacks is designed to make the dwellings as "alike" as possible.

Mobile Homes

Subpart F sets forth requirements governing the provision of moving expenses and replacement housing payments for a person displaced from a mobile home or a moble home site. Eligibility for a replacement housing payment is based on the length of time a person owned or rented the mobile home and occupied it on the displacement site.

The present rules of Federal agencies differ as to the policies to be applied when a displaced mobile home occupant owned the displacement mobile home but rented the displacement site, or rented the displacement mobile home but owned the displacement site. Differences also arise with respect to a displaced person who purchases a replacement mobile home but rents the replacement site, or rents a replacement mobile home but purchases the site. Under the proposed rule such a person would be eligible to receive a replacement housing payment that combines a payment for the mobile home with a payment for the mobile home site. Each such payment would be computed under the applicable section(s) § 25.401 and/or § 25.402). However, the total replacement housing payment to a person would not exceed the maximum payment (either $15,000 or $4,000) permitted under the section that governs the computation for the dwelling.

For example, if a person rented the displacement mobile home and occupied it on a site he or she owned for more than 180 days prior to the initiation of negotiations and, after displacement, the person rented a replacement mobile home on a site which he or she purchased, the person may be eligible for a rental assistance payment computed under § 25.402(b) to help rent the mobile home and a 180-day homeowner payment computed under § 25.401 to help purchase the replacement mobile home site. However, the maximum total replacement housing payment in this case would be $4,000, since the person rented the replacement mobile home and $4,000 is the ceiling on rental assistance payments.

The proposed rule at Subpart F would provide fair, equitable, and uniform relocation assistance to all eligible displaced mobile home occupants.

Last Resort Housing

Subpart G sets forth policies and procedures that maximize the flexibility of displacing agencies seeking to provide housing of last resort (Section 206 of the Uniform Act).

To provide displacing agencies with full authority to design and implement last resort housing measures according to their own needs, Subpart G would remove all unnecessary existing requirements.

It would remove the present requirement that an agency must, in every case where it contemplates the possible need for last resort housing, conduct an inventory of housing in the locality, analyze the housing inventory data, and prepare a lengthy replacement housing plan.

The proposed rule would also eliminate the requirement that a displacing agency must establish an advisory committee to consult with, advise, and assist the displacing agency in its development of a replacement housing plan in any case where 26 or more units of last resort replacement housing are needed.

In addition, the proposed rule would remove the explicit direction that a replacement housing plan under the last resort housing procedure must be submitted for review to HUD or the Farmers Home Administration (FmHA) and must be submitted to the Regional and State Clearinghouses.

Regulations Affected

It is anticipated that existing Uniform Act Government-wide regulations, including the General Services Administration guidelines at 41 CFR Part 101–6, as well as the Department of Housing and Urban Development Government-wide regulation at 24 CFR Part 43 (issued and made applicable Government-wide pursuant to a January 4, 1971, Presidential memorandum, and concerning last resort housing and seed money loans) those of the following Federal agencies will be reviewed and analyzed in the context of these DOT model regulations.

7 CFR Part 21 (Department of Agriculture)
24 CFR Part 15 (Department of Education)
45 CFR Part 15 (Department of Health and Human Services)
24 CFR Part 42 (Department of Housing and Urban Development)
41 CFR Part 114–50 (Department of Interior)
41 CFR Part 128–18.5001 *et seq.* (Department of Justice)
29 CFR Part 12 (Department of Labor)
49 CFR Part 25 (Department of Transportation)
32 CFR Part 641 (Department of Army)
32 CFR Part 742 (Department of Navy)
7 CFR Part 652 (Soil Conservation Service)
13 CFR Part 310 (Economic Development Administration)
15 CFR Part 916 (National Oceanic and Atmospheric Administration)
23 CFR Part 712 and 740 (Federal Highway Administration)
40 CFR Part 4 (Environmental Protection Agency)
41 CFR Part 101–18 (General Services Administration)
38 CFR Part 25 (Veterans Administration)
39 CFR Part 777 (Postal Service)
18 CFR Part 1306 (Tennessee Valley Authority)
36 CFR Part 904 (Pennsylvania Avenue Development Corporation)

Regulatory Evaluation

Initially the adoption of this proposed rule would result in relatively insignificant costs and benefits since it would only involve the revision of DOT's existing relocation regulation. However, after the proposed regulation is adopted by other affected Federal agencies, there would be significant benefits to State and local governments that undertake Federally-assisted projects since they would no longer have to follow differing Federal regulations in implementing the Uniform Act. The only cost that affected State and local governments would incur would be the slight cost of adjusting their operating procedures to comply with a single Federal regulation that would apply on all Federally-assisted projects.

The benefits to State and local governments would result from the anticipated simplification of the Federal regulatory scheme and the consequent reductions in administrative costs. It has not been possible to accurately estimate the total cost savings that this will produce for the many affected State and local governmental agencies, however, representative agencies and organizations of affected agencies have clearly indicated that adoption of a single Federal regulation would result in some reduction in their administrative costs.

The Department has determined that this NPRM does not constitute a major rule under the criteria of Executive Order 12291. It will have no significant economic impacts. It will merely simplify and clarify current Department of Transportation regulations that implement the Uniform Act, and will eventually, when adopted by other agencies operating under the Uniform Act, reduce administrative costs and burdens on State and local governmental agencies that must comply with the Uniform Act on Federally assisted projects.

Under the criteria of the Regulatory Flexibility Act, it is certified that this action, if promulgated, will not have a significant economic impact on a substantial number of small entities, since there will be no significant effect on the relocation benefits provided to businesses, as the provisions of the Uniform Act which require those benefits have not been changed, and the economic impact on State and local agencies that are subject to the Uniform Act is not expected to be significant. The primary impact on such agencies would be the eventual elimination of current administrative burdens caused by differing or conflicting Federal regulations that implement the Uniform Act. As Federal agencies eliminate separate regulations implementing the Uniform Act and adopt a single Government-wide, such burdens will be reduced.

It does not impose information collection or reporting requirements beyond those contained in the current regulation. It is not considered a significant rule under the Department's Regulatory Policies and Procedures. Comments are specifically requested on the impact of this proposed rule on small entities and on the estimated costs of the proposed regulation.

List of Subparts in 49 CFR Part 25

Transportation, Relocation and real property acquisition.

Issued at Washington, D.C., on April 8, 1983.

Elizabeth Hanford Dole,

Secretary of Transportation.

For the reasons set forth in the preamble, the Department of Transportation proposes to amend Part 25 of Title 49, Code of Federal Regulations to read as follows:

PART 25—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY-ASSISTED PROGRAMS

Subpart A—General

Sec.

25.1 Purpose.
25.2 No duplication of payments.
25.3 Assurances, monitoring and corrective action.
25.4 Manner of notices.
25.5 Administration of jointly funded projects.
25.6 Federal agency waiver of regulations.
25.7 Compliance with other laws and regulations.
25.8 Recordkeeping and reports.
25.9 Appeals.
25.10 Definitions.

Subpart B—Real Property Acquisition

25.101 Applicability of acquisition requirements.
25.102 Basic acquisition policies.
25.103 Criteria for appraisals.
25.104 Review of appraisals.
25.105 Acquisition of tenant-owned improvements.
25.106 Expenses incidental to transfer of title to the Agency.
25.107 Certain litigation expenses.
25.108 Donations.

Subpart C—General Relocation Requirements

25.201 Purpose and applicability.
25.202 Relocation analysis.
25.203 Notice of relocation eligibility.
25.204 Availability of comparable replacement dwellings prior to displacement.
25.205 Relocation assistance advisory services.
25.206 Ninety-day notice.
25.207 Eviction for cause.
25.208 General requirements—claims for relocation payments.
25.209 Relocation payments not considered as income.

Subpart D—Payments for Moving and Related Expenses

25.301 Payment for actual reasonable moving and related expenses—residential moves.
25.302 Fixed payment for moving expenses—residential moves.
25.303 Payment for actual reasonable moving and related expenses—nonresidential moves.
25.304 Fixed payment for moving expenses—nonresidential moves.
25.305 Ineligible moving and related expenses.

Subpart E—Replacement Housing Payments

25.401 Replacement housing payments for 180-day homeowner-occupants.
25.402 Replacement housing payments for 90-day occupants.
25.403 Additional rules governing replacement housing payments.

Subpart F—Mobile Homes

25.501 Applicability.
25.502 Moving and related expenses—mobile homes.
25.503 Replacement housing payments for 180-day mobile home owner-occupants.
25.504 Replacement housing payments for 90-day mobile home occupants.
25.505 Additional rules governing relocation payments to mobile home occupants.

Subpart G—Last Resort Housing

25.601 Applicability.
25.602 Methods of providing replacement housing.

Authority—Sec. 213, Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91–646, 84 Stat. 1894 (42 U.S.C. 4601).

Subpart A—General

§ 25.1 Purpose.

The purpose of these regulations is to promulgate rules to implement the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601 et. seq.), in accordance with the following objectives—

(a) To ensure that owners of real property to be acquired for Federal and federally-assisted projects are treated fairly and consistently, to encourage and expedite acquisition by agreements with such owners, to minimize litigation and relieve congestion in the courts, and to promote public confidence in Federal and federally-assisted land acquisition programs; and

(b) To ensure that persons displaced as a result of federal or Federally-assisted projects are treated fairly, consistently, and equitably so that such persons will not suffer disproportionate injuries as a result of projects designed for the benefit of the public as a whole.

§ 25.2 No duplication of payments.

No person shall receive any compensation under these regulations that would have substantially the same purpose or effect as compensation which the person receives under the State law of eminent domain and which is part of the cost of the project.

§ 25.3 Assurances, monitoring and corrective action

(a) *General.* Before a Federal agency may approve any grant to, or contract or

agreement with, a State agency under which Federal financial assistance will be made available for a project which results in real property acquisition or displacement that is subject to the Uniform Act, it must obtain appropriate assurances from the State agency that it will comply with the Uniform Act. The Federal agency will monitor compliance with these regulations and the State agency shall take whatever corrective action is necessary to comply with these regulations. The Federal agency may also apply sanctions in accordance with applicable program regulations.

(b) *Prevention of Fraud, Waste, and Mismanagement.* The Agency shall take appropriate measures to carry out these regulations in a manner that minimizes fraud, waste, and mismanagement. For example, to the extent practicable, functions shall be separated to ensure that the same person does not compute, approve, and deliver a payment to a claimant.

§ 25.4 Manner of notices.

Each notice which the Agency is required to provide to a property owner or occupant under these regulations shall be personally served and documented in Agency files or sent by certified or registered first-class mail, return receipt requested. Each notice shall be written in plain understandable language. Persons who are unable to read and understand the notice must be provided with appropriate translation and counseling. Each notice shall indicate the name and telephone number of a person who may be contacted for answers to questions or other needed help.

§ 25.5 Administration of jointly funded projects.

Whenever two or more Federal agencies provide financial assistance to an Agency or Agencies to carry out functionally or geographically related activities which will result in the acquisition of property or the displacement of a person, the heads of the Federal agencies may by agreement designate one such agency as the cognizant Federal agency, for the purpose of implementing the Uniform Act. At a minimum, the agreement shall set forth the federally-assisted activities which are subject to its terms and cite any policies and procedures, in addition to these regulations, that are applicable to the activities under the agreement. Under the agreement, the cognizant Federal agency shall assure compliance with the provisions of the Uniform Act and these regulations for the project. All assisted activities under the agreement shall be deemed a project for the purposes of these regulations.

§ 25.6 Federal agency waiver of regulations.

The Federal agency financing the project may waive any provision in this part that is not required by law when it is determined that the waiver does not reduce any assistance or protections available to an owner or displaced person under this part. A request for a waiver shall be justified on a case-by-case basis.

§ 25.7 Compliance with other laws and regulations.

The implementation of these regulations shall be in compliance with the following, including any implementing regulations—

(a) Section I of the Civil Rights Act of 1966 (42 U.S.C. 1982 et seq.).

(b) Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.).

(c) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3601 et seq.).

(d) The National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347).

(e) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 790 et seq.).

(f) Executive Order 12250—Leadership and Coordination of Non-Discrimination Laws.

(g) Executive Order 11063—Equal Opportunity and Housing.

(h) Executive Order 11246—Equal Employment Opportunity.

(i) Executive Order 11625—Minority Business Enterprise.

§ 25.8 Recordkeeping and reports.

(a) *Records.* The Agency shall maintain a separate file for each acquisition of real property and each person displaced. These records shall be sufficient to demonstrate compliance with these regulations and shall be retained for at least three years after each owner of the property and each person displaced from the property have received the final payment to which they are entitled under these regulations.

(b) *Confidentiality of Records.* Records maintained by an Agency in accordance with these regulations are confidential and are not to be treated as public information, unless applicable law provides otherwise.

(c) *Reports.* The Agency may be required to submit periodic reports of its real property acquisition and displacement activities under these regulations to the appropriate Federal agency.

§ 25.9 Appeals.

(a) *General.* The Agency shall establish a process for the prompt review of appeals in accordance with the requirements of applicable law and these regulations.

(b) *Actions which may be appealed.* A person may file an appeal with the Agency in any case in which the person believes that the Agency has—(1) Failed to properly determine the person's eligibility for, or the amount of, a payment required under § 25.106 or § 25.107 or a relocation payment required under these regulations. A person may also appeal the refusal of the Agency to waive the time limit for filing a claim or the one-year purchase and occupancy requirement at § 25.402(a)(3); or (2) Failed to provide the person a reasonable opportunity to relocate to a comparable replacement dwelling or to properly inspect the replacement dwelling.

(c) *Time limit for initiating appeal.* The Agency may set a reasonable time limit for a person to file an appeal. For an appeal under paragraph (b)(1) of this section, the time limit shall be not less than 180 days after the person receives notification of the Agency's determination on the person's claim or its refusal to waive the applicable time limit. For an appeal under paragraph (b)(2) of this section, the time limit shall not be less than 180 days after the date of displacement.

(d) *Right to representation.* A person has a right to be represented by legal counsel and to be accompanied by an advisor, attorney or other representative in any personal appearance in connection with his or her appeal, but solely at the person's own expense.

(e) *Review of files by person making appeal.* The Agency shall permit a person to inspect and copy all materials pertinent to his or her appeal, except materials which are confidential. The Agency may, however, impose reasonable conditions on the person's right to inspect, consistent with applicable laws.

(f) *Construction of rules and regulations.* In deciding appeals, it is intended that applicable rules and regulations be applied in a manner that best fulfills the objective of providing "fair and equitable treatment" so that displaced persons do "not suffer disproportionate injuries as a result of programs designed for the benefit of the public as a whole."

(g) *Oral appeal.* If a person asks to make an oral appeal, the person shall be given the opportunity to present the appeal orally to an appropriate Agency official within 15 days from the date of

his request. The Agency shall prepare a summary of the matters discussed in the oral presentation and include it as part of its case file. If the Agency does not grant the full relief requested by the person, it shall so notify the person promptly in writing and state that the person has a right to file a written appeal.

(h) *Written appeal.* A person may file a written appeal to the Agency, whether or not he or she has made a prior oral appeal. The written appeal shall be considered by the Agency, regardless of form.

(i) *Scope of review of appeal.* In deciding an appeal, the Agency shall consider—

(1) All applicable regulations;

(2) All pertinent justification and other material submitted by the person; and

(3) All material upon which the Agency based the determination being appealed and any other available information that is needed to ensure a fair and full review of the appeal.

(j) *Request for additional time.* If, after filing an appeal, a person makes a reasonable request for additional time to gather and prepare information for a supplemental written appeal, the person must be granted a reasonable amount of additional time.

(k) *Determination and notification after appeal.* Promptly after receipt of all information submitted by a person in support of the appeal, the Agency shall make a written determination on the appeal and furnish the person a copy. If any payment or other relief to the person is granted, the notification shall include a brief statement on how this will be provided. If the full relief requested is not granted, the notification shall include the factual and legal basis upon which the decision is based, including any appropriate explanation, along with a statement of the person's right to seek judicial review.

(l) *Assistance to person making appeal.* If a person is unable to prepare a written appeal, the Agency shall offer the person appropriate assistance or notify him or her of other available sources of assistance.

(m) *Agency official to hear appeal.* The Agency official hearing an oral appeal or conducting the review of a written appeal shall be either the head of the Agency or his or her authorized designee. However, the official shall not be an official directly involved in the action appealed or a subordinate to such an official.

(n) *Judicial review.* Nothing in these regulations shall in any way preclude or limit a person from seeking judicial review of his or her appeal on its merits after exhaustion of such administrative remedies as are available to the person under this Section.

(o) *Federally-assisted State administered programs.* Whenever a project is carried out by an Agency provided Federal financial assistance under a program administered by a State, the State may establish the procedures governing appeals. These procedures may provide for the Agency to hear the appeal and, if the person is dissatisfied with the Agency's determination on the appeal, for the State to review the appeal.

§ 25.10 Definitions.

(a) *Agency.* The term "Agency" means the Federal agency, State or State agency which acquires the real property (see § 25.101) or displaces a person (see § 25.10(e)).

(b) *Business.* The term "business" means any lawful activity, except a farm operation, that is—

(1) Conducted primarily for the purchase, sale, lease and/or rental of personal and/or real property, and/or for the manufacture, processing, and/or marketing of products, commodities, and/or any other personal property; or

(2) Conducted primarily for the sale of services to the public; or

(3) a Solely for the purpose of § 25.303 of these regulations, conducted primarily for outdoor advertising display purposes, when the display(s) must be moved as a result of the project; or

(4) Conducted by a nonprofit organization that has established its nonprofit status under applicable Federal or State law.

(c) *Comparable replacement dwelling.* The term "comparable replacement dwelling" means a dwelling which meets or exceeds the following minimum requirements—

(1) Decent, safe, and sanitary as described in § 25.10(d).

(2) Functionally equivalent to the displacement dwelling with living space adequate to accommodate the displaced person.

(3) In an area that is not subject to unreasonable adverse environmental conditions; is not generally less desirable than the location of the displaced person's dwelling with respect to public utilities, commercial and public facilities; and is reasonably accessible to the person's place of employment.

(4) On a site that is typical in size for residential development with normal site improvements including customary landscaping, but not including special improvements such as outbuildings, fences, swimming pools, and greenhouses. (See also § 25.403(a)(2).)

(5) Currently available to the displaced person.

(6) Within the financial means of the displaced person.

(i) A replacement dwelling purchased by a 180-day homeowner is considered to be within the homeowner's financial means if the homeowner is paid the full price differential as described at § 25.401(c), all increased mortgage interest cost as described at § 25.401(d), and all incidental expenses as described at §25.401(e).

(ii) A replacement dwelling rented by a displaced person is considered to be within his or her financial means if the monthly rent at the replacement dwelling does not exceed the monthly rent at the displacement dwelling, after taking into account any rental assistance which the person receives under these regulations. If the cost of any utility services is included in either rent, an appropriate adjustment must be made to ensure that like circumstances are compared. For a person who paid little or no rent before displacement, the market rent of the displacement dwelling shall be used when computing costs.

(d) *Decent, safe, and sanitary dwelling.* The term "decent, safe, and sanitary dwelling" means a dwelling which meets applicable housing and occupancy codes. However, if any of the following standards are not met by an applicable code, such following standard shall apply, unless waived for good cause by the Federal agency funding the project. The dwelling shall—

(1) Be structurally sound, weathertight and in good repair.

(2) Contain a safe electrical wiring system adequate for lighting and other electrical devices.

(3) Contain a heating system capable of sustaining a healthful temperature for a displaced person of approximately 70 degrees, except in those areas where local climatic conditions do not require such a system.

(4) Be adequate in size with respect to the number of rooms and area of living space needed to accommodate the displaced person. There shall be a separate, well-lighted and ventilated bathroom that provides privacy to the user and contains a sink and bathtub or shower stall and a toilet, all in good working order and properly connected to appropriate sources of water and to a sewage drainage system. In the case of a housekeeping dwelling, there shall be a kitchen area that contains a fully usable sink, properly connected to potable hot and cold water and to a sewage drainage system, and adequate space and utility service connections for a stove and refrigerator.

(5) Contains unobstructed egress to safe open space at ground level. If the replacement dwelling unit is on the second story or above, two unobstructed means of egress are required.

(6) For a displaced person who is handicapped, be free of any barriers which would preclude reasonable ingress, egress, or use of the dwelling by the person.

(e) *Displaced person.* (1) *General.* The term "displaced person" means any person (defined at § 25.19(k)) who moves from the real property or moves his personal property from the real property—

(i) As a result of the Agency's acquisition of such real property in whole or in part for the project. (This includes any person who moved from the real property as a result of the initiation of negotiations as described at § 25.10(j)); or

(ii) As a result of the written order from the acquiring Agency to vacate such real property for the project; or

(iii) As a result of the Agency's acquisition of, or written order to vacate other real property on which the person conducts a business, farm operation, or nonprofit organization, for the project. However, eligibility as a displaced person under this paragraph (1)(iii) applies only for purposes of obtaining relocation assistance advisory services (described at § 25.205) and moving expenses under § 25.303).

(2) *Persons not displaced.* The following is a nonexclusive listing of persons who do not qualify as a displaced person under these regulations.

(i) A person who moves before the initiation of negotiations; or

(ii) A person who initially enters into occupancy of the property after the date of its acquisition for the project; or

(iii) A person who is not required to relocate permanently as a direct result of the project. Such determination shall be made by the Agency in accordance with any guidelines established by the Federal agency providing financial assistance for the project; or

(iv) A person who, after receiving a notice of relocation eligibility (described at § 25.203) is notified in writing that he or she will not be displaced for the project. Such notice shall not be issued unless the person has not moved and the Agency agrees to reimburse the person for any expenses incurred to satisfy any binding contractual relocation obligations entered into after the effective date of the notice of relocation eligibility; or

(v) An owner-occupant who voluntarily sells his or her property as described at § 25.101(a)) after being informed in writing that if a mutually satisfactory agreement of sale cannot be reached, the Agency will not acquire the property. In such cases, however, any resulting displacement of a tenant is subject to these regulations; or

(vi) A person who retains use and occupancy of the real property for life following its acquisition by the Agency; or

(vii) A person who retains use and occupancy of the real property for a fixed term after its acquisition by the Department of Interior under Pub. L. 93–447 or Pub. L. 93–303; or

(viii) A person who is required to temporarily vacate the premises in order to permit fumigation or other code enforcement work which does not exceed five calendar days.

(f) *Dwelling.* The term "dwelling" means the place of permanent or customary and usual residence of a person according to local custom or law, including a single family house, a single family unit in a two-family, multi-family, or multi-purpose property, a unit of a condominium or cooperative housing project, a non-housekeeping unit, a mobile home, or any other residential unit.

(g) *Farm operation.* The term "farm operation" means any activity conducted solely or primarily for the production of one or more agricultural products or commodities, including timber, for sale or home use, and customarily producing such products or commodities in sufficient quantity to be capable of contributing materially to the operator's support.

(h) *Federal agency.* The term "Federal Agency" means any department, agency, or instrumentality in the executive branch of the Government, any wholly owned Government corporation, and the Architect of the Capitol, the Federal Reserve Bank and branches thereof.

(i) *Federal financial assistance.* The term "Federal financial assistance" means any Federal grant, loan, or contribution, except a Federal guarantee or insurance.

(j) *Initiation of negotiations.* The term "initiation of negotiations" means the delivery of the initial written offer by the Agency to the owner or the owner's representative to purchase real property for the project for the amount determined to be just compensation, unless applicable Federal program regulations specify a different action to serve this purpose. However, in any case where a person moves after the Agency issues a notice of its intent to acquire the real property, but before delivery of the intitial written purchase offer, the "initiation of negotiations" means the person's move from the property.

(k) *Person.* The term "person" means any individual, family, partnership, corporation, or association.

(l) *Salvage value.* The term "salvage value" means the probable sale price of an item, if offered for sale on the condition that it will be removed from the property at the buyer's expense, allowing a reasonable period of time to find a person buying with knowledge of the uses and purposes for which it is adaptable and capable of being used, including separate use of serviceable components and scrap when there is no reasonable prospect of sale except on that basis.

(m) *State.* The term "State" means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, the trust territories of the Pacific Islands, or a political subdivision of any of these jurisdictions.

(n) *State agency.* The term "State agency" means any department, agency or instrumentality of a State, or of a political subdivision of a State, or of two or more States, or of two or more political subdivisions of a State or States.

(o) *Tenant.* The term "tenant" means a person who has the temporary use and occupancy of real property owned by another.

(p) *Unform Act.* The term "Uniform Act" means the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

(84 Stat. 1894; 42 U.S.C 4601 et seq.; Pub. L. 91–646).

Subpart B—Real Property Acquisition

§ 25.101 Applicability of acquisition requirements.

(a) *General.* The requirements of this Subpart apply to any Agency acquisition of real property (including any less-than-full-fee interest) for a Federal or federally-assisted project carried out under the threat of eminent domain. In those instances where the Agency has authority to acquire property free of the threat of eminent domain, the requirements outlined in this Subpart will not apply if the owner is informed in advance that the transaction must be on a voluntary basis and that if a mutually satisfactory agreement cannot be reached, the Agency will not acquire the property.

(b) *Less-than-full-fee interest in real property.* The requirements of this Subpart apply to acquisition of a life estate, or life use, acquisition by

leasing/easement where the lease/easement term, including option(s) for extension, is 50 years or more, and to any other acquisition for a project of a less-than-full-fee interest including easements.

(c) *Federal-assisted projects.* For federally-assisted projects the provisions of §§ 25.102, 25.103, 25.104, and 25.105 are applicable to the extent practicable under State law.

§ 25.102 Basic acquisition policies.

(a) *Expeditious acquisition.* The Agency shall make every reasonable effort to acquire the real property expeditiously by negotiation.

(b) *Notice to owner.* As soon as feasible, the owner shall be notified in writing of the Agency's interest in acquiring the real property and the basic protections provided to the owner by law and these regulations (see also 90-day notice requirement at § 25.206).

(c) *Appraisal and invitation to owner.* Before the initiation of negotiations the real property shall be appraised and the owner or the owner's designated representative shall be given an opportunity to accompany the appraiser during the appraiser's inspection of property.

(d) *Establishment of offer of just compensation.* Before the initiation of negotiations, the Agency shall establish an amount which it believes is just compensation for the real property. The amount shall not be less than the approved appraisal of the fair market value, including damages or benefits to the remaining property (see also § 25.104). Promptly thereafter the Agency shall make a written offer to the owner to acquire the property for the full amount believed to be just compensation.

(e) *Summary statement.* Along with the initial written purchase offer, the owner shall be given a written statement of the basis for the offer of just compensation, which shall include:

(1) A statement of the amount offered as just compensation. (In the case of a partial acquisition, the compensation for the real property to be acquired and the compensation for damages to the remaining real property shall be separately stated.)

(2) A description and location identification of the real property and the interest in the real property to be acquired.

(3) An identification of the buildings, structures, and other improvements (including removable building equipment and trade fixtures) which are considered to be part of the real property for which the offer of just compensation is made. (Where appropriate, the statement shall identify any separately held ownership interest in the property (e.g., a tenant-owned improvement) and indicate that such interest is not covered by the offer.)

(f) *Basic negotiation procedures.* The Agency shall make reasonable efforts to contact the owner or the owner's representative and (1) discuss its offer to purchase the property including the basis for the offer of just compensation, and (2) explain its acquisition policies and procedures including its payment of incidental expenses in accordance with § 25.106. The owner shall be given reasonable opportunity to consider the offer and present material which the owner believes is relevant to determining the value of the property and to suggest modification in the proposed terms and conditions of the purchase, and the Agency shall consider the owner's presentation.

(g) *Updating offer of just compensation.* If the information presented by the owner or a material change in the character or condition of the property indicates the need for new appraisal information, or if a significant delay has occurred since the time of the appraisal(s) of the property, the Agency shall have the appraisal(s) updated or obtain a new appraisal(s). If the latest appraisal information indicates that a change in the purchase offer is warranted, the Agency shall promptly reestablish just compensation and offer that amount to the owner in writing.

(h) *Coercive action.* The Agency shall not advance the time of condemnation, or defer negotiations or condemnation or the deposit of funds with the court, or take any other coercive action, in order to induce an agreement on the price to be paid for the property.

(i) *Administrative settlement.* The purchase price for the property may exceed the amount offered as just compensation when reasonable efforts to negotiate on that amount have failed and an authorized Agency official approves such administrative settlement as being reasonable, prudent, and in the public interest. A written justification shall be prepared which indicates that available information (e.g., appraisals, recent court awards, estimated trial costs, and valuation problems) support such a settlement.

(j) *Payment before taking possession.* Before requiring the owner to surrender possession of the real property, the Agency shall (1) pay the agreed purchase price to the owner, or (2) in the case of a condemnation, deposit with the court, for the benefit of the owner, an amount not less than the agencies approved appraisal of the fair market value of such property, or the amount of the award of compensation in the condemnation proceeding for the property.

(k) *Uneconomic remnant.* If the acquisition of only a portion of a property would leave the owner with an uneconomic remnant, the Agency shall offer to acquire the uneconomic remnant along with the portion of the property needed for the project. An uneconomic remnant is a remaining part of the property in which the owner is left with an interest that the Agency determines has little or no utility or value to the owner.

(l) *Inverse condemnation.* If the Agency intends to acquire any interest in real property by exercise of the power of eminent domain, it shall institute formal condemnation proceedings and not intentionally make it necessary for the owner to institute legal proceedings to prove the fact of the taking of the real property.

(m) *Fair rental.* The amount charged a former owner or tenant for the use of the real property between the date of acquisition and the date of displacement for the project shall not exceed the fair rental value for a short-term occupier or the market rent, whichever is less.

§ 25.103 Criteria for appraisals.

(a) *Definition of appraisal.* An appraisal is a written statement independently prepared by a qualified appraiser setting forth an opinion of value of an adequately described property as of a specific date, supported by the presentation and analysis of relevant market information.

(b) *Standards of appraisal.* The format and level of documentation for an appraisal are dependent on the complexity of the appraisal problem. The Agency shall develop minimum standards for appraisals of those acquisitions which, by virtue of their low value or simplicity, do not require the in-depth analysis necessary in a standard appraisal. A standard appraisal shall be prepared for all other acquisitions. A standard appraisal shall reflect nationally recognized appraisal standards including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisition. As a minimum, it shall contain the following items:

(1) The purpose and/or the function of the appraisal, a definition of the estate being appraised, and a statement of the assumptions and limiting conditions affecting the appraisal.

(2) An adequate description of the physical characteristics of the property being appraised (and in the case of a partial acquisition, an adequate

description of the remaining property), a statement of the known and observed encumbrances, if any, title information, location, zoning, present use, an analysis of highest and best use, and a 5-year sales history of the property.

(3) All relevant approaches to value. However, when there is sufficient market data, the appraisal may be limited to the market approach. If more than one approach is utilized, there shall be an analysis and correlation of the approaches to value including an explanation of the final conclusion of value that is sufficient to support the appraiser's opinion(s) of value.

(4) A description of comparable sales, including a description of any items that affect the validity of the sale or indicated value such as parties to the transaction and source and method of buyer financing.

(5) A breakdown of land and improvement values and, for a partial acquisition, a statement of the value of the real property to be acquired and of damages and benefits, if any, to the remaining real property.

(6) The effective date of valuation, date of appraisal, signature, and certificate of appraiser.

(c) *Influence of projects on just compensation.* To the extent permitted by applicable law, the appraiser shall disregard any decrease or increase in the fair market value of the real property, prior to the date of valuation, caused by the project for which the property is to be acquired, or by the likelihood that the property would be acquired for the project, other than that due to physical deterioration within the reasonable control of the owner.

(d) *Owner retention of improvements.* If the owner of a real property improvement is permitted to retain it for removal from the project site, the amount determined to be just compensation for the interest in real property to be acquired from the owner shall not be less than the amount determined by subtracting the salvage value of the improvements the owner retains for off-site removal from the amount determined to be just compensation for the owner's entire interest in the real property.

(e) *Qualifications of appraisers.* The Agency shall establish criteria for determining the minimum qualifications of appraisers, including review appraisers. Appraiser qualifications shall be consistent with the level of difficulty of the appraisal assignment. The Agency shall review the experience, education, training, and other qualifications of appraisers, including review appraisers, and utilize only those determined to be qualified.

(f) *Conflict of interest.* No appraiser shall have any interest, direct or indirect, in the real property which is being appraised for the Agency that would in any way conflict with the preparation of the appraisal. No Agency appraiser shall act as a negotiator for the Agency or the owner in the acquisition of real property which the appraiser has appraised in connection with the project. Compensation for making an appraisal shall not be based on the amount of the valuation.

§ 25.104 Review of appraisals.

The Agency shall have an appraisal review process and, as a minimum:

(a) A qualified reviewing appraiser shall examine all appraisals to assure that they meet Agency appraisal requirements and shall, prior to acceptance, seek correction or revision of those which do not.

(b) If the reviewing appraiser is unable to approve or recommend approval of an appraisal as adequate support for compensation, the reviewing appraiser may develop appraisal documentation in accordance with § 25.103 to support an approved or recommended value if it is determined that it is not practical to obtain additional appraisals.

(c) The review appraiser's recommended or approved value of the property shall be set forth in a signed written report which identifies the appraisal reports reviewed and explains the basis for such recommendation. Any damages or benefits to any remaining property shall also be identified in the report.

§ 25.105 Acquisition of tenant-owned improvement.

(a) *Acquisition of improvements.* When acquiring any interest in real property, the Agency shall acquire at least an equal interest in all buildings, structures, or other improvements located upon the real property to be acquired which it requires to be removed or which it determines will be adversely affected by the use to which such real property will be put. This shall include any improvement of a tenant-owner who has the right or obligation to remove the improvement at the expiration of the lease term.

(b) *Improvements considered to be real property.* Any building, structure, or other improvement which would be considered to be real property if owned by the owner of the real property on which it is located shall be considered to be a real property improvement for purposes of this Subpart.

(c) *Appraisal and establishment of just compensation for tenant-owned improvements.* Just compensation for a tenant-owned improvement is the amount which the improvement contributes to the fair market value of the whole property or its salvage value, whichever is greater. (Salvage value is defined at § 25.10(1)).

(d) *Special conditions.* No payment shall be made to a tenant-owner for any real property improvement unless—

(1) The tenant-owner, in consideration for the payment, assigns, transfers, and releases to the Agency all of the tenant-owner's right, title, and interest in the improvement;

(2) The owner of the real property on which the improvement is located disclaims all interest in the improvement; and

(3) The payment does not result in the duplication of any compensation otherwise authorized by law.

(e) *Alternative payment.* Nothing in this Subpart shall be construed to deprive the tenant-owner of any rights to reject payment under this Subpart and to obtain payment for such property interests in accordance with other applicable law.

§ 25.106 Expenses incidental to transfer of title to the Agency.

The owner shall be reimbursed for all reasonable expenses the owner necessarily incurred for—

(a) Recording fees, transfer taxes, documentary stamps, evidence of title, boundary surveys, legal descriptions of the real property, and similar expenses incidental to conveying the real property to the Agency. However, the Agency is not required to pay costs solely required to perfect the owner's title to the real property;

(b) Penalty costs and other charges for prepayment of any preexisting recorded mortgage entered into in good faith encumbering the real property; and

(c) The pro rata portion of any prepaid real property taxes, which are allocable to the period after the Agency obtains title to the property or effective possession of it, whichever is earlier.

Whenever feasible, the Agency shall pay these costs directly and avoid the need for an owner to pay any such costs and then seek reimbursement from the Agency.

§ 25.107 Certain litigation expenses.

The owner of the real property shall be reimbursed for any reasonable expenses, including reasonable attorney, appraisal and engineering fees, which the owner actually incurred because of a condemnation proceeding, if—

(a) The final judgment of the court is that the Agency cannot acquire the real property by condemnation; or

(b) The condemnation proceeding is abandoned by the Agency other than under an agreed-upon settlement; or

(c) The court having jurisdiction renders a judgment in favor of the owner in an inverse condemnation proceeding or the Agency effects a settlement of such proceeding.

§ 25.106 Donations.

Nothing in these regulations shall prevent a person, after being informed of the right to receive just compensation, from making a gift or donation of real property or any part thereof, or any interest therein, or of any compensation paid therefor, to the Agency.

Subpart C—General Relocation Requirements

§ 25.201 Purpose and applicability.

This Subpart prescribes general requirements governing the provision of relocation payments and other relocation assistance under the regulations in this part. These requirements apply to the relocation of any displaced person as defined at § 25.10(e).

§ 25.202 Relocation analysis.

At an early stage in the planning of a project, and in any event prior to commencing any actions which will cause displacements, a relocation analysis shall be developed by the Agency to assist it in the recognition and successful resolution of those problems associated with the displacement of individuals, families, and businesses in order to minimize adverse impacts on displaced persons and to expedite project advancement and completion. This analysis will not be subject to prior Federal approval, but it must be documented in the Agency's file and be in sufficient depth to assure that comparable replacement dwellings will be available to displaced persons.

§ 25.203 Notice of relocation eligibility.

As soon as feasible, a written notice of relocation eligibility and/or informational brochure shall be issued to each person to be displaced (see definition of displaced person at § 25.10(e)). Eligibility shall begin on the date of the initiation of negotiations. The notice and/or an informational brochure shall—

(a) Inform the person that he or she will be displaced for the project and generally describe the relocation payment(s) for which the person may be eligible, the basic conditions of eligibility, and the procedures for obtaining the payment(s).

(b) Indicate that the person will be given reasonable relocation advisory services, including housing referrals, help in filing payment claim(s), and other necessary assistance to help the person successfully relocate.

(c) Inform any person to be displaced from a dwelling that he/she cannot be required to move permanently, unless at least one comparable replacement dwelling has been made available to the displaced person.

(d) Describe the person's right to appeal the Agency's determination as to eligibility for, or the amount of, any relocation payment for which the person is eligible and the suitability of any replacement housing which has been offered.

§ 25.204 Availability of comparable replacement dwellings prior to displacement.

(a) *General.* No person to be displaced shall be required to move permanently from his or her dwelling, unless at least one comparable replacement dwelling (defined at § 25.10(c)) has been made available to the person. Where possible, three or more comparable replacement dwellings shall be made available. A comparable replacement dwelling will be considered to have been made available to a person, if—

(1) The person is informed of its location;

(2) The person has sufficient time to negotiate and enter into a purchase agreement or lease for the property; and

(3) Subject to reasonable safeguards, the person is assured of receiving the relocation assistance and acquisition compensation to which the person is entitled in sufficient time to complete the purchase or lease of the property.

(b) *Circumstances permitting waiver.* The Federal agency funding the project may grant a waiver of the policy in paragraph (a) of this section in any case where it is demonstrated that a person must move because of—

(1) A major disaster as defined in Section 102(c) of the Disaster Relief Act of 1974 (42 U.S.C. 5121); or

(2) A Presidentially declared national emergency; or

(3) Another emergency which requires immediate vacation of the real property, such as when continued occupancy of the displacement dwelling constitutes a substantial danger to the health or safety of the occupants or the public.

(c) *Basic conditions of emergency move.* Whenever a person is required to relocate for a temporary period because of an emergency as described in paragraph (b) of this section, the Agency shall—

(1) Take whatever steps are necessary to assure that the affected person is temporarily relocated to a decent, safe, and sanitary dwelling;

(2) Pay actual reasonable out-of-pocket moving expenses and any reasonable increases in monthly housing costs incurred in connection with the temporary relocation;

(3) As soon as feasible, make available to the displaced person at least one comparable replacement dwelling. (For purposes of filing a claim and meeting the eligibility requirements for a relocation payment, the date of displacement is the date the person moves from the temporarily occupied dwelling.)

§ 25.205 Relocation assistance advisory services.

(a) *General.* The Agency shall carry out a relocation assistance advisory program which satisfies the requirements of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3601 et seq.), and Executive Order 11063 (27 FR 11527), and offers the services described in paragraph (b) of this section. If the Agency determines that a person occupying property adjacent to the real property aquired for the project is caused substantial economic injury because of such acquisition, it may offer the services to such person.

(b) *Services to be provided.* The Advisory program shall include such measures, facilities, and servcies as may be necessary or appropriate in order to—

(1) Personally interview each person to be displaced, determine the person's relocation needs and preferences, and explain the relocation payments and other assistance for which the person may be eligible, the related eligibility requirements, and the procedures for obtaining such assistance.

(2) Provide current and continuing information on the availability, purchase prices, and rental costs of comparable replacement dwellings. Explain that the person cannot be required to move unless at least one comparable replacement dwelling is made available as set forth in § 25.204(a).

(i) The Agency shall inform the person to be displaced of the specific comparable replacement dwelling, and the price or rent, to be used as the basis for establishing the upper limit of the replacement housing payment (see § 25.403(a)), and the basis of those determinations.

(ii) Where feasible, housing shall be inspected prior to being made available to assure that it meets applicable standards (see § 25.10(c) and § 25.10(d)). If such an inspection is not made, the person to be displaced shall be notified that a replacement housing payment may not be made unless the replacement dwelling is subsequenty inspected and determined to be decent, safe, and sanitary.

(iii) In addition to making comparable replacement dwellings available, whenever possible, minority persons shall be given reasonable opportunities to relocate to decent, safe, and sanitary replacement dwellings, not located in an area of minority concentration, that are within their financial means. This policy, however, does not require an Agency to provide a person a larger payment than is necessary to enable the person to relocate to a comparable replacement dwelling.

(iv) Displaced persons, especially the elderly and handicapped, shall be offered transportation to inspect housing to which they are referred.

(3) Provide current and continuing information on the availability, purchase prices, and rental costs of comparable and suitable commercial and farm properties and locations. Assist any person displaced from a business or farm operation to obtain and become established in a suitable replacement location.

(4) Minimize hardships to persons in adjusting to relocation by providing counseling, advice as to other sources of assistance that may be available and such other help as may be appropriate.

(5) Supply persons to be displaced with appropriate information concerning Federal and State housing programs, disaster loan and other programs administered by the Small Business Administration, and other Federal and State programs offering assistance to persons to be displaced.

(c) *Coordination of relocation activities.* Relocation activities shall be coordinated with project work and other displacement causing activities to ensure that, to the extent feasible, persons displaced receive consistent treatment and duplication of functions is minimized.

§ 25.206 Ninety-day notice.

(a) *General.* No lawful occupant shall be required to move without at least 90 day's advance written notice of the earliest date by which the property must be vacated. The 90-day notice might include a specific date by which the property must be vacated or include a statement indicating that the occupant will be given a further written notice indicating, at least 30 days in advance, the specific date by which he or she must vacate.

(b) *Timing of notice.* A 90-day notice shall not be given before the notice of relocation eligibility is issued. Also, at least one comparable replacement dwelling must be made available to a person occupying a dwelling before the person can be issued a 90-day notice.

(c) *Urgent need.* In unusual circumstances, an occupant may be required to vacate the property on less than 90 days's advance notice if the Agency determines that a 90-day notice is impracticable, such as when the person's continued occupancy of the property would constitute a substantial danger to the person's health or safety. A copy of the Agency's determination shall be included in the application case file.

§ 25.207 Eviction for cause.

Eviction for cause is permissible only as a last resort and must conform to applicable State and local law. Any person who has lawfully occupied the real proprty, but who is later evicted for cause on or after the effective date of the notice of relocation eligibility, retains the right to the relocation payments and other assistance set forth in these regulations. (For example, an otherwise eligible person who is evicted for failure to pay his or her rent remains eligible for relocation assistance.) However, the date of the eviction establishes the date of the person's displacement.

§ 25.208 General requirements—claim for relocation payments.

(a) *Documentation.* Any claim for a relocation payment shall be supported by such documentation as may be reasonably required to demonstrate expenses incurred, such as bills, certified prices, appraisals or other evidence of such expenses. A displaced person must be provided whatever assistance is necessary to complete and file any required claim for payment.

(b) *Expeditious payments.* The Agency shall review claims in an expeditious manner. The claimant shall be promptly notified as to any additional documentation that is required to support the claim. Payment for a claim shall be made as soon as feasible following receipt of sufficient documentation to support the claim.

(c) *Advance payments.* If a person demonstrates the need for an advance relocation payment in order to avoid or reduce a hardship, the Agency shall issue the payment, subject to such safeguards as are appropriate to ensure that the objective of the payment is accomplished.

(d) *Time for filing.* All claims for a relocation payment shall be filed with the Agency within 18 months after the move is completed, unless this time period is waived by the Agency.

(e) *Multiple occupants of one displacement dwelling.* If two or more occupants of the displacement dwelling move to separate replacement dwellings, each occupant is entitled to a reasonable prorated share, as determined by the Agency, of any relocation payments that would have been made if the occupants moved together to a comparable replacement dwelling. However, if the Agency determines that two or more persons hold separate tenancies (and/or ownerships), each such person has a separate entitlement to relocation payments.

(f) *Direct payment of claim.* The Agency shall not withhold any part of a relocation payment to a displaced person to satisfy an obligation to the Agency or any other creditor. The full amount of a relocation payment shall be made payable to the eligible claimant, unless the claimant designates in writing that a specific amount shall be paid to another party.

(g) *Notice of denial of claim.* If the Agency disapproves all or part of a payment claimed or refuses to consider the claim on its merits because of untimely filing or other grounds, it shall promptly notify the claimant in writing of its determination, the basis for its determination, and the procedures for appealing that determination.

§ 25.209 Relocation payments not considered as income.

No relocation payment received by a displaced person under these regulations shall be considered as income for the purpose of the Internal Revenue Code of 1954, or for the purposes of determining the eligibility or the extent of eligibility of any person for assistance under the Social Security Act or any other Federal law.

Subpart D—Payment For Moving and Related Expenses

§ 25.301 Payment for actual reasonable moving and related expenses—residential moves.

Any displaced owner-occupant or tenant of a dwelling, who qualifies as a displaced person (defined at § 25.10(e)), is entitled to reimbursement of his or her actual moving and related expenses, as the Agency determines to be reasonable and necessary, including expenses for—

(a) Transportation of the displaced person and personal property. Transportation costs for a distance beyond 50 miles are not eligible, unless the Agency determines that relocation beyond 50 miles is justified.

(b) Packing, crating, unpacking, and uncrating of the personal property.

(c) Disconnecting, dismantling, removing, reassembling and reinstalling relocated household applicances, and other personal property.

(d) Storage of the personal property, generally not to exceed 12 months, and generally not on property owned by the displaced person.

(e) Insurance for the replacement value of the personal property in connection with the move and necessary storage.

(f) The reasonable replacement value of property lost, stolen or damaged in the process of moving (not through the fault or negligence of the displaced person, his or her agent or employee), where insurance covering such loss, theft or damage is not reasonably available.

(g) Other moving-related expenses that are not listed as ineligible under § 25.305, as the Agency determines to be reasonable and necessary (such as the cost of obtaining bids).

§25.302 Fixed payment for moving expenses—residential moves.

Any person displaced from a dwelling, or a seasonal residence, is entitled to receive a fixed payment in lieu of a payment for actual moving and related expenses under § 25.301, that consists of—

(a) A moving expense allowance not to exceed $300 which shall be determined in accordance with the approved Agency schedule applicable to the displacement; and

(b) A dislocation allowance of $200.

§25.303 Payment for actual reasonable moving and related expenses—nonresidential moves.

(a) *Eligible costs.* Any displaced business, or farm operation which qualifies as a displaced person (defined at § 25.10(e)), is entitled to payment for such actual moving and related expenses, as the Agency determines to be reasonable and necessary, including expenses for—

(1) Transportation of the personal property. Transportation costs for a distance beyond 50 miles are not eligible, unless the Agency determines that relocation beyond 50 miles is justified.

(2) Packing, crating, unpacking, and uncrating the personal property.

(3) Disconnecting, dismantling, removing, reassembling and installing relocated machinery, equipment, and other personal property and substitute personal property (described at § 25.303(c)). This includes connection to utilities available nearby. It also includes modifications necessary to adapt the personal property to the replacement structure or site or to the utilities or to adapt the utilities to the personal property. (Expenses for providing utilities from the right-of-way to the building or improvement are excluded.)

(4) Storage of the personal property, generally not to exceed 12 months, and generally not on property owned by the displaced person.

(5) Insurance for the replacement value of the personal property in connection with the move and necessary storage.

(6) Any license, permit or certification required of the displaced person at the replacement location. However, the payment may be based on the remaining useful life of the existing license, permit or certification.

(7) The reasonable replacement value of property lost, stolen or damaged in the process of moving (not through the fault or negligence of the displaced person, his or her agent or employee), where insurance covering such loss, theft or damage is not reasonably available.

(8) Professional services necessary for (i) planning the move of the personal property, (ii) moving the personal property, or (iii) installing the relocated personal property at the replacement location.

(9) Relettering signs and replacing stationery on hand at the time of displacement that is made obsolete as a result of the move.

(10) Actual direct loss of tangible personal property incurred as a result of moving or discontinuing the business or farm operation. The payment shall consist of the reasonable costs incurred in attempting to sell the item plus the lesser of—

(i) The fair market value of the item for continued use at the displacement site, less the proceeds from its sale. (To be eligible for payment, the claimant must make a good faith effort to sell the personal property, unless the Agency determines that such effort is not necessary. When payment for property loss is claimed for goods held for sale, the fair market value shall be based on the cost of the goods to the business, not the potential selling price); or

(ii) The estimated cost of moving the item, but with no allowance for storage. (If the business or farm operation is discontinued, the estimated cost shall be based on a moving distance of 50 miles).

(11) Purchase of substitute personal property. If an item of personal property, which is used as part of a business or farm operation, is not moved but is promptly replaced with a substitute item that performs a comparable function at the replacement site, the displaced person is entitled to payment of the lesser of—

(i) The cost of the substitute item, including installation cost at the replacement site, minus any proceeds from the sale or trade-in of the replaced item; or

(ii) The estimated cost of moving and reinstalling the replaced item, based on the lowest acceptable bid or estimate obtained by the Agency for eligible moving and related expenses, but with no allowance for storage.

(12) *Searching for a replacement location.* A displaced business or farm operation is entitled to reimbursement for actual expenses, not to exceed $1,000, as the Agency determines to be reasonable, which are incurred in searching for a replacement location, including—

(i) Transportation.

(ii) Meals and lodging away from home.

(iii) Time spent searching, based on reasonable salary or earnings.

(iv) Fees paid to a real estate agent or broker to locate a replacement site.

(13) Other moving-related expenses that are not listed as ineligible under § 25.305, as the Agency determines to be reasonable and necessary (such as the cost of obtaining bids).

(b) *Notification and inspection.* The following requirements apply to payments under this section.

(1) As soon as possible after the initiation of negotiations, the Agency shall inform the displaced person, in writing, of the requirements of subparagraphs (2) and (3) of this paragraph.

(2) The displaced person must provide the Agency reasonable advance written notice of the approximate date of the start of the move or disposition of the personal property and a list of the items to be moved. However, the Agency may waive this notice requirement after documenting its file accordingly.

(3) The displaced person must permit the Agency to make reasonable and timely inspections of the personal property at both the displacement and replacement sites and to monitor the move.

(c) *Self-move.* If the displaced person elects to take full responsibility for all or a part of the move of the business, farm

operation, or nonprofit organization, the Agency may approve a payment for the person's moving expenses in an amount not to exceed the lowest acceptable bid or estimate obtained by the Agency, or prepared by a qualified staff person, without submission of any additional documentation of moving expenses actually incurred in the move.

(d) *Transfer of ownership.* To be eligible for a payment under paragraph (a) or (c) of this section, the claimant shall, in accordance with applicable law, transfer to Agency ownership of the personal property that has not been sold or traded in.

(e) *Advertising sign.* The amount of payment for direct loss of an advertising sign, which is personal property, shall be the lesser of—

(1) The depreciated reproduction cost of the sign as determined by the Agency, less the proceeds from its sale; or

(2) The estimated cost of moving the sign, but with no allowance for storage.

§ 25.304 Fixed payment for moving expenses—nonresidential moves.

(a) *Business.* Any displaced business (other than an outdoor advertising display business (described at § 25.10(b)(3)) or a nonprofit organization (see § 25.304(d)) is eligible for a fixed payment in lieu of a payment for actual moving and related expenses, in an amount equal to its average annual net earnings as computed in accordance with paragraph (e) of this section, but not less than $2,500 nor more than $10,000, if the Agency determines that—

(1) The business cannot be relocated without a substantial loss of its existing patronage (clientele). A business is assumed to meet this test, unless the Agency demonstrates that it will not suffer a substantial loss of its existing patronage;

(2) The business is not part of a commercial enterprise having another establishment, which is not being acquired by the Agency, and which is under the same ownership and engaged in the same or similar business activities. For purposes of this rule, a remaining business facility that did not contribute materially to the income of the displaced person during the two taxable years prior to displacement shall not be considered "another establishment"; and

(3) The business contributed materially to the income of the displaced person during the two taxable years prior to displacement. However, the Agency may waive this test for good cause.

(b) *Determining number of businesses acquired.* In determining whether two or more legal entities, all of which have been acquired, constitute a single business, which is entitled to only one fixed payment, all pertinent factors shall be considered, including the extent to which—

(1) The same premises and equipment are shared;

(2) Substantially identical or interrelated business functions are carried out and business and financial affairs are commingled;

(3) The entities are held out to the public, and to those customarily dealing with them, as one business; and

(4) The same person or closely related persons own, control or manage the affairs of the entities.

(c) *Farm operation.* Any displaced farm operation (defined at §§ 25.19(g)) may choose a fixed payment in lieu of a payment for actual moving and related expenses in an amount equal to its average annual net earnings as computed in accordance with paragraph (e) of this section, but not less than $2,500 nor more than $10,000. In the case of a partial acquisition of land which was a farm operation before the acquisition, the fixed payment shall be made only if the Agency determines that—

(1) The acquisition of part of the land caused the operator to be displaced from the farm operation on the remaining land; or

(2) The partial acquisition caused a substantial change in the nature of the farm operation.

(d) *Nonprofit organization.* Any displaced nonprofit organization may choose a fixed payment in lieu of a payment for actual moving and related expenses, in an amount or $2,500, if the Agency determines that it—

(1) Cannot be relocated without a substantial loss of existing patronage (membership and clientele). A nonprofit organization is assumed to meet this test, unless the Agency demonstrates otherwise; and

(2) Is not part of an enterprise having at least one other establishment engaged in the same or similar activity which is not being acquired by the Agency.

(e) *Average net earnings or business of farm.* The average annual net earnings of a business or farm operation are one-half of its net earnings before Federal, State and local income taxes, during the two taxable years immediately prior to the taxable years in which it was displaced. If the business or farm was not in operation for the full two taxable years prior to displacement, net earnings shall be based on the actual period of operation on the displacement site, projected to an annual rate. Also, average annual net earnings may be based upon a different period of time when the Agency determines it to be more equitable. Net earnings include any compensation obtained from the business or farm operation by its owner, the owner's spouse, and dependents. The displaced person shall furnish the Agency proof of net earnings through income tax returns, certified financial statement or other reasonable evidence which the Agency determines is satisfactory.

§ 25.305 Ineligible moving and related expenses.

A displaced person is not entitled to payment for—

(a) The cost of moving any structure or other real property improvement in which the displaced person reserved ownership. (However, this rule does not preclude the computation under § 25.401(c)(4); or

(b) Interest on a loan to cover moving expenses; or

(c) Loss of goodwill; or

(d) Loss of profits; or

(e) Loss of trained employees; or

(f) Any additional expense of a business, farm or nonprofit organization incurred because of operating in a new location; or

(g) Personal injury; or

(h) Any legal legal fee or other cost for preparing a claim for a relocation payment or for representaing the claimant before the Agency; or

(i) Expenses for searching for a replacement dwelling.

Subpart E—Replacement Housing Payments

§ 25.401 Replacement housing payments for 180-day homeowner-occupants.

(a) *Eligibility.* A displaced person is eligible for the replacement housing payment for a 180-day homeowner-occupant if the person—

(1) Has actually owned and occupied the displacement dwelling for not less than 180 days immediately prior to the initiation of negotiations; and

(2) Purchases and occupies a decent, safe, and sanitary replacement dwelling within one year after the later of—

(i) The date the person receives final payment for the displacement dwelling or, in the case of condemnation, the required amount is deposited in the court, or

(ii) The date the person moves from the displacement dwelling.

(b) *Amount of total payment.* The total replacement housing payment for an eligible 180-day homeowner-occupant is an amount, not to exceed $15,000, which is the combined sum of—

(1) The amount, if any, by which the cost of a replacement dwelling exceeds the acquistion price of the displacement dwelling, as determined in accordance with paragraph (c) of this section (Price differential);

(2) The amount, if any, necessary to compensate the displaced person for any increased interest costs and other debt service costs to be incurred in connection with the mortgage(s) on the replacement dwelling, as determined in accordance with paragraph (d) of this section (Increased mortgage interest costs); and

(3) The amount of the reasonable expenses, as determined in accordance with paragraph (e) of this section (Incidental expenses), that are incidental to the purchase of the replacement dwelling.

(c) *Price differential.* (1) *Determination of price differential.* The price differential to be paid under paragraph (b)(1) of this section is the amount, if any, which must be added to the acquistion price of the displacement dwelling to provide a total amount equal to the lesser of—

(i) The reasonable cost of a comparable replacement dwelling as determined in accordance with § 25.403(a).

(ii) The purchase price of the decent, safe, and sanitary replacement dwelling actually purchased and occupied by the displaced person.

(2) *Mixed-use and multifamily properties acquired.* If the displacement dwelling was part of a property that contained another dwelling unit and/or space used for nonresidential purposes, only that portion of the acquisition payment which is actually attributable to the displacement dwelling shall be considered its sale price when computing the price differential.

(3) *Disaster-related insurance proceeds.* To the extent necessary to avoid duplicate compensation, the amount of any insurance proceeds received by a person in connection with a disaster related loss to the displacement dwelling shall be included in the sale price of the displacement dwelling when computing the price differential.

(4) *Owner retention of displacement dwelling.* If the owner retains ownership of his or her dwelling, moves it from the displacement site, and reoccupies it on a replacement site (see also § 25.103(d), Owner retention of improvements), the purchase price of the replacement dwelling shall be considered to be the sum of —

(i) The moving expenses and the cost of restoration to a condition comparable to that prior to the move;

(ii) The costs, if any, incurred to make the unit a decent, safe, and sanitary replacement dwelling (defined at § 25.10(d)); and

(iii) The cost of the replacement site, not to exceed the cost of an available suitable replacement site, unless the claimant did not own the displacement site and there is a reasonable opportunity for the claimant to rent a suitable replacement site.

(d) *Increased mortgage interest costs.* The amount to be paid for increased mortgage interest costs under § 25.401(b) is the sum of the present value of any increase in interest costs resulting because the interest rate on the mortgage financing on the replacement dwelling exceeds that on the displacement dwelling plus other debt service costs, all computed on the basis of the following rule—

(1) The payment shall only be based on bona fide mortgages that were a valid lien on the displacement dwelling for at least 180 days prior to the intitation of negotiations. All such mortgages on the displacement dwelling shall be used to compute the payment;

(2) The payment shall be based on the unpaid mortgage balance on the displacement dwelling or the new mortgage amount, whichever is less;

(3) The payment shall be based on the remaining term of the mortgage on the displacement dwelling or the actual term of the new mortgage, whichever is shorter;

(4) The interest charge on the new mortgage shall not exceed the prevailing interest rate currently charged by mortgage lending institutions in the area in which replacement dwelling is located;

(5) The present value of the increased cost shall be computed at the prevailing interest rate paid on savings deposits by commercial banks in the area in which the replacement dwelling is located; and

(6) Purchaser's points and origination fees, but not seller's points, shall be paid to the extent (i) they are not paid as incidental expenses, (ii) they do not exceed rates normal to similar real estate transactions in the area, and (iii) the Agency determines them to be necessary. The computation of such points and fees shall be based on the unpaid mortgage balance on the displacement dwelling or the new mortgage amount, whichever is less.

(e) *Incidental expenses.* The incidental expenses to be paid under paragraph (b)(3) of this section or § 25.402(c)(1) are those reasonable costs actually incurred by the displaced person incident to the purchase of a replacement dwelling, including—

(1) Legal, closing, and related costs, including those for title search and insurance, preparing conveyance instruments, notary fees, preparing surveys and plats, and recording fees.

(2) Lender, FHA or VA appraisal fees.

(3) FHA or VA application fee.

(4) Certification of structural soundness when required by the lender.

(5) Credit report.

(6) Owner's and mortgagee's evidence or assurance of title.

(7) Escrow agent's fee.

(8) State revenue or documentary stamps, sales or transfer taxes (not to exceed the costs for a comparable replacement dwelling).

(9) Such other costs as the Agency determines to be incidental to the purchase.

§ 25.402 Replacement housing payment for 90-day occupants.

(a) *Eligibility.* A tenant or owner-occupant displaced from a dwelling is entitled to a payment not to exceed $4,000 for rental assistance, as computed in accordance with paragraph (b) of this section, or downpayment assistance, as computed in accordance with paragraph (c) of this section, if such displaced person—

(1) Has actually and lawfully occupied the displacement dwelling for at least 90 days immediately prior to the initiation of negotiations;

(2) Is not eligible to receive a replacement housing payment for a 180-day homeowner-occupant under § 25.401; and

(3) Has rented, or purchased, and occupied a decent, safe, and sanitary replacement dwelling within one year after—

(i) In the case of a tenant, the date he or she moves from the displacement dwelling; or

(ii) In the case of an owner-occupant, the later of—

(A) The date he or she receives final payment for the displacement dwelling, or, in the case of condemnation, the date the required amount is deposited in the court; or

(B) The date he or she moves from the displacement dwelling.

However, the Agency may extend this one-year period for good cause.

(b) *Rental assistance payment.*(1) *Amount of payment.* An eligible displaced person who rents the replacement dwelling is entitled to a payment up to, but not to exceed, $4,000 for rental assistance. Such payment shall be 48 times the amount, if any, obtained by subtracting the base monthly housing cost for the displacement dwelling, as determined in

accordance with paragraph (b)(2) of this section, from the lesser of—

(i) The monthly rent and utility charges (one-twelfth of the estimated reasonable annual charges for heat, hot water, lighting, water and sewer) for a comparable replacement dwelling; or

(ii) The monthly rent and utility charges for the decent, safe, and sanitary replacement dwelling actually occupied by the displaced person

(2) *Base monthly housing cost.* The base monthly housing cost for the displacement dwelling is the lesser of—

(i) The average monthly cost for rent and utilities for a reasonable period prior to displacement, as determined by the Agency. For an owner-occupant or person who pays only a nominal rent, the average monthly cost for rent shall be the fair market rent; or

(ii) Thirty (30) percent of gross household income (the gross monthly income of the head of the household, his or her spouse, and any other members of the household who are over 18 years of age).

(3) *Manner of disbursement.* The payment under this section shall be disbursed in a lump sum amount unless the Agency determines on a case-by-case basis, for good cause, that the payment should be made in installments.

(c) *Downpayment assistance payment.* (1) *Amount of payment.* An eligible displaced person who purchases the replacement dwelling is entitled to a payment for downpayment assistance up to, but not to exceed, $4,000. Such payment shall be the full amount of the first, $2,000 of the required downpayment and incidental expenses computed under § 25.401(e) plus one-half of any amount required over $2,000. However, the total payment by the Agency shall not exceed $4,000.

(2) *Required downpayment.* For purposes of this section, the term "required downpayment" means the downpayment ordinarily required to obtain conventional loan financing for the decent, safe, and sanitary dwelling actually purchased and occupied. However, if the downpayment actually required of a displaced person for the purchase of the replacement dwelling exceeds the amount ordinarily required, the amount of the "required downpayment" shall be the amount which the Agency determines is necessary for the downpayment.

(3) *Application of payment.* The full amount of the replacement housing payment for downpayment assistance must be applied to the purchase price of the replacement dwelling and related incidental expenses.

§ 25.403 Additional rules governing replacement housing payments.

(a) *Determining cost of comparable replacement dwelling.* The upper limit of a replacement housing payment shall be based on the actual cost of a representative comparable replacement dwelling (defined at § 25.10(c)) which has actually been offered to the person to be displaced.

(1) If available, at least three representative comparable replacement dwellings shall be examined and the payment computed on the basis of the dwelling most nearly representative of, and equal to or better than, the displacement dwelling. An adjustment shall be made to the asking price of any dwelling, if such an adjustment is considered appropriate by the Agency, e.g., local market conditions. An obviously overpriced dwelling may be ignored.

(2) If the site of the comparable replacement dwelling lacks a major attribute of the displacement dwelling site, e.g., it is significantly smaller or does not contain a swimming pool, the value of such attribute shall be subtracted from the purchase price of the displacement dwelling for purposes of computing the payment.

(3) To the extent feasible, comparable replacement dwellings shall be selected from the neighborhood in which the displacement dwelling was located or in nearby neighborhoods where housing costs are generally the same or higher.

(b) *Inspection of replacement dwelling.* Before making a replacement housing payment or releasing a payment from escrow, the Agency or its designated representative shall inspect the replacement dwelling and determine whether it is a decent, safe, and sanitary dwelling as defined at § 25.10(d).

(c) *Owner of displacement dwelling.* A displaced person is considered to have met the requirement to own a displacement dwelling if the person holds any of the following interests in real property acquired for the project:

(1) Fee title, a life estate, a 99-year lease, or a lease, including any options for extension, with at least 50 years to run from the date of acquisition; or

(2) An interest in a cooperative housing project which includes the right to occupy a dwelling; or

(3) A contract to purchase any of the interests or estates described in subparagraphs (1) or (2) of this paragraph; or

(4) Any interest which in the judgment of the Agency warrants consideration as ownership.

(d) *Purchase of replacement dwelling.* A displaced person is considered to have met the requirement to purchase a replacement dwelling, if the person—

(1) Purchases a dwelling; or

(2) Purchases and rehabilitates a substandard dwelling; or

(3) Relocates a dwelling which he or she owns or purchases; or

(4) Constructs a dwelling on a site he or she owns or purchases; or

(5) Contracts for the purchase or construction of a dwelling on a site provided by a builder or on a site the person owns or purchases.

(e) *Delay in occupancy after purchase of replacement dwelling.* If the displaced person initially occupies the replacement dwelling after the date by which occupancy is required, but the delay beyond such date is caused by reasons beyond the person's control, the occupancy requirement shall be considered to be satisfied.

(f) *Presidentially declared disaster.* No person shall be denied eligibility for a replacement housing payment solely because he or she is unable, because of a major disaster as determined by the President, to meet the occupancy requirements set forth in the regulations in this part.

(g) *Conversion of payment.* A 180-day owner-occupant who initially rents a replacement dwelling and receives a rental assistance payment under § 25.402(b) is eligible to receive a payment under § 25.401 if he or she meets the eligibility criteria described at § 25.401(a), including purchase and occupancy within the prescribed one-year period. Any portion of the rental assistance payment that has been disbursed shall be deducted from the payment computed under § 25.401.

(h) *Payment after death.* A replacement housing payment is personal to the displaced person and upon his or her death the undisbursed portion of any such payment shall not be paid to the heirs or assigns, except that—

(1) The amount attributable to the displaced person's actual occupancy of the replacement housing shall be paid;

(2) The full payment shall be disbursed in any case in which a member of a displaced family dies and the other family members continue to occupy the replacement dwelling selected in accordance with these regulations; and

(3) Any portion of a replacement housing payment necessary to satisfy the legal obligation of an estate in connection with the selection of a replacement dwelling by or on behalf of a deceased person shall be disbursed to the estate.

Subpart F—Mobile Homes

§ 25.501 Applicability.

This Subpart describes the requirements governing the provision of relocation payments for a person displaced from a mobile home or mobile home site who meets the basic eligibility requirements of these regulations. Except as modified by this Subpart, such a displaced person is entitled to a moving expense payment in accordance with Subpart D and a replacement housing payment in accordance with Subpart E to the same extent and subject to the same requirements as persons displaced from conventional dwellings.

§ 25.502 Moving and related expenses—mobile homes.

(a) *General.* A tenant or owner-occupant displaced from a mobile home or mobile home site is entitled to a payment for the cost of moving his or her personal property on an actual cost basis in accordance with § 25.302 or, as an alternative, on the basis of a fixed payment under § 25.302 as described in the applicable Agency schedule.

(1) If a displaced mobile homeowner files a claim for actual moving expenses for moving the mobile home to a replacement site, the reasonable cost of disassembly, moving and reassembly of any attached appurtenances (such as porches, decks, skirting and awnings) which were not acquired, anchoring of the unit and utility "hook-up" charges are reimbursable.

(2) If the mobile home is not acquired but the owner obtains a replacement housing payment under one of the circumstances described at § 25.503(c), the owner is not eligible for payment of moving expenses under Subpart D for moving the mobile home.

(b) *Mobile home part entrance fee.* A displaced mobile home occupant, who elects to obtain a moving expense payment on an actual cost basis in accordance with § 25.301, is entitled to payment for the reasonable entrance fee that the person must pay in order to relocate to a mobile home park. However, no part of an entrance fee (such as a security deposit) which is returnable to the person shall be paid.

§ 25.503 Replacement housing payment for 180-day mobile home owner-occupants.

A displaced owner-occupant of a moble home is entitled to a replacement housing payment not to exceed $15,000 under § 25.401 if—

(a) The person both owned the displacement mobile home and occupied it on the displacement site for at least 180 days immediately prior to the initiation negotiations.

(b) The person meets the other basic eligibility requirements at §25.401(a); and

(c) The Agency acquires the mobile home as real property, *or* the mobile home is not acquired by the Agency but the person is displaced because the mobile home—

(1) Is not decent, safe, and sanitary; or

(2) Cannot be moved without substantial damage or unreasonable cost; or

(3) Cannot be moved because there is no available comparable replacement site; or

(4) Cannot be moved because it does not meet mobile home park entrance requirements.

(When the mobile home is not actually acquired, the acquisition price of the displacement dwelling used for the purpose of computing the price differential amount (described at § 25.401(c)) shall include the salvage value or trade-in value of the mobile home, whichever is higher.)

§ 25.504 Replacement housing payments for 90-day mobile home occupants.

A displaced occupant of a mobile home is eligible for a replacement housing payment, not to exceed $4,000, under §25.402 if—

(a) The person actually occupied the displacement mobile home on the displacement site for at least 90 days immediately prior to the initiation of negotiations;

(b) The person meets the other basic eligibility requirements at § 25.402(A); and

(c) The Agency acquired the mobile home as real property, *or* the mobile home is not acquired by the Agency but the person is displaced from the mobile home because of one of the circumstances described at § 25.503(c).

§25.505 Additional rules governing relocation payments to mobile home occupants.

(a) *Persons with both an ownership and tenant interest.* A displaced mobile home occupant may have owned the displacement mobile home and rented the site or have rented the displacement mobile home and owned the site. Also, a person may elect to purchase a replacement mobile home and rent a replacement site, or rent a replacement mobile home and purchase a replacement site. In such case, the total replacement housing payment shall consist of a payment for dwelling and a payment for a site, each computed under the applicable section in Subpart E. However, the total replacement housing payment to a person shall not exceed the maximum payment (either $15,000 or $4,000) permitted under the section that governs the computation for the dwelling.

(b) *Comparable replacement dwelling.* When computing the amount of a replacement housing payment for a person displaced from a mobile home, the cost of a comparable replacement dwelling is the reasonable cost of a comparable replacement mobile home. This applies whether the displaced person's replacement dwelling is another mobile home or a conventional home. However, if a comparable replacement mobile home is not available, the replacement housing payment shall be computed on the basis of the reasonable cost of a comparable conventional dwelling.

(c) *"Initiation of negotiations."* If the mobile home is not actually acquired, but the occupant is considered displaced under these regulations, the "initiation of negotiations" shall be the date of the initiation of negotiations to acquire the land or, if the land is not acquired, the date prescribed by the Agency. The date prescribed by the Agency shall not be later than its notice to vacate the property.

(d) *Mobile home pad.* A "comparable replacement site" shall include a mobile home pad if the displacement site has a mobile home pad or applicable housing codes require a pad.

(e) *Person moves mobile home.* If the owner is reimbursed for the cost of moving the mobile home under these regulations, he or she is not eligible to receive a replacement housing payment to assist in purchasing or renting a replacement mobile home. The person may, however, be eligible for assistance in purchasing or renting a replacement site.

(f) *Partial acquisition of mobile home park.* The acquisition of a portion of a mobile home park property may leave a remaining part of the property that is not adequate to continue the operation of the park. If the Agency determines that a mobile home occupant located in the remaining part of the property is required to move, such an occupant shall be considered displaced by the project and entitled to the relocation payments and other assistance in these regulations.

Subpart G—Last Resort Housing

§ 25.601 Applicability.

(a) *Basic determination to provide last resort housing.* Under these regulations a person cannot be required to move from his or her dwelling unless

at least one comparable replacement dwelling is made available to the person. In some cases, a replacement housing payment under Subpart E is not sufficient to provide such housing and additional measures may be needed. Therefore, an Agency is authorized to take additional measures whenever it determines that, unless it does so, there is a reasonable likelihood that the project will not be able to proceed to completion in a timely manner because no comparable replacement dwelling will be available on a timely basis to a person to be displaced. The agency's obligation to ensure that a comparable replacement dwelling is available shall be met when such a dwelling, or assistance necessary to provide such a dwelling, is offered under the provisions of this Subpart.

(b) *Basic rights of persons to be displaced.* The provisions of this Subpart do not deprive any displaced person of any rights the person may have under the Uniform Act or any implementing regulations. The Agency shall not require any displaced person, without the person's written consent, to accept a dwelling provided by the Agency under the procedures in this Subpart in lieu of any acquisition payment or any relocation payment for which the person may otherwise be eligible. A 180-day homeowner-occupant who is eligible for a payment under § 25.401 is entitled to a reasonable opportunity to purchase a comparable replacement dwelling.

§ 25.602 Methods of providing replacement housing.

Agencies shall have broad latitude in implementing this Subpart, but implementation shall be on a reasonable cost basis. The methods of providing last resort housing include, but are not limited to:

(a) Rehabilitation of and/or additions to, an existing replacement dwelling;

(b) The construction of a new replacement dwelling;

(c) The provision of a direct loan, which requires regular amortization or deferred repayment. The loan may be unsecured or secured by the real property. The loan may bear interest or be interest free.

(d) A replacement housing payment in excess of the limits set forth in § 25.401 or § 25.402. (A rental assistance subsidy under this Subpart may be provided in installments);

(e) The relocation and, if necessary, rehabilitiation of a replacement dwelling;

(f) The purchase of land and/or a replacement dwelling by the displacing agency and subsequent sale or lease to, or exchange with, a displaced person; and/or

(g) The removal of barriers to the handicapped.

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Surface Mining and Reclamation Operations Under a Federal Program; Idaho

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 912

Surface Mining and Reclamation Operations Under a Federal Program for Idaho

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) of the Department of the Interior promulgates a Federal program for regulation of coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands in Idaho. This includes surface effects of underground coal mining. This program is necessary in order to regulate surface coal mining activities in the absence of a State program.

DATE: Effective date, May 16, 1983.

ADDRESSES: Documents in the Administrative Record are available for public review and copying during regular business hours at the Office of Surface Mining, Wyoming Field Office, 935 Pendell Blvd., Room 07, Mills, Wyoming 82644, or the Administrative Record Room, Office of Surface Mining, 1100 L Street, NW., Washington, D.C. Copies of the proposed and final rule may also be obtained by mail from the Office of Surface Mining, Wyoming Field Office, P.O. Box 1420, Mills, Wyoming 82644, or from the Office of Surface Mining, Administrative Record, 1951 Constitution Avenue, NW., Washington, DC 20240. Copies of the proposed and final rule may also be obtained at either location.

FOR FURTHER INFORMATION CONTACT: James M. Kress, Office of Surface Mining, Branch of Regulatory Programs, Room 222, 1951 Constitution Avenue, NW., Washington, D.C. 20240, telephone: (202) 343–5866, or Gene Filer, Office of Surface Mining, Wyoming Field Office, P.O. Box 1420, Mills, WY 82644, telephone (307) 328–5778.

SUPPLEMENTARY INFORMATION:

Availability of Copies

Copies of the proposed program are available for inspection and may be obtained at the OSM offices listed above under "**ADDRESSES.**"

Background

Under Section 504(a) of the Surface Mining Control and Reclamation Act of 1977 (the Act), Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*, the Secretary of the Interior (the Secretary) is required to promulgate a Federal program within 34 months after passage of the Act if a State fails to submit a program to assume responsibility for regulating surface mining activities, fails to resubmit a program within 60 days of disapproval, or fails at any time to implement, enforce, or maintain an approved State program. The time for submitting State programs was extended by seven months to March 3, 1980, as the result of litigation, *In re: Permanent Surface Mining Regulation Litigation*, 13 Envir. Rep. Cas. 1447 (July 25, 1979). The date for the required implementation of a Federal program in any State which did not submit a program to obtain primary regulatory responsibility has passed.

Once a decision has been made that a Federal program is necessary for a State, the Secretary must make several determinations before promulgating a program. Section 504(a) of the Act requires that, in implementing a Federal program, the Secretary must take into consideration the nature of the State's terrain, climate, biological, chemical, and other relevant physical conditions. This requirement is also found in the regulations for Federal programs, 30 CFR 736.22(a)(1). The Act (Section 505(b)) and the regulations (Section 736.23(b)) also provide that if a State has more stringent land use and environmental laws or regulations, they shall not be construed to be inconsistent with the Act or the Secretary's regulations. The Secretary believes that the requirements of Section 505(b) can best be met by identifying State laws and regulations which impose more stringent environmental controls and listing them in this Federal program. If the State's laws or regulations establish more stringent standards than those of the Act or the Secretary's regulations, or if the State regulates or protects an aspect of the environment which neither the Act nor the Secretary's regulations protect, OSM would then specifically preserve those State Standards in the Federal program. However, by identifying more stringent State environmental controls in a Federal program, OSM would not be assuming any responsibility for enforcing such State laws. That would be left to the State.

Also, in promulgating a program for a State, Section 504(g) specifies that any State statutes or regulations which regulate surface mining and reclamation operations are to be identified by the Secretary and will be superseded and preempted to the extent that they interfere with the achievement of the purposes and requirements of the Act and Federal program. This provision is reinforced by Section 505(a) of the Act which states that only inconsistent State laws shall be superseded by the Federal program. Thus, State statutes and rules regulating the same activities as those covered by the Federal law and regulations and which do not provide as much protection as do the Federal law and regulations are considered to interfere with achievement of the purposes of the Act. Accordingly, they must be identified and preempted by OSM.

Federal programs are based on the Secretary's permanent program regulations. 30 CFR Subchapters A, F, G, J, K, L, and M. The permanent program regulations implement the procedures and performance standards of the Act. They form the benchmark for State programs. In order for a State to have a program approved by the Secretary, Section 503(a)(7) requires that the State's rules and regulations be consistent with the Secretary's regulations.

Pursuant to Section 504(a), the Secretary becomes the regulatory authority when a Federal program is implemented for a State. The permanent program regulations contain references to "the regulatory authority" and to "the State regulatory authority," both of which mean the Secretary when a Federal program is involved. Section 701(22) of the Act. The Secretary has delegated all authority for surface coal mining activities to the Director of the Office of Surface Mining (the Director), who is the official responsible for implementing the Washington Federal program.

The parts of the permanent program regulations that must be included in a Federal program are listed in the regulations, 30 CFR 736.22(b). They include general requirements and definitions (Parts 700 and 701), the exemption for coal extraction incident to government-financed highway or other construction (Part 707), the designation of lands unsuitable for surface mining (Parts 780, 761, 762 and 765), permits and permit applications (Subchapter G), reclamation bonding (Subchapter J), performance standards (Subchapter K), inspection and enforcement (Parts 842, 843 and 845), and blaster training and certification (Subchapter M). In addition, the provisions in the permanent regulations on protection of employees (Subchapter P) and restrictions on financial interests (Part 706) are applicable to Federal employees who, in the instance of a Federal program, are directly enforcing the Act.

The rules for the permanent program are found in 30 CFR Parts 700–707 and 730–865. Part 705 was published October 20, 1977 (42 FR 56060). Parts 795 and 865 (originally Part 830) were published December 13, 1977 (42 FR 62639). The other permanent program regulations were published at 44 FR 15323–15463 (March 13, 1979). Subchapter M was published on December 12, 1980 (45 FR 82098). Corrections were published at 44 FR 15485 (March 14, 1979); 44 FR 53507–53509 (September 14, 1979); 44 FR 66195 (November 19, 1979); 45 FR 26001 (April 16, 1980); 45 FR 37818 (June 5, 1980); and 45 FR 47424 (July 15, 1980). Amendments to the rules have been published at 44 FR 60969 (October 22, 1979) as corrected at 44 FR 75143 (December 19, 1979); at 44 FR 77440–77445 (December 31, 1979); 45 FR 2626–2629 (January 11, 1980); 45 FR 25998–26001 (April 16, 1980); 45 FR 33926–33927 (May 20, 1980); 45 FR 39446–39447 (June 10, 1980); 45 FR 52306–52324 (August 6, 1980); 45 FR 52375 (August 7, 1980); 45 FR 58780–58786 (September 4, 1980); and 45 FR 76932 (November 20, 1980); 46 FR 37232 (July 17, 1981); 46 FR 41702 (August 17, 1981); 46 FR 47720 (September 29, 1981); 46 FR 53376 (October 28, 1981); 46 FR 59934 (December 7, 1981); 47 FR 32942 (July 30, 1982); 47 FR 33481 (August 2, 1982); 47 FR 35620 (August 16, 1982); 47 FR 38486 (August 31, 1982); 47 FR 44942 (October 12, 1982); 47 FR 47212 (October 22, 1982); 47 FR 51316 (November 13, 1982); 48 FR 1166 (January 10, 1983); 48 FR 2286 (January 18, 1983); and 48 FR 9199 (March 3, 1983).

Representatives of industry, two States and several environmental groups challenged the permanent regulatory program in the U.S. District Court for the District of Columbia. These suits were consolidated and heard in a single lawsuit entitled *In Re: Permanent Surface Mining Regulation Litigation* (Civil Action No. 79–1144). In response to the arguments raised in the challenges, the Secretary voluntarily suspended several permanent program regulations. These suspensions were announced in the **Federal Register** on November 27, 1979 (44 FR 67942); December 31, 1979 (44 FR 77447–77454); January 30, 1980 (45 FR 6913); and August 4, 1980 (45 FR 51547–51550). In two opinions the court remanded certain other regulations which had been challenged in the lawsuit. These opinions were issued on February 26, 1980, and May 16, 1980. Many of the issues decided by the District Court were appealed to the Court of Appeals for the District of Columbia Circuit. *In Re: Permanent Surface Mining Regulation Litigation*, Nos. 80–1810, 80–1811, 80–1812, 80–1813 and 80–1823. The appeals were remanded to the District Court for the District of Columbia on February 1, 1983, in order for the issues to be reconsidered in light of revision of the permanent program rules discussed below.

Idaho Federal Program

On July 12, 1982, the Office of Surface Mining proposed a Federal program to regulate coal exploration and surface coal mining in Idaho. 47 FR 30214. The proposed public hearing in the State was cancelled. OSM is promulgating a final Federal regulatory program because there are coal deposits located on non-Federal and non-Indian lands which can be economically extracted, and the State has failed to submit a regulatory program for approval.

As mentioned above, when promulgating a Federal program for a State, OSM is required by Section 504(a) of the Act to take into consideration the nature of the terrain, climate, biological, chemical, and other relevant physical conditions of that State. OSM reviewed Idaho's laws and regulations to determine whether they suggest that special provisions may be necessary or appropriate based on special terrain or other physical conditions in the State. OSM believes that there are Idaho statutes which, in certain circumstances, impose stricter environmental controls than are provided under the Act or the Federal regulations. Those statutes are listed in § 912.700(e).

Pursuant to Section 504(a), the Secretary becomes the regulatory authority when a Federal program is implemented for a State. OSM's permanent program regulations contain references to "the regulatory authority" and to "the State regulatory authority," both of which mean the Secretary when a Federal program for a State is involved. Section 701(22) of the Act. The Secretary has delegated all authority for regulating surface coal mining, activities to the Director of the Office of Surface Mining, and the promulgation of this Federal program for Idaho does not change that delegation.

Explanation of Cross-Referencing

To take advantage of the results which revision of the permanent program regulations will achieve, OSM has developed and promulgated this Federal program in the following manner. Rather than repeating the full text of the permanent regulations, there is instead only a cross-reference to the appropriate permanent program regulations. For example, criteria for the designation of lands unsuitable for surface coal mining are provided by making the criteria in 30 CFR Part 762 applicable to this program (see § 912.762).

One effect of the cross-referencing to the permanent program regulations is that as the permanent program regulations are revised, this Federal program will be similarly revised. Over time, all of the permanent program regulations will be reviewed and many will be revised. No separate rulemaking will be undertaken or necessary for revision of this program, however, unless OSM determines that special conditions are present which necessitate different rules for Idaho. In any case, the promulgation of this cross-referencing Federal program would not result in any modification of the substance of OSM's permanent program rules.

In the general notice of intent to promulgate Federal programs of May 16, 1980 (45 FR 32228), it was stated that each Federal program would be specific to the particular State and would implement the permanent program procedures and environmental protection provisions of the Act (45 FR at 32229). However, except for changes to incorporate more stringent State environmental protection standards and to list other State laws requiring permits for which coordination is required, OSM believes that few changes are needed in the permanent program regulations for any particular State for which a Federal program must be promulgated.

A notice concerning both the proposed and final permanent program rules appeared on July 13, 1982, in connection with the availability of a draft supplemental environmental impact statement on the permanent program rules. 47 FR 30266–67. It advised the public that any change in a permanent program rule would also result in a corresponding change in this program, absent special conditions. The statement invited comments on necessary modifications to accommodate unique or unusual aspects of surface mining in any Federal program State so that the Federal program for such a State could be tailored as necessary.

Several provisions of the permanent program regulations are already applicable to all Federal programs because they were fully promulgated for application to all regulatory programs and, therefore, need not be cross-referenced here. Those provisions are 30 CFR Chapter VII, Subchapter P—Protection of Employees; Part 706—Restrictions on Financial Interests of Federal Employees; and Part 769—Petition Process for Designation of Federal Lands Unsuitable for Surface

Coal Mining. 30 CFR Part 764—Designating Lands Unsuitable for Surface Coal Mining has been included in this program by a cross-reference under § 912.764, to provide a petition process on non-Federal lands in Idaho. Also, Part 760 has not been included because its provisions do not provide any substantive requirements. Instead, they impose requirements on the Secretary and his delegates which need not be incorporated in each Federal program. Part 765 was also not included because it is directly applicable to a Federal program State without being incorporated or cross-referenced.

With regard to bonding regulations (Subchapter J), only Part 800 is cross-referenced because OSM has proposed to revise Subchapter J to include just one part, Part 800. 46 FR 45082 (September 9, 1981). Should the Idaho Federal program become effective before the final rule notice revising the bonding regulations appears, and the bonding rules not be revised by the time a permit under this Federal program is to be issued, as a condition of issuance of that permit the applicant will be required to abide by the then-effective bonding rules until such rules are superseded.

Content and Organization of the Program

The content and organization of the Idaho Federal program generally follow the permanent program regulations. However, as discussed above, instead of the full text appearing, each section of the Idaho Federal program includes only a reference to the pertinent permanent program regulations.

Sections 912.700 (e) and (f), respectively, list State statutes that are more stringent than and those that are inconsistent with the Act. Where specific provisions are needed for Idaho that are different from the permanent program regulations, a separate statement has been added to the appropriate section of this Federal program.

To fulfill the Secretary's obligation under Section 504(a) of the Act to take into consideration the nature of the terrain, climate, biological, chemical, and other relevant physical conditions of each State, Idaho laws were reviewed. OSM believes there are Idaho statutes which, in certain circumstances, impose stricter environmental controls than are provided for under the Act or the Federal regulations. The Idaho laws which OSM has identified as setting more stringent land use and environmental controls for surface mining are listed in § 912.700(e), and are summarized as follows:

(a) Idaho Code Section 47–1503(20) defines "operator" to include those who engage in surface mining or exploration operations. This definition of operator is broader than that contained in OSM's regulation, 30 CFR 701.5.

(b) Idaho Code Section 47–1509(c) requires every operator who conducts exploration or surface mining operations which disturb less than two acres to return the land to the approximate original contour whenever possible. Section 528(2) of the Act exempts from OSM regulation those surface mining operations affecting two acres or less.

(c) Idaho Code Section 47–1513(c) provides for the assessment against an operator, in certain circumstances, of a civil penalty in the amount of the anticipated cost of reclamation; 30 CFR Part 843 contains no such provision.

(d) Idaho Code Section 47–1513 (f) and (g) provide for the assessment of civil penalties in the amount of $100 to $1,000 per day, in addition to bond forfeiture, in certain circumstances; 30 CFR 843 and 845 contain no such provision.

(e) Idaho Code Sections 47–1301—47–1324 and Rules 1 through 20 promulgated thereunder regulate the practice of dredge mining, which is not specifically addressed by the Federal Act.

(f) Idaho Code Section 18–4301 provides that interference with ditches, canals, or reservoirs used for several purposes, including mining, is punishable as a misdemeanor. Neither the Act nor permanent regulations contain such a provision.

(g) Idaho Code Section 18–7019 provides for criminal sanctions for willful or malicious interference with structures used to conduct water for mining and other purposes. Neither the Act nor permanent regulations contain such a provision.

(h) Idaho Code Section 42–1713 requires a fee to be paid by each owner of a dam, reservoir, or mine tailing impoundment structure. 30 CFR 816.49, 816.91–93, 817.49 and 817.91–.93 do not require payment of such a fee.

(i) Idaho Code Section 42–1718 (Supp.) provides that the State costs and expenses of work done to render a dam, impounding structure, or its appurtenance facility safe, shall be recoverable by the State from the owner. 30 CFR 816.49, 816 .91–.93, 817.49, and 817 .91–93 contain no such provision.

In accordance with 30 CFR 736.23, OSM believes that the Idaho statute and rules listed in Section 912.700(f) of this Federal program interfere with the achievement of the goals and purposes of the Act, and the permanent program rules thereunder. Thus, OSM is preempting the following Idaho statute and rules insofar as they apply to coal mining on the effective date of this Federal program except as they pertain to operations affecting two acres or less, or which otherwise are not regulated by the Surface Mining Control and Reclamation Act:

Idaho Surface Mining Act, Sections 47–1501—47–1528, as amended, and all regulations thereunder. However, Sections 47–1503(20), 47–1509(c), 97–1513(c), and 47–1513 (f) and (g), and all regulations issued thereunder, as specified in Section 912.700(e) of this Federal program, are not preempted and superseded, as they have been found to be more stringent than the Act and permanent program rules. By superseding the State's Surface Mining Act, OSM becomes the permitting authority for surface coal mining and exploration under the program promulgated here.

The Idaho Surface Mining Act represents the main body of Idaho law relating to mined land reclamation and to the exploration or surface mining of minerals. Although Idaho requires, to a limited extent, the reclamation of surface mined lands, review of the above Idaho statute and rules indicates that they are not consistent with the Act or the premanent program rules, and that they interfere with the achievement of the goals and purposes expressed in the Act insofar as they pertain to coal. Thus, the Idaho statute and rules described above will no longer be applicable to the regulation of coal exploration or to surface coal mining and reclamation in Idaho, except as they pertain to operations affecting two acres or less or which otherwise are not regulated by the Surface Mining Control and Reclamation Act. Their applicability to the mining of minerals other than coal is not affected by this action.

OSM had proposed to preempt a number of Idaho laws. See proposed § 912.700(f) (2)–(3), 47 FR 30218–30219. However, it is OSM's policy not to supersede State laws unless absolutely necessary. Further review of those State laws has led OSM to conclude that they would not necessarily interfere with achievement of the purposes and goals of the program and need not be superseded; therefore, they are not being preempted in this final rule notice.

To coordinate the Federal program permitting process under the Act with the permitting requirements imposed by other Federal statutes and by Idaho, § 912.700(b) of the Idaho Federal program identifies the various permits, statutes, and rules which may, expressly or by implication, impact on surface coal mining and reclamation and coal exploration. The pertinent permits, statutes, and rules follow:

(a) Idaho Code Sections 47–1317, 47–1318, 47–1319, and 47–1317 (Supp.), provide for the permitting of dredge mining operations.

(b) Idaho Code Section 39–101 *et seq.* (Supp.), Environmental Protection and Health Act of 1972, and regulations promulgated thereunder, address issuance and regulation of pollution source permits.

(c) Idaho Code Section 47–704 addresses the leases of mineral rights on State lands.

Coordination of these permitting requirements under State law with the issuance of a surface mining permit by OSM is achieved under § 912.700(b) by stipulating that no person may conduct exploration or mining, except with the applicable State permits.

OSM has removed Part 850 from the permanent program rules. To ensure that blaster training and certification is preserved in States with Federal programs, OSM will promulgate standards for blaster training and certification at a later date.

Copies of the Idaho Surface Mining Act, as amended, and the other Idaho statutes referred to herein are in the administrative record, and are available for review at the place listed above under *"ADDRESSES."*

Disposition of Comments

Comments on the proposed Idaho Federal program were received solely from the Office of the Attorney General, State of Idaho.

1. The Attorney General commented that §§ 912.770 and 912.776, concerning coal exploration, may be construed to inhibit or prevent exploration for minerals other than coal.

The Surface Mining Control and Reclamation Act of 1977 and regulations promulgated thereunder regulate only "surface coal mining operations," as defined in Section 701(28) of the Act. Thus, neither §§ 912.770 and 912.776 nor the other provisions of the Idaho Federal program apply to mining of, or exploration for, minerals other than coal.

2. The Attorney General additionally expressed concern that proposed §§ 912.761, 912.762, and 912.764, which implement Section 522 of the Act, could preclude coal leasing on State trust lands.

Section 522 of the Act establishes a procedure under which citizens may petition to designate areas unsuitable for all or certain types of coal mining, thereby enabling the State and Federal governments to respond to conflicts which could arise between coal mining and other uses of the land. Under certain circumstances, surface coal mining operations on specific State trust lands could be prohibited if such lands are covered by the Congressionally mandated prohibitions described in § 912.761, or if these lands are designated as unsuitable for surface mining pursuant to § 912.764. Idaho agencies will have the opportunity to participate in the consideration of any petition submitted under § 912.764.

3. The Attorney General further commented that the preemption of Title 47, Chapter 7 of the Idaho Code would preclude the State from exercising remedies of injunction, cancellation of State leases, etc., in the event of exploration or coal mining on State trust lands without a bond or lease.

As noted in Comment 4 and OSM's response to it, Idaho Code Sections 47–701, 47–702, 47–703, and 47–718 (1981 Session Laws), which cover regulation of coal leasing on State trust lands, will not be preempted or superseded by this Federal program. The State will therefore not be prevented from exercising its available enforcement remedies under Chapter 7 of Title 47 concerning coal leasing on State trust lands. All requirements of Idaho law applicable to coal leasing on State trust lands will be preserved by this Federal program.

4. The Attorney General commented that proposed § 912.700(f)(5), which would have preempted Idaho Code Sections 47–701, 47–702, 47–703, and 47–718 (1981 Session Laws), would have prevented the State from using these enforcement mechanisms in the regulation of coal leasing on State trust lands. The Attorney General suggested that the State of Idaho should retain concurrent jurisdiction over coal leasing on State trust lands.

OSM agrees and has deleted § 912.700(f)(5) from the final rule.

Section 504(g) of the Act specifies that any State statutes or regulations which regulate surface coal mining and reclamation operations subject to the Act shall be superseded and preempted by the Federal program to the extent that they interfere with the achievement of the purposes and requirements of the Act and the Federal program. Proposed § 912.700(f)(5) stated that, except for application to surface coal mining operations affecting two acres or less, Idaho Code Section 47–701, 47–702, 47–703, and 47–718 (1981 Session Laws) would be preempted and superseded, except Sections 47–703A, 47–718(1)(b), and 47–718(3). The preamble indicated that this preemption was necessary because Chapter 345 was less stringent than the Act and the permanent program rules thereunder, and would therefore interfere with the achievement of the purposes and goals of the Federal Act and program. OSM now believes the enforcement measures in 47–718 would not so interfere. The underlying State laws, of which enforcement is now preserved, Sections 47–701, 47–702, and 47–703, have not been superseded because they pertain to the legal rights of persons exploring for coal on State lands and not to the manner in which exploration is conducted.

OSM has also revised its earlier determination in Section 912.700(e)(11) that Idaho Code Section 47–718(3) was more stringent than Section 518 of the Act in providing for the assessment of a civil penalty. As pointed out in the comments, Idaho Code Section 47–701 *et seq.*, regulates the administration of coal leasing on State trust lands. It is not necessary to make a determination as to the stringency of Idaho Code Section 47–718(3) because State jurisdiction over coal leasing on State trust lands is not affected by this Federal program. Therefore, proposed Section 912.700(e)(11) has been deleted.

Further, OSM believes that preemption of Idaho Code Sections 47–701, 47–702, 47–703, and 47–718 (1981 Session Laws) would unnecessarily interfere with the State's administration of coal leasing on such lands. Therefore, these sections have not been preempted or superseded, nor are State responsibilities under them affected by, the promulgation of this Federal program. However, any coal exploration or surface coal mining operations would be subject to regulation under the Federal program.

OMB Review

The recordkeeping and reporting requirements of the proposed rule are the same as those of the permanent program regulations, which have been approved by the Office of Management and Budget under 44 U.S.C. Section 3507. Although this rule contains information and recordkeeping requirements, OSM anticipates less than ten respondents. Under the Paperwork Reduction Act and the Federal Reports Act, clearance of information collection forms is required only if ten or more respondents are expected. If in the future the number of respondents appears to be increasing, the proper forms, if they differ from those already approved, will be submitted to the Office of Management and Budget with accompanying notices in the **Federal Register**, in accordance with the requirements of 44 U.S.C. Chapter 35.

Other Information

The information collection requirement(s) contained in §§ 912.764, 912.770 912.771, 912.795, and 912.800 do not require approval by the Office of Management and Budget under 44 U.S.C. 3507, because there are fewer than ten respondents annually.

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.)*

The reasons underlying this determination are as follows:

This Federal program would not result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or foreign markets; nor would it increase costs or prices for consumers, individual industries, Federal, State, or local governmental agencies or geographic regions. We further certify that there will be no significant demographic effects, direct costs, indirect costs, nonquantifiable costs, competitive effects, enforcement costs, or aggregate effects on small entities.

The Office of Surface Mining Reclamation and Enforcement has determined that this rule is categorically excluded from compliance with the National Environmental Policy Act in accordance with 40 CFR 1507.3.

Subjects Affected by Rulemaking

In accordance with the **Federal Register** rule at 1 CFR 18.20, which requires an identification of topics affected by a rule, OSM has identified the following subjects:

List of Subjects in 30 CFR Part 912

Coal mining, Intergovernmental relations, Surface mining, Underground mining, Reporting requirements.

Drafting Information

These regulations were drafted by William Larkin, Office of the Solicitor, and James M. Kress, Branch of Regulatory Programs, Office of Surface Mining.

Dated: March 21, 1983.

Daniel N. Miller, Jr.,

Assistant Secretary, Energy and Minerals.

Part 912 is added to 30 CFR Chapter VII to read as follows:

PART 912—IDAHO

Sec.

912.700 Idaho Federal Program.
912.701 General.
912.707 Exemption for coal extraction incident to Government-financed highway or other construction.
912.761 Areas designated unsuitable for surface coal mining by act of Congress.
912.762 Criteria for designating areas as unsuitable for surface coal mining operations.
912.764 Process for designating areas unsuitable for surface coal mining operations.
912.770 General requirements for permits and exploration procedures.
912.771 General requirements for permits and permit applications.
912.776 General requirements for coal exploration.
912.778 Surface mining permit applications—minimum requirements for legal, financial, compliance, and related information.
912.779 Surface mining permit applications—minimum requirements for information on environmental resources.
912.780 Surface mining permit applications—minimum requirements for reclamation and operation plan.
912.782 Underground mining permit applications—minimum requirements for legal, financial, compliance, and related information.
912.783 Underground mining permit applications—minimum requirements for information on environmental resources.
912.784 Underground mining permit applications—minimum requirements for reclamation and operation plan.
912.785 Requirements for permits for special categories of mining.
912.786 Review, public participation, and approval or disapproval of permit applications and permit terms and conditions.
912.787 Administrative and judicial review of decisions on permit applications.
912.788 Permit reviews, revisions, and renewals, and transfer, sale, and assignment of rights granted under permits.
912.795 Small operator assistance.
912.800 General requirements for bonding of surface coal mining and reclamation operations.
912.815 Performance Standards—coal exploration.
912.816 Performance Standards—surface mining activities.
912.817 Performance Standards—underground mining activities.
912.818 Special performance standards—concurrent surface and underground mining.
912.819 Special performance standards—auger mining.
912.822 Special performance standards—operations in alluvial valley floors.
912.823 Special performance standards—operations on prime farmland.
912.824 Special performance standards—mountaintop removal.
912.826 Special performance standards—operations on steep slopes.
912.827 Special performance standards—coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.
912.828 Special performance standards In Situ processing.
912.842 Federal inspections.
912.843 Federal enforcement.
912.845 Civil penalties.

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977. 30 U.S.C. 1201 *et seq.*, 91 Stat. 445.

§ 912.700 Idaho Federal Program.

(a) This part contains all rules that are applicable to surface coal mining operations in Idaho which have been adopted under the Surface Mining Control and Reclamation Act of 1977.

(b) The rules in this part cross-reference pertinent parts of the permanent program regulations in this chapter. The full text of a rule is in the permanent program rule cited under the relevant section of the Idaho Federal program.

(c) The rules in this part apply to all surface coal mining operations in Idaho conducted on non-Federal and non-Indian lands. The rules in Subchapter D of this chapter apply to operations on Federal lands in Idaho.

(d) The information collection requirements contained §§ 921.764, 921.770, 921.771, 921.795, and 921.800 part do not require approval by the Office of Management and Budget under 44 U.S.C. 3507 because there are fewer than ten respondents annually.

(e) The following provisions of Idaho laws provide, where applicable, for more stringent environmental control and regulation of surface coal mining operations than do the provisions of the Act and the regulations in this chapter. Therefore, pursuant to Section 505(b) of the Act, they shall not be construed to be inconsistent with the Act.

(1) Idaho Code Section 47–1503(20) pertaining to the definition of "operator."

(2) Idaho Code Section 47–1509(c) regarding reclamation of disturbed land of less than 2 acres.

(3) Idaho Code Section 47–1513(c) providing for assessment of anticipated costs of reclamation against an operator.

(4) Idaho Code Sections 47–1513 (f) and (g) providing for assessment of civil penalties in addition to bond forfeiture.

(5) Idaho Code Sections 47–1301 *et seq.* and Rules 1 through 20 promulgated thereunder pertaining to regulation of dredge mining.

(6) Idaho Code Sections 18–4301 and 18–7019 providing for punishment for interference with water sources used in mining operations.

(7) Idaho Code Section 42–1713 requiring a fee to be paid by each owner of a dam, reservoir or mine tailing impoundment structure.

(8) Idaho Code Section 42–1718 (Supp.) providing for assessment against an operator for costs incurred in correction deficiencies in dams and impoundment structures.

(f) The following Idaho statute and regulations interfere with the achievement of the purposes and goals of the Act. Therefore, in accordance with Section 504(g) of the Act, they are preempted and superseded with respect to surface coal mining and reclamation, except as they apply to surface coal mining operations affecting two acres or less, or which otherwise are not regulated by the Surface Mining Control and Reclamation Act:

The Idaho Surface Mining Act, Idaho Code Sections 47–1501—47–1524, as amended, and all regulations issued thereunder (with the exception of Sections 47–1503(20), 47–1509(c), 47–1513(c), and 47–1513 (f) and (g), and all regulations issued thereunder).

§ 912.701 General.

Sections 700.5, 700.11, 700.12, 700.13, 700.14, 700.15 and Part 701 of this chapter shall apply to surface coal mining and reclamation operations in Idaho.

§ 912.707 Exemption for coal extraction incident to Government-financed highway or other construction.

Part 707 of this chapter, Exemption for Coal Extraction Incident to Government-Financed Highway or Other Construction, shall apply to surface coal mining and reclamation operations.

§ 912.761 Areas designated unsuitable for surface coal mining by act of Congress.

Part 761 of this chapter, Areas Designated by Act of Congress, shall apply to surface coal mining and reclamation operations.

§ 912.762 Criteria for designating areas as unsuitable for surface coal mining operations.

Part 762 of this chapter, Criteria for Designating Areas Unsuitable for Surface Coal Mining Operations, shall apply to surface mining and reclamation operations.

§ 912.764 Process for designating areas unsuitable for surface coal mining operations.

Part 764 of this chapter, State Processes for Designating Areas Unsuitable for Surface Coal Mining Operations, pertaining to petitioning, initial processing, hearing requirements, decisions, data base and inventory systems, public information, and regulatory responsibilities shall apply to surface coal mining and reclamation operations.

§ 912.770 General requirements for permits and exploration procedures.

(a) Part 770 of this chapter, General Requirements for Permit Systems Under State Programs, shall apply to surface coal mining, reclamation, and exploration operations.

(b) Where applicable, no person shall conduct surface coal exploration operations which result in the removal of more than 250 tons in one location, or surface coal mining operations without permits issued and/or certificates required by the State of Idaho, pursuant to Idaho Code Sections 47–704, 47–1317, 47–1318, 47–1319, 47–1317 (Supp.), and 39–101 *et seq.* (Supp.).

§ 912.771 General requirements for permits and permit applications.

(a) Part 771 of this chapter, General Requirements for Permits and Permit Applications, shall apply to any person who makes application for a permit to conduct surface coal mining and reclamation operations.

(b) A person who wishes to conduct new surface coal mining and reclamation operations or who wishes a revision of his permit shall file a complete application at least 12 months prior to the date upon which permit issuance or revision is desired, and shall pay to the Secretary a permit fee in accordance with § 736.25 of this chapter.

§ 912.776 General requirements for coal exploration.

(a) Part 776 of this chapter, General Requirements for Coal Exploration, shall apply to any person who conducts or seeks to conduct coal exploration operations.

(b) The Office shall make every effort to act on an exploration application within 60 days of receipt or such longer time as may be reasonable under the circumstances. If additional time is needed, OSM shall notify the applicant that the application is being reviewed, but more time is necessary to complete such review, setting forth the reasons and the additional time that is needed.

§ 912.778 Surface mining permit applications—minimum requirements for legal, financial, compliance and related information.

Part 778 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Legal, Financial, Compliance, and Related Information, shall apply to any person who makes application for a permit to conduct surface coal mining and reclamation operations.

§ 912.779 Surface mining permit applications—minimum requirements for information on environmental resources.

Part 779 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Information on Environmental Resources, shall apply to any person who makes application to conduct surface coal mining and reclamation operations.

§ 912.780 Surface mining permit applications—minimum requirements for reclamation and operation plan.

Part 780 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Reclamation and Operation Plan, shall apply to any person who makes application to conduct surface coal mining and reclamation operations.

§ 912.782 Underground mining permit applications—minimum requirements for legal, financial, compliance, and related information.

Part 782 of this chapter, Underground Mining Permit Applications—Minimum requirements for Legal, Financial, Compliance, and Related Information, shall apply to any person who makes application for a permit to conduct underground coal mining operations.

§ 912.783 Underground mining permit applications—minimum requirements for information on environmental resources.

Part 783 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Information on Environmental Resources, shall apply to any person who submits an application to conduct underground coal mining operations.

§ 912.784 Underground mining permit applications—minimum requirements for reclamation and operation plan.

Part 784 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Reclamation and Operation Plan, shall apply to any person who makes application to conduct underground coal mining.

§ 912.785 Requirements for permits for special categories of mining.

Part 785 of this chapter, Requirements for Permits for Special Categories of Mining, shall apply to each person who makes application for a permit to conduct certain categories of surface coal mining and reclamation operations as specified therein.

§ 912.786 Review, public participation, and approval or disapproval of permit applications and permit terms and conditions.

Part 786 of this chapter, Review, Public Participation, and Approval or Disapproval of Permit Applications and Permit Terms and Conditions, shall apply to the review of applications made by any person for surface coal mining and reclamation operations.

§ 912.787 Administrative and judicial review of decisions on permit applications.

Decisions on permit applications shall be subject to administrative and judicial review in accordance with Part 787 of this chapter and Sections 520, 525, and 526 of the Act.

§ 912.788 Permit reviews, revisions, and renewals, and transfer, sale, and assignment of rights granted under permits.

Part 788 of this chapter, Permit Reviews, Revisions, and Renewals, and Transfer, Sale, and Assignment of Rights Granted Under Permits, shall apply to review, revision, and renewal of permits for surface coal mine operations, and to transfer, sale, and assignment of rights granted under permits.

§ 912.795 Small operator assistance.

Part 795 of this chapter, Small Operator Assistance, shall apply to any person making application for assistance under the small operator assistance program.

§ 912.800 General requirements for bonding of surface coal mining and reclamation operations.

Part 800 of this chapter, General Requirements for Bonding of Surface Coal Mining and Reclamation Operations Under Regulatory Programs, shall apply to all surface coal mining and reclamation operations.

§ 912.815 Performance standards—coal exploration.

Part 815 of this chapter, Permanent Program Performance Standards—Coal Exploration, shall apply to any person conducting coal exploration operations.

§ 912.816 Performance standards—surface mining activities.

Part 816 of this chapter, Permanent Program Performance Standards—Surface Mining Activities, shall apply to any person who conducts surface coal mining and reclamation operations.

§ 912.817 Performance standards—underground mining activities.

Part 817 of this chapter, Permanent Program Performance Standards—Underground Mining Activities, shall apply to any person who conducts underground coal mining operations.

§ 912.818 Special performance standards—concurrent surface and underground mining.

Part 818 of this chapter, Special Permanent Program Performance Standards—Concurrent Surface and Underground Mining, shall apply to any person who conducts combined surface and underground coal mining operations.

§ 912.819 Special performance standards—auger mining.

Part 819 of this chapter, Special Permanent Program Performance Standards—Auger Mining, shall apply to any person who conducts surface coal mining operations which include auger mining.

§ 912.822 Special performance standards—operations in alluvial valley floors.

Part 822 of this chapter, Special Permanent Program Performance Standards—Operations in Alluvial Valley Floors, shall apply to any person who conducts surface coal mining and reclamation operations on alluvial valley floors.

§ 912.823 Special performance standards—operations on prime farmland.

Part 823 of this chapter, Special Permanent Program Performance Standards—Operations on Prime Farmland, shall apply to any person who conducts surface coal mining and reclamation operations on prime farmlands.

§ 912.824 Special performance standards—mountaintop removal.

Part 824 of this chapter, Special Permanent Program Performance Standards—Mountaintop Removal, shall apply to any person who conducts surface coal mining operations constituting mountaintop removal mining.

§ 912.826 Special performance standards—operations on steep slopes.

Part 826 of this chapter, Special Permanent Program Performance Standards—Operations on Steep Slopes, shall apply to any person who conducts surface coal mining and reclamation operations on steep slopes.

§ 912.827 Special performance standards—coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.

Part 827 of this chapter, Special Permanent Program Performance Standards—Coal Processing plants and Support Facilities Not Located at or Near the Minesite or Not Within the Permit Area for a Mine, shall apply to any person who conducts surface coal mining and reclamation operations which includes the operation of coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.

§ 912.828 Special performance standards—In Situ processing.

Part 828 of this chapter, Special Permanent Program Performance Standards—In Situ Processing, shall apply to any person who conducts in situ processing activities.

§ 912.842 Federal inspections.

(a) Part 842 of this chapter, Federal Inspections, shall apply to all exploration and surface coal mining and reclamation operations.

(b) The Secretary will furnish a copy of each inspection report regarding inspections conducted pursuant to this section to the Office of the Idaho Attorney General upon request.

§ 912.843 Federal enforcement.

(a) Part 843 of this chapter, Federal Enforcement, shall apply when enforcement action is required for violations on surface coal mining and reclamation operations.

(b) The Office will furnish a copy of each enforcement action and order to show cause issued pursuant to this section to the Office of the Idaho Attorney General upon request.

§ 912.845 Civil penalties.

Part 845 of this chapter, Civil Penalties, shall apply when civil penalties are assessed for violations on surface coal mining and reclamation operations.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Presidential Documents

Title 3—

The President

Proclamation 5048 of April 14, 1983

Modification of Proclamation No. 4991 Regarding Suspension of the Application of TSUS Column 1 Rates of Duty to Products of Poland

By the President of the United States of America

A Proclamation

By Proclamation No. 4991 of October 27, 1982, the President suspended the application of the rates of duty provided for in column 1 of the Tariff Schedules of the United States (TSUS) to products of Poland. Proclamation No. 4991 is effective with respect to articles exported on and after November 1, 1982.

Taking into account the factors cited in Proclamation No. 4991 and in order to alleviate unnecessary hardships to United States companies that entered into contracts before the decision to suspend most-favored-nation treatment for products of Poland was announced, I find it appropriate to amend Proclamation No. 4991 to permit articles that are exported to a consignee in the United States before June 30, 1983, pursuant to written and binding contracts to purchase executed on or before October 9, 1982, to enter at the column 1 rate of duty.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States including, but not limited to, the Trade Expansion Act of 1962, and the Trade Act of 1974, as amended, do proclaim that paragraph 3 of Proclamation No. 4991 of October 27, 1982, is hereby amended to read as follows:

"(3) This Proclamation shall take effect with respect to articles exported on and after November 1, 1982, other than articles exported prior to June 30, 1983, to a consignee in the United States pursuant to a written and binding contract to purchase which was executed on or before October 9, 1982, provided that a copy of such contract is presented to the United States Customs Service on or before May 31, 1983 and the importer or consignee in the United States certifies that the articles are exported pursuant to that contract."

IN WITNESS WHEREOF, I have hereunto set my hand this 14th day of April, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Proclamation 5049 of April 14, 1983

American Indian Day, 1983

By the President of the United States of America

A Proclamation

The story of the Indian in America is a record of endurance, of survival, of adaptation and creativity in the face of overwhelming obstacles. It is a record of enormous contributions to this country—to its art and culture, its strength and spirit, its sense of history, and its sense of purpose.

When European settlers began to develop colonies in North America, they entered into treaties with sovereign Indian nations. Our new Nation continued to enter into treaties with Indian tribes on a government-to-government basis. Throughout our history, despite periods of conflict and shifting national policies in Indian affairs, the government-to-government relationship between the United States and Indian tribes has endured. The Constitution, treaties, laws, and court decisions have consistently recognized a unique political relationship between Indian tribes and the United States.

In 1970, President Nixon announced a national policy of self-determination for Indian tribes. At the heart of the new policy was a commitment by the Federal government to foster and encourage tribal self-government.

As set forth in the message on Indian policy of January 24, 1983, this Administration honors the commitment made in 1970 to strengthen tribal governments and lessen Federal control over tribal government affairs. To further the principle of self-government, we will encourage the political and economic development of the tribes by eliminating excessive Federal regulation and government intervention, which in the past have stifled local decision-making, thwarted Indian control of Indian resources, and promoted dependence rather than self-sufficiency.

In promoting effective self-government and a more favorable environment for the development of healthy reservation economies, we will take a flexible approach which recognizes the diversity among tribes and the right of each tribe to set its own priorities and goals. The tribes, not the Federal government, will chart the path of their own development. In support of this policy, the Federal government will faithfully fulfill its responsibility for the physical and financial resources it holds in trust for the tribes and their members.

In recognition of the unique status and contribution of the American Indian peoples to our Nation, the Congress of the United States, by House Joint Resolution 459 (P.L. 97–445), has authorized and requested the President to issue a proclamation designating May 13, 1983 as "American Indian Day."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim May 13, 1983 as American Indian Day. I invite

the people of the United States to observe this day with appropriate ceremonies and deeds and to reaffirm their dedication to the ideals which our first Americans subscribe.

IN WITNESS WHEREOF, I have hereunto set my hand this 14th day of April, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Rules and Regulations

Federal Register
Vol. 48, No. 74
Friday, April 15, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 330

Recruitment, Selection, and Placement (General)

AGENCY: Office of Personnel Management.

ACTION: Interim rulemaking, with comments requested.

SUMMARY: The Office of Personnel Management (OPM) is issuing interim regulations to provide for placement assistance for persons previously employed as National Guard Technicians who are eligible and applying for or receiving an annuity by reason of a disability that disqualifies them from membership in the National Guard or from holding the military grade required as a condition of their National Guard employment. This action is necessary to implement a portion of the Omnibus Budget Reconciliation Act of 1982.

DATES: Effective: April 15, 1983. Comments must be received on or before June 14, 1983.

ADDRESS: Written comments may be sent to Richard B. Post, Associate Director, Staffing Group, U.S. Office of Personnel Management, 1900 E Street, NW., Washington, D.C. 20415, or delivered to Room 6F08, 1900 E Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: William Bohling, 202-632-6000.

SUPPLEMENTARY INFORMATION: Section 302(a) of Pub. L. 97-253, the Omnibus Budget Reconciliation Act of 1982, which will be codified as 5 U.S.C. 8337(h), provides: (1) That a National Guard Technician who is required as a condition of employment to be a member of the National Guard or to hold a certain military grade may be eligible for disability retirement based on a disability that disqualifies the individual from membership in the National Guard or from holding the required military grade; and (2) that any individual applying for or receiving an annuity under this provision "shall, in accordance with regulations prescribed by the Office, be considered by any agency of the Government before any vacant position in the agency is filled if—(A) the position is located within the commuting area of the individual's former position; (B) the individual is qualified to serve in such position as determined by the head of the agency; and (C) the position is at the same grade or equivalent level as the position from which the individual was separated." The law further stipulates that a National Guard Technician may retire under 5 U.S.C. 8337(h), and receive placement consideration consistent with Section 302(a) provisions, only if he/she has *not* been found to be disabled under 8337(a) of 5 U.S.C.

On October 1 1982, at 47 FR 43634, OPM published an interim regulation with a 60-day comment period establishing a new Schedule A appointing authority in the excepted service covering positions filled by National Guard Technicians who are eligible for or receiving an annuity based on a disability that disqualifies them from National Guard membership or from holding a military grade required by their technician employment. Since National Guard Technicians are appointed under 32 U.S.C. 709(a), which confers no status or eligibility for movement to other positions, a special appointing authority was needed to permit their placement in other agencies. Schedule A appointing authority, under which agencies determine qualifications for their positions, was appropriate in view of the language of the Reconciliation Act.

OPM has now determined that it would be beneficial to the proper adminstration of this provision of the Reconciliation Act to also issue regulations specifying the nature of the placement assistance to be provided to National Guard Technicians. OPM has further determined that the intent of this provision of the Act, i.e., controlling retirement outlays by providing realistic opportunities for alternative civilian employment in lieu of disability retirement, can be satisfied by providing National Guard Technicians with priority consideration, without time limit, for any vacant position in the competitive service that agencies plan to fill through an external hire and to any vacant position in the excepted service for which agencies request recruiting assistance. Implementation of this regulation would not, therefore, interfere with an agency's authority to fill vacant positions through internal selections.

OPM did consider the option of requiring agencies to inform the Office of all vacancies, in both the competitive and excepted service, and prohibiting promotions, reassignments, and outside hires to any vacancies for which qualified disabled National Guard Technicians were available. This option had, however, two major drawbacks which suggested that it would not be consistent with congressional intent: (1) It would have created an inequity by granting excepted National Guard Technicians who become eligible for disability retirement greater benefits than are available to other Federal employees in the competitive service who become eligible for disability retirement. (Competitive service employees are eligible only for referral to vacancies which agencies plan to fill by external hiring.) (2) In cases where agencies are freezing outside hiring in efforts to avoid reductions in force, absolute priority would not result in placement of disabled National Guard Technicians. It would merely limit the agencies' flexibility in assigning employees so as to accomplish necessary work with reduced staff. We believe that the number of additional placements which might result from wider referrals would be insufficient to offset the loss of productivity and efficiency in those agencies which cannot take on additional employees and that such an approach exceeds the intent of the Reconciliation Act.

The Director finds that good cause exists to waive the general notice of proposed rulemaking and to make this amendment effective in less than 30 days. The regulation is being made effective immediately because it is needed to implement 5 U.S.C. 8337(h), which became effective on October 1, 1982.

E.O. 12291, Federal Regulation

OPM has determined that this is not a major rule as defined under Section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it pertains solely to conditions for appointment of certain employees by Federal agencies.

Lists of Subjects in 5 CFR Part 330

Government employees.

Office of Personnel Management.

Donald J. Devine,

Director.

Accordingly, the Office of Personnel Management is amending 5 CFR Part 330 by adding Subpart H to read as follows:

PART 330—RECRUITMENT, SELECTION, AND PLACEMENT (GENERAL)

Subpart H—Placement Assistance for National Guard Technicians Who Become Entitled to a Disability Annuity

Sec.

330.801 Coverage.
330.802 OPM assistance.
330.803 Priority referral.
330.804 Department of Defense responsibility for placement assistance.
330.805 Duration of eligibility for assistance.

Authority: 5 U.S.C. 3301, 3302, 8337(L).

Subpart H—Placement Assistance for National Guard Technicians Who Become Entitled to a Disability Annuity

§ 330.801 Coverage.

This subpart applies to current or former National Guard Technicians who—

(a) Are or were separated from such positions on or after December 31, 1979, because of a medical disability that disqualified them from membership in the National Guard or from holding the military grade required for such employment;

(b) Have not been found by OPM to be disabled under subchapter III of chapter 83 of title 5, United States Code, section 8337(a);

(c) Have applied for or are receiving an annuity under the provisions of subchapter III of chapter 83 of title 5, United States Code, section 8337(h); and,

(d) Are not eligible for assistance under Subpart C of this part.

§ 330.802 OPM assistance.

An employee covered by this subpart is subject to mandatory enrollment in OPM's placement assistance program. Such an employee shall receive priority consideration for vacant positions in the Federal Government in accordance with procedures described through the Federal Personnel Manual system.

§ 330.803 Priority referral.

(a) An employee covered by this subpart shall be referred, both by OPM and agencies with delegated examining authority, and considered by any agency of the Government for any vacant position at GS–15 and below or the equivalent whenever—

(1) An agency plans to seek or is seeking the names of qualified candidates from a register or registers of competitive eligibles maintained by OPM or agencies with delegated examining authority;

(2) The position is expected to last more than one year;

(3) The position is located within the commuting area of the employee's former National Guard Technician position;

(4) The position is at the same grade or equivalent level as the National Guard Technician position from which the employee was separated; and,

(5) The employee is qualified for the vacant position as determined by the head of the agency or his/her designee.

In addition, OPM and agencies with delegated examining authority will refer the names of employees covered by this subpart whenever an agency requests recruiting assistance for positions in the excepted service.

(b) When an agency selects an individual referred under this subpart, it will generally employ him or her under authority of Part 213, Subpart C, § 213.3102(j) of the excepted service or other appropriate excepted service appointing authorities.

§ 330.804 Department of Defense responsibility for placement assistance.

(a) The Department of Defense shall, as the Government agency employing National Guard Technicians and in accordance with its own personnel management policies and practices, ensure that employees covered by this subpart receive appropriate consideration for vacant positions within the military departments and defense agencies for which the head of that department or agency, or his/her designee, determines that the individual is qualified, which is in the same commuting area and which is at the same grade or equivalent level as the National Guard Technician position from which the employee was separated.

(b) The Department of Defense will be notified by OPM whenever a National Guard Technician who was separated on or after December 31, 1979, and before October 1, 1982, from such a position because of a medical disability that disqualified him/her from membership in the National Guard or from holding the military grade required for such employment has filed a timely application for disability annuity under 5 U.S.C. 8337(h). The department shall, in turn take steps to provide appropriate internal placement consideration to such individuals beginning on the day following the date that such notification from OPM has been received by the department. Further, the department or its appropriate component will be responsible for enrolling such individuals into OPM's placement assistance program as soon as is reasonably possible, with the expectation that, in most cases, enrollment can be made within 30 calendar days following the date that the department has been notified by OPM that a timely application for a disability annuity under 5 U.S.C. 8337(h) has been filed by the former National Guard Technician.

(c) For National Guard Technicians who are separated on or after October 1, 1982, because of a medical disability that disqualified him/her from membership in the National Guard or from holding the military grade required for such employment, internal Department of Defense placement consideration shall begin as soon as the determination has been made by the department or its appropriate component that the technician is no longer qualified for membership in the National Guard and shall continue after the date of actual separation from the National Guard Technician position in accordance with paragraph (a) of this section. The Department of Defense or its appropriate component will also be responsible for enrolling such individuals into OPM's placement assistance program as soon as is reasonably possible, with the exception that, in most cases, enrollment can be made within 15 calendar days following the actual date of separation from the National Guard Technician position.

§ 330.805 Duration of eligibility for assistance.

(a) An employee covered by this subpart is eligible for OPM placement assistance without time limit. Eligibility will, however, be terminated upon—

(1) His/her reemployment by a Federal department or agency in a nontemporary position;

(2) His/her declination of any position in the Government for which he/she has been found qualified by the head of the agency or his/her designee, and which is at the same grade or equivalent level, in the same commuting area and with at least the same tenure and work

schedule as the former National Guard Technician position;

(3) His/her restoration to earning capacity as determined by OPM pursuant to the terms of section 8337 of title 5, United States Code; or,

(4) Any other circumstance which terminates his/her eligibility for an annuity under section 8337(h)(1) of title 5, United States Code.

(b) When an agency appoints a former National Guard Technician who has applied for or is receiving an annuity under section 8337(h) of title 5, United States Code, *or* when an agency makes an offer of a position which conforms to the requirements of paragraph (a)(2) of this section and the offer is declined, the agency shall notify OPM of such an appointment or declination in accordance with instructions published through the Federal Personnel Manual system. This notification shall include the date of the appointment or declination and, if an appointment, the title, pay plan, series, grade, and rate of pay of the position.

5 CFR Part 890

Federal Employees Health Benefits Program

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: These regulations call for the simultaneous submission of Federal Employees Health Benefit (FEHB) carriers' benefit and rate proposals. The regulations will permit an assessment of the impact of benefit and rate proposals on both the Government and enrollees in a more timely and orderly fashion than is possible with the present FEHB contract negotiation cycle.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Mary Ann Mercer, 202-254-0574.

SUPPLEMENTARY INFORMATION: On February 22, 1983, the Office of Personnel Management published proposed rules in the **Federal Register** (48 FR 7460-7461, 48 FR 7478-7479) with a request for comments from interested parties before publication as final regulations. Respondents included 29 of the 132 carriers participating in the FEHB Program, one non-participating carrier, two Federal agencies, and one individual in the private sector. The responses were generally in favor of the simultaneous submission of benefit and rate proposals, but were mixed with regard to the due date of May 31. The comments focused on two primary concerns:

OPM's Discretion To Request Benefit and Rate Proposals

Several commentors felt that the Director of OPM should not be given discretion to request rate proposals because the Director's decision not to request rate proposals in a particular year could require rates that are too low or too high for the benefits, given fluctuations in inflation, utilization, and insured populations. Such concerns are unnecessary: The FEHB statute itself requires that rates "reasonably and equitably reflect the cost of the benefits provided." Any use of the discretion provided by these regulations will necessarily require preservation of the relationship between rates and benefits. Some community rated plans expressed concern that, since they meet their expenses through uniformly and equally applied community rates, the integrity of community rating could not be maintained if a plan were prevented from applying a necessary rate increase to the Federal group. Again, we would reassure the carriers that the statutory mandate that rates reflect the cost of the benefits provided will govern any use of OPM's discretion.

Date of Final Rate Submission

Carriers stated that the final rate submission date should not be moved forward from July 31 to May 31. They argue that under existing regulations carriers base rate estimates, in part, on paid claims and utilization experience from the beginning of the most recent contract year through June. Final rate proposals have been due July 31 and five or six months of experience were available to draw on for the rate estimates. Under the new regulations, approximately four months' experience (January through April) for the current contract year will be available prior to the May 31 filing date. This paid claims experience, however, would be based in part on claims for services that were incurred the previous year. Therefore, the data submitted from the previous contract year may not be representative of current utilization since it would not fully reflect the most current benefits and most recent open season enrollment changes. Due to this limited current experience, the carriers have suggested that they will be forced to build an additional margin into the proposed rates to account for unexpected increases in claims. This margin, according to the carriers, would result in higher premiums.

As we have already observed, there is a statutory relationship between premium levels and the cost of benefits provided. OPM will work within the statutory scheme. Our regulations are merely intended to enhance the fiscal integrity of the Program by providing sufficient time to analyze benefit and rate proposals to ensure that rates are adequate and acceptable to employees and the Government.

While we recognize that the claims and utilization experience cutoff date will occur two months earlier than it did under the previous regulations, the proposed rates will still be negotiated by OPM and the carrier, and the established premium rate will require OPM's consideration and final approval, as has been the procedure in the past. OPM will, as in the past, carefully evaluate proposals to ensure that the rates established are reasonable and equitable for the benefits offered, given inflation and utilization experience.

Miscellaneous Issues

One carrier recommended that an extension of the May 31 date for submission of benefit and rate proposals be applicable to all plans. It is not the intention of the regulations to extend the May 31 deadline for benefit and rate proposals on a plan-by-plan basis. In the event that the Director determines an extension for submission is in the interest of the Program, the extension would apply to all participating plans.

A concern expressed by one community rated carrier is that the change in date of submission of final rate proposals to May 31 will affect its other lines of business. Community rated plans gear some of their other contract negotiations to the FEHB Program negotiation process. Carriers that do so generally establish their per capita hospital and physician fees prior to FEHB Program negotiations and use the information in establishing their proposed rates for the FEHBP. Under the new regulations, some carriers will not have completed their negotiations with hospitals and doctors prior to May 31, so that their per capita hospital and physician fees will not be finally established. OPM recognizes that there may be conflicts experienced by some community rated carriers during this initial year of adjustment, and will take this into account in its 1984 negotiations.

One carrier commented that the term "comprehensive medical plans" was omitted from the Title 41 regulations and believed this omission results in a conflict with the regulatory provisions

that currently admit only comprehensive medical plans into the Program. Since statutory provisions govern the types of plans which will be accepted into the FEHB Program at any given time, we do not agree that a conflict exists. Furthermore, omission of the term "comprehensive medical plans" from the regulations provides flexibility to OPM in the event the Program is opened to other types of plans through future legislation.

One carrier offered that issuance of the regulations would have a significant economic impact on health maintenance organizations because submission of final rate proposals on May 31 rather than July 31 "would increase the risk of rate decisions that resulted in adverse financial consequences." This assertion assumes rates submitted will be inaccurate because they are submitted earlier. While it is true that there will be less experience at the time the rates are proposed, OPM will make its evaluations and will negotiate based on all information available at the time of its decision. The new regulations begin the process at an earlier date, but they do not conclude it earlier. Consequently, there will be no impact on rates in the long run.

E.O. 12291, Federal Regulation

OPM has determined that this is not a major rule as defined under Section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that, within the scope of the Regulatory Flexibility Act, this regulation will not have a significant economic impact on a substantial number of small entities because the regulations simply rearrange the timeframe in which health benefit carriers must submit information.

List of Subjects in 5 CFR Part 890

Administrative practice and procedure, Claims, Government employees, Health insurance, Retirement.

Office of Personnel Management.

Donald J. Devine,

Director.

Accordingly, OPM is amending 5 CFR Part 890 as follows:

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

1. In § 890.203, the last sentence of paragraph (a)(1) is removed and two sentences are inserted in its place:

§ 890.203 Application for approval of, and proposal of amendments to, health benefit plans.

(a)(1) * * * Participation of an approved plan becomes effective on the first day of the contract period which is: (i) At least nine months after OPM receives the application, and (ii) at least seven months after OPM receives benefit and rate proposals and all evidence to demonstrate that the plan has met all requirements for approval. At any time, OPM may make a counter-proposal or propose changes on its own motion.

* * * * *

2. In § 890.203, paragraph (b) is revised to read as follows:

§ 890.203 Application for approval of, and proposal of amendments to, health benefits plans.

* * * * *

(b) Changes in rates and benefits for approved health benefits plans shall be considered at the discretion of the Director of OPM. If the Director of OPM determines that it is beneficial to enrollees and the Federal Employees Health Benefits Program to invite health plan benefit and/or rate changes for a given contract period, a "call letter" shall be issued to the carrier approximately 9 months prior to the expiration of the current contract period. Any proposal for change shall be in writing, specifically describe the change proposed, and be signed by an authorized official of the carrier. OPM will review any requested proposal for change and will notify the carrier of its decision to accept or reject the change. OPM may make a counter proposal or at any time propose changes on its own motion. Benefits changes and rate proposals, when requested by OPM, shall be submitted not less than 7 months before the expiration of the then current contract period, unless the Director of OPM determines that a later date is acceptable. The negotiation period shall begin approximately 7 months before the expiration of the current contract period, and OPM shall seek to complete all benefit and rate negotiations no later than 3 months preceding the contract period to which they will apply.

(5 U.S.C. 8913)

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 407]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period April 17–23, 1983. Such action is needed to provide for orderly marketing of fresh lemons for the period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: April 17, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910; 47 FR 50196), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on July 6, 1982. The committee met again publicly on April 11, 1983, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during

the specified week. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the act.

Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—[AMENDED]

Section 910.707 is added as follows:

§ 910.707 Lemon regulation 497.

The quantity of lemons grown in California and Arizona which may be handled during the period April 17, 1983, through April 23, 1983, is established at 280,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: April 13, 1983.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

7 CFR Parts 1004, 1007, 1011, and 1046

[Milk Order Nos. 7, 4, 11, and 46; Docket Nos. AO-366-A20, et al.]

Milk in Georgia and Certain Other Marketing Areas; Order Amending Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

7 CFR Part	Marketing area	AO numbers
1007	Georgia	AO-366-A20
1004	Middle Atlantic	AO-160-A60
1011	Tennessee Valley	AO-251-A25
1046	Louisville-Lexington-Evansville	AO-123-A51

SUMMARY: This action adopts on an emergency basis amendments to the Georgia, Middle Atlantic, Tennessee Valley, and Louisville-Lexington-Evansville orders. The order changes will provide handlers with limited transportation credits from the marketwide pool for certain Class II and Class III milk transferred or diverted to unusually distant outlets for surplus disposal. The changes, which will apply only through June 30, 1983, were considered at a public hearing held on March 1, 1983, in Atlanta, Georgia. The order changes were requested by a cooperative association that represents dairy farmers who supply milk to the markets.

The changes are necessary to reflect current marketing conditions and to insure that all producers in the affected markets share more equitably in the cost of disposing of unusually large supplies of surplus milk that are expected this spring. Marketing conditions are such that prompt amendatory action is required. For this reason, a recommended decision and the opportunity to file exceptions thereto were omitted. Cooperative associations in each market representing more than two-thirds of the producers have approved the issuance of the amended orders.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, (202/447-4829).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued February 15, 1983; published February 22, 1983 (48 FR 7461).

Emergency Final Decision: Issued March 30, 1983; published April 5, 1983 (48 FR 14604).

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the Georgia, Middle Atlantic, Tennessee Valley, and Louisville-Lexington-Evansville orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except they may conflict with those set forth herein.

The following findings are hereby made with respect to each of the aforesaid tentative marketing agreements and orders:

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the respective marketing areas.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulate the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending each of the aforesaid orders effective upon publication in the Federal Register. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of this order are known to handlers. The decision of the Assistant Secretary containing all amendment provisions of this order was issued March 30, 1983 (48 FR 14604). The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending each of the aforesaid orders effective upon publication in the Federal Register and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the Federal Register. (Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551–559).

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations

specified in Sec. 8c (9) of the Act) of more than 50 percent of the milk, which is marketed within each of the specified marketing areas, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending each of the specified orders, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the respective orders as hereby amended; and

(3) The issuance of the order amending each of the specified orders is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

List of Subjects in 7 CFR Parts 1004, 1007, 1011, and 1046

Milk marketing orders, Milk, Dairy products.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, the handling of milk in each of the specified marketing areas shall be in conformity to and in compliance with the terms and conditions of each of the aforesaid orders, as amended, and as hereby further amended, as follows:

PART 1007—MILK IN THE GEORGIA MARKETING AREA

In § 1007.60, paragraph (g) is revised to read as follows:

§ 1007.60 Handler's value of milk for computing uniform price.

* * * * *

(g) With respect to milk marketed on and after the effective date hereof through June 1983, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II or Class III milk pursuant to § 1007.42(b)(3) or § 1007.42(d)(2) by a rate for each truckload of milk so moved that is equal to 3.6 cents per hundredweight for each 10 miles or fraction thereof that the nonpool plant is located more than 350 miles (as determined by the market administrator) from the nearest of the following locations: the city hall in Atlanta, Georgia; the city hall in Augusta, Georgia; the transferor plant; or for diversions, the pool plant of last receipt for the major portion of the milk on the load or the courthouse of the county where the major portion of the milk so diverted was produced. No credit shall apply to the total quantity of milk so moved to a given nonpool plant by a handler during the month if any portion of the milk is assigned to Class I.

PART 1004—MILK IN THE MIDDLE ATLANTIC MARKETING AREA

In § 1004.60, paragraph (f) is revised to read as follows:

§ 1004.60 Pool obligation of each pool handler.

* * * * *

(f) With respect to milk marketed on and after the effective date hereof through June 1983, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II milk pursuant to § 1004.42(d) or § 1004.42(e)(3) by a rate for each truckload of milk so moved that is equal to 3.6 cents per hundredweight for each 10 miles or fraction thereof that the nonpool plant is located more than 200 miles (as determined by the market administrator) from the nearest of the following locations: the city hall in Philadelphia, Pennsylvania; the zero milestone in Washington, D.C.; the city hall in Baltimore, Maryland; the transferor plant; or, for diversions, the pool plant of last receipt for the major portion of the milk on the load or the courthouse of the county where the major portion of the milk so diverted was produced. No credit shall apply to the total quantity of milk so moved to a given nonpool plant by a handler during the month if any portion of the milk is assigned to Class I.

PART 1011—MILK IN THE TENNESSEE VALLEY MARKETING AREA

In § 1011.60, paragraph (g) is revised to read as follows:

§ 1011.60 Handler's value of milk for computing uniform price.

* * * * *

(g) With respect to milk marketed on and after the effective date hereof through June 1983, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II or Class III milk pursuant to § 1011.42(b)(3) or § 1011.42(d)(2) by a rate for each truckload of milk so moved that is equal to 3.6 cents per hundredweight for each 10 miles or fraction thereof that the nonpool plant is located more than 350 miles (as determined by the market administrator) from the nearest of the following locations: the city hall in Bristol, Tennessee; the city hall in Knoxville, Tennessee; the city hall in Chattanooga, Tennessee; the transferor plant; or, for diversions, the pool plant of last receipt for the major portion of the milk on the load or the courthouse of the county where the major portion of the milk so diverted was produced. No credit shall apply to the total quantity of milk so moved to a given nonpool plant by a handler during the month if any portion of the milk is assigned to Class I.

PART 1046—MILK IN THE LOUISVILLE-LEXINGTON-EVANSVILLE MARKETING AREA

In § 1046.60, paragraph (g) is added to read as follows:

§ 1046.60 Handler's value of milk for computing uniform price.

* * * * *

(g) With respect to milk marketed on and after the effective date hereof through June 1983, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II or Class III milk pursuant to § 1046.42(b)(3) or § 1046.42(d)(2) by a rate for each truckload of milk so moved that is equal to 3.6 cents per hundredweight for each 10 miles or fraction thereof that the nonpool plant is located more than 250 miles (as determined by the market administrator) from the nearest of the following locations: the city hall in Louisville, Kentucky; the city hall in Lexington, Kentucky; the city hall in Evansville, Indiana; the transferor plant; or, for diversions, the pool plant of last receipt for the major portion of the milk on the load or the courthouse of the county where the major portion of the milk so diverted was produced. No credit shall apply to the total quantity of milk so moved to a given nonpool plant by a handler during the month if any portion of the milk is assigned to Class I.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: April 15, 1983.

Signed at Washington, D.C., on April 11, 1983.

John Ford,

Deputy Assistant Secretary, Marketing and Inspection Services.

Animal and Plant Health Inspection Service

9 CFR Part 54

[Docket No. 83-032]

Animals Destroyed Because of Scrapie; Interim Rule

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document on an emergency basis amends the regulations authorizing the payment of indemnities for sheep and goats destroyed because of scrapie to provide for indemnity only for animals diagnosed as having scrapie and for certain animals related by blood to animals diagnosed as having scrapie. These amendments are necessary to allow for indemnity only for animals that present a substantial risk of being infected with scrapie in order to utilize scrapie indemnity funds more effectively.

DATES: Effective: April 15, 1983.

Comments should be submitted on or before June 14, 1983.

ADDRESS: Written comments should be submitted to T. O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Written comments received may be inspected at Room 728 of the Federal Building, 8 a.m. to 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Jack R. Pitcher, Special Diseases Staff, Veterinary Services, APHIS, USDA, Room 824, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8231.

SUPPLEMENTARY INFORMATION:

Background

This document, on an emergency basis, amends the "Animals Destroyed Because of Scrapie" regulations in 9 CFR Part 54 (referred to below as the regulations) which authorize the payment of indemnity for sheep and goats destroyed because of scrapie.

Scrapie is a fatal disease of sheep and goats, affecting the nervous system. It is necessary to destroy certain animals in order to prevent the spread of the disease since there is no treatment for the disease. Also, there is no known diagnostic test for confirming scrapie in the live animal. Microscopic examination of the brain tissue is necessary for confirmation of the disease. Scrapie develops slowly; animals may carry the disease agent for 18 to 42 months before symptoms of the disease appear. When symptoms do appear, they allow a preliminary clinical diagnosis of scrapie. These symptoms include nervousness, slight muscular tremors, lack of luster in the wool, and itching.

Prior to the effective date of this document, the regulations provided for indemnity of sheep and goats determined to be "affected animals" or "exposed animals." Under the regulations an "affected animal" is defined as:

> An animal for which a diagnosis of scrapie has been made by a Veterinary Services representative or State representative.

Previously, the regulations also defined an "exposed animal" as:

> An animal, other than an affected animal, which is either in an infected or source flock, or which has been:
>
> (1) Held, pastured, or penned with an infected flock at any time since the birth or introducton of the affected animal into such flock, or
>
> (2) Held, pastured, or penned with a source flock at any time since the birth or introduction of an affected animal into such flock, or
>
> (3) Female progeny of an affected female animal and her first generation male progeny, or
>
> (4) The dam of an affected animal and the dam's first generation progeny, or
>
> (5) The first generation progeny of an exposed female animal moved from an infected flock or source flock, or
>
> (6) The first generation progeny of an affected male animal.

Further, the regulations previously defined the terms "flocks," "infected flock," and "source flock" as follows:

> *Flock.* A group of animals maintained on common ground, or two or more groups of animals under common ownership or supervision, and geographically separated, but which have an interchange of animals.
>
> *Infected flock.* A flock in which an affected animal has been found by a Veterinary Services representative or a State representative.
>
> *Source Flock.* A flock from which an animal was moved and within 18 months of the date of the movement the animal showed clinical evidence of scrapie, or from which two or more animals were moved and subsequent to the movement the animals showed clinical evidence of scrapie.

Sufficient funds are not available to allow for indemnity of all animals that were designated as "affected animals" and "exposed animals." Under these circumstances, the regulations are amended to restructure the program to provide for indemnity only for "affected animals" and other animals which present a substantial risk of being infected with scrapie.

The main means by which scrapie is spread is from parent to offspring, principally through the dam. An infected female exposes her offspring at birth and immediately after birth. The risk of spread to offspring through an infected male is less, attributable in part to the fact that under customary flock management practices a sire seldom, if ever, has contact with his offspring. While it is possible that scrapie can be transmitted by exposure from animal to animal other than from parent to offspring, that risk is relatively minimal. Consistent with these findings, the regulations are amended to allow for indemnity payments only for "affected animals" and certain bloodline animals.

Based on departmental experience, it has been determined that, in addition to "affected animals," the following bloodline animals are the only animals that present a substantial risk of being infected with scrapie:

(1) The dam of an infected animal and the dam's first generation progeny,

(2) The maternal granddam of an affected animal,

(3) The first generation progeny of an affected animal, and

(4) All succeeding generations of female progeny from female progeny of an affected female animal.

The regulations previously allowed for the payment of indemnity for "affected animals" and for all of these categories of bloodline animals other than the maternal granddam of an affected animal. Accordingly, since it has been determined that the maternal granddam of an affected animal also presents a substantial risk of being infected with scrapie, the regulations are amended to allow for indemnity for the maternal granddam of an affected animal in addition to "affected animals" and the other classes of bloodline animals.

Under the previous program most of the animals for which indemnity was paid presented only a minimal risk of spreading scrapie and were in one of the following four categories:

(1) In an infected or source flock,

(2) Held, pastured, or penned with an infected flock at any time since the birth or introduction of the affected animal into such flock,

(3) Held, pastured, or penned with a source flock at any time since the birth or introduction of an affected animal into such flock, or

(4) The first generation progeny of an exposed female animal moved from an infected flock or source flock.

This document deletes these four categories of exposed animals from the list of animals eligible for indemnity payments. It appears that this will substantially reduce indemnity costs

without significantly reducing the effectiveness of the scrapie eradication program. Further, if the indemnity funds were distributed in accordance with the previous program, the funds would be quickly exhausted with payments mostly for the four categories of exposed animals referred to above which pose only a minimal risk of being infected with scrapie.

This document also amends the regulations by making nonsubstantive changes for purposes of clarity.

Emergency Action

Dr. John K. Atwell, Deputy Administrator of the Animal and Plant Health Inspection Service for Veterinary Services, has determined that an emergency situation exists which warrants publications of this interim rule without prior opportunity for public comment. Immediate action is necessary to allow for indemnity only for animals that present a substantial risk of being infected with scrapie in order to utilize scrapie indemnity funds more effectively.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect to this interim rule are impracticable and contrary to the public interest and good cause is found for making this interim rule effective less than 30 days after publication of this document in the **Federal Register**. Comments have been solicited for 60 days after publication of this document and a final document discussing comments received and any amendments required will be published in the **Federal Register** as soon as possible.

Executive Order 12291

This interim rule is issued in conformance with Executive Order 12291, and has been determined to be not a "major rule." Based on information compiled by the Department, it has been determined that this rule will not have a significant effect on the economy; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Also, the emergency nature of this action makes it impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this interim rule.

Regulatory Flexibility Act

The emergency situation discussed above makes compliance with section 603 and timely compliance with section 604 of the Regulatory Flexibility Act impracticable. Since this action may have a significant economic impact on a substantial number of small entities, the Final Regulatory Impact Analysis, if required, will address the issues required in section 604 of the Regulatory Flexibility Act.

List of Subjects in 9 CFR Part 54

Animal diseases, Goats, Indemnity payments, Sheep, Scrapie.

PART 54—ANIMALS DESTROYED BECAUSE OF SCRAPIE

Under the circumstances referred to above, 9 CFR Part 54 is amended as follows:

§ 54.1 [Amended]

1. Paragraphs (j), (l), (m), and (n) of § 54.1 are removed and the remaining terms are rearranged alphabetically without identifying letters.

2. In § 54.1, a definition of "bloodline animal" is added in alphabetical order to read as follows:

Bloodline animal. The dam of an affected animal and the dam's first generation progeny, the maternal granddam of an affected animal, the first generation progeny of an affected animal, and all succeeding generations of female progeny from female progeny of an affected female animal.

§ 54.3 [Amended]

3. In the first sentence of paragraph (a) of § 54.3, the word "exposed" is removed and the word "bloodline" is inserted in lieu thereof.

§ 54.7 [Amended]

4. In paragraph (a) of § 54.7, the word "exposed" is removed and the word "bloodline" is inserted in lieu thereof.

5. In paragraph (b) of § 54.7, the word "exposed" is removed and the word "bloodline" is inserted in lieu thereof.

§ 54.8 [Amended]

6. In paragraph (a) of § 54.8, the word "exposed" is removed and the word "bloodline" is inserted in lieu thereof.

(Sec 2, 32 Stat. 792, as amended, sec. 3, 23 Stat. 32, as amended, sec. 11, 58 Stat. 734, as amended; 21 U.S.C. 111, 114, 114a, 7 CFR 2.17, 2.51, 371.2(d))

Done at Washington, D.C., this 12th day of April 1983.

William E. Ketter,

Acting Deputy Administrator, Veterinary Service.

9 CFR Part 92

[Docket No. 83-023]

Ports of Importation for Animals and Birds

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule; Correction.

SUMMARY: This document amends the reference to "§ 92.3(e)" in 9 CFR 92.2(c)(3) to "§ 92.3(f)." This is a correction which is necessary to reflect the fact that § 92.3(e) has been redesignated as § 92.3(f).

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. S. S. Richeson, Chief Staff Veterinarian, Import/Export Animals and Products, VS, APHIS, USDA, Room 846, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8170.

SUPPLEMENTARY INFORMATION:

Background

On February 22, 1980, a final rule was published in the **Federal Register** (45 FR 11796-11797) amending the regulations in 9 CFR 92.3 concerning ports of importation for animals and birds. Section 92.3(e) titled "Special ports for pet birds" was redesignated as § 92.3(f) and a new § 92.3(e) titled "Limited ports" was added. However, when these amendments were made the reference in § 92.2(c)(3) to § 92.3(e) was not changed to reflect the new designation. Therefore; the reference to § 92.3(e) in § 92.2(c)(3) is corrected to read: § 92.3(f).

Done at Washington, D.C., this 12th day of April 1983.

William E. Ketter,

Acting Deputy Administrator, Veterinary Services.

Correction

In FR Doc. 83–8636 appearing on page 14347 in the issue of Monday, April 4, 1983, the date "April 14, 1983" which appears under "**SUMMARY**", "**EFFECTIVE DATE**", and "**ANNOUNCEMENT OF EFFECTIVE DATE**" should read "April 4, 1983."

BILLING CODE 1505-01-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 522

[No. 83–224]

Internal Processing—Schedule for Election of Federal Home Loan Bank Directors

Dated: April 8, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board is amending its regulations governing the procedure for electing directors to the boards of the Federal Home Loan Banks to prescribe earlier dates for completion of various steps involved in the election process. The Board believes that such changes would promote administrative efficiency in the internal processing of election materials and would provide newly elected directors with sufficient opportunity to become more familiar with the Federal Home Loan Bank System before assuming their official roles.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: K. Diane Boyle (202–377–6720), Program Analysis Development Division Director, Office of District Banks, or Deborah C. Jenkins (202–377–6464), Attorney, Office of General Counsel, Federal Home Loan Bank Board, 1700 G St., N.W., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: Section 7(d) of the Federal Home Loan Bank Act ("Bank Act"), 12 U.S.C. 1427(d), authorizes the Federal Home Loan Bank Board ("Board") to promulgate regulations for the nomination and election of directors to the boards of the Federal Home Loan Banks ("Banks"). Pursuant to this authority, the Board adopted §§ 522.24, 522.25, and 522.26 of the Federal Home Loan Bank System Regulations ("Bank System Regulations"), 12 CFR 522.24–522.26, to prescribe a comprehensive procedure for the election of directors of the Banks. Under this procedure, the Bank election process begins by May 31, the final date for submission of member capital stock reports by the Banks, and culminates on December 15, when the Board declares the results of the election.

The Board has determined to amend §§ 522.24, 522.25 and 522.26 of the Bank System Regulations to prescribe earlier dates for completion of various steps involved in electing directors to the boards of the Banks so that the election process will begin on April 15 and will conclude on November 15. None of the various steps have been eliminated or changed, nor has the time period allowed for completion of various tasks been reduced substantially. The Board believes that such changes are desirable and necessary to promote administrative efficiency in the internal processing of election materials, to enable the Board to designate earlier persons to serve as Chairman and Vice-Chairman of the boards of the Banks, fulfilling its statutory responsibility under section 7(g) of the Bank Act, and most importantly, to provide newly elected directors sufficient opportunity to become familiar with and knowledgeable about the operations of the Banks before assuming responsibility for management of the Banks on January 1.

Because the amendments pertain to internal Board procedures for processing election materials and because it is in the public interest to provide prompt action on such matters, the Board finds that observance of the notice and comment procedures prescribed by 5 U.S.C. 553(b) and 12 CFR 508.12, and delay of the effective date pursuant to 5 U.S.C. 553(d) and 12 CFR 508.14 are unnecessary and contrary to the public interest.

List of Subjects in 12 CFR Part 522

Federal Home Loan Banks, Organization.

Accordingly, the Board hereby amends Part 522 of Subchapter B, Chapter V of Title 12, *Code of Federal Regulations*, as set forth below.

SUBCHAPTER B—REGULATIONS FOR THE FEDERAL HOME LOAN BANK SYSTEM

Revise §§ 522.24, 522.25, and 522.26 as follows:

PART 522—ORGANIZATION OF THE BANKS

Sec.

* * * * *

522.24 Report of stock investment.
522.25 Designation and nomination of elective directorship.
522.26 Election of directors.

* * * * *

§ 522.24 Report of stock investment.

Each Bank shall, by April 15 of each year, report to the Board, on prescribed forms, the number of shares of Bank stock each of its members was required to hold at the end of the preceding calendar year. Such number shall be conclusive for purposes of election of directors.

§ 522.25 Designation and nomination of elective directorship.

(a) By June 15 of each year, the Board will: (1) Notify each member of the number of elective directorships designated for the state in which the member is located; and (2) notify each member in each state for which an elective directorship is to be filled of its right to nominate an eligible person(s) therefor, and provide each such member the following:

(i) A list of members located in its state;

(ii) A current list of directors of the Bank of which it is a member, containing the name of each director, the name and address of the member institution with which he is affiliated, and the expiration date of his term; and

(iii) The nominating certificate.

(b) Each member in each state entitled under these regulations to participate in the election of directors may by resolution of its governing body nominate or authorize one of its directors or officers to nominate a qualified person for each directorship to be filled in its state. The nominating certificate must be received in the Board's Office of District Banks by July 15.

(c) A letter will be sent to each nominee by August 5 informing him of his nomination. However, no such letter will be sent to any nominee: (1) Then serving as an elective director whose term does not expire until after the close of the calendar year during which the election is being held; (2) holding an appointive directorship unless the Office of District Banks has received from him, before July 15, notice of his intention to be a candidate for a directorship; or (3) determined by the Board to be ineligible under section 7(d) of the Act. With such letter will be sent a list of nominees and a questionnaire. The completed

questionnaire must be received in the Office of District Banks by August 20 in order for the nominee to have his name placed on the election ballot. A nominee shall be eligible for election only if his name is so placed on the ballot.

(d) Notwithstanding other provisions of this section, if at any time when nominations are required, the members of a Bank hold less than $1 million of the capital stock of the Bank, the Board will, in accordance with section 7(h) of the Act, appoint a director(s) to fill the place(s) for which nominations are required.

(e) In any Federal Home Loan Bank district that comprises five or more states, the Board may increase the elective directorships to a number not exceeding thirteen. The designations and nomination of all elective directorships shall be undertaken in the manner set forth in this section.

§ 522.26 Election of directors.

(a) By September 25, the Board will mail to each member in each state for which an elective directorship is to be filled a set of ballot materials in a form prescribed by the Board's Office of District Banks. The ballot will contain in alphabetical order the name of each candidate eligible to represent the members located in such state having complied with the provisions of § 522.25 of this Part, the name and address of the member institution with which each candidate is affiliated, the candidate's title in the member institution, and the number of votes the member may cast, as determined under the provisions of paragraph (b) of this section.

(b) The number of votes each member may cast shall equal the number of shares of stock in the Bank required by the Act to be held by such member at the end of the calendar year preceding the election, except that: (1) A member that is the result of a merger or consolidation, occurring in the year of election, of two or more member institutions within the same state and Federal Home Loan Bank district, may cast votes equal to the total number of shares of stock that the merged or consolidated institutions comprising it were required to hold as of the end of the calendar year preceding the election, and (2) no member may cast votes in excess of the average number of such shares required by the Act to be held at the end of such calendar year by members in such state.

(c) Each member entitled to receive a ballot may, by resolution of its governing body, cast its votes or authorize one of its directors or officers to cast its votes for each of as many candidates as there are directorships to be filled. The ballot materials shall be sent to the Office of District Banks and must be received by October 25. No ballot may be changed after it is delivered to the Office of District Banks, which will preserve all ballots until the end of the next calendar year. Election ballots will not be opened until after 5 p.m., e.s.t., October 25. Only ballots executed on forms supplied by the Board will be considered.

(d) By November 15 the Board will declare elected the candidate receiving the highest number of votes cast, and where two or more directorships are to be filled from the ballot, the Board will declare elected each candidate receiving the next succeeding highest number of votes until the number of candidates declared elected equals the number of directorships to be filled. If required by a tied vote, the Board will declare elected one of the candidates whose votes are tied.

(e) The Board will record the results of the election in its minutes and notify the directors elected. The Board will furnish each member such results, including the name and address of the institution with which he is affiliated and his title therein, the number of votes he received, the number of members eligible to cast votes for the directorship(s), and the total eligible votes all such members were entitled to cast.

(f) In any date specified in §§ 522.24 through 522.26 occurs on a Saturday, Sunday, or holiday, the next business day shall be included in the time allowed. No nominating certificate, questionnaire, or ballot shall be considered unless received in the Office of District Banks by the date specified.

(Secs. 6, 7, 17, 47 Stat. 728, 729, 736, as amended (12 U.S.C. 1426, 1427, 1437); Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943-48 Comp., p. 1071)

By the Federal Home Loan Bank Board

J. J. Finn,

Secretary.

BILLING CODE 6720-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 369

Restrictive Trade Practices or Boycotts

AGENCY: International Trade Administration, Commerce.

ACTION: Interpretation.

SUMMARY: The Department wishes to clarify the application of its antiboycott regulations to situations involving the shipment of goods to a boycotting country by United States persons when the goods are denied entry for boycott-related reasons.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Howard N. Fenton, Director, Compliance Policy Division, Office of Antiboycott Compliance, U.S. Department of Commerce (202/377-2381).

SUPPLEMENTARY INFORMATION: The antiboycott regulations prohibit boycott-based refusals to do business. 15 CFR 369.2(a) provides that:

> No United States person may: refuse, knowingly agree to refuse, require any other person to refuse or knowingly agree to require any other person to refuse to do business with or in a boycotted country, with any business concern organized under the laws of a boycotted country, with any national or resident of a boycotted country, or with any other person, when such refusal is pursuant to an agreement with the boycotting country, a requirement of the boycotting country, or a request from or on behalf of the boycotting country.

Over the past five years the Office of Antiboycott Compliance has provided its position informally on the application of this provision to situations involving the refusal by a boycotting country to permit the entry of goods supplied by a United States person for boycott-related reasons. The Office is now providing that position in written form as another interpretation of the antiboycott regulations.

List of Subjects in 15 CFR Part 369

Boycotts, Foreign trade, Reporting requirements, Restrictive trade practices, Trade practices.

Interpretation

The principal author of this interpretation is Brian C. Murphy, Office of Antiboycott Compliance.

PART 369—APPENDIX [SUPPLEMENT 7—ADDED]

The following appendix is added to Part 369 as Supplement 7:

Supplement 7—Appendix—Interpretation

Prohibited Refusal To Do Business

When a boycotting country rejects for boycott-related reasons a shipment of goods sold by a United States person, the United States person selling the goods may return them to its inventory or may re-ship them to other markets (the United States person may *not* return them to the original supplier and demand restitution). The U.S. person may

then make a non-boycott based selection of another supplier and provide the goods necessary to meet its obligations to the boycotting customer in that particular transaction without violating § 369.2(a) of the Regulations.

If the United States person receives another order from the same boycotting country for similar goods, the Department has determined that a boycott-based refusal by a United States person to ship goods from the supplier whose goods were previously rejected would constitute a prohibited refusal to do business under § 369.2(a) of the antiboycott regulations. The Department will presume that filling such an order with alternative goods is evidence of the persons' refusal to deal with the original supplier.

The Department recognizes the limitations this places on future transactions with a boycotting country once a shjipment of goods has been rejected. Because of this, the Department wishes to point out that, when faced with a boycotting country's refusal to permit entry of the particular goods, a United States person may state its obligation to abide by the requirements of United States law and indicate its readiness to comply with the unilateral and specific selection of goods by the boycotting country in accordance with § 369.3(c) of the antiboycott regulations. That Section provides, in pertinent part, as follows:

A United States person may comply or agree to comply in the normal course of business with the unilateral and specific selection by a boycotting country * * * of * * * specific goods, * * * provided that * * * with respect to goods, the items, the normal course of business, are identifiable as to their source or origin at the time of their entry into the boycotting country by (a) uniqueness of design or appearance or (b) trademark, trade name, or other identification normally on the items themselves, including their packaging.

The United States person may also provide certain services in advance of the unilateral selection by the boycotting country, such as the compilation of lists of qualified suppliers, so long as such services are customary to the type of business the United States person is engaged in, and the services rendered are completely non-exclusionary in character (i.e., the list of qualified suppliers would have to include the supplier whose goods had previously been rejected by the boycotting country, if they were fully qualified). See § 369.2(a)(6) for a discussion of the requirements for the provision of these services.

The Department wishes to emphasize that the unilateral selection exception in § 369.3(c) will be construed narrowly, and that all its requirements and conditions must be met, including the following:

—Discretion for the selection must be exercised by a boycotting country, or by a national or resident of a boycotting country;

—The selection must be stated in the affirmative specifying a particular supplier of goods;

—While a permissible selection may be boycott based, if the United States person knows or has reason to know that the purpose of the selection is to effect discrimination against any United States person on the basis of race, religion, sex, or national origin, the person may not comply under any circumstances.

The Department cautions United States persons confronted with the problem or concern over the boycott based rejection of goods shipped to a boycotting country that the adoption of devices such as "risk of loss" clauses, or conditions that make the supplier financially liable if his or her goods are rejected by the boycotting country for boycott reasons are presumed by the Department to be evasion of the statute and regulations, and as such are prohibited by § 369.4 of the antiboycott regulations, unless adopted prior to January 18, 1978. See § 369.4(d).

Dated: April 11, 1983.

William V. Skidmore,

Director, Office of Antiboycott Compliance.

BILLING CODE 3510-25-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 178

[Docket No. 82F-0364]

Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of tris(2,4-di-*tert*-butylphenyl) phosphite as an antioxidant and/or thermal stabilizer for polycarbonate resins by removing the current temperature limitations. This action responds to a petition filed by Ciba-Geigy Corp.

DATES: Effective April 15, 1983. Objections by May 16, 1983.

ADDRESS: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Julius Smith, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of December 28, 1982 (47 FR 57774), FDA announced that a petition (FAP 2B3664) had been filed by Ciba-Geigy Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that the food additive regulations be amended to provide for the safe use of tris(2,4-di-*tert*-butylphenyl) phosphite as an antioxidant and/or thermal stabilizer for polycarbonate resins.

FDA has evaluated data in the petition and other relevant material and concludes that the proposed food additive use is safe and that the regulations should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Bureau of Foods (address above) by appointment with the contact person listed above. As provided in § 171.1(h)(2), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has previously considered the potential environmental effects of this regulation as announced in the notice of filing published in the **Federal Register**. No new information or comments have been received that would alter the agency's previous determination that there is no significant impact on the human environment and that an environmental impact statement is not required.

List of Subjects in 21 CFR Part 178

Food additives, Food packaging, Sanitizing solutions.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Foods (21 CFR 5.61 as revised February 4, 1983; 48 FR 5251), Part 178 is amended in § 178.2010(b) by revising the entry for "Tris(2,4-di-*tert*-butylphenyl) phosphite" under limitation 3 to read as follows:

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

§ 178.2010 Antioxidants and/or stabilizers for polymers.

* * * * *

(b) * * *

Substances	Limitations
* * * * *	
Tris(2,4-di-*tert*-butylphenyl) phosphite (CAS Reg. No. 31570-04-4).	* * * 3. At levels not to exceed 0.3 percent by weight of polycarbonate resins complying with § 177.1580 of this chapter.
* * * * *	

Any person who will be adversely affected by the foregoing regulation may at any time on or before May 16, 1983 submit to the Dockets Management Branch (address above) written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this regulation. Received objections may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective April 15, 1983.

(Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348))

Dated: April 1, 1983.

Sanford A. Miller,

Director, Bureau of Foods.

BILLING CODE 4160-01-M

---

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Dexamethasone Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Rachelle Laboratories, Inc., providing for safe and effective use of a dexamethasone injection in dogs, cats, and horses for its rapid adrenal glucocorticoid and anti-inflammatory effect.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Sandra K. Woods, Bureau of Veterinary Medicine (HFV–114), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: Rachelle Laboratories, Inc., 700 Henry Ford Ave., P.O. Box 2029, Long Beach, CA 90801, filed NADA 130–660 providing for intravenous use of Dexachel, a solution containing 2 milligrams of dexamethasone per milliliter, in dogs, cats, and horses. The drug is used for its rapid adrenal glucocorticoid and/or anti-inflammatory effect.

The formulation of this product is identical to that of Schering Corporation's Azium (dexamethasone sterile injection), which was reviewed by the National Academy of Sciences/National Research Council (NAS/NRC) and found effective as an anti-inflammatory agent in dogs, cats, horses, and cattle; approval of this drug is codified in 21 CFR 522.540. NADA 130–660 is approved on the basis of its being identical to the approved, NAS/NRC reviewed product. Section 522.540 provides that because the conditions of use have been NAS/NRC reviewed and found effective, applications for these uses need not include certain effectiveness data as specified by 21 CFR 514.111. The product is an intravenous solution; therefore, the requirement for bioequivalency data is waived under 21 CFR 320.22(b)(1). The product is approved on the basis of generic equivalency, and the regulation is amended to reflect the approval.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

---

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Diprenorphine Hydrochloride Injection/Etorphine Hydrochloride Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations concerning new animal drug applications (NADA's) for use of diprenorphine hydrochloride injection and etorphine hydrochloride injection to provide for a revised labeling statement. Supplemental NADA's, filed by American Cyanamid Co. and Lemmon Co., provide for the change.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Bob G. Griffith, Bureau of Veterinary Medicine (HFV–112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: American Cyanamid Co., Berdan Ave., Wayne, NJ 07470, is sponsor of NADA 47–870, and Lemmon Co., Sellersville, PA 18960, is sponsor of NADA 95–017, both providing for use of diprenorphine hydrochloride injection (21 CFR 522.723) and etorphine hydrochloride injection (21 CFR 522.883). The drugs are used respectively for reversing the effects of etorphine hydrochloride and for immobilization of wild or exotic animals. Both firms filed supplements to their NADA's to provide revised labeling stating that the drugs are for

use in wild or exotic animals only, not for use in domestic food-producing animals, and not for use 30 days before, or during, the hunting season in free-ranging wild animals that might be used for food. The supplements are approved and the regulations are amended to reflect the approval.

Approval of these supplements does not require new safety or effectiveness data in support of the approval. Therefore, freedom of information summaries are not required.

List of Subjects in 21 CFR Part 522

Animal drugs, injectable.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 522 is amended as follows:

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. In § 522.723, by revising paragraph (d)(3) to read as follows:

§ 522.723 Diprenorphine hydrochloride injection.

* * * * *

(d) * * *

(3) For use in wild or exotic animals only. Do not use in domestic food-producing animals. Do not use 30 days before, or during, the hunting season in free-ranging wild animals that might be used for food.

* * * * *

2. In § 522.883, by revising paragraph (d)(4) to read as follows:

§ 522.883 Etorphine hydrochloride injection.

* * * * *

(d) * * *

(4) For use in wild or exotic animals only. Do not use in domestic food-producing animals. Do not use 30 days before, or during, the hunting season in free-ranging wild animals that might be used for food.

* * * * *

Effective date. April 15, 1983.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: April 8, 1983.

BILLING CODE 4160-01-M

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Euthanasia Solution

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Syntex Agribusiness, Inc., providing for use of a euthanasia solution to induce rapid, humane, painless euthanasia of dogs.

EFFECTIVE DATE: April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Bob G. Griffith, Bureau of Veterinary Medicine (HFV-112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3430.

SUPPLEMENTARY INFORMATION: Syntex Agribusiness, Inc., 3401 Hillview Ave., Palo Alto, CA 94304, is sponsor of NADA 128-967 providing for intravenous use of Repose Euthanasia Solution containing 400 milligrams (mg) of secobarbital sodium and 25 mg of dibucaine hydrochloride per milliliter for the rapid, humane, and painless euthanasia of dogs. The sponsor submitted studies establishing effectiveness and safety (humane and painless euthanasia) of the drug, including studies that demonstrate that the drug meets the requirements of the Bureau of Veterinary Medicine's combination drug policy. The NADA is approved and the regulations are amended accordingly.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement therefore will not be prepared. The Bureau's finding of no significant impact and the evidence supporting this finding, contained in an environmental assessment (pursuant to 21 CFR 25.31, proposed December 11, 1979; 44 FR 71742) may be seen in the Dockets Management Branch (address above).

List of Subjects in 21 CFR Part 522

Animal drugs, injectable.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), § 522.900 is amended by adding new paragraph (c) to read as follows:

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 522.900 Euthanasia solution.

* * * * *

(c)(1) *Specifications.* Each milliliter of nonsterile, aqueous solution contains 400 milligrams of secobarbital sodium and 25 milligrams of dibucaine hydrochloride.

(2) *Sponsor.* See 000033 in § 510.600(c) of this chapter.

(3) Conditions of use—(i) *Indications for use.* To induce rapid, humane, painless euthanasia of dogs.

(ii) *Amount.* For dogs, 1 milliliter for each 10 pounds of body weight.

(iii) *Limitations.* For intravenous injection. Do not use for therapeutic purposes. Do not use in animals intended for food. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. April 15, 1983.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: April 5, 1983.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 7894]

Income Tax; Taxable Years Beginning After December 31, 1953; Special Periods of Limitation With Respect to Partnership Items of Federally Registered Partnerships

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the special periods of limitation for assessing a deficiency, and for filing a claim for credit or refund of any overpayment, attributable to a partnership item of a federally registered partnership. The regulations would provide the necessary guidance to the public to comply with the law.

DATE: These regulations are effective for partnership items arising in partnership taxable years beginning after December 31, 1978 and before September 4, 1982.

FOR FURTHER INFORMATION CONTACT: Donald W. Stevenson of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington , D.C. 20224 (Attention: CC:LR:T) (202–566–3297).

SUPPLEMENTARY INFORMATION:

Background

On January 14, 1983, proposed amendments to the Regulations on Procedure and Administration (26 CFR Part 301) under section 6501 (o) and 6511 (g) of the Internal Revenue Code of 1954 (as they read before the enactment of the Tax Equity and Fiscal Responsiblity Act of 1982 were published in the **Federal Register** (48 FR 1764). These amendments were proposed to conform the regulations to amendments made to the Code by section 212 of the Revenue Act of 1978 (92 Stat. 2818) and section 102 (a) (2) (A) and (B) of the Technical Corrections Act of 1979 (94 Stat. 208), effective for partnership taxable years beginning after December 31, 1978. For partnership taxable years beginning after September 3, 1982, section 402 (c) (5) and (7) of the Tax Equity and Fiscal Responsibility Act of 1982 (96 Stat. 667) further amended Code sections 6501 (o) and 6511 (g) and removed the special provisions for federally registered partnership. Thus, the amendments are effective for partnership items arising in partnership taxable years beginning after December 31, 1978 and before September 4, 1982.

No written comments were received in response to the proposed regulations, and no speakers appeared at the public hearing held on March 23, 1983. Therefore, the proposed amendments are adopted without change by this Treasury decision.

This Treasury decision is issued under the authority contained in section 6501 (o) (as it read before the enactment of the Tax Equity and Fiscal Responsibility Act of 1982) and 7805 of the Internal Revenue Code of 1954 (92 Stat. 2818, 26 U.S.C. 6501 (o); 68A Stat. 917, 26 U.S.C. 7805).

Regulatory Flexibility Act

No general notice of proposed rulemaking is required by 5 U.S.C. 553 (b) for interpretative regulations. Accordingly, the Regulatory Flexibility Act does not apply and no Regulatory Flexibility Analysis is required for this rule.

Non-Applicability of Executive Order 12291

The Treasury Department has determined that this regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 28, 1982.

Drafting Information

The principal author of these regulations is Donald W. Stevenson of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Adoption of Amendments to the Regulations

Accordingly, the proposed amendments to the Regulations on Procedure and Administration (26 CFR Part 301) under sections 6501 (o) and 6511 (g), as published in the **Federal Register** on January 14, 1983 (48 FR 1764), are hereby adopted without change as set forth below.

Approved: April 8, 1983.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

John E. Chapoton,

Assistant Secretary of the Treasury.

48 FR 1764 Jan. 14, 1983

List of Subjects in 26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Partnership item, Penalties, Pensions, Statistics, Taxes, Disclosure of information, and Filing requirements.

PART 301—[AMENDED]

The amendments to 26 CFR Part 301 are as follows:

Paragraph 1. New §§ 301.6501(o)–2 and 301.6501(o)–3 are added to read as follows:

§ 301.6501(o)–2 Special rules for partnership items of federally registered partnerships.

(a) *In general.* In the case of any tax imposed by subtitle A with respect to any person, the period for assessing a deficiency attributable to any partnership item of a federally registered partnership shall not expire before the later of—

(1) The date which is 4 years after the date on which the return of the federally registered partnership for the partnership taxable year in which the item arose is filed (or, if later, the date prescribed for filing the return), or

(2) If the name or address of the person against whom the assessment is sought does not appear on the return of the federally registered partnership, the date which is 1 year after the date on which a satisfactory identifying statement is furnished in writing to the director of the service center with which the partnership return is filed. A satisfactory identifying statement is a written statement providing the name, address, and taxpayer identification number of both the partner and the partnership. The statement shall note the partnership taxable year for which the statement is furnished.

(b) *"Pass through" entity as partner.* In the case of a partnership having a "pass through" entity (*i.e.*, partnership, electing small business corporation (as defined in section 1371(b)), trust, estate, or nominee) as a partner, the 1 year period described in paragraph (a)(2) of this section shall not begin with respect to the person to be assessed until the chain of ownership linking the taxpayer with the federally registered partnership in which the item originally arose is fully disclosed.

Example. Partnership U, a federally registered partnership, has two partners, Partnerships W and X. The partners of W are A and B, who are individuals, and T, a trust whose beneficiaries are individuals C and D. The partners of X are E, an individual, and Partnership Y whose partners are individuals F, G, and H. U and X properly disclose the identity of their partners. W, however, discloses the identity of only A and B, and Y discloses the identity of only F and G. The period of limitation described in paragraph (a) of this section for items attributable to U does not expire with respect to T, C, D, and H until one year after the chain of ownership linking these taxpayers with U is fully disclosed.

(c) *Federally registered partnership—*(1) *In general.* With respect to any partnership taxable year, a federally registered partnership is any partnership—

(i) Interests in which have been offered for sale at any time during the taxable year or a prior taxable year in an offering required to be registered with the Securities and Exchange Commission, or

(ii) Which, at any time during the taxable year or a prior taxable year, was subject to the annual reporting requirements of the Securities and Exchange Commission which relate to the protection of investors in the partnership.

For purposes of the preceding sentence an interest is "offered for sale" when it is the subject of an "offer for sale" as that term is used in section 2 of the Securities Act of 1933 (15 U.S.C. 77b).

(2) *Certain reporting requirements not taken into account.* A requirement to file reports with the Securities and Exchange Commission for any purpose other than to protect investors does not cause the partnership to be treated as a federally registered partnership. For example, a brokerage firm organized as a partnership is not a federally registered partnership merely because it files reports required by the Commission for regulatory purposes.

(d) *Extension by agreement—*(1) *In general.* Any general partner of a federally registered partnership (or any other person authorized by the partnership) may, prior to the expiration of the limitation period described in paragraph (a) of this section, extend the period for assessing a deficiency attributable to a partnership item for any period of time agreed upon in writing. The extension shall become effective when the agreement has been executed by the district director or the service center director and shall be binding on all persons whose liability for tax imposed by subtitle A is affected in whole or in part by partnership items flowing from the partnership.

(2) Authorization of other persons. The partnership may authorize persons other than the general partners to extend the period of limitation for assessing a deficiency attributable to a partnership item. This authorization shall be in writing, shall clearly identify the person being authorized and the action being authorized, and shall be signed by all the general partners. The authorization shall become effective when filed with the district director and shall remain in effect until a written revocation signed as provided in the preceding sentence is filed.

(3) Removing authority of general partners. A partnership wishing to deny to some or all of the general partners the authority to execute an agreement extending the period of limitation for assessment may do so by submitting a written statement to that effect. The statement shall either identify the partners exclusively authorized to execute such an agreement or declare that one or more named partners or all partners lack the authority to execute such an agreement. The statement shall be signed by all the general partners. The statement shall become effective when filed with the district director and shall remain in effect until a statement revoking or superseding it and signed as provided in the preceding sentence is filed.

(e) Special period of limitation with respect to carryback of net operating loss, capital, loss, etc. The provisions of section 6501(o) must also be taken into account in applying the various special periods of limitation prescribed in sections 6501 (h), (i) and (j). Thus, to the extent that a carryback is attributable to a partnership item of a federally registered partnership, the period for assessing a deficiency attributable to that carryback shall not expire before the date determined under paragraph (a) of this section with respect to the partnership taxable year in which the item arose.

(f) Otherwise applicable limitation period. The special provisions of section 6501(o) and this section do not terminate any otherwise applicable period for assessing a deficiency. Thus, the fact that more than 4 years have elapsed since the filing of the partnership return for the year in issue does not prevent assessment against a partner, based on partnership items if an otherwise applicable period of limitation for the partner has not yet expired

Example. Partnership V files its return for the taxable year ending December 31, 1980, on April 15, 1981. A, a partner in Partnership V, agrees to extend the assessment period for A's taxable year ending December 31, 1980, until September 30, 1985. The partnership does not agree to any extension under section 6501(o)(3) so that the period for assessing a deficiency attributable to partnership items could expire on April 15, 1985. A deficiency may be assessed against A for 1980 at any time prior to October 1, 1985, even if that deficiency is based on partnership items.

(g) *Effective date.* This section and § 301.6501(o)–3 are effective generally for partnership items arising in partnership taxable years beginning after December 31, 1978 and before September 4, 1982. This section shall not apply, however, to any partnership taxable year with respect to which the amendments made to Code section 6501(o) by section 402 of the Tax Equity and Fiscal Responsibility Act of 1982 are effective. See section 407(a)(3) of that Act.

§ 301.6501(o)–3 Partnership items.

(a) *Partnership item defined.* For purposes of section 6501(o) (as it read before the enactment of the Tax Equity and Fiscal Responsibility Act of 1982), § 301.6501(o)–2, and § 301.6511(g)–1, the term "partnership item" means—

(1) Any item required to be taken into account for the partnership taxable year under any provision of subchapter K of chapter 1 of the Code, to the extent that the item is designated in paragraph (b) of this section as more appropriately determined at the partnership level than at the partner level, and

(2) Any other item to the extent affected by an item described in paragraph (b) of this section.

The items described in paragraph (a)(2) of this section include items related to the partnership (for example, a partner's basis in the partnership interest) as well as more general items whose computation may be affected by changes to items described in paragraph (b) of this section (for example, adjusted gross income, self-employment tax, income averaging, medical deduction, and charitable contribution deduction).

(b) *Items more appropriately determined at the partnership level.* The following items which are required to be taken into account for the taxable year of a partnership under subchapter K of chapter 1 of the Code are more appropriately determined at the partnership level than at the partner level:

(1) The partnership aggregate and each partner's share of each of the following:

(i) Items of income, gain, loss, deduction, or credit of the partnership;

(ii) Expenditures by the partnership not deductible in computing its taxable income (for example, foreign taxes and charitable contributions);

(iii) Items of the partnership which may be tax preference items under section 57(a) for any partner;

(iv) Income of the partnership exempt from tax;

(v) Partnership liabilities (including determinations with respect to the amount of the liabilities, whether the liabilities are nonrecourse, and changes from the preceding taxable year); and

(vi) Other amounts with respect to partnership investments, transactions, and operations necessary to enable partners to compute—

(A) The credit provided by section 38;

(B) Recapture under section 47 of the credit provided by section 38,

(C) Their amounts at risk in any activity to which section 465 applies, and

(D) The depletion allowance under section 613A with respect to oil and gas wells;

(2) Guaranteed payments;

(3) Optional adjustments to the basis of partnership property pursuant to an election under section 754 (including necessary preliminary determinations, such as the determination of a transferee partner's basis in a partnership interest); and

(4) To the extent that the determination can be made from determinations that are necessary at the partnership level with respect to an amount, the character of an amount, or the percentage interest of a partner in the partnership for purposes of the partnership books and records or for purposes of furnishing information to a partner—

(i) Contributions to the partnership;

(ii) Distributions from the partnership;

(iii) Amounts to be taken into account by a partner dealing with the partnership in a transaction to which section 707(a) applies (including the application of section 707(b));

(iv) The application to the distributee partner of section 751(b); and

(v) The application to the transferor partner of section 751(a).

(c) *Illustrations.* This paragraph (c) illustrates the provisions of paragraph (b)(4) of this section. The factors enumerated are not exhaustive; there may be additional partnership-level determinations with respect to a determination listed in paragraph (b)(4) of this section.

(1) *Contributions.* For purposes of its books and records, or for purposes of furnishing information to a partner, the partnership needs to determine:

(i) The character of an amount received from a partner (for example, whether it is a contribution, a loan, or a repayment of a loan);

(ii) The amount of money contributed by a partner;

(iii) The applicability of the investment company rules of section 721(b) with respect to a contribution; and
